

OFFICIAL AUCTIONEER OF THE PCGS MEMBERS ONLY SHOW

Dear Numismatic Enthusiast,

Welcome to the LARGEST and BEST ever Regency Auction! Anchored by numerous important collections, we have broken the sale into two days.

Wednesday is our Dollar Day Auction, featuring the P.F.M. Collection of Morgan Dollars and the Crow River Collection of Peace Dollars. The P.F.M. Collection ranks in the top 10 current PCGS Registry Sets for Circulation Strike Morgans, (#6 current set). The Crow River Collection, like the record breaking \$10 Indian Set assembled by the same collector, is full of hand selected coins, pieces that are not just high grade, but also high quality for the grade and exceptionally eye appealing.

In addition to these two anchor consignments, there are nearly 100 lots of other silver dollars, from early Draped Bust issues, to a really cool off-center Trade dollar, to MONSTER toned dollars (including selections from the Aurora Borealis Collection). If you collect silver dollars, you will definitely find something of interest. Day 1 will begin at 5:30 pm Central Time on Wednesday, May 16.

Thursday offers an unbelievable selection of RARE U.S. coins! We start Thursday with the Premier Collection of Proof Barber Dimes, Mint State Barber Quarters, and Walking Liberty Half Dollars, all carefully chosen over several years by a very picky collector customer of Legend.

Coins from all U.S. series follow, with a high-end Fugio copper leading the way. Further selections from the Aurora Borealis Collection, this time WILD toned Indian cents, take center stage among a marvelous selection, which includes the FINEST 1914-D cent, a PCGS MS66+ RD.

The David Poole Collection of Proof 3 Cent Nickels is a remarkable study of this obsolete type, focused on CAM and DCAM coins, all graded by PCGS.

A small consignment of Seated half dimes and dimes is the epitome of FRESH and includes a monster H10C 1859 PCGS MS68+ CAC and a killer 10C 1836 PCGS MS67+ CAC.

Further selections of type coins feature:

- · A nice run of No Motto Seated half dollars in Mint State;
- The Dale Larsen Collection of Toned Late Date Walkers;
- A complete set of Classic Head \$2.50 gold;
- The Oak Crest Collection of Carson City \$5 gold.

Within these great selections you will certainly find many great coins for your collection!

Rounding out the sale is the Steven Cook Collection of Patterns, Part 1. The first offering features a diverse array of over 75 pattern coins.

We hope that among the 850+ lots that follow, you will find a few great coins for your collection! If we can be of any assistance, do not hesitate to let us know.

Warm regards,

Julie Abrams

President of Legend Rare Coin Auctions.

TERMS AND CONDITIONS

This is a public auction, conducted in accordance with these Terms and Conditions of Sale, by Legend Rare Coin Auctions (hereinafter referred to as "LRCA"). By bidding on any lot offered by LRCA, the bidder indicates acceptance of the following Terms and Conditions of Sale. Bidders are to comply with the Terms and Conditions of Sale, posted on LegendAuctions.com, at the time of the auction in which they are participating.

BUYER'S PREMIUM

A 17.5% buyer's premium will be added to all successful bids, and is payable by the winning bidder as part of the total purchase

SALES TAX

All sales are subject to applicable state and local taxes. Any lots that are picked up and/or delivered in the state of Pennsylvania are subject to applicable state and local taxes.

PAYMENT

All merchandise must be paid for within TEN (10) days of the date of sale. We reserve the right to cancel any unpaid order after that time and to ban the bidder from future sales. Credit cards (Visa, MasterCard and Discover) are accepted for auction payments up to \$2,500.00 per invoice. Invoices and/or balances over \$2,500.00 must be paid via personal or certified check, money order, or wired funds. Personal checks, money orders and cashier's checks may be held for up to 10 business days in order to allow time for them to clear appropriate banking channels. E-check payments available. Please call 732-935-1168 to set up your account.

Please email info@legendauctions.com for bank-wiring instructions and/or to provide numismatic references.

RETURN POLICY

All lots are sold "as is." Lots graded by PCGS, NGC or other third-party grading services, or any lot viewed by the buyer or anyone on buyer's behalf prior to the auction, may not be returned. This is not an approval sale. All sales of lots to the highest bidder are final. Bidders are strongly advised and encouraged to research any lots upon which they plan to bid, and to determine bids, based upon their own evaluation. Bidders assume all risks concerning and related to the grade, quality, appearance, condition, history and origin of any lot. Bidders acknowledge that coin grading is not an exact science, that it can be subjective and inconsistent and that it is possible that two parties might assess or grade the same coin differently. LRCA makes every effort to accurately describe all items offered in its sales. All items will be available for preview prior to the auction.

SHIPPING

Shipping costs will be billed separately and are non-refundable. Items will usually ship within 5-10 business days after payment has been received and/or funds have cleared. Coins will be shipped via Fed Ex or USPS or transported via armored carrier.

The shipping charge includes fees for our third-party insurance coverage, as well as any costs incurred through the USPS or Federal Express. Any shipments made via armored carrier (Brinks, Dunbar, etc.) will be calculated and assessed at the time of shipment.

INTERNATIONAL SHIPPING

It is not possible for LRCA to ship to some countries. Please email questions to info@legendauctions.com. Payment for all international orders is required in US funds. Please contact julie@legendauctions.com for bank wiring instructions.

Customs requirements for each country are the responsibility of the buyer. All packages shipped outside of the United States will include the required customs declaration and full value of the invoice.

BIDS VIA TELEPHONE

An absentee bidder may also participate live, during the auction, via telephone. Requests for phone bidding must be received at least three days prior to the auction date. Please fill out our phone bidding request form online or call 732-935-1168 to request a call from one of our representatives during the live auction. LRCA cannot guarantee phone lines, but will make every effort to accommodate those who wish to participate via this method.

RIGHTS & RESPONSIBILITIES

The auctioneer will determine the highest bidder. The auctioneer, alone, has the right to reopen the bidding for an item, if deemed necessary. LRCA and its representatives reserve the right to remove any attendees who impede the preview and/or the auction. Title to all merchandise shall pass to the winning bidder after receipt of good funds by LRCA. Bidders will be held responsible for their bids, including those bids placed incorrectly. PLEASE VERIFY BIDS BEFORE SUBMITTING THEM. In order to have a bid removed or corrected, bidder must contact LRCA prior to start of the auction. Bidder waives auctioneer's responsibility and holds LRCA harmless for failure to recognize,

accept, receive or execute any lost or missing bids by internet, telephone, email, floor bid, fax, mail or other means. LRCA reserves the right to postpone or cancel an auction without notice. Lots may be withdrawn at LRCA's discretion, without prior notice. Lots may carry a reserve. A reserve is a price below which the auctioneer will not sell an item, or will re-purchase the item on behalf of the consignor or for LRCA. LRCA permits bids to be placed by the auctioneer, or an employee of the auctioneer, up to the pre-determined reserve set by the consignor. Legend Rare Coin Auctions' partner, Legend Numismatics, reserves the right to bid on items, for its own account and for the accounts of its clients.

DISCLAIMER AND WARRANTIES

No warranty of merchantability or fitness for a particular purpose is made or implied on any lot. No warranty, whether expressed or implied, is made with respect to any lot except for warranty of title, and in the case of title, auctioneer is selling only that right or title to the lot that the consignor may have as of the auction sale date. All lots are sold "as is" and with all faults. Purchaser hereby assumes all risks concerning and related to the grading, quality, description, condition, authenticity, and provenance of a lot.

- a. Coins and currency listed in this catalog graded by pcgs, ngc, or any other third party grading service or examined by the buyer prior to the auction sale may not be returned for any reason whatsoever by any buyer, except for claims related to authenticity.
- b. For non-certified coins that have not been examined by the Buyer prior to the Auction Sale: if it is determined in a review by LRCA that there is a material error in the catalog description of a non-certified coin or the LRCA no later than seventy-two (72) hours of delivery of the lots in question, and such lots are returned and received by LRCA, in their original, sealed containers, no later than fourteen (14) calendar days after delivery, in the same condition the lot(s) were delivered to the Buyer, time being of the essence.
- c. If an item or items are returned pursuant to the terms herein, they must be housed in their original, sealed and unopened container.
- d. Late remittance or removal of any item from its original container, or altering a coin constitutes just cause for revocation of all return privileges.
- e. Grading or condition of rare coins may have a material effect on the value of the item(s) purchased, and the opinion of others (including independent grading services) may differ with the independent grading services opinion or interpretation of LRCA. LRCA shall not be bound by any prior, or subsequent opinion, determination or certification by any independent grading service.
- f. Questions regarding the minting of a coin as a "proof" or as a "business strike" relate to the method of manufacture and not to authenticity.
- g. All oral and written statements made by LRCA and its employees or agents (including affiliated and related companies) are statements of opinion only, and are not warranties or representations of any kind, unless stated as a specific written warranty, and no employee or agent of LRCA has authority to vary or alter these Terms and Conditions of Auction Sale. LRCA reserves the right to vary or alter the Terms of Sale, either generally or with respect to specific persons or circumstances, in its sole discretion. Any variation or alteration shall be effective only if in writing and signed by an officer of LRCA authorized to do so.
- h. LRCA is acting as an auctioneer. Title to the lots purchased passes directly from the Consignor to the Buyer. Accordingly, LRCA is not making, and disclaims, any warranty of title.

i. Bidder acknowledges that the numismatic market is speculative, unregulated and volatile, and that coin prices may rise or fall over time. LRCA does not guarantee or represent that any customer buying for investment purposes will be able to sell for a profit in the future.

j. Bidder acknowledges and agrees that neither LRCA, nor its employees, affiliates, agents, third-party providers or consignors warrant that auctions will be unimpaired, uninterrupted or error free and accordingly shall not be liable for such events.

WAIVER AND RELEASE

Bidder, for himself, his heirs, agents, successors and assignees, generally and specifically waives and releases, and forever discharges LRCA, and its respective affiliates, parents, officers, directors, shareholders, agents, subsidiaries, employees, managers and members and each of them, and their respective successors and assignees from any and all claims, rights, demands and causes of actions and suits, of whatever kind or nature, including but not limited to claims based upon Auctioneer's negligence, whether in law or equity, tort or otherwise, whether known or unknown, suspected or unsuspected (a "Claim"), which Bidder may assert with respect to and/or arising out of, or in connection with any challenge to the title to or authenticity of any goods purchased, the sale itself, any lot bid upon or consigned, and/or the auction, except where such Claim is otherwise expressly authorized in these Terms of Sale. It is the intention of Bidder that this waiver and release shall be effective as a bar to each and every Claim that may arise hereunder or be related to the Auction Sale.

DISPUTES

If a dispute arises concerning ownership of a lot or concerning proceeds of any sale, LRCA reserves the right to commence a statutory inter-pleader proceeding at the expense of the Consignor and Buyer and any other applicable party, and in such event shall be entitled to its reasonable attorneys' fees and costs. LRCA reserves the right to cancel or postpone the Auction Sale or any session thereof for any reason whatsoever. No Bidder shall have any claim as a result thereof, including for incidental or consequential damages. Neither LRCA nor any affiliated or related company shall be responsible for incidental or consequential damages arising out of any failure of the Terms of Sale, the auction or the conduct thereof and in no event shall such liability exceed the purchase price, premium, or fees paid. Rights granted to Bidders under the within Terms and Conditions of Auction Sale are personal and apply only to the Bidder who initially purchases the lot(s) from LRCA. The rights may not be assigned or transferred to any other person or entity, whether by sale of the lot(s), operation of law or otherwise. Any attempt to assign or transfer any such rights shall be absolutely void and unenforceable. No third party may rely on any benefit or right conferred by these Terms and Conditions of Auction Sale.

Any dispute arising out of or related to these Terms of Sale, the Auction Sale or any lot, with the sole exception of actions by Legend Rare Coin Auctions to collect amounts owed to it and other damages, shall be submitted to binding arbitration pursuant to the commercial arbitration rules of the American Arbitration Association, with any arbitration hearing to occur in Monmouth County, New Jersey. Absent an agreement of the parties, the arbitrator shall limit discovery to that which is necessary to enable the hearing to proceed efficiently. The arbitrator shall not have the power to award punitive or consequential damages, nor alter, amend modify any of the terms of this Agreement. The award by the arbitrator, if any, may be entered in any court having jurisdiction thereof. Each party shall pay one-half the costs of the arbitration. Bidder acknowledges and agrees that the competent courts of the State of New Jersey shall have exclusive in personam jurisdiction, subject to the requirement to arbitrate, over any dispute(s) arising hereunder, regardless of any party's current or future residence or domicile. Bidder further agrees that venue of the arbitration proceeding shall be in Monmouth County, New Jersey; and any court proceeding shall be in the Monmouth County Superior Court, in the State of New Jersey, and in each case waive any claim of Forum Non Conveniens. Bidder agrees that any arbitration or legal action with respect to this Auction Sale is barred unless commenced within one (1) year of the date of this Auction Sale.

Auction participants expressly waive any right to trial by jury

Laura Sperber Partner

PRINCIPALS

Laura was raised in Highland Park, NJ. During high school, the coin bug hit her hard. Her trip to the 1976 NYC ANA left a lasting mark and huge desire for her to own and handle the greatest rarities. While attending Monmouth University, Laura attended coin shows more than classes. After college, she started LSS RCI, a wholesale coin company. In 1986, she realized the need for a "better" coin retailer and teamed up in 1986 with George Huang to form Legend Numismatics.

In 1996 Bruce Morelan became a partner and since then Legend has exclusively built or assisted in assembling this generation's greatest collections. In 2012 Laura saw the need for a smaller, boutique auction firm, and created Legend-Morphy with Dan Morphy, whom she split with in 2014. Today, Laura is also a leading consumer advocate for coins. The passion has never subsided, and she keeps a beautiful Proof Walker on her desk to this day.

Bruce Morelan Partner

Bruce started collecting coins when he was only six years old and by the time he was in high school his dream was to be a coin dealer. But life intervened and instead, Bruce went into business. By chance, he became Legend Numismatics' financial backer in 1996. His great grandmother had given him three coins when he was young, one of which being a Trade Dollar, so he set out to build the finest Trade Dollar set. After a few years with ultra rarities, Bruce returned to his love of dollars and completed both a set of Gobrechts and a set of Seated Dollars.

After selling those sets, Bruce recently returned to dollars with a new Gobrecht set and a spectacular early dollar set capped by his dream coin, the Amon Carter 1794 Dollar. Not many collector's can say they have completed not only the finest 1794-1885 Dollar Sets and have over the years owned such coins as two 1913 Liberty Head Nickels, an 1894-S Dime, 1876-CC Twenty Cent piece, 1827 Original and Restrike Quarters, 1838-O Half Dollar, two 1885 Trade Dollars and four 1884 Trade Dollars!

Julie Abrams President

Julie Abrams started in numismatics in 1986 when she joined up with Bernard Rome and launched Teletrade, the first computerized auction company. Teletrade developed a unique coin trading method, utilizing state-of-the-art digitized voice board technology to run live auctions before the advent of the internet. As President of Teletrade, Julie helped expand the company, increasing the frequency of auctions and expanding annual sales to \$24 million within a few years. In 1999, GMAI, a publicly traded company, purchased Teletrade and Ms. Abrams became Executive Vice President of Sales for the parent company. Her job responsibilities included continuing her role as CEO for Teletrade as well as marketing to buyers and consignors, with the goal of maintaining a balance between inventory and sales while growing the business.

In 2004 she joined Stacks-Bowers, an old world traditional auction house where she worked to expand their e-commerce presence, including the development of an online bidding platform for the firm. She also marketed Stacks' programs to secure consignments from dealers and institutions such as banks, museums and universities.

Julie is a member of the American Numismatic Association, the Central States Numismatic Association and Florida United Numismatists.

hile Legend Rare Coin Auctions has a long tradition of offering some of the FINEST silver dollar collections (like the #1 Coronet Collection sold by us in 2015), we have been blessed with not one but two great complete sets to anchor our May Regency 2018 Sale so we decided to create a special "Dollar Day"session. The special full sets are the PFM Morgans (#6 on th PCGS Registry) and the Crow River Peace Dollar Collection. There are also several outstanding pieces from the Aurora Borealis Collection of Toned Morgans. In all, the 237 lots comprise an exceptional offering that has something for everyone!

The first lot is a fitting introduction to the silver dollar, a Mexican 1741 8 Reales or Mexican "Pillar Dollar." This is the first coin listed in the Guide Book of United States Coins and is the foundation of our dollar based economy. Following this CHOICE Mint State piece, are a few Draped Bust dollars, both in Mint State, as well as very popular collector grades. A small selection of Seated Liberty and Trade dollars follow, with a gorgeous 1865 PCGS PR64+CAM CAC, a really cool 1878 Trade struck 5% off center and a killer 1925 PCGS MS67+CAC as highlights.

The P.F.M. Collection, which is a complete circulation strike set, the #6 PCGS Registry Set, follows with

numerous highlights including: 1879-CC Capped Die. PCGS MS65; 1879-O PCGS MS66 Ex Jack Lee 2; 1878/79-O PCGS MS65 PL Ex PCGS Tour; 1884-S PCGS MS63; 1889-CC PCGS MS63; 1891-O PCGS MS65 DMPL CAC Ex Jack Lee; 1892-S PCGS MS65; 1893-S PCGS AU58 Ex Shrike Set; 1895-O PCGS MS63; 1896-O PCGS MS64; 1899-O Micro O. PCGS MS64+ CAC; 1899-S PCGS MS67 CAC; 1904-S PCGS MS67 CAC Ex Coronet Collection.

After the presentation of the P.F.M. Collection, Morgan dollars will continue with the properties of other important consignments, and these are presented in untoned and TONED selections. The toned selections are anchored by duplicates of the world-class Aurora Borealis Collection.

Anchoring the Peace Dollars is the Crow River Collection. Assembled by the dedicated collector who put together the record breaking \$10 Indian set we sold in Regency Auction XXIII. While he was patiently waiting for certain coins to appear for that set, he worked on this amazing, SUPERB set. The 1927-D is the PCGS MS66 CAC ex Jack Lee and the 34-S is graded MS66 CAC.

All told, if you collect Silver Dollars, you CANNOT miss this great session! Happy collecting!

LOT 1 MEXICO. 8 REALES 1741-Mo MF. PCGS MS62

For generations of Collector's, the first numismatic reference is the annually published Guide Book of United States Coins (known simply as the Red Book because of its iconic cover). The first coin you encounter in that book is the Mexican "Pillar" dollar, or 8 Reales. This iconic coin was struck from 1732 to 1771, and served as specie in the colonial economy. The entire American monetary system of dollars used the 8 Reales as its model, and much of American Colonial paper money was

backed by "Spanish Milled Dollars"--this coin. Spanish colonial coins circulated in day to day transactions as legal tender in the United States until 1857.

The coin we are offering here is boldly struck and quite distinctive with an intensely reflective, prooflike luster. A lovely honey-gold with rich amber accents toward the rims add a wonderful depth to the eye appeal.

PCGS 3, NGC 4. There are a handful of this date graded finer, but it is unlikely many have this great eye appeal. A great coin for anyone building a set of silver dollar type coins to represent "where it all began."

PCGS# 670034 | ESTIMATE: \$3,000+

LOT 2 \$1 1797 10 X 6 STARS. PCGS VF30

B-3, BB-71. A lovely, choice collector grade early Bust dollar. Superb definition remains despite the light wear. Aside from a few teeny ticks and lines, the surfaces are smooth and retain a wonderful, wholesome look and we have seen coins graded XF that do not have the bold detail or good looks of this early dollar.

PCGS 44, NGC 10. The most recent PCGS-graded coin sold in April 2016 for \$5,170 (that coin was CAC). The current PCGS Price Guide value is listed at \$6,500 and this really eye appealing coin should see premium bidding.

PCGS# 6865 | ESTIMATE: \$4,000+

LOT 3 \$1 1798 SMALL EAGLE, 15 STARS. PCGS VF25

B-2, BB-81. This is the only die marriage for this variety, and a tough R-3 with perhaps 500-900 known in all grades.

The presently offered example saw years of circulation; but the wear is even, and with only a few minor scuffs and marks on the reverse, the surface quality and eye appeal are well above average for the assigned grade. This example has moderate tone and is very attractive for a VF25.

PCGS 22, NGC 2. The last one to sell brought \$5,405 in April 2017, and it did not have the eye appeal of this coin, nor did the one in the March 2017 mid-winter ANA sale, that brought \$5,581. The current Collector's Universe value is listed at \$6,750. This coin is certainly worthy of any variety set of Bust dollars and keep in mind this is not a variety that comes nice, so be prepared to duke it out to add this one to your set!

PCGS# 6868 | ESTIMATE: \$5,250+

LOT 4

\$1 1802/1 B-1, BB-231. CLOSE DATE. PCGS AU55 CAC An amazing, high grade survivor! Dave Bowers estimates that perhaps 100-175 examples survive in all grades, and his most recent list of "Notable Specimens" range in grade from AU58 to XF45.

This GEM AU has a bold, totally original look. Richly toned on both the obverse and reverse, a wealth of underlying satiny silver luster glows from under the dove, pewter, gold, and olive patina. Ms. Liberty, the eagle, and all the devices are criply struck and retaining bold definition with only the slightest hint of high point friction.

PCGS 5, NGC 2, CAC 3. No CAC approved AU55s have ever sold in auction (an NGC AU55+ CAC sold in June 2016 for \$11,750). All the AU55s that have previously sold in auction were B-4, BB-232 which is a much more common variety. As such, this condition census B-1, BB-231 should bring a strong premium from the early dollar specialist!

PCGS# 6898 | ESTIMATE: \$10,000+

LOT 5 \$1 1802 PCGS MS63+

A wonderful, nearly Condition Census grade B-6, BB-241.

Brilliantly lustrous, with an intense satin vibrancy that brings life to a rich rose, gold, pewter patina. Accents of lilac and soft violet hues adds to the wonderful eye appeal. The details are sharply impressed, crisply rendered by an exacting, well centered blow from screw press. Even under intense scrutiny with a powerful glass, you will be hard pressed to find any serious ticks or marks.

PCGS 8, NGC 8. This is the ONLY MS63+ graded by either service, and only four coins are graded finer at PCGS. The current Collector's Universe value is listed at \$72,500 and the only coin finer to sell in auction was the Stickney-Clapp-Eliasberg-Pogue coin that sold for \$329,000 in March 2017. Whether you are looking for a CHOICE early dollar for a type set, or an advanced date set of Bust dollars this coin presents a very important opportunity for the advanced collector. Don't let this opportunity pass you by!

PCGS# 40087| ESTIMATE: \$65,000+

LOT 6 \$1 1841 PCGS AU58

A delightful, very nicely toned early Seated Liberty dollar in nearly Mint State condition. The fields display a semi-watery lustrous nature and when viewed under a light it brings out the lovely original hues. The strike is bold and despite some very minor contact marks, the eye appeal is certainly better than average.

PCGS 45, NGC 53. The eye appeal of this coin is better than the last two examples

that sold in auction: the most recent in August 2016 for \$1,293 and the one before that in April 2016 for \$2,350. The current PCGS value is \$1,550. A nice looking coin for an "everyman" type set.

PCGS# 6927 | ESTIMATE: \$1,200+

LOT 7 \$1 1863 PCGS PR65+

A GEM quality Civil War date Seated dollar. Very rare so fine, only 460 were struck, and clearly this one is among the higher graded pieces at PCGS. Sharply struck on both sides, the devices are frosted and the mirrored fields have a flashy watery type reflection. At

certain angles the obverse mirrors really do beam from under the rosy-slate toning with accents of lilac, violet, sky-blue and light gold. There are some microscopic hairlines under the colorful toning. The GEM quality is unquestioned!

Only 460 Proofs were struck. PCGS 7, NGC 15. This is the SOLE PR65+ at PCGS. There are only 10 coins finer at the PCGS. The current Collector's Universe value is listed at \$26,000. This coin has not appeared in auction. A great coin for any Civil War era specialist! Good luck.

PCGS# 7006 | ESTIMATE: \$16,500+

LOT 8 \$1 1865 PCGS PR64+ CAM CAC

Mother Nature and Monet teamed up to create the ultimate beautiful Proof Seated Dollar. The quality is extremely High-end!

Deep and glittering mirrors beam unbroken from all over. The mirrors are also crystal clear and have an intense reflection. Only a small line or two can be detected if you look hard and use a strong glass. Wild and totally original rings of royal

blue/green/violet open into softer champagne/pale tangerine on the obverse. The reverse has a deeper gold/violet/purple color (probably from lying on felt). Miss Liberty and the details are thickly frosted and have full strikes. As we said in the headline, the eye appeal is jaw dropping on this ultimate creation!

Only 500 were minted. PCGS 16, NGC 19, CAC 5. PCGS has graded only 3 coins PR64+ cameo. The current Collector's Universe value is \$8,500 which really has little to do with a coin of this caliber. We see virtually no similar coins of any date ever offered. Opportunity knocks loud, are you ready to answer?!

PCGS# 87008 | ESTIMATE: \$8,500+

LOT 9 \$1 1865 NGC PR65

A GEM that is beaming with reflective mirrors on both sides. Elegant deep azure, teal, rose, and gold tones are brought out by the bold mirrored fields. In general the mirrors offer great clarity and are icy smooth. Both sides are fully struck up.

From a mintage of only 500, the 1865 represents a conditionally rare date, as well as the last of the regular issue No Motto dates (the ultra rare 1866

does not count). This handsome coin is among the finest graded by either service.

PCGS 28, NGC 30. This coin brought \$10,575 in June 2015 and a few months earlier, it sold for \$11,750. NGC has graded 10 coins finer in the non-CAMEO designations. A lovely coin that will delight any proof dollar collector.

PCGS# 7008 | ESTIMATE: \$8,500+

LOT 10 \$1 1872 PCGS PR62 CAC

A very pleasing coin for the assigned grade with bold reflective mirrors. A dusting of light toning on both sides, most noticeable on the reverse adds to the eye appeal. Housed in a first generation PCGS encapsulation.

Only 950 Proofs were struck. PCGS 50, NGC 20, CAC 4. We think that a good number of these graded PR62 are duplicated submissions in hopes of receiving a higher grade. A pleasing coin in an ancient encapsulation.

PCGS# 7020 | ESTIMATE: \$2,800+

LOT 11 \$1 1877-S PCGS MS65 CAC

An exceedingly HIGH-END GEM. This coin looks like it sat somewhere undisturbed since the day it left the mint 140 years ago!

Insane surfaces are the epitome of perfection. What looks like some activity is nothing more than some irregular toning. We went over this coin with a strong glass and found ZERO impairments. The surfaces

look as smooth textured as you will ever find. A moderate luster (which is strong for a 77-S) enhances the even, original toning. Both sides are blanketed by a moderate mix of champagne/pale purple/pale brown colors. Miss Liberty and every detail are so fully struck you do not need a glass to see the frost or the features standing out. The eye appeal is neat!

PCGS 31, NGC 28, CAC 13. The last PCGS CAC piece to sell in auction brought \$7,800 in February 2018. The current Collector's Universe value is \$8,500. We think this coin will easily eclipse that number. This will be a great addition to ANY GEM Trade Dollar or Type set.

PCGS# 7046 | ESTIMATE: \$8,000+

LOT 12

\$1 1878-S TRADE. STRUCK 5% OFF CENTER. PCGS XF40

A remarkably RARE and impressive mint error, one of perhaps three known Trade dollars struck off center. It is, in the words of noted error specialist, Fred Weinberg, a "trophy" error coin.

Struck off center towards 1:00 on the obverse, there is a margin along the opposite rim. We highly doubt that this coin actually circulated, but was carried by the fortuitous person who discovered it as a pocket piece. Only light friction is noted, all the devices retain strong definition throughout. Very cool, deep toning "pulls away" from the peripheral devices accentuating the off center strike. The eye appeal is clearly unique and intriguing. This is a VERY RARE error, possibly unique for the date, and perhaps a handful exist for the entire series.

Our estimate is based on our consignor's conversations with Fred Weinberg; Fred believes that this coin could realize anywhere between \$35,000 and \$50,000, but who knows! This a truly unique opportunity to acquire a very important and visually impressive Mint error. We would like to congratulate the winning bidder in advance on this one!

Legend Rare Coin Auctions is Proud to auction the Current #6 PCGS Registry Set in the Morgan Dollars Basic Set, Circulation Strikes (1878-1921). Not only is it complete by date and mintmark, but the collector also included major varieties that are popularly collected with the regular issues and are there to augment the depth of the collection.

The P.F.M. collector has carefully assembled this set over the course of nearly two decades, starting roughly in 2001. As you review the following lots, you can clearly tell that assembling this set was a labor of love for the collector. Many of the coins come from such great collections of the past like: Jack Lee, Coronet, PCGS Tour, Cajun, and Shrike.

Seeking out mostly untoned or lightly toned examples, each coin was carefully selected for exceptional strikes, bold luster, and strong eye appeal. For good measure, the collector also made sure to have a fair number of PL and DMPL designated coins to add to the visual allure. Many of the coins are among the finest examples PCGS has

graded over the course of their 32 years of grading coins. Highlights of this collection, include, but are certainly not limited to:

1879-O PCGS MS66 CAC Ex Jack Lee II 1880 PCGS MS66 PL 1880/79-O PCGS MS65 PL 1884-S PCGS MS63 1886-S PCGS MS66 PL Ex Jack Lee-Naples II 1889-O PCGS MS66+ 1890-S PCGS MS66 PL 1891-O PCGS MS65 DMPL CAC Ex Jack Lee 1892-S PCGS MS65 1893-S PCGS AU58 Ex Shrike 1896-O PCGS MS64 1899-O Micro O. Whether or not you currently collect Morgan Dollars, the P.F.M. Collection may well inspire you to start a set of this very challenging, perennially popular series. On behalf of the consignor, we wish you happy bidding!

LOT 13 \$1 1878 8 TAIL FEATHERS. PCGS MS66 CAC

The first of many different Red Book varieties struck in this most popular series. The first reverse type was struck with the eagle having 8 tail feathers--which is not accurate, as bald eagles have 7 tail feathers. After the ornithological error was pointed out, the reverse was redone to make it correct. 699,300 examples of the 8 Tail Feather reverse were

struck, and this one is a very rare HIGH GRADE survivor--typically these are seen in MS65 or lower.

Impressive cartwheel luster blooms on both sides, with the obverse showing hints of subtle reflective flash in the fields. Morgan's portrait of Liberty is fully rendered and her cheek is fully frosted and nearly pristine. Save for a tiny gold spot on the central reverse, the entire coin is brilliant, untoned silver and the eye appeal looks as though this coin just left the press.

PCGS 90, NGC 33, CAC 26. There are seven coins graded finer at PCGS, NONE at NGC. The last CAC-approved PCGS coin to sell in auction realized \$5,875 in the 2016 ANA auction; CAC-approved examples prior to 2015 were selling for \$8,000+! The current PCGS Price Guide lists a value of \$5,250 but we think this coin will surpass that level rather easily. Anything finer is a five figure coin, and precious few exist for the collector to ever hope to obtain.

LOT 14 \$1 1878 7 TAIL FEATHERS REV. OF 1879 PCGS MS65 CAC Ex. The Shrike Set.

A high-end, eye appealing GEM 7
Tail Feather dollar.
Brilliant, pearly satin-like luster graces the fields. Morgan's portrait of Liberty is boldly impressed and the details are nicely frosted. We note, for full disclosure, a few teeny frost breaks and tiny scuffs that do not affect the eye appeal.

PCGS 455, NGC 179, CAC 50. When sold in the January 2011 sale of the Shrike Set, this GEM sold for \$2,530. A very popular and scarce major variety struck during the first year of this ever popular series.

PCGS# 7076 | ESTIMATE: \$1,800+

LOT 15 \$1 1878 7/8 TAIL FEATHERS, WEAK. PCGS MS66

Sitting at the pinnacle of the Population Report with 14 other reported examples, this satiny-white specimen is a very important "pop-top" example for the Registry Set collector. Sharply struck, frosty devices are surrounded by lustrous, untoned fields.

PCGS 15, NGC 0.

None are graded finer

at PCGS, and the finest NGC has graded is MS65. The current PCGS Price Guide value is listed at \$4,000, however there are numerous records in the \$6,000 to \$8,250 range, going back nearly 20 years. This coin is ex. Heritage's July 2004 New York sale, lot 7016, where it realized \$6,555. An attractive GEM worthy of inclusion in any high ranking Morgan Dollar Registry Set. Good luck!

PCGS# 7070 | ESTIMATE: \$3,500+

LOT 16 \$1 1878 7/8 TF, STRONG. PCGS MS65 DMPL EX JACK LEE

Among legendary Morgan dollar Collector's, the name Jack Lee ranks at the top of the list; his collections are historic and coins bearing his pedigree are often among the finest, if not the finest. The present coin is a bold, GEM DMPL that was once part of Jack's famed collection. From the Jack Lee Collection, it found its way into the Dr. Volker Dube Collection (Heritage's 2005 FUN auction, lot 10941), where it was described in part:

"This is a fully brilliant example with deeply mirrored fields and lustrous silver devices, provided excellent cameo contrast. Examples of this issue are sometimes encountered with prooflike fields on one side or the other, but rarely with both sides exhibiting mirrored fields, and almost never with deeply mirrored fields on both sides as seen here."

Today, the coin is still housed in the old green tag PCGS holder and the eye appeal is just as brilliant as it was over 13 years ago! The richly reflective fields boast intense clarity and the devices are fully frosted, producing very impressive cameo-like contrast. The eye appeal is excellent!

PCGS 3, NGC 0. In its most recent auction appearance (FUN 2007), this GEM sold for \$16,100. The current PCGS Price Guide suggests a value of \$20,000. Without an example sold in over a decade, this coin could see a price higher than that when the gavel falls--and it would not be a total shock.

PCGS# 97079 | ESTIMATE: \$15,000+

LOT 17 \$1 1878-CC PCGS MS66 PL

An impressive GEM that borders on an even higher adjective grade. Impressively lustrous with strongly reflective fields. Sharply struck throughout with fully frosted devices on both sides. A couple of light bag marks are observed when viewed with a strong light, but they are mostly trivial and do not impede the high-end look. The first Carson City Morgan dollar

issue, and none are graded finer in the PL designation.

PCGS 9, NGC 11. The last PCGS coin to sell realized \$12,000 in a December 2017 auction (was CAC) and a non-CAC NGC coin sold in October 2016 for \$12,925, making the \$8,000 PCGS Price Guide value seemingly too low! This coin's eye appeal is equal to those two examples, and should see similarly strong bidding when this GEM crosses the block!

PCGS# 7081 | ESTIMATE: \$8,000+

LOT 18 \$1 1878-S PCGS MS66 PI

Extremely flashy and awash with a brilliant silver luster that dances on both obverse and reverse of this GEM. Sharply struck the devices are crisply defined by an exacting blow from the dies, and they are fully frosted, giving a decent amount of contrast. A delicate pearl-like iridescence can be seen in the fields, but the mirror-like fields do have decent clarity and

depth. A few microscopic marks and a tiny spot do not mar the eye appeal, but will serve to identify this coin in the future.

PCGS 16, NGC 25. Only 2 coins are finer at PCGS within the PL designation, both MS68 PL. The current PCGS Price Guide lists a \$3,450 valuation in MS66 PL, and the most recent examples, graded by both PCGS and NGC have sold around \$2,600. This coin, housed in an early blue tag holder has a great, fresh look, and is a lovely example of a coin that will be very expensive to find any finer.

PCGS# 7083 | ESTIMATE: \$2,500+

LOT 19 \$1 1879 PCGS MS66

With an original mintage of over 14.8 million, you would think that this date would be relatively common at the MS66 level--it is NOT. Indeed, this is a major condition rarity at this premium GEM level.

Displaying a bold look, this brilliantly lustrous, untoned 1879 is fully prooflike on the obverse, while the reverse has a

thick, satin-like frost. The devices are boldly embossed into the planchet, and the details are fully frosted, imparting a decent contrast on the obverse. We note a few unobtrusive areas of contact that do nothing to mar the excellent eye appeal.

PCGS 238, NGC 76. This coin was once part of the Clarke Marie Collection (Heritage, September 2004, lot 8304) and sold for \$4,600. Since then, PCGS MS66 examples have sold in a wide range of prices (mostly in the \$2,500-\$3,000), and the current PCGS Price Guide value is listed at \$2,300. Keep in mind that if the reverse was also fully PL, this would be easily be a \$7,000+ coin! Good luck!

LOT 20 \$1 1879-CC PCGS MS64+ PL CAC

About as high-end and and eye appealing that you could ever hope for without spending much more on a GEM DMPL. This 64+ PL has bold contrast between the sharply struck devices and highly reflective fields. The mirrored fields offer bold clarity that offer intense contrast. The eye appeal is exceptional with minimal abrasions that are not located in any prime focal areas, and the all important cheek is very clean--it would impress even the most persnickety of old time Morgan specialists!

PCGS 85, NGC 52, CAC 21. In MS64+ PL, PCGS has graded a mere 4 coins, NGC 1. There have been three auction appearances in this grade, with this coin being the first to sell, realizing \$21,850 in April 2012. The current PCGS Price Guide value is \$18,000. VERY RARE any finer, with nine coins graded finer in the designation. In MS65 PL the most recent example to sell in auction was in 2010! This coin presents a grand opportunity for any serious collector who wants a fully reflective PL that displays moderate cameo-like contrast without the price tag of a GEM DMPL! As such, we can see many Collector's vying to add this beauty to their sets.

PCGS# 7087 | ESTIMATE: \$16,000+

LOT 21 \$1 1879-CC PCGS MS65

A wonderful GEM example of this important KEY date Carson City issue. Struck with a mintage of just over 3/4 of a million pieces, very few were in the GSA holdings released in the early 1970s. Most examples that survive are circulated, and of the Mint State survivors, very few are in such fine condition.

Boasting a luxurious luster that rolls along the nearly pristine surfaces, this 79-CC is thoroughly impressive to behold. While we note the normal softness in Liberty's hair curl just above the ear, the rest of the design elements enjoyed a bold strike throughout. Somehow, this GEM survived without being marred by any serious contact, and was lovingly cared for since striking.

PCGS 98, NGC 47, CAC 35. The most recent PCGS-graded examples sold in our December 2017 Regency Auction, where a similar example realized \$21,150. The PCGS Price Guide lists a \$24,000 value. VERY RARE any finer, with just a baker's dozen finer--the finest grading MS66. This is an important GEM coin that even the pickiest of Collector's will be proud to own!

PCGS# 7086 | ESTIMATE: \$18,000+

LOT 22 \$1 1879-CC CAPPED DIE. PCGS MS65

The Capped Die variety is avidly sought, and the name is a bit of a misnomer, some catalogers more accurately call it "CC over CC" Listed as a Top 100 variety in the VAM series, it is a popular Red Book listed issue. In the past, the Capped Die was thought of as "a poor man's 1879-CC," but modern research has proven how rare this issue is!

A very attractive example of this important rarity! The luster is quite bold, with brilliant, rolling cartwheels that in a light show off a flashy, semi-reflective texture in the fields. This reflectivity is shy of the full PL designation but it does impart a great look. Ms. Liberty and the eagle are crisply struck up, and essentially full in definition. The devices are also frosted, and unmarred from any distracting marks or scuffs from bag or other storage means. Essentially brilliant and untoned, there is a faint, delicate dusting of clear gold that only appears at certain angles.

PCGS 12, NGC 9. This coin last appeared in auction during Heritage's offering of the Snake River Collection, 2010 ANA auction, lot 3338, where it sold for a record realization of \$63,250. Since then, the Coronet Collection example that we sold in 2015 sold for \$45,825. PCGS lists a value of \$41,500. We are not sure why the prices have come down, but this coin's quality will speak for itself!

PCGS# 7088 | ESTIMATE: \$40,000+

LOT 23 \$1 1879-S REVERSE OF 1878. PCGS MS65 CAC

A brilliantly frosty P.Q. GEM! Sharply struck with essentially full definition throughout the devices. None of the tiny ticks are in any focal area of the design, nor do they impair the boldly lustrous eye appeal.

Two major varieties of Morgan dollars were struck in San Francisco in 1879, each utilizing

a different reverse style. The Reverse of 1878, is considerably rarer than the Reverse of 1879, and is identified by a flat breasted eagle and the angle of the top feather on the arrow is flat.

PCGS 65, NGC 18, CAC 6. Only two PCGS/CAC graded examples have ever sold in auction, both in 2010--nearly 8 years ago--one in August for \$5,750 and one in November for \$5,463. The current PCGS Price Guide value is \$4,500 and with only two coins graded finer (both MS66), this is as fine as you will ever be able to obtain for your set (unless you want to pay mid-five figures for a 66, should one appear again--its been nearly 7 years since the last one sold in auction). We can see this truly PQ GEM being bid to a very strong level.

PCGS# 7094 | ESTIMATE: \$4,200+

LOT 24 \$1 1879-S PCGS MS68 PI

WOW! There is a lot to enjoy about this SUPERB, reflective GEM! The first thing, aside from the flashy prooflike fields is the exceptional smoothness of Liberty's fully frosted cheek. Even using a strong glass, you will not find a single flaw, not even a minor graze. The fields, are likewise, generally free of any post mintage issue; we

will note some die polish lines, raised die rust, and a pair of planchet flecks (on the reverse)--these are mint made and do not affect the numerical grade. While a common date, featuring the 3rd Reverse (or Reverse of 1879), it is EXTREMELY RARE in this ultimate state of preservation.

PCGS 3, NGC 3. Obviously NONE ARE GRADED FINER in PL at either service. The most recent example to sell in auction was in July 2015 for \$14,688, and that coin was CAC-approved. Prior to that, one sold in June 2011 for \$14,375, and that was the first to sell ins April 2008--clearly this is not a grade that is offered with any frequency! The current PCGS Price Guide value is listed at \$17,500. A great coin for anyone building a SUPERB set of Morgan dollars, or for someone wanting an example for type in an ultra high grade--either way we expect intense bidding for this one!

PCGS# 7093 | ESTIMATE: \$13,000+

LOT 25 \$1 1879-O PCGS MS66 Ex. The Shrike Set.

Our consignor purchased this magnificent GEM 79-O from the 2009 FUN auction of the Arno Collection. Earlier this coin was a part of the Jack Lee 2 collection. You know that most of the coins that Jack Lee owned were of the highest quality and eye appeal—this coin really is no exception to that rule! First, the luster has full rolling cartwheels that

just beam and bloom in the light. Ms. Liberty is fully struck up and even the most minute details in her hair and headband are razor sharp in definition. Her cheek shows a thick frost and is icy smooth, a trait that will truly delight any fastidious collector! A delicate touch of clear gold is mostly confined to the extreme periphery. All in all, this is a highly desirable coin, boasting one of the most famous pedigrees for Morgans and a great eye appeal to boot!

PCGS 23, NGC 7. Only four coins are graded finer, all MS66+. Back in the above cited FUN auction, this coin realized \$17,250. The other Jack Lee Coin found its way into the Coronet Collection, where it most recently sold for \$29,375 in our Regency Auction XII. The current PCGS Price Guide value is listed at \$18,000 and we would not be surprised if this beautiful GEM broke through that level when it crosses the block!

PCGS# 7090 | ESTIMATE: \$14,000+

LOT 26 \$1 1880 VAM 9, 8/7, STEM. PCGS MS65 CAC

A TOP 100 VAM. Boldly lustrous and generally well struck, this is a very nice 1880 regardless of variety. The 8/7 overdate was discovered in 1968 by Ted Clark, and traces of the mostly effaced 7 under the second 8 can be seen within the loops.

PCGS 36, NGC 4, CAC 142 (CAC does not designate this overdate

on their population report. The current PCGS Price Guide value is \$900 and the most recent example sold in August 2016 for \$793!

PCGS# 41097 | ESTIMATE: \$700+

LOT 27 \$1 1880 PCGS MS66 PL

A splendid, boldly reflective GEM that last appeared in auction in 2010. Vibrant mirrored fields provide a subtle contrast against the frosty, well struck devices. Both sides are basically untoned, save for the slightest hint of a pale white iridescence that comes out when tilted at certain angles in a light.

PCGS 2, NGC 6. This is the Arno Collection coin that sold for \$5,752 in the 2009 FUN auction, but more recently sold for \$6,900 in a March 2010 internet auction. The current PCGS Price Guide value is listed at \$8,500 and since none have sold in a major auction since 2009, we can see a bidding war break out to add this GEM to an advanced cabinet. Good luck!

PCGS# 7097 | ESTIMATE: \$5,500+

LOT 28 \$1 1880-CC PCGS MS66 CAC

Strong mint brilliance sets both sides aglow in a vibrant luster. Nicely struck and untoned, this GEM greets the viewer with a wonderful eye appeal.

PCGS 864, NGC 600, CAC 182. The current PCGS Price Guide lists a value of \$1,750 and according to the auction database, every PCGS/ CAC coin has sold in

excess of that level. We have no doubt that this minty fresh GEM will continue that trend.

PCGS# 7100 | ESTIMATE: \$1,600+

LOT 29

\$1 1880-CC 8/HIGH 7. PCGS MS67 CAC

Truly a beautiful, brilliantly lustrous SUPERB GEM. A glowing luster beams from all over, offering a shining satiny frost that blends with a radial cartwheel effect on the obverse. Superior quality fields are devoid of any stray marks or even breaks in the luster. Nicely struck except at the absolute highest points of the design, including the curls above Liberty's ear and eagle's breast feathers. The cheek is free of anything that is visible to the naked eye, and holds up under magnification; indeed the only distraction found using a glass are some mint made planchet roller marks that were not fully struck out. There is no doubt that this coin is among the absolute finest of the variety.

PCGS 8, NGC 2, CAC 5. PCGS and NGC have graded one coin each finer, both services show a MS67+ on their reports, but neither has ever appeared in auction. Also, no CAC-approved MS67 has ever sold in auction and we cannot find this coin listed in our auction database. The most recent PCGS MS67 to sell realized \$15,275 in the 2015 ANA auction, and there is a record from 2013 for a one that sold for \$22,325. Currently, the PCGS Price Guide value is listed at \$19,500 and it would not shock us if this incredible GEM sold for a level in excess of that amount. Remember, only one coin is graded finer, and PCGS estimates that coin at \$50,000! This exceptional 1880-CC will fit nicely in ANY SUPERB cabinet. Be prepared for record bidding!

PCGS# 7102 | ESTIMATE: \$15,000+

LOT 30 \$1 1880-CC 8/ LOW 7. PCGS MS66 PL

Many variations of overdates and reverse types were paired up to strike the 591,000 silver dollars at the Carson City mint in 1880. On this variety, the second 8 was punched over an errant 7 that was placed too low. Both obverse and reverse show a scintillating, reflective flash in the richly mirrored fields,

surrounding devices that are exceptionally crisp in definition from an exacting blow from the dies. The cheek is very clean and frosty, providing a decent contrast. The eye appeal is finer than most pieces you will encounter.

PCGS 5, NGC 3. There is a single coin finer in the PL designation, a 66+ PL. Only two PCGS MS66 PL examples have ever sold in auction, one in August 2011 for \$5,175 and the other in April 2014 for \$4,179. The current PCGS Price Guide value is listed at \$7,500 and the sole 66+ PL sold in the 2017 FUN auction for \$12,338. A great coin for an advanced Morgan Dollar collection.

PCGS# 7105 | ESTIMATE: \$4,000+

LOT 31 \$1 1880/79-CC REVERSE OF 1878. PCGS MS66 CAC

Swirling, cartwheel mint luster blooms on both sides of this sharply impressed, PQ gem. Brilliant, untoned silver surfaces show only the most insignificant scuffs or ticks, but nothing that adversely affects the high-end look. The overdate feature is clearly seen under a low magnification glass.

PCGS 94, NGC 22, CAC 9. The most recent PCGS/CAC MS66 to sell in auction realized \$6,463 in April 2016 and before that one sold for as much as \$8,813. PCGS has graded only 10 coins finer, all are MS66+ and the most recent of those brought \$10,575. In MS66, the current PCGS Price Guide shows a value of \$4,500, and this coin, tied for second finest graded at PCGS will likely bring a price in excess of that amount.

PCGS# 7108 | ESTIMATE: \$4,000+

LOT 32 \$1 1880-CC 8/7, REVERSE OF '78. PCGS MS65

Sharply struck and highly frosted, this is a very pleasing GEM. A delicate iridescent toning is noted on both sides, but it does not impede the bold luster.

PCGS 207, NGC 347. The most recent example sold in June 2017 for \$2,115 and there are records of up

to \$2,500; the current CU value is listed at 2,300. Rare any finer!

PCGS# 7110 | ESTIMATE: \$1,800+

LOT 33 \$1 1880-CC 8/7, REVERSE OF 1878. PCGS MS66+

An exceptionally HIGH GRADE VAM-7A, a "Hit List 40" variety. A rich whirling luster flows unimpeded on satiny smooth surfaces on both obverse and reverse. Aside from the lightest touch of iridescent gold, this SUPERB coin is untoned and totally brilliant. Sharply struck

and remarkably clean, this GEM will delight any Morgan dollar collector.

PCGS 12, NGC 4. There are two coins finer, both MS67. The presently offered MS66+ was last sold in August 2012, where our consignor paid \$7,638. Prices have come down from their peak of \$9,400 realized by two CAC examples in 2014, the current PCGS Price Guide still lists a value of \$6,500. Keep in mind that the last MS67 sold for \$54,625 in our July 2013 auction. A great coin for any serious collection of Morgan dollars, and we anticipate fierce competition to bring this GEM home.

PCGS# 7110 | ESTIMATE: \$5,000+

LOT 34 \$1 1880/79-O PCGS MS64 PL CAC

A marvelous coin with sharply struck design elements and a flashy, bold prooflike luster that accents the frosty nature of the devices. A few light marks do preclude entry into the full GEM status, but the eye appeal is VERY high-end for a 64.

PCGS 16, NGC 7, CAC 10. Only two PCGS MS64 PL CAC

have ever sold in auction, both in the 2016 ANA auction, where they realized \$4,255 and \$4,935. Worthy of a strong bid from the collector of PL Morgans. Keep in mind that only 8 coins are finer at PCGS, and the finest to sell in auction was the MS64+ PL CAC that sold in our July 2017 Regency Auction for \$8,225.

OUR ESTIMATES

The estimates you see published in this catalog are based on HAMMER. Keep in mind that a coin could be either low or high end for the grade, have stunning color or be dull, all of which radically affect a coin's value. Yes, there can be huge price differences within a grade, and we offer estimates as a guide so Collector's can have a better idea of value. One thing we will never do is offer low ball estimates in order to claim stronger sales.

These published estimates represent what Legend Rare Coin Auctions determines to be an approximate high wholesale value for the coin. The numbers are based upon current market values, similar trades, auction prices, published prices, and a consideration of the coin's quality. There is no guarantee that the estimated prices are minimums or are exactly what you can expect to get if you attempt to resell them wholesale.

We always advise you to view the coins you are interested in and calculate what you'll pay using as much information as possible. If you have any questions, please feel free to ask us. We are here to help you!

LOT 35

\$1 1880/79-O PCGS MS65 PL CAC

PFM set out to build one of the better Morgan sets ever. He certainly spared no expense especially with his 1880-O! This was the auction coin from the famous PCGS Tour set from 20 years ago! At the time PCGS rounded up the every best Morgan's graded and sent them out on tour. Legend Auctions is honored to have the opportunity to sell this most important piece. The quality is all there and then some!

Full 4" + mirrors actually are very close to full DMPL status. You do not have to imagine the mirrors are there because the mirrors are quite deep, have bold clarity, and are pretty clean overall. When you twirl the coin, the mirrors are so strong they make you think this coin is a proof and not an 1880-O! The coin does appear fully black and white. There is a faint hint of some natural color. Miss Liberty and the detail are thickly frosted and are fully struck. Her cheek will make the most demanding "old time" collector grin from ear to ear. The eye appeal is incredible!

PCGS 2, NGC 1, CAC 1. PCGS has graded NONE higher. There are no auction records for this coin. There does happen to be a current Collector's Universe Value of \$60,000. ALL varieties of 80O's are RARE in MS65 (for the regular version there is only 1 MS66). Legend Numismatics and Legend Auctions unhesitatingly rank this SUPERB GEM as one of the VERY best 1880O's that exist. We doubt anything similar exists.

If you are building a real top tier Morgan set, this coin will be a tremendous standout fit.

PCGS# 7117 | ESTIMATE: \$50,000+

LOT 36 \$1 1880-S PCGS MS67 CAC

The 1880-S is one of the most frequently encountered Morgan dollars in SUPERB GEM thanks to a large number of bags that were released from the Treasury in the early 1960s. Today, MS67s are not uncommonly seen, but this one was clearly hand selected by the collector for its high-end lustrous look. Brilliantly lustrous with

bold cartwheels, this coin's cheek is fully frosted and in pristine condition.

PCGS 2271, NGC 3442, CAC 870. The current PCGS Price Guide value is \$785 and this coin will certainly challenge that amount when it crosses the block.

Earlier from the Rafael

in November 2004 by
Heritage, where it was
described as being "a
needle-sharp Superb
Gem with exceptional
luster and pristine cheek.
The centers have a mere
hint of tan color. This
lovely Morgan Dollar
is ideal for the finest
quality Registry Set."
Well those words proved
prophetic, as it was

placed into the P.F.M. Set. The underdigit can be seen with the naked eye, and the eye appeal is superb!

PCGS 28, NGC 16. This amazing GEM is bested by only two coins graded slightly finer at PCGS as MS67+. This coin realized a near record price in 2004, when it sold for \$4,370. That speaks volumes to the AMAZING quality this coin possesses! Go ahead and forget the PCGS Price Guide value and more recent APRs—there will be intense bidding for this one!

PCGS# 7120 | ESTIMATE: \$2,000+

LOT 38 \$1 1880/79-S PCGS MS67 CAC

Typical for any 80-S, the presently offered SUPERB GEM has a brilliant silver cartwheel luster that captivates the eye as it is rotated. Sharply struck and very eye appealing with only a very limited amount of iridescence.

PCGS 67, NGC 12, CAC 10. Fewer than a dozen coins are finer

at PCGS, the finest being a trio graded MS68. The most recent PCGS MS67 CAC to sell in auction was in the 2018 FUN auction, that brought \$1,440 and the current PCGS Price Guide value is \$1,650. A welcome addition to any Morgan dollar collection.

PCGS# 7122 | ESTIMATE: \$1,250+

LOT 39 \$1 1881 PCGS MS66+ CAC

Despite a large mintage of over 9 million, very few coins have survived in such a pristine state of preservation. This satiny superlative GEM is as brilliant and and pristine as the time it came off the dies in 1881.

PCGS 210, NGC 56, CAC 34. In MS66+ PCGS has graded 22

coins, NGC 1. Only five coins are graded MS67 finer at PCGS. The most recent PCGS/CAC coin sold in our December 2017 Regency Auction and sold for \$4,348. The current PCGS Price Guide value is listed at \$3,750, and keep in mind that a PCGS MS67 would bring somewhere in the \$17,500 to \$20,000 and none are CAC approved. A superb coin that will be a delight for the next owner and will find itself in another high ranking Registry Set.

PCGS# 7124 | ESTIMATE: \$3,500+

LOT 40 \$1 1881 PCGS MS65 DMPL

In our opinion, this coin is a lock solid MS65 DMPL. CAC was brutal by not beaning it. We really do not understand what they are thinking.

Full blown 8" mirrors beam vividly from all over. The mirrors have usual clarity, offer just a few tiny scattered ticks, and are almost as reflective as full Proof

mirrors. When you twirl this coin you are nearly blinded by the flash. A hint of pale reddish gold can be seen by the rims. It is important to note this coin has never been messed with. The contrast is strong. Miss Liberty and the details are fully struck and have thick creamy white frost. The eye appeal is outstanding!

PCGS 8, NGC 13, CAC 1. PCGS has graded 2 coins MS65+. The last PCGS CAC piece to sell in auction brought \$11,163.00 03/2013. That is really a meaningless number today because it's been so long since any have appeared in auction. The current Collector's Universe Value is \$14,000. This coin is more than worthy of inclusion in any GEM DMPL collection.

PCGS# 97125 | ESTIMATE: \$12,500+

LOT 41 \$1 1881-CC PCGS MS67+

A very high graded example for the date, among the twenty highest graded by PCGS, bested by only four coins graded MS68.

A brilliant, satiny mint bloom shows a bold rolling affect as you rotate it in a light. The devices are frosty with a touch of the most delicate iridescent

white and clear gold hues. Under intense scrutiny a tiny tick or graze can be seen, but noted only for full disclosure, the eye appeal is certainly worthy of this lofty grade.

PCGS 16, NGC 8. The current PCGS Price Guide value is \$13,500 and the most recent examples to sell were CAC, realizing in general, between \$10,500 and \$13,000. A MS68 will certainly be \$25,000+, if you can find one!

PCGS# 7126 | ESTIMATE: \$9,500+

LOT 42 \$1 1881-O PCGS MS65 PL

While relatively scarce in GEM grades, this date is downright RARE in the Prooflike and DMPL designations. The P.F.M. 81-O is tied for FINEST graded in the PL designation at PCGS.

Sharply struck from a newly polished set of dies, imparting the brilliant, mirror-like

finish in the fields of both sides. The mirrors offer a bold reflective look and are clear and clean, free from any serious haze.

Liberty's cheek is frosty and there is considerable contrast between the devices and fields.

PCGS 6, NGC 3. None are finer at PCGS and the most recent example sold for \$4,230, and this GEM has a much cleaner look. Prior to that coin selling in July 2016, this coin sold back in March 2009. The current PCGS Price Guide value is listed at \$3,750 and keep in mind that a DMPL would cost double. Good luck.

Sensational, swirling cartwheel luster boldly rolls along both the obverse and reverse. Very high-end for the grade, the surfaces are devoid of any distracting marks and the cheek is extremely smooth and will delight the pickiest of old timers.

PCGS 2250, NGC 4360, CAC 930. The

most recent example to sell in auction brought \$1,560 in December 2017. This exceptional coin is great for a type set or nice collection of Morgan dollars.

date. While over 11,000,000 were struck many were likely stored in vaults at the Treasury Department and melted as part of the 1918 Pittman Act that authorized converting up to 350,000,000 silver dollars into bullion. Rare in any grade MS66 and up. The presently offered SUPERB GEM is among the ten finest examples graded at PCGS, bested only by the sole MS67+, ex Jack Lee/ Coronet.

A strong frosty mint brilliance glows on both sides. Ultra smooth surfaces hold up to intense scrutiny; even with a strong glass the obverse is completely free of any kind of tick, frost break, or any other mark of consequence. The devices are crisply struck up from a bold impression from the dies. Beautiful, milky white frosty silver have an accent of iridescence at the rim. The eye appeal is excellent, totally worthy of placement in this world class collection.

PCGS 9, NGC 9, CAC 3. This is the Cajun Collection coin, last sold in March 2005 for \$17,250. Since then, no CAC coin as ever sold in auction. The Jack Lee - Amherst Collection sold in November 2007 for \$26,450 and another coin sold in \$21,150 in November 2015. The Coronet Collection coin, graded PCGS MS67+ CAC for a record \$32,900 in our June 2015 Regency Auction. This coin, with its Cajun-P.F.M. pedigree will certainly generate a lot of attention from Collector's, and will end up in another world class set of Morgan dollars.

PCGS 85, NGC 75, CAC 25. The P.F.M

Collector purchased this SUPERB 82-CC in the 2012 FUN auction for \$9,775 and the current PCGS Price Guide value is listed at \$7,250. There are a mere four coins finer at PCGS, 3 in MS67+ and a single MS68. If you are going to build a specialized set of CC Morgans, your search for an 82-CC can end here!

LOT 46 \$1 1882-O PCGS MS66+

SUPERB quality for an 82-O, a date that rarely is seen in such lofty grades. This highly lustrous beauty is among the dozen finest examples graded at PCGS. Flashy mint luster swirls on both the obverse and reverse, accenting the very well struck devices and high quality, smooth surfaces. Even using a

strong lopp there are no significant marks or ticks worthy of single mention. Generally brilliant, fresh silver, there are areas that show a dusting of clear gold iridescence that adds to the visual allure.

PCGS 72, NGC 13. There are five coins graded MS66+ and seven coins finer. None of the MS66+s have ever sold in auction. A PCGS/CAC MS66 sold for \$8,225 in our December 2017 Regency Auction and the last MS67 sold in August 2010, realizing nearly \$30,000. The current PCGS Price Guide value in MS66+ is \$8,500. This is a great coin for any high grade Registry Set of Morgan dollars; anything finer will cost over \$25,000 if you can find any--most of the coins finer are ensconced in major collections.

LOT 52 \$1 1883-S PCGS MS64 CAC

Bold swirling luster beams on both sides of this impressive, near-GEM quality KEY, conditionally scarce issue. In the old days before 3rd party grading, we have no doubt it would have been sold as a full GEM grade example.

Ms. Liberty, the eagle, and all the details are fully struck up and the

details are nicely frosted. The brilliant mint luster rolls smoothly over clean and very high-end quality for the grade. You will be hard pressed to find another MS64 with such a great, high-end look.

PCGS 488, NGC 426, CAC 84. VERY RARE in any grade finer, and thus the populations are likely inflated thanks to the multiple submissions of the same coin in hopes of receiving a higher grade. The most recent example to sell in auction brought \$5,405 in the 2017 ANA auction, and that was on the low end of the APR spectrum for PCGS/CAC coins. Any PCGS MS65 would cost \$25,000 or more. We know this coin will incite a very serious bidding battle when it crosses the block--it will fit in ANY GEM set!

OUR ESTIMATES

The estimates you see published in this catalog are based on HAMMER. Keep in mind that a coin could be either low or high end for the grade, have stunning color or be dull, all of which radically affect a coin's value. Yes, there can be huge price differences within a grade, and we offer estimates as a guide so Collector's can have a better idea of value. One thing we will never do is offer low ball estimates in order to claim stronger sales.

These published estimates represent what Legend Rare Coin Auctions determines to be an approximate high wholesale value for the coin. The numbers are based upon current market values, similar trades, auction prices, published prices, and a consideration of the coin's quality. There is no guarantee that the estimated prices are minimums or are exactly what you can expect to get if you attempt to resell them wholesale.

We always advise you to view the coins you are interested in and calculate what you'll pay using as much information as possible. If you have any questions, please feel free to ask us. We are here to help you!

LOT 56 \$1 1884-S PCGS MS63

One of the most famous condition rarities in the entire U.S. series. The generous mintage of 3,200,000 would make anyone believe that the 1884-S dollar would be a common issue. However, due to a high rate of circulation of the issue, this is one of the MAJOR condition rarities in the series. VERY RARE in choice, and virtually unobtainable in GEM or better grades. This is one of those issues that most Collector's only dream of owning in Mint State--many opting for a high-end AU58.

The P.F.M. Collection coin has a delicate dusting of golden-tan iridescent toning over highly lustrous surfaces. Typical for an 84-S there is a touch of striking softness in the hair curls above the ear and some bluntness on the eagle's chest. The luster is strong and rolls around the problem free fields.

PCGS 51, NGC 46. EXTREMELY RARE any finer! There are less than 20 finer at PCGS, from MS64+ to a monster MS68! The most recent PCGS MS63 sold for \$48,000 in the 2018 FUN auction and the current PCGS Price Guide value is \$57,500. We recently sold a PCGS MS63+ CAC for \$73,438 in our Regency Auction XXIII. If you are building a CHOICE or GEM set and still need an 84-S, be sure to bid on this high grade survivor.

With only a trio of coins graded finer at PCGS, this MS67+ is about as high a grade as any collector could ever hope to obtain for their set. This 1885 is truly SUPERB and PQ! Wonderfully smooth and satiny surfaces have a brilliant silver luster that flows freely on both sides. George Morgan's design elements were nicely

struck up. The cheek is quite clean and all the fields are free of any serious distractions and the eye appeal is exceptional!

PCGS 187, NGC 216, CAC 88. In MS67+, PCGS has graded 25 and NGC 5. The last PCGS MS67+ CAC sold in the January 2017 FUN auction for \$4,123 and we sold one in May 2016 for \$4,583 and the current PCGS Price Guide value is listed at \$5,500. Amazing! While overshadowed by the 84-S, the 85-S is quite scarce in GEM Mint State. Flashy, brilliant, rolling cartwheel luster swirls over blast white silver surfaces. Blazing and vivid in its brilliance, the fields show hints of reflectivity and the surfaces are clean and totally free of any distracting marks or ticks or any kind. The

cheek is totally frosty, nice and smooth. Most of the details are fully struck up with only the slightest hint of weakness at the eagle's breast feathers or hair curls. Looking as fresh today as it did when it came off the dies, this beauty ranks up there among the finer examples seen at PCGS.

PCGS 50, NGC 14. Only four coins have ever graded finer at PCGS, a pair graded MS67 are the finest seen. The most recent MS66 was an NGC coin that sold in the 2018 FUN auction for \$4,080. This is the only the third time this coin has appeared in auction since 2001; the last time this near-gem sold was in the Heritage February 2008 sale of the Jimmy G. Collection. The 86-O is one of the classic condition rarities of the Morgan series. Along with the 84-S and 92-S, the vast majority of the 86-O's

generous mintage was either paid out at the time of issue and disappeared into commerce, or huge numbers were melted down under the auspices of the Pittman Act.

Generally well struck in the centers, the satiny mint frost blooms in the centers and are framed at the rims by a delicate golden halo. A few teeny scuffs are seen on the cheek and in the fields, but overall the eye appeal is quite nice.

PCGS 230, NGC 84. This is the highest grade most Collector's can ever hope to add to their sets. The last time this coin sold it realized \$7,475 in February 2008. The most recent PCGS-graded MS64 brought \$8,813 in March 2017. The PCGS Price Guide value is listed at \$10,000. Only 26 coins are finer, most of which are MS64+ and we sold the most recent MS64+ a PCGS coin that brought \$15,863 in our July 2017 Regency Auction. Anything finer is a six-figure rarity! smooth, defect free
surfaces it is not hard
to see why! Flashy,
cartwheel luster radiates
brilliantly on both
sides. As you rotate the
lustrous surfaces in a
light, you clearly see
hints of semi-prooflike

reflection. The devices are fully struck up thanks to an exacting and precision blow from the dies. Both sides display exceptional quality fields, free of any distractions. Even using a strong glass you cannot find anything worthy of singular mention. Couple that with a boldly original look, this coin has a SUPERB eye appeal!

PCGS 18, NGC 6, CAC 9. NONE ARE FINER at PCGS. The most recent example to sell in auction realized \$11,400 in the 2018 FUN auction and that was the first PCGS/CAC MS66 to sell since August 2012! Like the majority of the coins in the P.F.M. Collection, this coin is worthy of placement in any top ranking PCGS Registry Set of Morgan Dollars, and we know it will take a strong bid to bring this SUPERB coin home.

Visually, very impressive! Very bold, flashy, glassy mirrors beam from all over. Brilliant and swirling cartwheel luster brings out the bold reflection, that despite a light iridescent tone, is very clear, clean, and deep. Razor sharp on both sides, the devices show off a precision and exacting strike. You know that with the Jack Lee pedigree, this GEM is special and exceptional!

PCGS 3, NGC 0. There are NONE FINER! This coin has never sold in auction. The other Jack Lee coin sold in the 2009 FUN auction for \$12,200. The current Collector's Universe value is listed at \$27,500. This is a VERY RARE opportunity for the DMPL specialist--do not let it pass you by! Expect strong bidding here!

LOT 68 \$1 1887 PCGS MS67 PL

Earlier ex: PCGS Tour, NFL Set, and Arno Collections. What an impressive provenance for a Morgan dollar! Housed in an old green tag holder.

First sold in Heritage's 2001 FUN auction where it was sold as part of the Gregg Bingham NFL Collection, where it was described as: "A

common issue in an uncommon level of preservation, this sharply impressed Superb Gem is free of even the most trivial distraction. A light overlay of silver-gray iridescence is noted throughout, but both sides radiate a uniformly brilliant finish at all angles."

PCGS 5, NGC 7. In the January 2009 FUN auction featuring the Arno Collection, this SUPERB GEM sold for \$4,313 and the current PCGS Price Guide value is listed at \$6,000. There are NONE FINER in the PL designation, and this coin has such a great provenance!

LOT 69 \$1 1887/6-O PCGS MS64 CAC

Satiny mint bloom shines from all over. This well preserved overdate is quite attractive and is EXTREMELY RARE any finer. The hair curls above Liberty's ear and the eagle's breast feathers display the typical striking weakness, but otherwise the devices have good details and the surfaces are smooth and free of any serious marks or defects. The

overdate 7/6 can be seen with a strong glass with the loop of the 6 partially visible to the right of the 7.

PCGS 125, NGC 29, CAC 22. This coin was last sold in auction in October 2000 and it sold for \$6,900. The last PCGS/CAC coin to sell in auction brought \$6,600 in March 2018. Very rare any finer, and this coin is PQ. Anticipate strong bidding to bring this near GEM home!

LOT 70 \$1 1887-O PCGS MS65 CAC

Another date that saw a large mintage, but due to extensive circulation and/or widespread melting under the Pittman Act, this is a VERY SCARCE date in MS65, and RARE any finer, with the finest certified being a single grade point finer than the presently offered coin. A bold, brilliant luster is mostly frosty, but

when rotated in a light, you do see a swirl of rolling cartwheels. The obverse of this GEM is nearly pristine, and suggest a finer grade. The reverse does show a few light bag marks, which account for the assigned grade, but do not detract from the overall high-end look; clearly this piece was hand selected for its baby smooth cheek and impressive for the date strike.

PCGS 381, NGC 81, CAC43. The most recent PCGS/ CAC coin sold in auction was in the April 2016 Central States auction where one sold for \$3,173. CAC-approved coins have all brought strong premiums and we do not doubt that this trend will continue here. With its superb quality cheek and good strike, we can see it bringing a record bid for the grade.

LOT 71 \$1 1887-S PCGS MS66

Boldly lustrous with distinctive reflective, semi-prooflike surfaces. Icy smooth mirror-like fields really do have a ton of flash when rotated in a light. The devices are frosty and well struckwith crisp definition of Liberty's hair locks and eagle's feathers; the cheek has a clean, smooth look with only a single line that can be seen with a glass.

PCGS 31, NGC 11. The most recent coin to sell brought \$4,080 in the 2018 FUN auction, but for the prior two years, the four PCGS coins that sold brought between \$5,170 and \$6,463. The current PCGS Price Guide value is listed at \$6,000, and keep in mind that only five coins are finer at PCGS and the finest to ever sell in auction was the toned MS66+ in our January Regency Auction 25, that brought \$28,200, and the untoned NGC MS67 Ex Eliasberg, sold for \$30,550 in April 2014. Clearly this coin ranks among the finest available to Collector's, and we anticipate this GEM bringing a strong bid from the advanced collector.

LOT 74 \$1 1888-O DOUBLED DIE OBVERSE. PCGS AU58 CAC

A GEM AU, "super slider" example of the Hot Lips variety, one of the most sought after varieties in the Morgan dollar series, even garnering placement in the Guide Book of United States Coins. As the moniker implies, the boldest evidence of the doubled die is at Liberty's lips, (as well as at the nose

and chin). Last sold in the Heritage's November 2004 auction of the Rafael Romero Collection, where it was described in part: "The bright surfaces are essentially untoned, and display sharply struck design elements, except for softness in the hair over Liberty's ear. Remarkably clean surfaces show just a few minor contact marks and luster grazes on Liberty's cheek and neck, and in the adjacent field."

PCGS 61, NGC 21, CAC 17. Only nine coins are graded finer at PCGS, the finest being graded MS62. In the above cited Romero Collection, this coin sold for \$8,913. At the time, it was tied for finest certified at PCGS. Since then there have been few lower Mint State grade examples graded and sold. A 58+ CAC sold in the 2018 FUN auction for \$5,280 and the sole MS62 sold in the 2017 ANA auction for \$12,925. This nearly condition census piece retains a wonderful look, that in the old days before certification, would likely have been called "Uncirculated." Worthy of a strong bid!

LOT 75 \$1 1888-S PCGS MS66

The mintage of Morgan dollars dropped to 657,000, only the lowest output of dollars at the San Francisco mint until 1893, and the third lowest mintage from that facility in the entire series. Ranking among the highest graded at either service, only a half dozen are finer at PCGS. A strong brilliant luster swirls along

smooth, clean surfaces. Well struck throughout, this PQ GEM has a great eye appeal, aided by a barely visible halo of clear gold at the rims.

PCGS 32, NGC 13. The current PCGS Price Guide value is \$7,000 and the most recent example to sell in auction realized \$4,560 (the P.F.M. coin is cleaner and has a bolder radial luster) and another, sold as part of the JC Collection in that same sale realized \$7,200. Only six coins are graded higher, 3 in 66+ and 3 in 67. The last 67 sold in our May 2016 Regency Auction XVII for \$24,675. OUR ESTIMATES

The estimates you see published in this catalog are based on HAMMER. Keep in mind that a coin could be either low or high end for the grade, have stunning color or be dull, all of which radically affect a coin's value. Yes, there can be huge price differences within a grade, and we offer estimates as a guide so Collector's can have a better idea of value. One thing we will never do is offer low ball estimates in order to claim stronger sales.

These published estimates represent what Legend Rare Coin Auctions determines to be an approximate high wholesale value for the coin. The numbers are based upon current market values, similar trades, auction prices, published prices, and a consideration of the coin's quality. There is no guarantee that the estimated prices are minimums or are exactly what you can expect to get if you attempt to resell them wholesale.

We always advise you to view the coins you are interested in and calculate what you'll pay using as much information as possible. If you have any questions, please feel free to ask us. We are here to help you!

LOT 77 \$1 1889-CC PCGS MS63

One of the classic KEY DATE Morgan dollars that is in demand in all grades. Only 350,000 were struck and the vast majority of this date either went into circulation or were melted en masse as a result of the Pittman Act of 1918. While many dates were heavily represented in the GSA holdings of the early 1970s, only a single coin came from the vast quantities of CC dollars from that holding. Despite the rumors of three bags from other sources, after a look at the PCGS and NGC Population figures, these likely are just rumors.

The MS63 piece in the P.F.M. is about as high a grade as most Collector's could even hope to obtain for their sets. Dave Bowers calls the MS63 grade the "optimal collector grade" in his Red Book of Morgan dollars. The present coin displays a good amount of detail from a bold strike. Soft, satiny mint luster blooms on both sides imparting a bold visual effect for the assigned grade. A few teeny scuffs are noted on either side, and account for the grade, but do not detract from the general eye appeal.

PCGS 96, NGC 65. We think that there is some duplication in the population reports, inflated by resubmissions hoping for a higher grade. The majority of those finer are graded MS64, in fact, only two have graded finer than MS64 at PCGS, a single MS65 and the monster Eliasberg-Jack Lee MS68. The current PCGS Price Guide value in MS63 is \$51,500 and the most recent example sold in the 2018 FUN auction for \$42,011; just prior to that, we sold one in our December 2017 Regency Auction XXIV for \$49,938. If you are still looking for a CHOICE 89-CC for your set, this is a great chance to finally end your search!

After 30+ years of certification, this lone coin is the FINEST graded at PCGS. One look and you will fully agree.

This coin has been to CAC and we fully disagree with them not beaning it. We do not see the reason. You name it, this coin has it. The surfaces are as pristine as you will ever see. There are practically no microscopic marks that violate this coins awesome satiny surfaces. A thicker satiny like luster beams from allover. Both sides are untoned. Miss Liberty and the details are frosty and are well struck. Her cheek is perfect- something you do not hardly ever see. The eye appeal is crazy great!

PCGS 12, NGC 1. This piece is the only PCGS MS66+ graded, NONE have been graded finer. There is not even a Collector's Universe Value for an MS66+ (MS66 is only \$22,500). We can see this coin possibly setting a record price. The quality and eye appeal are certainly worth of that!

LOT 79 \$1 1889-S PCGS MS66 CAC

WOW! What an incredible SUPERB GEM 89-S. One of the lower mintage outputs from the western-most mint, this date does generally come nicely struck and lustrous, however abraided. The P.F.M. collector hand selected this amazing coin for its smooth, clean cheek, bold, blazing mint luster, and strong devices.

Well struck devices show only the slightest weakness at the tips of Liberty's curls. Blast white silver surfaces show not even a trace of tone and the eye appeal is as fresh today as it was when it came off the dies.

PCGS 92, NGC 32, CAC 20. This coin is ex FUN 2004 auction (and still housed in the OGH), where it realized \$4,830. The current PCGS Price Guide value is \$4,500 and the most recent CAC-approved MS66 sold in April 2016 for \$5,170. Only 11 coins are finer, 10 in 66+ and a single MS67--the last 66+ sold in July 2017 for \$8,813. Here is another coin that could see a run away price when it crosses the block! Good luck!

Of course, the Tailbar is one of the more popular Morgan varieties, so named for the die gauge that connects the eagle's tail to the wreath. Very rare in such a high grade, with only a handful finer.

PCGS 88, NGC 51, CAC 16. Only six of these are 64+, and only five coins are finer. This coin realized \$9,200 in 2013 and is the only MS64+ to sell in auction. If you are building a great Morgan set, this coin would make a wonderful addition! We are so pleased to be able to help place this near-GEM into another world-class cabinet of Morgan dollars. EX JACK LEE. We unhesitatingly pronounce this to be the FINEST 1891-O DMPL that exists. We can't imagine another coin even being remotely close in quality. Plus, this coin was from the greatest Morgan Collection ever assembled- the Jack Lee set. He spent years using his unlimited resources to find the vest best coins. One look and you can immediately see why this coin was chosen for his once in a lifetime collection.

At first glance, this coin reminds you of a Proof. The mirrors are a full 8" deep. The mirrors also have great clarity, are amazingly clean, and are highly reflective. When you twirl the coin, the mirrors look like a freshly made sheet of glass. There is a super light hint of original color-NOT haze spread evenly all over. The contrast is strong. Miss Liberty and the details are fully struck and have thick frost. Her cheek is full GEM + and has not even the slightest marks/lines. The eye appeal is memorable and awesome!

PCGS 2, NGC 0, CAC 2. Back in 06/2010 a PCGS MS65 DMPL (NO CAC) sold for \$57,500. This is quite possibly your only chance to buy the best 1891-O DMPL that exists for a very long time. LOT 94 \$1 1892-S PCGS MS65

While the mintage of 1,200,000 is not tiny, the number of Mint State survivors is. Clearly the 92-S was not saved in any quantity at time of issue, and whatever coins that were placed into circulation remained for many years. Your typical survivor tends to be in VF-AU grades, and whatever might have been held in government vaults were melted under the authority of the Pittman Act of 1918 that mandated the conversion of \$350,000,000 silver dollars into bullion. Any Mint State survivors exist by pure happenstance. One look at the PCGS and NGC combined populations, and you will see how truly rare this date is: in Mint State grades combined, 114 coins have been graded, from MS60 to MS68.

The presently offered MS65 is dusted with a clear silvery-white and pale gold iridescence that is highlighted by a bold, satiny mint frost. Sharply struck on both sides, the deals are crisp and complete. Liberty's cheek is nice and smooth, and both sides, even when closely inspected with a strong glass, are generally free of any marks, but we note some light die grease and light lines on the reverse.

PCGS 4, NGC 1. VERY RARE at this grade level, and excessively so any finer. The most recent example to sell realized \$192,000 in the February 2018 Long Beach Auction. We sold a marvelous PCGS MS64 CAC for \$293,750 in July 2017. Our consignor purchased this coin in October 2007. PCGS has graded just 10 coins finer, so we wish you the best of luck finding a higher grade example! If you are looking for a MS65 for your set, be sure to take a look at this example and be prepared to bid liberally!

LOT 95 \$1 1893 PCGS MS65

A better date Morgan dollar that is quite scarce in the GEM grades. A bold, rolling cartwheel luster blooms on both sides with a sharp strike. Mostly a bold cartwheel luster with accents of PL reflectivity. A swath of golden tone can be seen on the obverse and the reverse is fully frosted. Ms. Liberty's cheek is smooth and

fully frosted with no breaks in the frost. The eye appeal is very nice.

PCGS 240, NGC 82. PCGS has graded only 25 coins finer--the finest being graded MS66. The most recent MS65 graded by PCGS, brought \$3,760 in a February 2018 auction and generally these have been bringing in the \$4,000 range. The current PCGS Price Guide value is listed at \$4,750, and anything finer could cost into the five figures. A very nice GEM that will see stiff competition from bidders!

LOT 96 \$1 1893-CC PCGS MS64

Due to the Panic of 1893, the mintages of silver dollars dropped at all mints, the 93-CC saw a mintage of 677,000, about a 50% drop in output from the prior year. It is a KEY date in any Mint State grade, and especially so in near gem grades. The P.F.M. 93-CC has a vibrant mint luster that swirls on both

sides, accenting the lightest dusting of pewter and gold. Well struck with bold details, especially well defined in the central devices. As might be expected at the MS64 level, there are some very minor bag marks. None are horribly distracting on their own and the eye appeal is nicer than many out there.

PCGS 566, NGC 196. First, looking at the Population figures, there is no doubt that there are lots of duplication reported at the services. Above MS64, the populations drop dramatically so we can only imagine how many MS64s have been resubmitted in hopes of receiving a 65 grade. The most recent non-CAC PCGS coins sold for \$12,000 (December 2017 and January 2018). The current PCGS Price Guide value is \$15,000 and it jumps to \$31,500 in 64+ and \$80,000 in 65-making MS64 the highest grade most Collector's could ever hope to acquire for their sets. As such we think there will be very serious bidding from many astute Collector's looking to finally fill this hole in their sets!

LOT 97 \$1 1893-O PCGS MS64

Only 300,000 silver dollars were struck for the 93-O issue, and it is not only scarce in all grades, but it is exceptionally hard to find in such high grades, and EXTREMELY RARE any finer! The presently offered near-GEM has a very high-end look. First the satiny mint frost has a glowing, silvery sheen that enlivens the smooth surfaces. A dusting of pearly frost can be seen at certain angles and there are a few teeny ticks on the cheek and in the fields, but the eye appeal is generally nice overall.

PCGS 89, NGC 29. There are only ten PCGS coins are graded finer. The most recent example sold for \$10,800 in November 2017. The P.F.M. collector paid \$13,800 for this coin in March 2010. The current PCGS Price Guide is \$17,000 and a 64+ brought \$42,300 and any 65 is a \$150,000+ coin! Seems a nice 64 like the present example offers a lot of value!

LOT 98 \$1 1893-S PCGS AU58

Ex Shrike Set. The KING of the Morgan dollar series, the rarest date struck for circulation, and an important KEY date in ANY GRADE. Only 100,000 were struck, the lowest of all where surviving coins are known (there are 12,000 1895 Philadelphia mint issues listed as having been coined, but none of these are known).

Only light friction on the surfaces keep this lustrous piece from a full Mint State grade. Under a strong glass we note some very fine lines and a scuff or two that we describe for full disclosure. A pale light gold color can be seen on the surfaces when the the lustrous surfaces are viewed in a light source.

PCGS 13, NGC 15. This is the most recent example to sell in auction, realizing \$80,500 in the 2011 FUN Auction that featured the Shrike Set and goin back to 2003, only two other PCGS AU58s have ever sold in auction! Any Mint State coin is a six-figure coin, with the most recent MS60, an NGC coin selling for \$123,375 in September 2013. We think the PCGS Price Guide of \$55,000 is just plain wrong. For an example of this KEY Morgan not to appear in over seven years, this is an opportunity not to be taken lightly! You can now finally upgrade your collection! Good luck!

LOT 99 \$1 1894 PCGS MS64 CAC

As the nation's economy stagnated following the Panic of 1893, Morgan dollar mintages remained low--in fact, the Philly mint output in 1894 was limited to 110,000--only 10,000 more than the 93-S.

The presently offered near-GEM has a pale gold and lavender pastel iridescence that

is brought out by a remarkable cartwheel luster. Totally original surfaces show a few tiny ticks, but the eye appeal is superb for the grade! Housed in an old green tag holder.

PCGS 266, NGC 119, CAC 45. In September 2010, this coin sold for \$8,050 and the current PCGS Price Guide value is \$9,000. We figure that there will be intense bidding to add this gem a high ranking set.

A semi-key date that is quite rare in such a lofty grade. A more than decent near-gem quality coin that has a brilliant, satiny luster that glows when rotated. Well struck, save for some minor softness in the curls and eagle's breast feathers. Ms. Liberty's cheek is smooth and clean, with only a small mark or two. The eye

appeal is strong with just a dusting of pearly-gold iridescence. We are not entirely sure why this coin did not CAC.

PCGS 358, NGC 234. The current PCGS Price Guide value is \$8,750. There were two MS64s that sold in the recent 2018 FUN auction, an NGC coin that sold for \$7,500 and a PCGS that brought \$6,000, but previously non-CAC PCGS coins have sold in the \$7,000 to \$8,000 with some examples breaking the \$10,000 level. If you can find a 65 it will cost you around \$50,000! A wonderful coin that deserves a home in another high ranking set.

PCGS 161, NGC 40. VERY RARE any finer. The most recent sold in the FUN 2018 auction for \$4,560 and one sold in December 2017 for \$5,400. The current PCGS Price Guide value is listed at \$6,250. This eye appealing GEM should see strong bidding.

OUR ESTIMATES

The estimates you see published in this catalog are based on HAMMER. Keep in mind that a coin could be either low or high end for the grade, have stunning color or be dull, all of which radically affect a coin's value. Yes, there can be huge price differences within a grade, and we offer estimates as a guide so Collector's can have a better idea of value. One thing we will never do is offer low ball estimates in order to claim stronger sales.

These published estimates represent what Legend Rare Coin Auctions determines to be an approximate high wholesale value for the coin. The numbers are based upon current market values, similar trades, auction prices, published prices, and a consideration of the coin's quality. There is no guarantee that the estimated prices are minimums or are exactly what you can expect to get if you attempt to resell them wholesale.

We always advise you to view the coins you are interested in and calculate what you'll pay using as much information as possible. If you have any questions, please feel free to ask us. We are here to help you!

LOT 102 \$1 1895-O PCGS MS63

A famous, KEY DATE Morgan dollar that saw a mintage of only 350,000. Clearly the vast majority of these were put into circulation where they remained, the typical survivor is apt to be moderately to heavily worn. Mint State survivors are VERY RARE indeed! Fully CHOICE pieces like this are a dream for most Collector's, and very rarely come around.

The presently offered CHOICE Mint State coin has a bold, frosty mint luster that radiates brilliantly on both sides. A pearly sheen shows off a delicate clear gold that highlights a bold strike for the date. Subtle contact can be seen when rotated at various angles, but that is to be expected at the MS63 grade level.

PCGS 19, NGC 15. The most recent example to sell in auction realized \$50,400 in the 2018 FUN auction. Going back to 2000, there have only been 15 appearances of a PCGS graded MS63 95-O. The current PCGS Price Guide value is listed at \$55,000 and with only 24 coins graded finer in all grades, anything finer will cost significantly more. What a great opportunity for any advanced Morgan dollar specialist.

PCGS# 7236 | ESTIMATE: \$45,000+

LOT 103 \$1 1895-S PCGS MS65

Ranking near the top of the Population Report at PCGS, only seven coins are graded finer. Like many other dates in the 1890s, the mintages were lower than usual following the Panic of 1893 and only 400,000 Morgan dollars were coined at the western most facility.

The fields show a moderate reflection

amplified by a brilliant cartwheel luster. Typical to the date, there are a number of die striations seen in the fields of both sides and the devices are crispy struck with bold definition. Under close inspection with a glass, we note some hidden bag marks. Most Mint State graded coins came from a few bags that were released in 1942 and into the 50s; and the Redfield hoard had perhaps a full bag. Examples from those holdings often come heavily bagmarked. The present coin is of hand selected quality and boasts a bold visual appeal for the date.

PCGS 38, NGC 10. The current PCGS Price Guide value is listed at \$19,000. There is a very wide range of auction results for GEM examples of this scarce date. Case in point, the most recent sold for \$12,925 in the 2017 ANA auction. But going back to 2004, most PCGS coins have sold for \$15,000+ with records in 2004, 2005, 2007, and 2008 for over \$25,000! This very attractive coin is well suited for any high-end collection of Morgan Dollars. It was hand selected by the PFM collector, and now will have a chance to represent this date in another carefully assembled set! Good luck!

LOT 104 \$1 1896 PCGS MS67 CAC

The 1896 is one of those dates that even in the lofty MS67 grade is ubiquitous, giving Collector's a chance to carefully select examples for their sets. The PFM collector did just that! Especially satiny and lustrous, this untoned SUPERB GEM has a strong strike and frosty devices that really captivate the eye.

PCGS 225, NGC 72, CAC 71. VERY RARE any finer! The last one to sell in auction realized \$2,820 (a moderately toned example) in our Regency Auction 25. Before that, one sold in July 2017 in our Regency Sale, for \$1,938. The current PCGS Price Guide value is \$1,950. Only 28 coins are graded finer, most are in 67+ and only 2 are in 68. This SUPERB GEM will entice even the pickiest of Collector's.

LOT 105 \$1 1896-O PCGS MS64

Here is a coin that was clearly hand selected by a very fastidious collector—one look at it and you know that it is better than most seen. For the date, the strike is quite bold. Liberty's curls and eagle's breast feathers show only the slightest hint of weakness. The luster is frosty, displaying a pearlescent, satin glow. The devices and fields are both devoid of any serious marks or ticks. A glass does reveal a few teeny ticks and a single minor hairline along the cheekbone, all of which are taken into account by the PCGS assigned grade.

The 1896-O is one of the most lackluster, poorly struck date in the entire series, and as expert Wayne Miller wrote, "the 1896-O is the rarest of all Morgan dollars in truly gem condition." Most of the 4.9 million struck were released directly into circulation, where they were to remain for a long time. Many probably were melted in pursuant to the 1918 Pittman Act, and though a few bags were released from Treasury holdings in the 50s and 60s, they were typically in lower Mint State grades, MS60-62.

PCGS 29, NGC 11. No doubt these figures include some duplication in the attempt of receiving an MS65 grade. This effort has been clearly futile, as in over 30 years of operations, combined, PCGS and NGC have graded a half dozen coins finer--Wayne Miller's words are clearly proven by the grading statistics. The most recent example to sell in auction realized \$30,000 in the 2018 FUN auction. Prior to that, one sold in November 2013 for \$32,900. The current Collector's Universe value is listed at \$40,000. Even the Coronet Collection the #1 PCGS Hall of Fame set was also a 64 and sold in 2015 for \$47,000 in our October 2015 Regency Auction XIV. Keep in mind that nothing finer has sold since 2005! This near-GEM example of this classic Morgan dollar condition rarity will certainly attract strong bidding from any advanced collector! We can see it bringing a very strong price when the the gavel falls.

LOT 106 \$1 1896-S PCGS MS65

With a 5 million coin mintage, one might think the 96-S is a common date. However, in part to extensive circulation and wholesale melting in 1918, very few survive in higher grade Mint State. Offering an above average strike for the date, only light weakness is noted in Liberty's hair curls and the eagle's breast. The cheek is smooth

and pleasing overall, we note only the lightest tiny ticks here and there, wholly acceptable for the assigned grade. The eye appeal is excellent.

PCGS 70, NGC 14. VERY RARE any finer and we believe there is duplication in the Population Report. The last one to sell in auction brought only \$8,400 in the 2018 FUN Auction. Prior to that, these were regularly selling in excess of \$10,000. The current PCGS Price Guide value is listed at \$13,000 and with only 8 graded higher at PCGS, a 65+ will cost \$20,000+ and certainly a 66 would cost around \$75,000. An important opportunity for the advanced Morgan collector.

The mirrors are so blinding on this GEM you really do need Ray Bans to view it! This coin has been to CAC and we are beside ourselves as to why they did not sticker it (we see no reason).

Deep 4"+ mirrors are bold and beam wildly from all over. You do NOT have to imagine the mirrors. In fact, the

mirrors border on full DMPL status. The mirrors exhibit remarkable clarity, cleanliness, and as we mentioned, have a nearly blinding reflection. When you twirl this coin the mirrors have a tremendous "deep dish" cartwheel look. There is strong contrast. Both sides are untoned. Miss Liberty and the details are fully struck and have thick white frost. The eye appeal is jaw dropping!

Morgan dollar legend John Love, you know this impressive coin has a an equally impressive pedigree.

PCGS 124, NGC 27. The last example sold in the 2018 FUN auction for \$3,360 and the current Collector's Universe value is listed at \$3,250. With only 18 graded higher, this is a great grade for Collector's to add a very high grade piece without paying a high price.

PCGS# 7270 | ESTIMATE: \$2,800+

LOT 122 \$1 1901 PCGS MS63

What a great coin for the collector! Unlike many other dates that were held in quantity in Treasury vaults that were released in the 1940s to the 1960s. Either the vast majority of the nearly seven million coins struck went directly into circulation or the mass quantities that were stored in the Treasury vaults were melted under the orders from

the 1918 Pittman Act. Either way, not counting the 1895 Proof Only issue, this is the RAREST Philadelphia Mint issue to find in Mint State.

This is a fully CHOICE example. Richly lustrous, bold satiny mint frost throughout graces both sides. Minimally scuffed or marked, none of the few tiny ticks have a negative affect on the overall PQ for the grade eye appeal.

PCGS 131, NGC 99. The most recent auction sale of a PCGS MS63 was in March 2017 where one sold for \$10,575. One sold in November 2016 for \$24,675, and the current PCGS Price Guide value is listed at \$13,500 and this coin could possibly exceed that level. Keep in mind a 64 will cost over \$50,000!

5. The most recent example sold in auction in the 2017 Central States auction. A non-CAC example brought \$11,750 in the 2016 ANA auction, and the current Collector's Universe value is listed at \$15,000. Only four coins are graded finer. and any PCGS-graded example any finer will cost \$30,000+. A real prize for an advanced Morgan dollar collector.

\$1 1901-S PCGS MS66 CAC

Ranking high among the the survivors, the present Premium Quality GEM has been off the market for nearly a generation! It is highly lustrous with a boom cartwheel frost. Totally untoned both sides have bold strikes. Satiny smooth surfaces are clean and free of any distracting marks and the cheek is especially clean and

smooth, quality that would please even the pickiest old time collector.

PCGS 39, NGC 6, CAC 9. No CAC-approved example has ever sold in auction. This high-end GEM sold for \$9,775 back in July 2003. We sold an example in December 2015 for \$9,400 and the most recent example to sell in auction was in the January 2018 FUN sale where two were offered, one at \$5,520 and the other at \$7,200. The current Collector's Universe value is listed at \$8,250. A wonderful coin, and remember only eight coins are graded finer at PCGS.

LOT 126 \$1 1902 PCGS MS66 PL CAC

Beaming prooflike luster offers watery, mirrorlike reflection in the fields. Delicate iridescent gold-silver tone dusts both sides of this PQ GEM. Sharply struck on both the obverse and reverse, the every detail is crisply defined. The cheek is frosty and totally smooth, the quality is very High-end!

PCGS 9, NGC 1, CAC 2. There are NO PLs graded finer at either service. The current Collector's Universe value is listed at \$7,500 and only two PCGS examples have ever sold in auction, both non-CAC. The most recent sold in November 2017 for \$4,560 and the other sold back in January 2001 for \$4,830. Clearly these DO NOT appear with any frequency! Good luck!

LOT 127 \$1 1902-O PCGS MS67

A billowy, frosty SUPERB GEM that is tied for finest graded. Nicely struck for the date the central devices show very full, complete details. The cheek is satiny and clean, free of any serious marks or flaws of any kind or size. Light iridescent toning can be seen in areas, attesting to originality. The eye appeal is very nice for the date.

PCGS 32, NGC 27. Three PCGS-graded coins sold in the 2017 FUN auction: 2 CAC coins sold for \$12,925 and \$16,450; and a non-CAC coin that sold for \$9,106. Examples have generally sold in the low-five figures and the current Collector's Universe value is listed at \$15,000. Here is a very pleasing example that is among the finest of the date. Bound for another high ranking Registry Set.

PCGS# 7280 | ESTIMATE: \$9,000+

LOT 128 \$1 1902-S PCGS MS66

A satiny mint luster glows with a vibrant cartwheel swirl on both sides of this Premium GEM. The brilliance is impressive given that the date usually comes with a "greasy" look. Slightly weak in the central devices as typically seen on examples of this date. The planchet shows some minor striations as part of the manufacturing process

and both sides are totally devoid of any serious marks.

PCGS 47, NGC 8. Only 11 coins have graded finer. The most recent 1902-S in MS66 was an NGC-graded coin that realized \$14,400 in the 2018 FUN auction. Prior to that, we sold a PCGS coin for \$4,818. The current PCGS Price Guide lists a value of \$6,250. VERY RARE any finer, a mere 11 coins are graded higher, and the most recent MS67 to sell in auction was our sale of the Clapp-Eliasberg-Jack Lee-Hansen- Casper- Arno- Sunnywood/Simpson collection coin that sold for \$52,875 in our October 2014 Regency Auction.

LOT 130 \$1 1903-O PCGS MS67

Billowing mint brilliance smoothly rolls along on both sides. The devices are sharply struck and displaying a totally original peachy-rosegold color in areas on both sides. The eye appeal is excellent!

PCGS 86, NGC 50. The current Collector's Universe value is listed at \$4,000. Only a

single MS67+ is graded finer, and that coin has never sold in auction. Good luck!

The 1903-O was once the KING of the Morgan dollars, out ranking any other Morgan dollar rarity. That was before October 1962. That month what happened is numismatic history: mint sewn original bags were discovered. The number of Mint State coins went from perhaps 10 to tens of thousands! Today, over fifty years after the hoard was discovered, the majority were in lower Mint State grades. Today, even in grades up to and including MS66, the 1903-O is fairly common. It is VERY SCARCE in MS67 and UNIQUE any finer (there is only a single MS67+ at PCGS).

The current PCGS Price Guide value is listed at \$16,000. VERY RARE any finer! A handful of 67 and a 67+ sit at the apex of the grading scale, with the Clapp-Eliasberg-Jack Lee- Arno- Sunnywood/Simpson coin that we sold for \$74,438 in October 2014 as the finest.

One of the FINEST examples of this Top 100 variety. This is a RARE variety, mostly seen in lower grades. It is particularly rare in AU and finer grades, with just a few finer.

This variety was created when a mint employee mistakenly used an S punch for a quarter. Light friction is seen on both sides. Very pleasing light gray

color and accents of lilac and gold.

PCGS 8, NGC 6. This pleasing coin sold for \$6,325 in the August 2010 ANA sale, as part of the Snake River Collection. Twenty coins are graded finer, with a UNIQUE MS62 being the finest. The current PCGS Price Guide value is listed at \$7,500 and keep in mind that the values go into the five figures any finer. Yet another darling SUPERB GEM Morgan from the PFM Collection.

Exquisite surfaces have no real hits. A few trivial frost breaks/ light ticks are all you can see. The surfaces are super sleek and smooth. For an O Mint, the luster is unusually bold and is full cartwheel like. Both

sides are mostly white with a splash of pale gold. Miss Liberty and the details are sharply struck and do stand out. The eye appeal is wonderful!

PCGS 50, NGC 32, CAC 17. PCGS has graded NONE higher. This is really hard to believe, the last PCGS CAC piece to sell in auction (not the toned Northern Lights coin which realized \$39,000) brought \$5,405 in our 2015 Coronet Collection sale. Prior to that, the last one sold in 01/2011. It is a myth this is a commoner date- especially in such a lofty grade!

Described in our sale of the Coronet Collction as: "This amazing 1904-S looks like it's been extra carefully stored from the day it left the bank until the day it was encapsulated. A true borderline MS68!

Absolutely perfect surfaces will pass every test. You won't find problems of any kind. A decent luster shows off a moderate, mellow mix of original golden brown/deep champagne/pale olive evenly spread all over. Miss Liberty and the details are fully struck and the eye appeal is pleasing! "

To that we will add that this coin has an impressive provenance, first being a part of the Anne Kate Collection, then going into the Coronet Collection. In the course of a dozen years, this marvelous GEM has resided in three major collections of Morgan dollars.

PCGS 2, NGC 1, CAC 1. This world class coin realized \$70,500 in our October 2015 Regency Auction on an estimate of \$45,000 to \$50,000. LOT 136 \$1 1921 MORGAN. PCGS MS66+ CAC

After a 17 year hiatus of striking silver dollars, after the widespread melting of silver dollars under the Pittman Act, the Mint began striking dollars again. By the time 1921 rolled around, new hubs had to be created, slightly different in the depth of the details than on the 1878-1904. While nearly 45 million

dollars were struck in Philadelphia, and it is the MOST common issue, in high-end GEM grades as here it is VERY RARE. Shimmering satin brilliance dances on the extremely high-end surfaces. Mark free and displaying on the lightest iridescent pearly-sliver gold. The devices are sharp and completely rendered. What a beautiful, High-end GEM!

PCGS 766, NGC 666, CAC 263. In MS66+, as here, PCGS has graded 117 examples with only 16 finer. The current PCGS Price Guide value is listed at \$1,450 and this SUPERB coin sold for \$1,880 in November 2013. OUR ESTIMATES

The estimates you see published in this catalog are based on HAMMER. Keep in mind that a coin could be either low or high end for the grade, have stunning color or be dull, all of which radically affect a coin's value. Yes, there can be huge price differences within a grade, and we offer estimates as a guide so Collector's can have a better idea of value. One thing we will never do is offer low ball estimates in order to claim stronger sales.

These published estimates represent what Legend Rare Coin Auctions determines to be an approximate high wholesale value for the coin. The numbers are based upon current market values, similar trades, auction prices, published prices, and a consideration of the coin's quality. There is no guarantee that the estimated prices are minimums or are exactly what you can expect to get if you attempt to resell them wholesale.

We always advise you to view the coins you are interested in and calculate what you'll pay using as much information as possible. If you have any questions, please feel free to ask us. We are here to help you!

While a smaller mintage by Morgan dollar standards, Collector's are lucky that a large percentage of the mintage was stored as specie in the U.S. Treasury, only to be discovered in the 1960s during a government audit. Tens of thousands of Mint State examples from fresh mint bags were distributed via the GSA auctions. Undoubtedly, the presently offered SUPERB GEM came from one of those bags. Brilliantly lustrous and boasting a strong, frosty mint bloom that blankets both sides. The details are fully rendered by an exacting blow from the dies. Even the pickiest of "old timers" will instantly fall in love with the cheek's clean look.

PCGS 1865, NGC 1388, CAC 401. PCGS has graded 249 in MS66+ and NGC has 94 on their report. The most recent PCGS/CAC coin sold in November 2017 for \$2,400 (that coin was not blast white like the present coin and had a light iridescent tone). The current CU value is \$1,900 and keep in mind the value will more than double in MS67.

The WOW factor of this coin is off the charts! One look and there is little to question as to why this coin ranks in the top 2% of all 1881-S Morgan's ever graded.

Only one tiny reverse tick keeps this coin from being a solid MS69. Overall, there are zero impairments of ANY size, ANY where. The surfaces are also borderline

prooflike. You do NOT have to imagine the mirrors. The luster is intense too. Both sides are a mix of original light silver and pale gold colors. Miss Liberty and the details are fully struck and have thick frost. Her cheek is amazing and the eye appeal is incredible!

PCGS 160, NGC 267, CAC 118. The last PCGS CAC piece to sell in auction brought \$14,400 January of 2018. The current Collector's Universe Value is \$19,500. While there are a few MS68+ MS Morgan's out there, few will have the perfection this coin displays!

The mirrors do display mind boggling clarity and have blinding flash. Just a few scattered trivial ticks (to be expected) can be found. There is strong contrast visible. Miss Liberty and every detail not only are fully struck, they have killer thick bright frosting.

PCGS 12, NGC 8. Looking this crazy deeply mirrored and black and white, we see this coin selling cheap. The current Collector's Universe value is \$11,000. We know we can NOT find another one like this! This will be a wonderful addition to ANY GEM DMPL Collection.

We fully agree this SUPERB GEM is not only tied but possibly is the FINEST 1884-O DMPL graded to date! Super high-end quality. There is only one microscopic tick we can see. The mirrors are intense and beam incredibly from all over. They are a good 8++" in depth, are crystal clear, are remarkably clean overall, and have a nearly blinding reflection. When you twirl the coin, the mirrors look like they belong to a proof coin. Miss Liberty and every detail are fully struck and are thickly frosted. Her

cheek is amazing and will please any picky "old timer." The eye appeal is jaw dropping!

PCGS 59, NGC 11, CAC 12. PCGS has graded only 3 coins in MS66+ DMPL. The last 1884-O PCGS CAC MS66+ DMPL to sell in auction brought \$4,888 in December 2011. It might as well have been a decade ago! Besides being the only one around, this coin had all the bells and whistles of a High-end DMPL. We think there will be strong bidding and possibly even a record price realized here.

What a High-end, premium quality example for the grade!

This is a very RARE Mint State survivor of this major condition rarity, and several times looking at this CHOICE coin, we asked ourselves "why isn't this a 63?" While we make no guarantees that this coin will ever grade a 63, we have seen coins that are not this nice residing in a 63 holder.

Brilliant, rolling cartwheel luster beams from all over.
Untoned surfaces have a billowing bloom in the fields that
does provide some contrast to the fully struck and frosted
reliefs. Ms. Liberty and the eagle possess very fully defined
features. For the grade, the eye appeal is wonderful!

PCGS 134, NGC 116, CAC 9. There are only three graded MS62+ at PCGS. The last regular PCGS MS62 CAC to sell was in our September 2016 auction, where it realized \$20,563. Only one 62+ has sold in auction, which was the toned Simpson coin in the notoriously weak 2015 FUN auction. That coin realized \$21,150. RARE any finer, and keep in mind a 63 will cost \$40,000+ without CAC. Bound for a wonderful Choice BU or finer set of Morgan dollars and we do expect very strong bidding for this beauty!

\$1 1886 PCGS MS67+ CAC

SUPERB in every possible way! Sharply struck, fully lustrous and nicely frosted devices are unmarred by any serious marks or ticks. Both sides have the narrowest of halos of clear gold. The surfaces are pristine and really cannot be beat in terms of eye appeal.

PCGS 519, NGC 978, CAC 333. In MS67+ PCGS has graded 66 and NGC 24. The last PCGS/CAC coin sold for \$2,400 and the current PCGS Price Guide value is \$2,500. There are 9 coins finer at PCGS, 8 in 68 and 1 in 68+. With its exceptional good looks this SUPERB dollar will find itself at home in any high-end Morgan set.

\$1 1888 NGC MS67

Despite a mintage in excess of 19,000,000, the 1888 is an unsung condition rarity in SUPERB GEM grade.

A billowing mint brilliance really does bloom dramatically when you rotate this untoned beauty in a light. Only under a powerful glass can you locate the one or two tiny ticks on the surfaces and there is only the slightest touch of weakness of strike.

PCGS 48, NGC 89. There is a very wide range of APRs for NGC graded examples; the most recent selling for \$3,120 in the 2018 FUN auction. Most have sold for over \$4,000. The current CU value is listed at \$5,000 and only three are finer at NGC, none at PCGS.

PCGS# 7182 | ESTIMATE: \$3,000+

LOT 156 \$1 1889-S NGC MS66

A lower mintage date, which saw only 700,000 dollars struck and while available in lower Mint State grades, this MS66 is tied for FINEST graded at NGC. Semi-prooflike reflective luster flashes brilliantly with the rolling cartwheels. Sharply struck, both sides are delicately framed by a band of dappled toning at the rims. Ms. Liberty's cheek is very nicely frosted with no serious marks to harm the wonderful eye appeal.

PCGS 92, NGC 32. The most recent MS66 to sell in auction was a PCGS coin, selling for \$3,120 in the 2018 FUN auction. The most recent NGC coin was a record for the grade at \$8,225 in 2015. The current CU value is listed at \$4,500. Here is a very nice looking 89-S that will fit nicely in any high-end set.

PCGS# 7194 | ESTIMATE: \$3,000+

LOT 157 \$1 1893-S PCGS F12 CAC

Presented here is a very handsome, original, and problem free example of this important key date issue. Always in strong demand from Collector's, in all grades from damaged problem coins all the way to GEM Mint State. Only 100,000 examples were struck and they are very scarce in all grades. This one has a great "circ-cam" look with deeper toned fields that surround lighter tan devices.

PCGS 511, NGC 251, CAC 51. The

current PCGS Price Guide value is listed at \$3,850 and this very attractive example should see very strong bidding from budget minded Collector's to finish their set with a CAC-approved example.

LOT 158 \$1 1897-S PCGS MS66 CAC

High-end! Even the pickiest of old time Collector's will enjoy the PQ nature of this GEM 97-S dollar! Brilliant mint luster beams from satin smooth surfaces. Even the cheek is clean and offering a fresh, frosty texture. A delicate, pale gold, soft peach, and icy, silver-blue iridescence are gently dusted on both sides, a touch deeper on the reverse. Very eye appealing!

PCGS 351, NGC 116, CAC 77. The most recent PCGS/CAC MS66 sold for \$1,200 in November 2017. Prior to that, the last PCGS/CAC coin sold in our offering of the

A.W. Collection, where it sold for \$3,643. The current CU value is listed at \$1,300. Very scarce any finer!

Sharply struck devices are frosty and there is a neat amount of contrast. The eye appeal is very nice and high-end!

PCGS 1, NGC 0. The current PCGS Price Guide value is listed at \$7,000 and there is only a single appearance for this coin in a September 2017 auction. With the market stronger today, it should exceed that level.

LOT 160 \$1 1921-S MORGAN. PCGS MS66+ CAC

No question this piece ranks as one of the finest graded-if not the finest graded! It blows away anything this cataloger has ever seen. Considering 21-S Morgan's are not generally nice, that is a powerful statement! This is also the first 21-S that really has excited us.

Save for one tiny invisible tick on the reverse, this coin has absolutely flawless surfaces. We doubt it ever saw one second of circulation. The surfaces are

also satiny smooth. A decent luster for the date shows off totally original pale olive toning that is splashed around mostly the obverse. Miss Liberty and the details are exceptionally struck and actually do display light frost. Her cheek is amazingly clean and smooth. The eye appeal is outstanding! PCGS 113 NGC 64, CAC 13. PCGS has graded 6 coins MS66+. We can't imagine any of the others come close to this coins SUPER High-end quality and charm. If we were building the Coronet set today, this piece would be the 21-S for the set. The current Collector's Universe value is \$13,000. Opportunity knocks loud here if you seek the ultimate 1921-S silver dollar!

LOT 161 \$1 1890 PCGS PR66 CAC

Totally original and very pretty, this GEM Brilliant Proof 1890 dollar has a wonderful look. Deeply toned with amber and rose toning at the central devices with bands of blue, teal, and lilac at the centers. Flashy, beaming mirrors offer good reflection and clarity. A wonderful example from a low mintage of only 590 and RARE so fine!

PCGS 13, NGC 24, CAC 2. RARE and underrated! DO NOT LET the Populations fool you! Prior to the one the that sold in March 2017, NO PCGS PR66 had sold since January 2001! An NGC PR66 has not sold since April 2002! Clearly these are far rarer than you would think. As a PCGS CAC coin, it should sell for around the current Collector's Universe value of \$7,600. Keep in mind a PR67 or a PR66 CAM will cost into the five figures!

PCGS# 7325 | ESTIMATE: \$6,500+

LOT 162 \$1 1893 PCGS PR65 CAM CAC

A marvelous GEM Proof 1893 dollar. Deeply reflective mirrors beam with bold clarity and a very glassy flash. The details do show some light weakness in the centers, which is typical for the date. A light halo of very light golden tone adds to the excellent eye appeal. What an amazing looking GEM PROOF!

Only 792 were struck. PCGS 6, NGC 10, CAC 5. No CAC approved PR65 CAM has ever graded--neither a PCGS nor an NGC. the most recent PCGS coin sold in October 2012 for nearly \$8,000. The current PCGS Price Guide lists a price of \$6,750. Here is a very attractive GEM Morgan Proof that will be very well suited for a Proof Type set or specialized set of Proof dollars.

LOT 163 \$1 1894 PCGS PR67 DCAM

Sit back and dream about the most stunning DCameo Proof you could ever want, then open your eyes and this coin has answered your dreams! What a monster piece!

Ultra deep (and we mean ULTRA deep) mirrors beam boldly from all over. The mirrors are crystal clear, super clean, and are nearly blinding with reflection. We are not really sure what CAC did not like here. We see NO problems. When you twirl the coin, the mirrors look like a flowing river of flash. The contrast is stunning. Miss Liberty and the details are thickly frosted and are fully struck. The eye appeal is mesmerizing!

PCGS 3, NGC 0. PCGS has graded only coin higher- a PR68+. We certainly never see these offered in real DCameo like this. The current Collector's Universe Value is \$35,000. This coin will make an outstanding addition to any GEM PR Cameo set.

PCGS# 97329 | ESTIMATE: \$25,000+

LOT 164 \$1 1896 NGC PR65

A very attractively toned Proof Morgan. Bold, watery mirrors beam with deep clear mirrors. While the multicolored toning is rich and "thick" it does not mar the depth or clarity of the mirrors. Too many toned proofs of the era are not flashy, as their mirrors are impaired by the toning. Again, that is NOT the case here, the eye appeal is superb!

Only 762 proofs were struck. PCGS 38, NGC 30. The last five PR65 examples of this date to sell in public auction were

NGC graded, the most recent being the CAC-approved Rev. McClure coin that sold in June 2016 for nearly \$10,000. Prior to that, one sold in June 2013 for \$5,581 and going back to 2005, these have sold in the \$4,830 and \$5,750 range. No PCGS coin has sold in a major auction since May 2005! Clearly this is a very scarce issue in this grade, and we think this coin will surpass the current Collector's Universe value of \$5,900. A great opportunity for the collector of GEM Proof Morgan dollars!

OUR ESTIMATES

The estimates you see published in this catalog are based on HAMMER. Keep in mind that a coin could be either low or high end for the grade, have stunning color or be dull, all of which radically affect a coin's value. Yes, there can be huge price differences within a grade, and we offer estimates as a guide so Collector's can have a better idea of value. One thing we will never do is offer low ball estimates in order to claim stronger sales.

These published estimates represent what Legend Rare Coin Auctions determines to be an approximate high wholesale value for the coin. The numbers are based upon current market values, similar trades, auction prices, published prices, and a consideration of the coin's quality. There is no guarantee that the estimated prices are minimums or are exactly what you can expect to get if you attempt to resell them wholesale.

We always advise you to view the coins you are interested in and calculate what you'll pay using as much information as possible. If you have any questions, please feel free to ask us. We are here to help you!

LOT 165 \$1 1904 PCGS PR67+ CAC

No question, this is one of the FINEST 1904 Proof Morgans that exists. Everything from its killer colors to its mirrors are awesome!

Superior deep mirrors beam wildly from all over. The mirrors enjoy great clarity, cleanliness, and are intensely reflective. They possess as bold a "rolling watery" look as you will ever see. Phenomenal and totally original colors bestowed by Mother Nature include: warm amber/ evergreen/purple/navy/blue/gold that swirl all over. We believe that the small toning dot on the eagle's breast is all that keeps this coin from grading PR68. Miss Liberty and the details are sharply struck and actually do have light silver frost. The eye appeal is like the quality-phenomenal!

ONLY 650 were minted. PCGS 9, NGC 24, CAC 5. PCGS has graded only 3 in PR67+. Prior to this coin selling in our December 2016 Regency Auction for \$34,075, it is critical to note the last regular PCGS PR67 CAC 1904 brought \$25,300 nearly FIVE years ago! The current Collector's Universe is only \$30,000 for this coin. We believe there will be strong bidding easily topping the CU number as you never ever see a 1904 Proof Morgan of this caliber offered. Good luck!

LOT 166 \$1 1878-CC PCGS MS66+ CAC

A beautifully toned SUPERB GEM that displays a boldly toned obverse that shows off shades of pastel aqua-blue, lime-green, gold, and plum-red that is pleasingly mixed across smooth, virtually mark free surfaces. Both sides offer a bold frosty luster that brings life to the obverse colors and the crisply defined devices. This remarkable coin may have been from the GSA holdings, although most 78-CCs from that source did not have the strong eye appeal of this beauty.

PCGS 368, NGC 222, CAC 60. In MS66+ as here, PCGS has graded 48, while NGC has graded 9. There are fifteen coins COMBINED finer between NGC and PCGS, all MS67. This coin sold in the 2016 ANA auction for \$15,275. We sold a similarly graded although not as toned example, for \$10,575 in our December 2017 Regency Auction and the current Collector's Universe value is listed at \$13,500. We can see this SUPERB GEM selling for a price close to its 2016 realization again. Good luck!

While "only" a 64, this coin is a GEM! With a fully toned obverse, awash in gorgeous colors that span the entire spectrum, we rate the toning a 9+ on our 10-point scale. LOT 168 \$1 1879-S PCGS MS65 CAC

Here is a superb bag toned GEM Morgan. It is an old friend to LRCA, having been sold previously in our Regency Auction XII, lot 80, where we cataloged it as follows:

"Great burlap bag toning covers two thirds of the obverse. The technical aspects of this coin are all there and then some! Ultra clean surfaces are semi-prooflike and a monster rainbow plume of violet/pearl green/gold/amber/royal blue colors covers the entire obverse. You can clearly see the burlap bag toning dots and the reverse is cameo. with splashes of gold by the rims. This coin is a perfect 10 on our color scale. This is Sunnywood level toning and we expect really strong bidding!"

Estimated at \$1,500-\$1,750 this beauty brought \$2,820 (June 2015). It could very well surpass that level today!

LOT 169 \$1 1879-S PCGS MS66+ CAC FROM THE AURORA BOREALIS COLLECTION.

"Spidey Magic." That is what the collector named this totally unique toner. While we are not 100% certain how this pattern was created, it is quite possible that a rubber band sat on the surfaces, while the paper worked its magic, imparting shades of icy-teal that contrast with the surrounding untoned silver areas. Majestic magenta, bright gold, and accents of coppery orange all come together over billowing, brilliant mint luster. Sharply struck, this SUPERB GEM has a truly unique look that was a delight for the the Aurora Borealis collector, and will be a treasure in the next cabinet it graces!

Ex Northern Lights Collection. We named this GEM+ coin, "GLORY DAYS" and it was catalogued in our January 2017 Regency Auction XX as: EX SONNIER COLLECTION.

PCGS showed this coin no mercy. Only if you use a strong glass and look really hard will you find a couple of tiny scattered ticks. Overall, this coin is super clean and smooth. A booming luster shows off wicked cool colors. This coin is also slightly prooflike. The obverse blazes with chrome like totally original shades of azure blue/magenta/green/gold colors. The reverse has an amazing thin crescent of gold/blue. We rank the colors a 9+ on our 1-10 color scale (10 is the best). The eye appeal is out of this world! Put this coin next your best Picasso- it's got everything going for it!" It was not surprising that this coin realized \$7,344 on a \$3,250 to \$3,750 estimate.

A GEM displaying 9+ color over GEM quality surfaces. The eye appeal is superb, imparted by a vivid green, magenta, gold, teal, and sky blue color. Rotating the coin in a light, the bold cartwheel luster forces the colors to bloom with an amazing visual effect.

As you should expect, to have been included in the Aurora Borealis Collection the color and eye appeal has to be SUPERB, and it is just that! We expect a fierce bidding war to erupt for this GEM!

LOT 172 \$1 1880-S PCGS MS66+ CAC

At first glance, the glassy surfaces on the obverse, with its rich toning almost appears to be a Proof. It is not until you rotate this GEM in a light that the famous S-mint cartwheel luster begins to bloom from all over. This is a very fresh looking, totally original example that clearly sat undisturbed in some form of cardboard holder, that imparted beautiful concentric toning on the obverse with a slightly more dappled look on the reverse. Bold blues, golds, violets, and roses burst forth on both sides, more vivid on the obverse. We rate the color an 8 on our 10-point color scale, and the eye appeal is quite nice!

PCGS# 7118 | ESTIMATE: \$1,500+

LOT 173 \$1 1881-CC PCGS MS67

A brilliant luster beams on both sides of this SUPERB GEM. A broad swath of deep violet, rich blue, and burnt orange dominate about 2/3 of the obverse, leaving the back of Liberty's head to the rim brilliant and flashy white silver. Well struck throughout, Ms. Liberty and the eagle are sharply rendered and beautifully frosted. Exceptionally clean for the date, only a few trivial microscopic ticks can be found anywhere, and only using a strong glass. The eye appeal is very strong.

PCGS 213, NGC 176. The most recent PCGS-graded coin sold in our December 2017 Regency Auction XXIV, realizing \$4,113 another sold for \$4,560 earlier that month. Neither coin had this one's bold look. The current Collector's Universe value is \$4,850. A very nice example for any collection of SUPERB Morgan dollars.

LOT 174 \$1 1881-CC PCGS MS67 CAC

A truly high-end GEM with exceptional color! The obverse is awash in variegated hues of magenta, green, gold, aqua, and pale yellow that are brought out by a rich underlying luster. We rate the obverse color as an 8 on our 10 point scale and clearly imparted by storage in a canvas bag. The reverse is mostly frosty silver with just a dusting of

clear gold. Well struck, both sides show a few teeny bag marks, nothing that impedes the impressive eye appeal.

PCGS 217, NGC 175, CAC 58. We can cite a monster toner example that brought \$11,750 back in April 2013. This one, while not as vivid, is a Premium Quality, SUPERB GEM that will see a strong price-- you just do not see this date with this type color with any frequency, in any grade.

Here is another AMAZING toned Morgan dollar that we are proud to handle again! Last sold in our Regency Auction XIX, we described it as follows:

"Boldly lustrous with a good deal of PL reflectivity, just so close to a full PL designation. Richly toned the color blends from violet, magenta, teal-green, orange, and gold. The color ranks as a 9 on our 1-10 color scale. There are a number of light scuffs and marks on the obverse that keep the grade limited to the assigned MS65 level, but certainly worth a strong bid!"

Against a presale estimate of \$1,400-\$1,600 this moose brought \$3,408. A magnificent opportunity for the advanced toner collector to add this GEM to their holdings!

LOT 178 \$1 1881-S PCGS MS65+ CAC

A beautiful swath of rainbow toning shines in front of Ms. Liberty's profile, is brought out by a full, booming cartwheel luster. The color fully defines the well struck devices and silky smooth fields on the obverse, covering about 50% of the surfaces. We rate the color at 8+ on our 10-point scale. The reverse is mostly untoned toward the centers with a lovely ring of rainbow at the rim. The eye appeal is exceptional for the assigned grade, and the color is fantastic!

A very patriotic looking GEM Morgan dollar. Both sides are richly toned in a melange of coppery red, cobalt blue, deeper violet, hints of gold, and dappled accents of the original silver surfaces, deeper on the obverse. The eye appeal is quite nice. You will definately enjoy the Red, White, and Blue look of this GEM!

LOT 181 \$1 1881-S PCGS MS66+ CAC

Last sold in our Regency Auction XIV's offering of the Kairos Collection, where we described it as follows:

Violet and fuchsia frame Miss Liberty's face and she gazes into deepening emerald green while behind her head lies an arc of silver white, gold and sky blue. Exceptionally colorful on the obverse and not at all too dark, keeping the vibrancy level high of the varying hues. White on the reverse. Exceptional quality for the base coin of course, and right on the cusp of the superb grade level. A thoroughly impressive condition and color rarity of this plentiful date."

This impressive GEM is truly worthy of any world class cabinet of toned Morgan dollars and we do rate the colors as a 9.5 on our 10-point color scale. This coin realized \$3,643 against an estimate of \$1,000-\$1,250, and that was before our offerings of the Northern Lights Collection! Today, this coin could bring more!

This is a killer end roll toner. You will have trouble putting this piece away!

The technical quality is all there and then some. In fact, PCGS might have been a bit too tough grading it an MS66+. In the end, it is all about the coins wild colors. End roll colors of original pearl green/gold/violet/blue/amber swirl boldly all over the obverse. The reverse has some light reddish gold. We fully rank the colors a 9+ on our 1-10 color scale (10 is the best). If we were building the Northern Lights Collection again, we would include this coin!

The reverse is toned as well, with delicate teal and gold around much of the periphery. Boldly struck with blazing luster throughout. Of course the quality of the surfaces is incredible too, and although available on this particular issue with patience, precious few offer the combination of quality and toning like this piece!"

We rate this GEM an 8+ on our scale. The value of this coin is all about the color.

The eye appeal is very special and we rate the color an 8+ on our color scale. The reverse is framed by a delicate blue/gold narrow band. Sharply struck and the surfaces are very clean and free of any distractions. You cannot beat the eye appeal!

PCGS 2507, NGC 4492, CAC 933. The PCGS Pop in 67+ is 249. Clearly this SUPERB GEM will entice strong bidding and who knows where it will end up! We sold a similar coin in our December 2017 Regency Auction for \$1,763.

LOT 185 \$1 1882-O PCGS MS65+ CAC Ex Sunnywood/Simpson Collection.

We are pleased to present such a great toner from one of the greatest toned Morgan collections ever Sunnywood-Simpson! Beautiful orange-magenta and rose-gold patina are draped across the obverse, interrupted by a line of sky-blue/silvery surfaces, likely caused by something that was touching the surface; whatever it was, the effect is quite dramatic indeed!

The Sunnywood collector purchased this magnificent GEM from Mike DeFalco, who knew how to find impossible coins with both killer colors and quality. So few 82-Os could come close to the eye appeal of this one!

The present consignor purchased this GEM out of the Sunnywood-Simpson Auction, paying \$6,169 against a \$4,500-\$5,000 estimate. We anticipate strong bidding on it again when it comes back around the block this time!

Had this coin been around a few years earlier, it would have had a Northern Lights Pedigree. This coin is the ultimate in SUPERB color and very close to full MS68! Remarkably clean surfaces are just that. We used a powerful glass and found ZERO imperfections of any size, anywhere. The luster is strong and of course highlights the killer original color. A rainbow crescent pattern of violet/pearl green/gold/pale lime blends together from left to right on the obverse. Any Peacock in heat would be jealous

of these colors. On our 1-10 color scale, we rank this coin a full 10 (10 is the best). The ONLY thing that we believe keeps this coin from being a full MS68 is a touch of softness in the strike. Regardless, this coin ranks among the very best of the best toners and the very best of the best 1883-O's in existence quality wise!

PCGS 72, NGC 34, CAC 13. PCGS has graded only 6 pieces in MS67+. None have ever been sold via auction. It is critical to note a non toned MS67+ has a Collector's Universe Value of \$6,750.00. LOT 190 \$1 1884-O NGC MS64*

Whoa! Look at the colors on this 84-O--the eye appeal is superb and this coin is truly worthy of NGC's "*" designation. The obverse displays a bounty of color, ranging from rich eggplant purple at the top of the obverse flowing horizontally to golden apricot at the lower portion of the design. In between shades of blue, aqua, and rose blend wonderfully. The colors rank as an 8 on our color scale, and with just a touch more depth they would rank as a 9 for sure.

LOT 191 \$1 1885-O PCGS MS64+ CAC FROM THE AURORA BOREALIS COLLECTION.

A real fireball of color! Rich bag toning (you can see some textile toning pattern in the field in front of Liberty's chin and neck), dominates the entire obverse. Bright, flaming magenta, orange, and gold blend with lavender, sky-blue, and subtle emerald all come out vividly when the light hits the ultra flashy luster. Sharply struck on both sides, it is really a true GEM quality coin worthy of the finest cabinet of Toned Morgan dollars. We believe this one will be fiercely contested by specialist Collector's! Good luck!

LOT 193 \$1 1885-O PCGS MS65+ CAC FROM THE AURORA BOREALIS COLLECTION.

Really neat End Roll toning! Shades of sunset-orange, Caribbean blue, emerald, gold, icy blue, and brilliantly lustrous original silver all blend together wonderfully on the obverse. The angular nature to the toning shows where the paper was folded and where the roll actually made contact on the surfaces. The pattern is truly unique and the eye appeal is VERY High-end. Also possessing a crisp strike for the date. Worthy of a very strong bid, know that our consignor paid \$2,500 for this GEM ages ago!

PCGS# 7162 | ESTIMATE: \$2,500+

LOT 192 \$1 1885-O PCGS MS65 CAC FROM THE AURORA BOREALIS COLLECTION.

Double bands of brilliant rainbow toning graces the obverse. The first covers about 50% of the obverse, while the second band is about 10% sitting just below the higher, thicker band. Teal and blue shades dominate, leading our consignor to name this GEM "Blueberry Monster." Add to these the subtle rose and lemon yellow and you get a coin that possesses a 9+ color. Even the reverse gets in on the act with a touch of rainbow at the left-most rim. The eye appeal is excellent and really worthy of a fine cabinet of Toned Morgans.

LOT 194 \$1 1886 PCGS MS64+ CAC FROM THE AURORA BOREALIS COLLECTION EX BATTLE CREEK.

Another remarkable toner from the Aurora Borealis Collection. A bold luster brings out the impressive bag toning on the obverse. Dominated by shades of blue and violet, both deep and pastel, it blends with a pleasing light gold and magenta throughout Liberty's hair curls. Sharply struck with exacting precision and displaying a billowing cartwheel luster. The surfaces are generally clean and free of any distracting marks or scuffs that so often are seen on coins of this grade. Indeed it is so close to MS65 quality, we would not blink if it came in a 65 holder. Bound for another collection of amazing toned dollars, we rate the color as 8.5+ on our scale. Certainly worth a very strong bid!

LOT 195 \$1 1886 PCGS MS65 CAC FROM THE AURORA BOREALIS COLLECTION EX BATTLE CREEK.

WOW! With all the emerald, amethyst, and ruby shades, you would think this was encrusted in precious stones. The dramatic toning is SUPERB, rating a 9.5+ on our 10-point color scale. Aided by a bold cartwheel luster and sharp strike, the eye appeal is is nothing less than AMAZING! We know that once this coin comes up to the auction block, the bidding activity will be fierce and a very strong price will be realized. It is a rare chance to add your name to the impressive pedigree chain!

\$1 1886 PCGS MS67 CAC What a magnificent toner! On a scale of 1-10, this coin

Peacocks go crazy when they see this piece. Mother Nature took out her best paint brush and really did some great work. Killer rainbow cascading colors of amber/violet/pearl green/baby blue/purple swirl wildly all over the obverse. The reverse is untoned. Even more important, the technical quality really is all there and then some. This is a piece you will never want to take off your desk. The eye appeal is totally gonzo!

LOT 196 \$1 1886 PCGS MS65+ CAC FROM THE AURORA BOREALIS COLLECTION EX BATTLE CREEK.

Outside of a being a Northern Lights GEM, this coin has the ultimate pedigrees! You know its quality and color are pretty much unrivaled. Technically this coin is all there and then some. There are NO surprise hits or lines anywhere. The colors are burlap bag amazing: violet/amber/pearl green/gold/blue all splash wildly on the obverse. We rank the colors a full 9+ on our 1-10 (10 is the best) color scale. The reverse is untoned. This is a coin with such stunning eye appeal this cataloger has had trouble putting it away! If you collect top toners, this coin is a tremendous addition to any wild set!

Another special treat that came to Sunnywood from long-time toned dollar dealer the late Mike DeFalco.

The clean, lustrous surfaces showcase a slightly faded kaleidoscope of rainbow colors."

PCGS 225, NGC 76, CAC 71. As a testament to the high-end quality, a this SUPERB GEM realized \$7,931 on a \$4,500-\$5,000 estimate. This is a rare opportunity to pick up a great coin from this famed collection!

LOT 202 \$1 1902-S PCGS MS64+ CAC

What a beautiful coin, and PCGS really showed it no consideration! In the old days, this toned beauty would have been graded a GEM! Lustrous, well struck devices display a deep eggplant-purple that dominates with shades of rose, bright pink, aqua-blue, cobalt, and orange-gold that mixes in, giving this coin a great look on the obverse. The cheek shows just a few teeny ticks under the color, but is generally very frosty and smooth. The reverse is mostly untoned and nearly PL with a touch of rainbow at

the rims. We rate the color a 9 on our scale, and don't forget this is a scarce coin to boot, rarely seen with such vibrant tones! A real prize for the collector of toned Morgan dollars by date!

LOT 203 \$1 1904-O PCGS MS67 CAC EX SUNNYWOOD/SIMPSON COLLECTION

Cataloged in our October 2014
Regency Auction IX, lot 222, as:
"In the first decade of this series
(1878 to 1887), many more silver
dollars were coined than needed.
Consequently, substantial numbers
of 1000-coin bags were stored in
Treasury and bank vaults, there to
remain for decades to come. As a
result, bag-toned coins are easy to
find for many early dates. Not so
for the later dates, with but a few

exceptions. Two of those exceptions are the 1899-O and 1904-O dollars, which were also stored in large quantities. The 1904-O does appear regularly with attractive bag-toned color. However, it is a rare treat to find that kind of color lying atop the superb GEM surfaces of a PCGS MS67. This superlative piece combines beautiful color with very high-end surfaces, for maximum eye appeal. Another treasure from toned Morgan dealer the late Mike DeFalco.

Yet another rainbow colored firecracker superb gem from the Sunnywood Collection. Absolutely gorgeous rainbow pink/ emerald green/electric gold//pale blue colors swirl all over, and we can't stress enough how incredible the technical quality of this coin is. We expect record setting bidding, so good luck!

There really is nothing new to add to those words, they are as true today as they were then. When we sold this coin in 2014, it had an estimate of \$7,500 to \$8,500 and that was too low, as it ended up selling for \$15,275, or double the low estimate! In today's market we can see this SUPERB GEM bringing that, or even more! If you missed out on the Sunnywood/Simpson coins in their first go around, here is a very rare opportunity for you!

Spectacular toning for a Peace dollar, and on a GEM to boot. The toning pattern reminds this cataloger of one of Monet's garden paintings, with bold emerald, gold, crimson, peach and rose iridescent hues. A bold luster brings the colors together beautifully across the obverse. We do rate the colors an 8.5 overall, but for a Peace dollar, it rates a 9. With beautifully toned Peace dollars much rarer than Morgan dollars, we know a full fledged bidding war will erupt when this GEM crosses the block!

On the heels of the record breaking sale of his collection of Indian Head Eagles in our October 2017 Regency Auction, the Crow River collector has decided to auction his set of Peace dollars. While waiting for certain \$10 Indians to appear on the market, he found that this short, completable series would be a fun challenge.

Carefully assembled, the Crow River collector sourced his coins from only select dealers, including our sister firm, Legend Numismatics, who represented him in his auction purchases. A testament to the quality of the coins, the set includes pieces pedigreed back to Jack Lee and Bob Simpson. He focused on untoned, white Peace dollars that are mostly CAC approved and the pieces are all of outstanding quality!

The offering of the Crow River Peace dollars presents a great opportunity for any advanced collector to upgrade their sets with these beautiful, high end examples! It has been an honor for us to present these coins to you, and we wish you the best of luck in your bidding and a hearty congratulations are in order to the winning bidder.

LOT 207 \$1 1921 PEACE, HIGH RELIEF PCGS MS66 CAC

What a terrific HIGH-END piece to start this GEM set. Like his \$10 Indians, each coin in this set was handpicked for its quality and outstanding eye appeal. You will NOT be disappointed here!

Amazing surfaces are satiny smooth and are super clean. Even using a strong glass reveals no flaws- just a microscopic tick here and there. A warm glowing luster beams from all over. The

surfaces are mostly creamy white and have a hint of gold. The obverse clearly offers the great "deep dish" appearance. Miss

Liberty and the details are thickly frosted and are fully struck. The eye appeal is magnificent!

PCGS 183, NGC 84, CAC 37. The last PCGS CAC piece to sell in auction brought \$12,338 in December of 2017. We fully expect strong bidding on this magnificent GEM 1921 Peace Dollar. Do not be fooled by the pops, these are NOT seen for sale much at all any more.

LOT 213 \$1 1923-S PCGS MS65 CAC

As we all know, 1923-S do not come looking like 1923 P's. In fact, they generally do not come looking great at all. To find this coin, the Crow River Collector rejected quite a few pieces but we agree this coin is above average. Overall, this coin appears clean. There are a few trivial superficial scuffs and frost breaks, but none are deep or serious. The luster is above average and is a glowing type. Both sides are white with a hint of gold. This piece is white and frosty. Miss Liberty and every detail are sharply struck and are thickly frosted. The eye appeal is beautiful for sure!

PCGS 60, NGC 31, CAC 10. PCGS has graded only 3 coins higher (only 1 MS66). The current Collector's Universe Value is a ridiculously cheap at \$16,500. Keep in mind, many sets out there need a GEM blast white 28S. Can you remember seeing one recently? We know we have not! We fully expect strong bidding to possibly push this coin into record price territory. Be prepared! PCGS # 7374

\$1 1934 PCGS MS66 CAC Yet another great GEM piece from the Crow River Collection. For the date, this coin is clearly +above

Superior surfaces are super clean and smooth overall. Only if you use a strong glass will you find a hidden tick or two. The luster is above average and both sides are an original white with a pale gold sheen. Miss Liberty and the details are sharply struck and stand out. The eye appeal is refreshing!

PCGS 197, NGC 38, CAC 58. The last PCGS CAC piece to sell in auction brought \$3,360 November of 2017. We expect strong bidding for this really sharp and good looking piece! PCGS # 7375

LOT 228 \$1_1934-D PCGS MS66 CAC

No question this is a totally original piece that has never been messed with in any way.

The surfaces have a thick satiny texture from what we call having "original skin" and only a few very tiny trivial frost breaks are scattered about the surfaces. A strong luster illuminates the coin. Both sides are deep original white highlighted by a crescent of gold on the rims. Miss Liberty and the details are exceptionally struck. The eye appeal is wonderful!

PCGS 99, NGC 28, CAC 19. PCGS has graded 3 higher (2 in MS67). There is a huge disconnect in valuing this date and grade. So many poor pieces have been graded it hurts the better ones like this coin. The last PCGS CAC piece to sell in auction brought \$10,575. That was in 2015. The one prior to it sold for \$7,050 in 2014. No matter what, these are worth far more then \$5,000! We do not remember the last time we saw a PCCS CAC piece being offered!

All hail the King! What a marvelous coin the Crow River Collector picked for his set.

There is one small frost break/tick that keeps this coin from being a lock MS66+. There are ZERO imperfections that really stand out, the surfaces are exceedingly clean and are smooth. The luster is really strong and beams boldly from all over. Both sides are a blazing silvery white with a few faint hints of gold. Miss Liberty and the details are frosty and are sharply struck. The eye appeal is terrific!

PCGS 30, NGC 14, CAC 10. PCGS has graded only 1 coin higher- an MS66+. That says a lot as to how this date does NOT come in the higher grades. The last PCGS CAC piece sold for \$32,900 August of 2015. Prior to that, there had not been one sold since 2011-when one brought \$34,500. This "King" of the series certainly is on many Want Listsespecially looking like this. We expect a really strong price to be realized here, so be prepared!

From the Crow River Collection. What an amazing coin to end the Crow River Collection of Peace Dollars! The quality here is outstanding!

The obverse is really MS67 quality while the reverse has a few tiny scuffs and keep it a MS66. Still, this coin is one heck of a MS66! Overall, the surfaces are exceptionally clean and smooth. The luster is intense and beams from all over. Both sides are a GEM white color.

Miss Liberty and the details are frosty and are sharply struck. The eye appeal is tremendous!

This is by far one of the very BEST 1925 Peace Dollars that we have ever seen-and that DOES say a lot (we have built many top pop sets)! It is true borderline MS68.

Unbelievable surfaces are as pristine as you can only dream about. We put a strong glass to the test and found ZERO imperfections of ANY size, anywhere. The texture is lightly satiny, and everything is smooth. A full glowing luster beams from all over. Both sides are a fabulous totally original white. There are NO spots or discolorations. This coin has never been messed with. Miss Liberty and every detail are frosted and are fully struck. The eye appeal is amazing!

PCGS 114, NGC 67, CAC 45. PCGS has graded only 2 coins MS67+ and one MS68 (not beaned). We cannot stress enough how superior this coin is to the typical pale toned lifeless MS67's, generally see. Clearly someone took this coin right from the bank and saved it carefully. It is our strong opinion this coin is worth far more than any published price. Keep in mind, the lone MS68 sold for \$89,115 in 2011-that is 7 long years ago! Even with NO bean it should bring \$100,000 today. This coin should be worth at least 25% of that! Opportunity knocks outrageously loud here for any picky and High-end loving Peace Dollar Collector.

Oh, so close to a full GEM grade! In fact, in the old days, we don't think anyone would have argued much if this coin had been cataloged as such. Brilliant, frosty mint luster glows on both sides. Sharply struck with full definition to the details. Under the closest inspection, we believe the only reason PCGS did not grade it a 65 is because of some contact at the lower reverse.

PCGS 1360, NGC 782, CAC 169. PCGS has graded 66 in 64+, NGC 17. The last PCGS/CAC MS64+ sold for \$1,860 and the current CU value is listed at \$1,800. Very scarce in GEM, with the last 65 selling for \$5,380. A very high-end looking 64+ that will entice strong bidding.

If you enjoyed our first ever "Dollar Day", then welcome to our largest ever session. Day 2 offers one of the most diverse, high-end, and comprehensive selections Legend Rare Coin Auctions has ever presented!

We are pleased to start the day off with a SUPERB offering—the Premier Collection. Consisting of partial sets of Proof Barber Dimes, Mint State Barber Quarters and a select group of Walking Liberty Halves, many of these are among the very finest of these dates that survive! There are so many highlights to talk about, but how about a 1900-O PCGS MS67+ Barber quarter with a GOLD CAC sticker?!

The second day continues on with such historic issues as a GEM Mint State Fugio copper, and Confederate Cent restrike in copper. The session's small cent selection is anchored by the Aurora Borealis Collection of Toned Proof Indian cents—each coin can be considered one of the most beautifully toned of their respective issues! A pair of Superb GEM 1909-S V.D.B. cents, the FINEST 1914-D, and amazing 1935 in MS68+ RD PCGS/CAC -possibly the finest Wreath reverse Lincoln in existence finish out the small cents.

Long time collector David Poole's remarkable Proof 3CN Registry Set is a study of this series in CAM and DCAM, and there are many FINEST known issues contained in the collection—prizes for any advanced collector of the series.

A small selection of amazing half dimes and dimes include a fresh, never before offered group featuring an 1859 half dime in PCGS MS68+ CAC and an 1836 dime in PCGS MS67+ CAC. Also included among these denominations is a near-GEM 1797 15 Star half dime and a CHOICE 1796 dime.

SUPERB GEM key quarters include the FINEST KNOWN 1865-S and 1867-S quarters, as well as one of the finest 1916 Standing Liberty, a PCGS MS67 FH. A neat run of Seated Liberty halves includes a number of early No Motto pieces graded by PCGS/CAC in MS60 to MS64, and a pair of 1887s in early generation NGC holders boast GOLD CAC stickers—one in MS65 and the other in PR65.

Over the years Dale Larsen, a long time professional numismatist, assembled a very neat group of toned late date Walkers. He sought out only the best coins from some of the leading dealers of the era. Speaking of awesomely toned half dollars, check out some of the Classic Commems, especially the Monroe and the two varieties of Norse Medals.

The gold coin section of Thursday's session is anchored by the Oak Crest Collection of Carson City Half Eagles, but is full of individual rarities that will delight any advanced gold bug: a GEM AU58 1825 \$2.50; a complete set of Classic Head \$2.50 all graded by PCGS; a VERY CHOICE 1843-O \$5 in PCGS MS63+ CAC; a very fresh and totally original \$20 1861-O in PCGS AU53 CAC; and a PCGS MS66 Flat Rim 1907 High Relief \$20.

Rounding out the end of the sale is the first part of the Steven Cook Collection of Pattern Coins. Seventy-seven lots of patterns from this collection are featured. Cool types, high grade pieces, and significant rarities are included. With most pieces valued in the \$1,500-\$5,000 range, these will prove to be a great "entry" into the extensive pattern series, so we expect strong participation from collectors of all types.

Welcome, enjoy, and good luck in Session 2!

egend Rare Coin Auctions is proud to present The Premier Collection. Assembled by an astute collector over the course of several years exclusively under the guidance of Laura Sperber. The coins presented in this sale are DUPLICATES(!) from his astounding collections. Having focused on Barber Dimes in Proof and Barber Quarters in Mint State, these coins are among BEST OF THE BEST that exist! Closing out the offering are some wonderful Walking Liberty Half Dollars. Not only are the coins all SUPERB GEM grades, but they were all hand

selected for extreme quality and eye appeal! Nearly every coin is PCGS/CAC, including some ultra-rare GOLD CAC stickers. Every coin is a highlight—a fact that will be made plainly clear as you look at the photos and read our descriptions. Once these coins are sold, it may be many, many years before coins of comparable quality (if they even exist), come to market. On behalf of our consignor, Legend Rare Coin Auctions wishes you all the very best of luck in bidding, and congratulations to the winning bidders!

Both sides have a gorgeous swirling mix of totally original pale purple/gold/lilac/blue/pale aqua green colors. Miss Liberty and the details are frosted and are fully struck. The eye appeal is fantastic!

Only 450 pieces were minted. PCGS 6, NGC 12, CAC 8. The last record we have of a PCGS piece selling was a NON CAC piece which realized \$5,463 back in May 2009. That piece was also darker. We can't stress enough how the market has put genuinely rare coins like this "silent stopper" for the series on sale. Opportunity knocks loud here!

LOT 256 10C 1913 PCGS PR67+CAM CAC

A MUST-SEE PIECE! It is clearly a VERY high-end borderline DCAM. It is well worthy of its lofty PR67+ designation. Ultra-deep mirrors fire up from all over. They have extreme clarity, cleanliness, and nearly blinding reflectivity. We assure you, these mirrors are so deep and awesome they WILL spoil you! Even using a strong glass, there are ZERO imperfections to be found. When twirling this coin, the mirrors look like a freshly made glowing sheet of glass. Miss Liberty and the details are needle sharp in strike and boldly standout with white frost.

ONLY 622 were minted. PCGS 3, NGC 3, CAC 3. This is the FINEST and only PR67+ graded for the date! PCGS has graded NONE higher. This piece last sold for \$8,518 in our October of 2017 sale. The collector is now changing directions. If you're a Cameo purist, this coin has intense black and white contrast! WOW! We expect some serious bidders on this piece-be ready!

LOT 257 10C 1914 PCGS PR68 CAC

This coin is well deserving of being the finest 1914 graded after 35 years of PCGS being in operation!

Sensational mirrors are deep and beam from all over and they boast excellent clarity, cleanliness, and of course have a bold reflection. When you twirl the coin, the mirrors have a beautiful rolling "watery" look. A mellow layer of totally original lavender/pale olive/soft rose colors blends nicely all over. Miss Liberty and the details are frosted and have needle sharp strikes. The eye appeal is terrific!

Only 425 were minted. PCGS 1, NGC 2, CAC 1. This coin last sold in our December 2016 Regency auction, where it realized \$17,038. PCGS has been in operations 35+ years and no other has been graded to date. To us, that is powerful proof as to the coin's rarity! Be prepared. We can see a huge bidding war for this GEM rarity!

LOT 258 10C 1915 PCGS PR67+ CAC

This is one of the most gorgeous Proof Barber Dimes you will ever see- let alone it being a VERY rare 1915. We do rank this coin as peing the FINEST graded. We can NOT imagine a better 1915 10C!

Mother Nature did quite a job on this monster gem! Ultra deep, crystal clear, problem free mirrors beam from all over with bold reflectivity. Both sides are bathed in original, psychedelic green/ violet/purple/blue/magenta/gold colors that swirl all over. You don't

even have to tilt the coin to see the colors. Miss Liberty and the details are frosty and have full, standout strikes. The eye appeal is mind boggling!

ONLY 450 were minted. PCGS 9, NGC 14, CAC 9. PCGS has graded possibly 3 in PR67+. Not only is it one of the most wildly toned pieces for the date, it also ranks high for the series! A pretty 1912 10C PR67+ CAC just sold for \$7,800 in March of 2018 in a major auction. This coin blows that one away! This the ultimate 1915 10C Proof for ANY GEM collection!

LOT 259 25C 1892 PCGS MS67+ CAC Outrageous and then some! Calling this coin SUPERB GEM is an UNDER statement!

Incredible fully prooflike mirrors make this wonder GEM look more Proof then Mint State. The surfaces are mirrored fields actually have great clarity and the flashy luster is tremendous. Picasso would be jealous of Mother

incredibly clean and sleek. The Nature's marvelous, totally original work here. Both sides

have nearly electric shades of pale iridescent green/rose/gold/blue/purple that swirl all over. Miss Liberty and every detail are frosted and are sharply struck. We really don't see why this coin wasn't designated MS68. Regardless, it has incredible eye appeal!

PCGS 34, NGC 24, CAC 24. PCGS has graded 6 in MS67+ with 2 in MS68. Save for one MS68, we'd challenge this coin vs every. The last PCGS CAC piece to sell in auction brought \$8,225 in April 2014. That was 4 long years ago! Nothing similar can be found these days. We expect strong bidding and possibly even a record price! Good luck!

It is impossible (not just hard) for
us to believe a better 92-O exists.
The quality is ULTRA high-end.
PCGS showed this MONSTER
no mercy!

Amazing surfaces are as pristine as you will find on ANY Mint State Barber Quarter. The texture is silky smooth. Even using a microscope and going over every inch of he surfaces will yield you NO imperfections of ANY size, anywhere. A full booming luster radiates from all over. Both sides

has jaw dropping original colors of lime/green/blue/pale violet that swirl wildly everywhere. Most important (for an O Mint) the details are frosty and are sharply struck. The eye appeal is both stunning and one you will never forget!

PCGS 16, NGC 6, CAC 9. PCGS has graded 7 coins MS66+. The last one to sell brought only \$2,820 in January 2017-which was ridiculously cheap. The current Collector's Universe Value is \$5,500. This coin is well worthy of that number or more-MUCH MORE!

LOT 261 25C 1893-O PCGS MS67 CAC

The 93-O had an original mintage of well over 3.25 million, and very few were saved; indeed, it is a very rare date any finer. The present SUPERB GEM is among the finest graded! Frosty mint bloom beams from all over. When you rotate the coin in a light, you can clearly see a subtle reflection in the fields that provide a stunning look! A brilliant, nearly cameo like appearance is eye catching! A pearly-iridescent toning graces

both sides, a little deeper on the reverse. A great coin for any high-end collection!

PCGS 3, NGC 2, CAC 3. There is a single coin graded finer at PCGS, graded MS67+ (which is the Eliasberg coin, also listed as MS68 at NGC). The aforementioned Eliasberg coin sold as MS68 NGC/CAC (now 67+) for \$23,500 in the October 2014 Gardner Sale. The current PCGS Price Guide value is \$12,500 and with its bold vivacity, it will see a fierce bidding war!

LOT 262 25C 1893-S PCGS MS66 CAC

WOW! This is truly a SPECTACULAR GEM survivor. As a date, the 93-S is uncommon in all grades, but especially so in lofty Mint State grades. Not only is this coin high-end in terms of technical quality, it is STUNNING in terms of eye appeal! A bold cartwheel luster rolls smoothly along the superb surfaces. The obverse is toned in beautiful blueberry and tangerine shades, the patina really sparkles in the light. The reverse is mostly untoned with a touch of gold at

the rim that really accents the flashy, semi-prooflike luster. Both sides have full, dynamic strikes with complete, crisp definition.

PCGS 4, NGC 1, CAC 1. Realizing \$9,200 back in the 2010 FUN auction, this coin is heads above the other 66s that are out there. We marvel at this coin's amazing eye appeal, and we think you will too! There are only three coins graded finer, a 66+ and 2 in 67. The last MS67 sold for \$20,563 in October 2015. We know this coin will bring a very strong price.

LOT 263 25C 1894-S PCGS MS67 CAC

In a collection full of marvels, this 94-S really does stand out! Not only is it the second finest graded at PCGS, it has an amazing, totally original, old collection type look!

A vibrant mint brilliance swirls in the form of radial cartwheels across both sides. This brilliant luster beams from below a layer of rich pastel iridescent toning. The eye appeal is exceptional and the surfaces are nearly without flaw. It takes a very

strong glass to locate the one or two insignificant ticks, neither of which negatively affect the STUNNING eye appeal.

PCGS 1, NGC 0, CAC 3. Clearly there is something not right with the population, even when you included the MS67+. This is the Gene Gardner coin that brought \$12,925 in October 2015. The current Collector's Universe value is listed at \$16,000. It is highly unlikely you will find a finer example, one that even Gene Gardner called "Finest Known."

PCGS# 5609 | ESTIMATE: \$12,000+

LOT 264 25C 1895-S PCGS MS66 While the mintage of 1,764,681 is well within the normal range of quarters for the era, like so many Barber dates, very few were saved at the time of issue. That any survive in such high-end grades is a matter of pure happenstance. The presently offered GEM is a marvel of survival. Boldly lustrous with full, rolling cartwheels that bring the rich blue-slate, teal, and golden-peach hues to a brilliant vivacity. Sharply struck on both sides, with crisp, bold, complete

details on Liberty and the eagle. The eye appeal is superb and totally original.

PCGS 3, NGC 2. How is this for RARE? In the last 18 years, before this coin's public offering, there has been the opportunity to buy a PCGS MS66 exactly twice in auction, once in 2000 and most recently in November 2017. The current Collector's Universe value is listed at \$6,000 and the APR in November was \$4,080. This coin should bring more!

A stone bold, totally original SUPERB GEM! Tied for FINEST GRADED at PCGS, one fleeting glance at this remarkable coin and you can see why!

A strong, satin mint brilliance glows on both sides with shades of violet, teal, apricot, and crimson grace both sides, especially the reverse, and stand out against the frosty untoned areas of silver, especially on the obverse. The crisply impressed devices are

sharp and complete, fully rendered from an exacting strike from the dies. As should be expected from one of the FINEST examples of this date, the eye appeal is incredible!

PCGS 6, NGC 1, CAC 5. The most recent example to sell in auction realized \$11,750 in the October 2014 Gene Gardner Collection sale; prior to that, it had previously sold for \$18,400 in April 2009. Today's Collector's Universe Value is ridiculously low, at \$9,500. We know this coin will bring that, or more! It is SUPERB!

LOT 266 25C 1897-O PCGS MS66+ CAC

Another absolutely SUPERB GEM in this collection. An iridescent layer of pleasing, old time collection patina is really brought out vividly with a bold, satiny underlying luster. Emerald, rose, and gold tones blend with aqua and lilac, the subtleties of the shades brought out in a light. Well struck with nearly full, crisp definition on both sides. Even using a strong glass, you will have a very difficult time trying to locate even the slightest flaw. The eye appeal is wonderful!

PCGS 35, NGC 5, CAC 5. There are only 14 coins graded MS66+ at PCGS, none at NGC and only two coins are graded finer. None of these 66+s have ever sold in auction. The most recent MS66 PCGS/CAC to sell in auction realized \$14,100. Nothing finer than MS66 has ever sold in auction in a PCGS holder. This remarkable SUPERB quarter could well bring a RECORD PRICE!

PCGS 5, NGC 2, CAC 2. PCGS has graded exactly 2 coins in MS66+ with only two coins finer. This coin sold in September 2013 for \$15,275 and keep in mind that ANY PCGS MS67 will be a \$30,000 coin (we just sold one in our December Regency Auction XXIV for \$28,200. The current MS66+ Collector's Universe value is listed at \$18,000. This is an important opportunity for the advanced Barber quarter collector; do not let it pass you by! LOT 268 25C 1898-O PCGS MS66+ CAC

We cannot believe the monster colors. Using the scale for the Morgan Toners, this coin would be a full 9++! We have only ever seen a few higher-grade pieces with similar colors. The quality is also SUPER High-end!

Remarkable surfaces are perfect and have a semi satiny texture. Only a microscopic tick keeps this coin from being a full MS67+. Even if it were a MS67, we would still love it. A really strong luster beams from all over. A head spinning circular color mix of totally original green/blue/lime/pale violet./tangerine colors open into light gold centers. Miss Liberty and the details are thickly frosted and are sharply struck. The eye appeal is UNBELIEVABLE!

PCGS 6, NGC 2, CAC 3. This coin brought \$18,976 in the August 2009 sale of the Duckor Collection. A MONSTER colored GEM like this should easily beat the current Collector's Universe value of \$20,000. We expect a full out bidding war over this remarkable coin-seeing is believing!

LOT 269 25C 1900-O PCGS MS67+ GOLD CAC

Hard to believe this incredible piece which is one of the finest O Mints in existence (actually it is the second finest known for the date). That is totally mind blowing! The quality is pure MS68 all the way (and is backed up by the GOLD CAC bean).

Absolutely flawless surfaces are story in themselves. They are the epitome of perfection-even if you scrutinize them via a neutron microscope. The surface texture is thick and satiny. A moderate luster (never saw an 00-O with blazing luster) does beam from all over. A super mix of totally original olive/gold/champagne/green colors evenly covers both sides. The colors are not dull. Miss Liberty and the details are sharply struck (also hard to find on an O Mint) and are lightly frosted. The eye appeal is the same as the coins quality- incredible!

PCGS 3, NGC 1, CAC 3. This is the ONLY MS67+ graded. The current Collector's Universe Value is \$20,000. This coin is of such crazy quality it is more than worth it! There is no question that 118 years ago when this coin left the bank it was never touched and sat carefully stored ever since.

Pieces like this are just so rare.

The ONLY reason this coin is for sale is the collector upgraded to the MS68+! His pursuit for the very finest of MS Barber Quarters (as proven by this coin and the MS68+) is unwavering. All the hard work has been done here for you!

OUR ESTIMATES

The estimates you see published in this catalog are based on HAMMER. Keep in mind that a coin could be either low or high end for the grade, have stunning color or be dull, all of which radically affect a coin's value. Yes, there can be huge price differences within a grade, and we offer estimates as a guide so Collector's can have a better idea of value. One thing we will never do is offer low ball estimates in order to claim stronger sales.

These published estimates represent what Legend Rare Coin Auctions determines to be an approximate high wholesale value for the coin. The numbers are based upon current market values, similar trades, auction prices, published prices, and a consideration of the coin's quality. There is no guarantee that the estimated prices are minimums or are exactly what you can expect to get if you attempt to resell them wholesale.

We always advise you to view the coins you are interested in and calculate what you'll pay using as much information as possible. If you have any questions, please feel free to ask us. We are here to help you!

A very high-end example of this conditionally RARE and underrated date. While the New Orleans mint delivered 4,748,000 quarters in 1902, most went right into commerce, where they would remain for a very long time, even "collector" grades (VF/XF/AU) are RARE.

This highly lustrous example is well within the Condition Census for the date, and it is an amazing coin with a wicked look! The surfaces are smooth and free of any disturbances on either side. Vividly lustrous, with a radiant satin glow brings out the gold, blue, and iridescent shades. The eye appeal is very high-end and cannot be improved!

PCGS 11, NGC 1, CAC 6. This is the ONLY MS66+ to ever sell in auction (out of only 3 so graded). In June 2017, this AMAZING GEM sold for \$25,850 as part of the Blue Moon Collection, Part II. There is only ONE PCGS MS67 finer, that has NEVER sold in auction. What a GREAT coin for any amazing set of Barber quarters. Expect fierce bidding for this beautiful prize!

sides of this High-end GEM
brought out by a silky satin-like
sheen. Light olive-gold,
russet-tan, and lilac-blue hues
are totally original
and beautiful.

PCGS 7, NGC 1, CAC 3. Only two are graded MS66+ and one coin is graded higher, so this SUPERB 1903-O is about as fine as anyone can ever hope to

add to their set. No MS66+ has sold in auction. A PCGS 66 CAC sold in February 2018 for \$4,113 and the Eliasberg-Hugon-Gardner Collection coin, the sole MS67 sold for \$32,900. The current PCGS Price Guide value is listed at \$9,500 and this coin will very likely exceed that level when the gavel falls. Opportunity knocks really louldly here!

LOT 273 25C 1904-O PCGS MS66 CAC

A remarkable survivor of this early 20th century branch mint quarter. At the time, little attention was paid to mintmarked issues, and few were saved. Displaying the typical softness in strike in the claws, it is very well struck everywhere else. A bold luster highlights the earthy shades of green, blue, gold, and pewter. The eye appeal is totally original and high-end!

PCGS 14, NGC 7, CAC 8. The

most recent example to sell in auction realized \$5,160 in November 2017 and this one has been off the market since August 2011. The current PCGS Price Guide value is listed at \$5,800. LOT 274 25C 1905-O PCGS MS66+ CAC

This remarkable SUPERB GEM ranks among the FINEST known examples. Sold as lot 1585 in the May 1996 Eliasberg sale, described as follows: "MS67. Heather and light golden toning over lustrous, satiny surfaces. Another remarkable Barber quarter, an outstanding gem specimen that is worthy of special note by the interested bidder."

To that we will note the exceptionally high quality and wonderful eye appeal. Eliasberg

obtained this coin, as he did much of his collection via his purchase of the Clapp Estate in 1942. J.M. Clapp obtained this quarter, as he did with many coins, directly from the branch mint at the time of issue.

PCGS 14, NGC 2, CAC 6. There are two coins graded MS66+, and only a single coin finer a MS67. This coin sold for \$11,750 in the October 2015 Gardner Collection sale as an NGC MS67, and for \$13,200 in the original Eliasberg Collection sale. The Current Collector's Universe value is listed at \$11,500. With only one coin finer, and with this coin's AMAZING looks and provenance, we know it will sell for a very strong price today! A true prize for any collector of Barber quarters or New Orleans coins.

LOT 275 25C 1906-O PCGS MS66+ CAC

A very pretty and high-end GEM. Dappled shades of slate-blue and coppery-goldenred patina grace both sides: the obverse center is brilliant silver and the reverse has gentle dusting across most of the surfaces. The satiny mint frost glows from below the color, imparting a very high-end eye appeal.

PCGS 33, NGC 16, CAC 12. In 66+, PCGS has graded 12 coins, NGC 1. The most recent

of these to sell was a PCGS/CAC coin that sold for \$4,935 in June 2017. Prior to that, one sold for \$4,025 in January 2012. What a great opportunity for the advanced collector! Don't let it slip you by!

25C 1907 PCGS MS67+ CAC WOW, WOW, WOW! Obviously, this coin sat untouched since the day it left the bank 111 years ago. We do rank it as SUPER High-end! (It did come out of an NGC MS68 holder).

Absolutely immaculate surfaces are special. Even using a strong glass will find you NO imperfections what so ever. The texture is satiny smooth. A warm glowing like luster beams from all over. Both sides are mostly original white with a splash of

light gold. Miss Liberty and every detail is needle sharp in strike. The eye appeal is INCREDIBLE!

PCGS 3, NGC 2, CAC 2. PCGS Has graded 2 MS67+ (the other is in impounded in a major collection). The current Collector's Universe Value is \$9,500.00-which to us seems way too cheap. Even if you do not collect MS Barbers but buy really neat pieces or need a Type coin-check this WILD GEM out. You certainly can NOT buy a better one!

LOT 277 25C 1907-O PCGS MS67 CAC

A marvelous SUPERB GEM from one of the more famous sets of Barber quarters ever assembled. It is not a shock as to why it has now been in two AMAZING collections--it is THAT high-end!

The toning on both sides is a marvel to behold! Clearly this coin sat for ages wrapped in tissue and then placed into an old collector envelope. You can see the tiny folds from the tissue impressed in the toning

as subtle breaks in the color. Coppery-orange-rose color blends with a slate-blue, icy lilac, and rosy-pewter. The hues are vividly brought to life by a strong satin-like mint frost that glows from below the color. Even using a strong glass, we are unable to locate a single flaw or any area of striking weakness. You cannot beat the eye appeal!

PCGS 4, NGC 1, CAC 7. Clearly there is duplication in the CAC populations. The most recent example to sell in auction realized \$9,988 in our Regency Auction 25, which was the former Gene Gardner coin. A single MS67+ is graded finer. The current Collector's Universe value is listed at \$10,000 and in 67+ the CU value is listed at \$15,000. We can understand if this SUPERB coin brought a RECORD price!

LOT 287 50C 1921 PCGS MS65+ CAC

EX NEWMAN COLLECTION. Among the TOP dozen examples graded at PCGS and this remarkable GEM has a SUPERB eye appeal and equally impressive pedigree.

The 1921 is one of the early KEY issues to the series with a mintage of only 246,000. Because of the post war recession, very few were saved at the time of issue, and most went into circulation. Most examples seen are heavily circulated, with VF being about average.

The presently offered GEM has an amazing look! Brilliant and bold cartwheel luster really brings life to the vivid old toning in shades of sea-green and lavender. The devices are very sharply struck with every design feature FULLY struck up. Even Liberty's hand is sharp and complete in its definition. A remarkable survivor bound for an AMAZING GEM set of Walkers.

PCGS 60, NGC 33, CAC 14. There are 7 in 65+ at PCGS. When sold in the November 2013 Newman Collection sale, this remarkable GEM realized \$28,200. Keep in mind PCGS has only graded four in 66, and the last one to sell realized \$54,050. What a great 1921 half that will delight even the pickiest of specialist Collector's!

LOT 289 50C 1934-S PCGS MS65 CAC

Truly a special 34-S! While the sharp strike and brilliant satin luster are both dynamic characteristics of this GEM, what is really special about this AMAZING coin is the bold, beautiful multicolored toning that adorns both sides. Shades of blue, gold, rose, orange, and magenta frame the obverse, while a swath of sky blue dramatically graces the central obverse. The reverse is dusted with a pastel blue iridescent toning that really delights the eye.

PCGS 301, NGC 114, CAC 35. For this coin you can just toss out the price guides and ignore the auction records. With toning as lovely as this, it is UNIQUE and should be regarded as an opportunity of the utmost importance for the advanced collector of toned Walkers.

What an amazing SUPERB GEM Walker. One look and you know this sat carefully protected since it left the bank 78 years ago!

There is no such thing as a cleaner Walker. The satiny smooth surfaces are free of even the most microscopic lines or ticks. The dreaded right obverse field never looked so good! A good and moderate luster beams from all over. Both sides are evenly covered by a light to medium mix of totally original pale blue/lavender/gold/champagne/creamy white colors. For a 40S, Miss Liberty and the details are well struck. The eye appeal is like the quality, outstanding!

PCGS 11, NGC 11, CAC 10. The last PCGS CAC piece brought \$21,150 01/2015 (a weaker auction). The consignor paid \$25,000 for this piece back in 2014. GEM really high grade Walkers like this do NOT appear at all any more. If you are building a high grade set, you need to check this SUPERB GEM out!

LOT 293 50C 1941-S PCGS MS66+ CAC

We rarely ever see Mother Nature & Co putting on color show with this date. What a great job she did too. Plus, this coin really is VERY high-end. Remarkable surfaces are the ultimate in cleanliness. You could use a neutron microscope and look for hours and find ZERO imperfections. The super smooth surfaces also emit a really strong luster. The luster, in turn, enlivens Mother Nature's fabulous work. Subtle but highly visible rings of reddish gold/blue/green/violet colors open into creamy white centers. There are pastel like

colors and you do not have to tilt the coin to see them. Miss Liberty and the details are sharply struck for a 41-S.

PCGS 701, NGC 283, CAC 150. PCGS has graded 82 in MS66+. Note, the value of this coin is more due to its beautiful colors then it being a 41-S. The last PCGS CAC piece to sell in auction brought \$3,400 January 2018. Keep in mind, the coin that is being offered here also has SUPERB GEM colors- something you certainly hardly ever see.

LOT 299 FUGIO 1787 UNITED STATES, 4 CINQ. PCGS MS65 BN CAC

The presently offered Fugio is a superb, totally original, and unconserved GEM. Displaying a wonderful chocolate brown color that is wonderfully accented with a lustrous sheen. Nicely defined with a sharp strike, the motto MIND YOUR BUSINESS is clear, and the reverse rings are fully defined with intricate reverse clashing within. Among the FINEST examples graded, it is just about the most perfect, beautiful, satiny, GEM we've ever seen on a Fugio copper of any variety. Attributed as Newman 8-B, W-6740 variety, considered to be Rarity-3, and certainly among the best known!

The Fugio copper is one of the first officially authorized coins struck for circulation in the young United States. Congress awarded a coinage contract to James Jarvis, and he was to strike up to 300 tons worth of copper into these coppers (sometimes referred to as Cents). It is estimated that some 400,000 were struck, far short of the millions anticipated. The design elements were taken from Continental paper currency notes issued the decade earlier, many inspired by Benjamin Franklin. The obverse, with its mottoes FUGIO and MIND YOUR BUISNESS, combined with the sundial motif translates roughly as "Time flies, so mind your business." The 13 interlocking chain links on the reverse represent the 13 original states with UNITED STATES and WE ARE ONE in the center.

PCGS 7, NGC 4, CAC 2. The last example to sell in auction was not CAC-approved and realized \$9,400 in the November 2013 Stack's Bowers auction. Across all varieties, there are certainly very few gems extant making this a very important opportunity for type Collector's. Don't let it pass you by--how many other colonials can be found in GEM grades--at any price?

LOT 300

1C 1861 C.S.A. RESTRIKE, COPPER. PCGS PR64 BN CAC

A very historic relic of the Civil War, an issue that is rarely offered in any grade. Beautiful, iridescent toning gently caresses the smooth, brown copper surfaces. Both sides are sharply struck and the fields offer a wealth of reflection under the toning. The eye appeal is excellent.

The story of the Confederate Cent begins, not in the recently formed Confederacy of seceded southern states, but in Philadelphia, where die famous die sinker Robert Lovett, on speculation, hoping to obtain a contract to strike coins for the Confederate Government, engraved a pair of dies. After striking a small number in copper-nickel (similar to the then circulating Indian cent), Lovett put the dies away, the legend says, because he was afraid of the federal government's response to his aiding the Confederacy. Years later, they came to light when he apparently accentually spent his pocket piece in a Philadelphia bar. From there, he sold his dies to John Haseltine and Colvin Randall. They struck a total of 74 restrikes in Gold (7), Silver (12), and Copper (55). During the striking of the 56th copper example, the dies cracked.

PCGS 4, NGC 0, CAC 1. The most recent example was not CAC and sold for \$43,475. This coin's remarkable quality and eye appeal will bring it to a very strong realization. One of the originals would cost well into the six-figures. This coin has almost as impressive a history and will appeal to any advanced collector of Civil War numismatics!

LOT 301 1863 MERRIAM TOKEN. "GOOD FOR A SCENT." PCGS MS67 BN F-115E-LA

The Struck in copper with a plain edge.

Designed and produced by Jos. H. Merriam of Boston, MA. This is one of (if not the most) popular Civil War token, and the presently offered specimen is the FINEST GRADED at either service. A very well detailed dog with the punny motto GOOD FOR A SCENT above, the date below, with Merriam's name on the collar. The

reverse has Merriam's business information advertising his die sinking and engraving business.

A bold luster shines on both sides of this beautiful SUPERB GEM. There is an awfully generous amount of original red color for a BN designation. Superbly struck and wonderfully preserved, this piece will be a stand out in any cabinet of Civil War era numismatic items!

PCGS 1, NGC 0. This is the FINEST certified example and it is highly unlikely that an equal exists. With MS65 and MS66 pieces selling into the mid-four figures it is anyone's guess what the winning bid will be, but we expect strong bidding competition to bring home this Civil War token trophy!

LOT 321 1C 1908-S PCGS MS65 RD CAC

A high-end quality GEM endorsed by both PCGS and Eagle Eye. Rich golden-red color is brought out by a strong original, fiery mint luster with accents of reflection in the obverse fields. The eye appeal is superb.

PCGS 235, NGC 84, CAC 51. The most recent PCGS/CAC coin was also Eagle Eye certified, and realized \$2,938 in our Regency Auction XVI (February 2016). Indeed all PCGS MS65 RD CAC coins have sold for \$2,000 to \$3,000 and the current PCGS Price Guide value is listed at \$2,650. RARE any finer!

LOT 322 1C 1909-S INDIAN. PCGS MS65 RB

The final date of the Indian Head cent series happens to be one of the KEY issues, with only 309,000 struck. Highly lustrous and boasting way more RED than brown. Under magnification we see some tiny toning flecks, but otherwise this crisply struck GEM has an excellent eye appeal.

PCGS 179, NGC 106. There really have not been many PCGS non-CAC coins sold in the last few years (only 4 coins since November 2012). The current PCGS Price Guide is listing a value of \$3,250, and keep in mind there are only 9 coins finer in the RB designation. A lovely GEM for a high grade set.

LOT 323 1C 1859 NGC PR65 CAM CAC FROM THE AURORA BOREALIS COLLECTION.

For an 1859 1C, this coin displays exceptional life and quality.

Deep mirrors beam boldly from all over. The mirrors have way above average clarity, are super clean, and are highly reflective. When you twirl the coin, the mirrors look like a freshly formed sheet of ice. All natural copper nickel colors are even on both

sides. There are NO spots or discolorations. The contrast is strong. Miss Liberty and the details are frosted and are sharply struck. The eye appeal is wonderful!

PCGS 8, NGC 6, CAC 8. NO CAC beaned 1850 Cameo Proof has ever been sold via auction. The current Collector's Universe Value is \$6,750. We assure you, as time goes on, you won't see many pieces ever offered that are anywhere near this coins great quality and looks!

LOT 324 1C 1863 PCGS PR66 CAM CAC FROM THE AURORA BOREALIS COLLECTION.

The WOW factor here is off the charts! We have never seen a more flashy and beautiful 1863 Proof!

Deep and really electric mirrors beam intensely from allover. The mirrors are the ultimate in clarity, cleanliness, and are highly reflective. When you twirl the coin, the mirrors almost blind you by their flash. A superb and totally original mix of pale violet/gold

colors that burst out like a floral display at a Spring flower show. Miss Liberty and the details are thickly frosted and are fully struck. The eye appeal is stunning!

PCGS 15, NGC 6, CAC 5. The last PCGS CAC piece to sell in auction brought \$11,1100 02/2018. We assure you, this coin offered here, hand picked by Aurora Borealis is one of the prettiest you will ever see by far.

1C 1864 BRONZE. PCGS PR65+ RB
FROM THE AURORA BOREALIS COLLECTION.

This coin is on fire! It has a color combination unlike any we've ever seen for this date. If it were a Morgan, we'd rank it a 9+ on our 1-10 color scale (10 is the best). Electric deep mirrors blaze from all over. The mirrors have great clarity, are clean overall, and are intense flash. Neon like colors of violet/green/gold explode from all over. There is also strong cameo contrast even though the coin is not designated a cameo. Miss Liberty and the details are thickly frosted a brilliant gold and are fully struck. The colors and eye appeal are so wild the astronauts on the space station can see them. Seeing is believing!

PCGS 39, NGC 22, CAC 5. NO PCGS PR65+ RB coin at all has ever been sold via auction. The Collector's Universe Value of \$3,700 is meaningless for this coin! With colors like these, we expect the price realized to be substantially more. Good Luck!

We consider this High-End original GEM to also be a borderline Cameo piece. Shimmering mirrors are deep and beam boldly from all over. The mirrors are super clean, have strong clarity, and are highly reflective. Beautiful natural colors of Mint Red/gold/pale green swirl gently all over. Of course the color and eye appeal were the top reasons Aurora picked this coin for his outstanding toned set. Miss Liberty and the details are needle sharp in strike and have thick golden frost. The eye appeal is great!

PCGS 6, NGC 4, CAC 3. Hard to believe a 1880 in PR67 RB has not been sold via auction since 2011. The current Collector's Universe Value is a ridiculous \$3,500. With all the bells and whistles and eye appeal this coin has to offer, we can see this blowing by \$3,500 easily. This coin will be a star in it's next collection!

What a headlight! Call the Fire Department! This coin is blazing! And it is SUPER High-End TOO! This is the FINEST 1881 RD Cameo graded (and is backed up by CAC). Pretty much ultra deep mirrors fire away from all over. The mirrors are crystal clear, are clean, and are intensely reflective. When you twirl the coin, you see what looks like a river of red mercury rolling around. Both sides are a GEM original Mint Red with highlights of gold. There are NO flecks or problems. The contrast is so bold the coin looks like it was carved out of a fresh block of copper. Miss Liberty and the details are needle sharp in strike and are thickly frosted.

PCGS 4, NGC 2, CAC 1. There are no published prices relevant to this WILD GEM; the consignor paid \$8,000 in a private transaction! The awesome eye appeal and killer quality of this piece (not to mention the Super star Pedigree) should push it to a record price.

The obverse of this coin is as cameo as cameo can be. The quality of this coin is also as High-end as can be! It is easy to see why Aurora Borealis chose this coin for his amazing toned Indian Cent set. Outrageous deep mirrors beam wildly from allover. The mirrors are crystal clear, are super clean, and are intensely reflective. When you twirl the coin you are blinded by the powerful blast from the mirrors. Electric shades of GEM original Mint Red/gold blaze from all over.

Some even neon like violet toning is spread around both sides. There are no spots or discolorations. Miss Liberty and the details boldly stand out with pinpoint sharp strikes and thick gold frost. The eye appeal is so wild it will make your jaw drop and lock! Remember, this is an Aurora Borealis coin!

PCGS 15, NGC 9, CAC 2. Rip up the current Collector Universe value is \$2,250. A coin this wild with color and quality sure will enjoy a bidding frenzy. If this were a toned Morgan, we'd rank the color as a 10-yes a full 10 (which is the highest number on our 1-10 color scale). Good luck here!

The surfaces are smooth and devoid of any flecks, spots, or marks. A strong coppery-brown satin luster gleams from all over, bringing life to the subtle olive, gold, rose, and teal overtones. Crisply struck throughout with full definition to all the details. The eye appeal is immaculate, with a look like you often see on Matte Proofs.

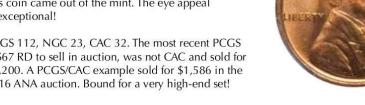

PCGS 1, NGC 0, CAC 1. In all color designations, the only other 66 is a PCGS RD and is not "+" graded. Nothing remotely close to the quality of this SUPERB GEM has ever sold in auction. Somehow there is a PCGS Price Guide value of \$7,000 in 66+ BN. As the FINEST numerically graded coin this piece will certainly be at home in the FINEST of Lincoln cent cabinets!

A glorious, SUPERB red GEM that likely was just submitted from an original roll. The brilliant luster and blazing red surfaces are as fresh today as they were when this coin came out of the mint. The eye appeal is exceptional!

PCGS 112, NGC 23, CAC 32. The most recent PCGS MS67 RD to sell in auction, was not CAC and sold for \$1,200. A PCGS/CAC example sold for \$1,586 in the 2016 ANA auction. Bound for a very high-end set!

PCGS# 2569 | ESTIMATE: \$750+

LOT 356 1C 1935 PCGS MS68+ RD CAC

Not only is this the FINEST GRADED, but it is absolutely one of the most SPECTACULAR Lincoln cents of any date or grade we have laid eyes on! Both the obverse and reverse are ON FIRE! Bold, brilliant, blazing Mint RED cartwheel luster rolls on both sides of this immaculate SUPERB GEM. The surfaces do not show a single flaw of any kind, anywhere! A bold ring of neon pink forms a frame on both sides, adding to the eye appeal. One look at this beauty and you will not be be able to look away!

PCGS 12, NGC 1, CAC 1. This is the SOLE 68+ RD for the ENTIRE Wheat series, 1909-1958! Anyone building the finest set of Lincoln cents or anyone looking for a fire cracker for a type set, prepare to bid very liberally to add this jewel to your collection! Once it is put away, it may not come out again for a LONG TIME!

LOT 357 1C 1943-S STEEL. PCGS MS68 CAC

A beautiful coin that is a twin to lot 139 in our December Regency Auction, a different example that we described as: "The only word for this PERFECT GEM is "PRISTINE." Looking as lustrous and remarkably clean as the moment it came off the dies the fields show a brilliant silvery-steel luster that show off an icy-blue frost. The eye appeal is spectacular."

PCGS 67, NGC 22, CAC 17. NONE ARE FINER. CAC-approved examples generally sell in the \$4,000 to \$5,000 range—the one in the above cited Regency Auction realized \$4,818 on a \$3,800 to \$4,000 estimate. This superb coin will be a highlight in any type or date collection of cents!

LOT 361 1C 1983 DOUBLED DIE REVERSE, PCGS MS67 RD CAC

One of the more modern varieties that has made it into the mainstream of collection, the 83 DDO cent, is rather rare in such a high grade. Brilliant RED luster beams from all over on both sides. All the lettering on the reverse is clearly doubled, visible with the naked eye. Bound for an amazing set of Lincoln cent varieties.

PCGS 60, NGC 117, CAC 16. Only two CAC-approved examples have sold in auction, one for \$1,440 and the other \$1,763 (both in 2017). The current CU value is listed at

\$1,600. A scarce modern coin that is bested by only a dozen coins finer.

PCGS# 3056 | ESTIMATE: \$1,500+

LOT 362 1C 1985-D PCGS MS69 RD

One of the FINEST examples of this modern cent and EXTREMELY RARE at this grade level. Blazing, fiery mint red luster beams from supremely high-end quality surfaces. Even using a powerful glass you cannot find a single imperfection of any kind--this coin is PERFECT!

PCGS 7, NGC 4. Clearly none are finer. The ONLY example to sell in auction was in June 2010, where one sold for \$5,635. If you are in the market to build the FINEST set of Memorial reverse cents, you will not find a finer 85-D! Good luck!

LIBERTY 1713

LOT 363 1C 1913 PCGS PR67 RB

A superbly toned MPL with amazing eye appeal and technical quality. The matte surfaces truly glisten when the light dances off the multitude of facets imparted during the sandblast process. Mostly rich red hues, including ample magenta shades show off a seductive emerald-green hue. The devices are crisply struck and both sides are very clean. Among the very finest graded by PCGS in any color designation, finer in any color.

PCGS 8, NGC 6. This coin has such

an amazing look, that it will make the \$10,500 CU value look low! We did sell a CAC-approved example for \$10,281 in our 25th Regency Auction. Only one coin is graded finer at PCGS, a PR67+ RB CAC that sold in the 2017 ANA auction for nearly \$16,000. This SUPERB coin is destined for a major collection of Matte Proof Lincolns. Prepare for strong bidding activity.

egend Rare Coin Auctions is proud to have been consigned the fabulous David Poole Collection of Proof Three Cent Nickels. This is a Hall of Fame Registry set at PCGS and one look at the offering you can clearly see why!

David has been a longtime friend and customer of Legend Numismatics. As many collector's know, he is one of the "good guys" in the hobby; his participation online and at shows is well known. His dedication to spreading his love of numismatics and sharing knowledge and observations from his own experiences has been a shining light for the

For many years his passion in collecting has been this obsolete denomination, struck from 1865 to 1889 in proof. Painstakingly, David handpicked every coin; carefully reviewing auctions and dealer inventories. In its final state, as presented for auction, it is a study of this series with a focus on CAMEO and Deep Cameo grades. While many dates are readily available in Proof,

with bold contrast designated by PCGS as CAM and DCAM, many of these dates are rare and very difficult to find, sometimes with many years passing between auction appearances!

Now with retirement looming, David wishes his coins to be placed with collectors who will appreciate them as much as he has. His clear choice for this goal was to consign to Legend Rare Coin Auctions. For David, building this collection was a labor of love, and we know our presentation will reflect all the love he had for these coins. Good luck!

Very few survive with full DCAM contrast, and this one is tied for FINEST of those precious few. The deep, icy mirrors shine through the reflective surfaces and the reliefs are fully

struck and highly frosted. The mirrors offer such deep and impressive clarity! The quality and eye appeal are AMAZING.

PCGS 3, NGC 2, CAC 3. The only PCGS coin to sell was NOT CAC and sold for \$10,575 in April 2015. There are no other comps. The CU value is \$10,000. It is amazing how rare DCAM 3CNs are. Equally as rare are the opportunities to buy one; DO NOT let this one slip away!

LOT 428 5C 1874 PCGS MS66 CAC

Exceptional eye appeal for a Mint State Shield nickel. Brilliant satin mint bloom shines under a delicate, original apricot-rose tone. Well struck and free of any marks. Tied for second FINEST graded, with only five MS66+ graded finer.

PCGS 12, NGC 5, CAC 10. The most recent one to sell brought \$3,050 in the 2016 FUN auction, a notoriously weak auction sale. These had been selling for \$4,000 or more a few years back and the current PCGS Price Guide value is listed at \$3,500. Now would be a great time to start a set of this neat series.

LOT 429 5C 1873 CLOSED 3. PCGS PR67 CAC

Among the finest certified by PCGS, only one 67+ is finer within the designation. Pristine watery fields reflect a light pastel iridescent toning that accentuates an exacting strike. A very high-end survivor of an original mintage of 1,100.

PCGS 4, NGC 5, CAC 3. There is a single PR67+ finer. The most recent example to sell in auction realized \$3,760. Before that, a PCGS/CAC coin sold in July 2015 for \$4,994. The current PCGS Price Guide value is listed at \$6,750. Keep in mind the 67+ has not yet sold in auction, and may not for quite some time. This is an important opportunity for anyone building a high grade set of PR Shield nickels!

LOT 430 5C 1877 PCGS PR66 CAM CAC

A borderline DCAM for sure! This is a PROOF ONLY DATE with a mintage of only 510 reported--clearly this SUPERB GEM presents a great opportunity for anyone building a set!

Intense deep mirrors powerfully explode from all over and are the ultimate in clarity, cleanliness, and of course reflection. If you twirl the coin it looks like a fresh sheet of ice hitting just right. There are no spots or stains. The contrast is stunning. Every detail is sharply struck and coated with frost that makes it look 3-D.

PCGS 47, NGC 63, CAC 33. We make no bones about the fact our sister firm paid strong for this near miss DCAM GEM.

It WILL mesmerize you! The CU value is \$6,000

PCGS# 83831 | ESTIMATE: \$5,250+

LOT 432 5C 1886 PCGS MS65 CAC

A beautiful GEM example of this KEY date to the series in Mint State. The majority of those minted went into circulation where they would remain for quite some time. GEM survivors are very few and far between! Lustrous surfaces shine with soft iridescent nickel tone. Well stuck and appealing to the eye, this coin is truly PQ.

PCGS 69, NGC 26, CAC 9. The most recent example to sell in auction was a non-CAC PCGS coin that sold in our December 2017 Regency Auction for \$4,935. The current PCGS Price Guide value is listed at \$5,500 and with this coin's high-end look, we think it could sell for more.

PCGS# 3847 | ESTIMATE: \$4,000+

LOT 431 5C 1879/8 PCGS PR67+ CAC

Within the TOP 10 graded examples at PCGS, this SUPERB GEM has a strong, steely nickel-silver reflective surface on both sides. The eye appeal is exceptional! There are only eight examples graded finer, including 6 in PR68 and a single PR69.

PCGS 33, NGC 16, CAC 16. The NGC number is for all varieties of 1879s. There are only 3 coins graded PR67+ at PCGS, and we sold the most recent example in the Regency Auction XV, December 2015, for \$3,055 and the current PCGS Price Guide value is \$4,000. VERY RARE finer, and this one is poised for a strong bidding competition from Registry Set Collector's. Good luck!

LOT 433 5C 1900 PCGS MS67 CAC

This SUPERB GEM is housed in an OGH and is very PQ even for the lofty grade assigned and clearly ranks among the FINEST KNOWN. A full, booming, nickel-silver luster booms with an impressive cartwheel swirl. Exceptionally sharp in definition, every one of Liberty's hair strands, every leaf detail on the reverse is fully struck and complete. The eye appeal cannot be beat!

PCGS 11, NGC 3, CAC 5. There is a single MS67+ finer. Before the recent downturn, CAC-approved PCGS MS67s were five figure coins, one selling in August 2011 for \$14,950 and one in June 2012 for \$12,650. The current PCGS value is listed at \$6,250. These just seem way too cheap at today's levels!

LOT 434

COMPLETE SET OF LIBERTY NICKELS PCGS PR65

Legend Rare Coin Auctions is presenting this PCGS PR65 set of Liberty nickels as a single lot; while common back in the 70's and 80's to see complete sets sold intact, when was the last time you saw one?

Our consignor assembled this set over the course of the last year or so, realizing how badly the market had beaten this series. Each coin was carefully selected for eye appeal, and most have a very well matched look.

The following coins are CAC-approved:

1883 No CENTS; 1884; 1886; 1887; 1888; 1889; 1893; 1894; 1899; 1901; 1906; 1908; 1909; and 1911. The 1901 is ex Teich Family Collection, as noted on the PCGS insert.

Most of the coins display a light pastel iridescent toning varying from pearly to delicate rainbow; others are brilliant with deep beaming mirrors that border on CAMEO like contrast.

The total combined Collector's Universe value is listed at \$17,025, but individual coins contained in the set have recently sold above their respective CU prices. If you were thinking of putting together a GEM set of Liberty nickels in proof together, here is one where the work has already been done for you!

PCGS# 3878 | ESTIMATE: \$17,000+

LOT 435 5C 1891 NGC PR67+* CAM

Of the 2,350 Proof nickels struck for Collector's in 1891, this is among the FINEST extant. Glorious mirrors beams through a dusting of pale, pastel iridescent toning. They are ultra deep and smooth with a bold clarity and cleanliness. The frosty devices are sharply struck and contrast with the mirrors in the most beautiful way! This SUPERB GEM is certainly worthy of NGC's "*"!

PCGS 3, NGC 1. This jewel sold in October 2012 for \$4,406. More recently a PCGS PR67+ CAM CAC sold

for \$9,400. Only two are finer at NGC, the last one to sell bright \$8,050 in August 2011. The current CU value is \$9,000. A remarkable SUPERB GEM worthy of any world class collection of Proof Lib nickels!

PCGS# 83889 | ESTIMATE: \$4,000+

LOT 436 5C 1906 PCGS PR67+ CAM CAC

A wonderful coin that is tied for second finest, and it has a very bold visual appeal. First, the obverse is so close to being a full DCAM. The mirrors are deep, offer an extreme amount of clarity and reflection that contrasts beautifully against the sharply struck and frosted devices. The reverse has a light iridescent toning and the contrast is not as strong as the obverse, but it is of high-end quality and bold visual allure!

PCGS 29, NGC 12, CAC 22. There are three examples in PR67+ CAM and only two finer. The only PR67+ CAM was an entirely different example that sold for \$4,113 in our Regency Auction XXIV. The current PCGS value is listed at \$4,900 and this coin should bring around that easily. Good luck.

PCGS# 83904 | ESTIMATE: \$3,800+

LOT 437 5C 1913 TYPE 1. PCGS MS67+ CAC

Exquisite! What an impressive Type 1. In the last two Regency Auctions, we have had the pleasure of selling two PCGS/CAC and one NGC/CAC MS67+, and this one is more beautifully toned than all the others! Lovely pastel, powder blue, icy teal, and delicate golden-peach blend together in an exceptional way that are brought out by a strong luster, all clinging to smooth surfaces and sharply defined details.

PCGS 649, NGC 279, CAC 221. There are 71 graded

MS67+ at PCGS. The most recent MS67+ to sell in auction was the NGC coin in our January 2018 Regency Auction that brought \$1,410. We sold one in December 2017 for \$1,821 and another for \$3,525. The current Collector's Universe value is listed at \$2,250 and we really think this SUPERB GEM will bring very close to that, or more!

PCGS# 3915 | ESTIMATE: \$1,500+

LOT 438 5C 1913 TYPE 1 PCGS MS68 CAC

Not only was this coin perfectly stored since the day it left the Mint 105 years ago, it was blessed by some awesome work from Mother Nature!

Absolutely perfect surfaces are a joy to behold. Use a strong glass-or even a microscope and look over everything because there really are ZERO imperfections anywhere. The texture is slightly Matte

like. A bold glowing luster can be seen all over. It certainly enlivens the magnificent original shades of pale blue/gold/violet/champagne that boldly swirl all over. Every detail is sharply struck and does stand out. The eye appeal is monumental!

PCGS 24, NGC 16, CAC 7. The last one to sell in auction was the Angel Dees coin which brought a crazy record of \$28,200 December of 2016. Prior to that, the last piece to sell in auction brought \$15,275 September of 2014. Do not let the pops fool you. Looking like this, we estimate no more then 5-6 piece survive. Even if you do not collect GEM Buffalos, this coin will be a start in any Type of set!

PCGS# 3915 | ESTIMATE: \$11,000+

LOT 439 5C 1913-D TYPE 2. PCGS MS65 CAC

A well struck and satiny example of this scarcer of the two types produced in 1913 at Denver. Iridescent toning graces both sides and the eye appeal is strong for the grade.

PCGS 170, NGC 82, CAC 34. In 2017, three examples sold in auction: November at \$1,020; August at \$1,410; and January at \$999. The CU value is currently at \$1,150. A tough coin to find finer, even the Angel Dee's coin was "only" MS65.

PCGS# 3922 | ESTIMATE: \$900+

LOT 440 5C 1916 DOUBLE DIE OBVERSE. NGC AU50

A totally pleasing and original example of this important rarity. Nicely defined details show light wear, evident that it was discovered before it was able to get heavily worn and pulled from circulation. Unlike many that have been conserved in the past, this piece has bold tan-russet and dove toning. A few insignificant marks are noted for accuracy, but none are serious enough to negatively affect the eye appeal. A very rare date in a highly collectible grade.

The doubled features are bold and completely visible to the naked eye. Not only is the doubling noticeable at the date and feathers, but also the profile shows bold doubling. The eye appeal really is superb for the assigned grade, as many we see are lacking in definition and eye appeal. Rarer than the other key varieties in the series, the 1918/7-D and the very famous 1937-D 3 Legged. Survival estimates range from 200-400 in all grades, with most being in the VF range.

PCGS 12, NGC 6. It has been over five years since the last PCGS AU50 sold in auction, realizing \$25,850 in January 2013. The most recent example was an NGC coin that sold for \$23,500 in April 2013. The current Collector's Universe value is listed at \$28,500. Rarely offered and a very important date for the advanced collector!

PCGS# 3931 | ESTIMATE: \$18,000+

LOT 441 5C 1918-S NGC MS65

Among the FINEST examples extant of this early S-mint date. A satin like glow shows some glossy luster on both sides. The strike is bold for the date, but does show some minor weakness in areas, as typical. Very eye appealing with a natural nickel-pewter toning on both sides. This GEM has a lot to offer the Buffalo nickel specialist!

PCGS 35, NGC 17. The last NGC coin sold in April

2016 for \$8,813, and more recently a PCGS MS65 sold for \$8,724 in the 2018 FUN auction. The current CU value is listed at \$15,000 and NGC has graded just a single MS66 finer. Bound for a very high grade set of Buffaloes!

PCGS# 3940 | ESTIMATE: \$7,500+

LOT 442 5C 1919 PCGS MS67

A magnificent GEM--a real SUPERB coin. Brilliant flashy mint luster beams from all over with a sharply struck design on both sides. The satin frost blooms, bringing out a light golden tone on the reverse, icy sky blue on the obverse. Ranking among the absolute BEST, this coin is exceptional in terms of technical quality and high-end.

PCGS 18, NGC 6. The most recent PCGS MS67 sold in

the 2015 ANA auction, and brought \$6,463. The current Collector's Universe value is listed at \$7,500. Only three coins are graded finer, all MS67+, the most recent of which was the Angel Dee's MS67+ that we sold in our December 2016 Regency Auction XIX for \$17,038. We expect this SUPERB GEM to excite advanced Buffalo nickel Collector's.

PCGS# 3941 | ESTIMATE: \$5,500+

LOT 443 5C 1919-D PCGS MS65 CAC

Like many of the early mint marked Buffalo nickels, the 19-D is a conditionally rare issue. Highly lustrous, nickel steel luster glows from all over. The reverse has a light violet/blue toning across the surfaces. The strike is strong for the date with nearly full detail. The eye appeal is exceptional.

PCGS 60, NGC 20, CAC 13. The last one to sell

realized \$8,519 in July 2014. Prior to that, one sold in February 2013 for \$18,975. There are only 25 coins grade finer. This handsome GEM is well suited for any high ranking GEM set!

PCGS# 3942 | ESTIMATE: \$6,000+

LOT 444 5C 1920-S NGC MS65*

A very beautifully toned GEM example of this conditionally RARE Buffalo nickel date. Both the obverse and reverse display bands of iridescent rainbow colors that beam brilliantly in the light, backlit by a glossy mint luster. Sharply struck for the date, the details have a profound appeal with the strong outlining from the beautiful toning. There is a single spot of carbon on the reverse, otherwise there is nothing that we can find that

takes away from the magnificent eye appeal. Very similar looking to the Angel Dee's Toned Set coin we sold in December 2016.

PCGS 26, NGC 15. The most recent NGC MS65 sold for \$8,100 in the 2018 FUN auction. This GEM sold for \$8,225 in the 2016 ANA auction. There are only five coins finer at NGC, the most recent finer coin sold in June 2015 for \$38,775. A coin like this deserves to be in a high-end cabinet of Toned Buffalo nickels.

PCGS# 3946 | ESTIMATE: \$7,000+

LOT 445 5C 1934-D PCGS MS66 CAC

Despite a generous mintage and more recent vintage, remarkably few examples survive in lofty grades, in fact the finest graded at either service are 66+. Boldly lustrous and well struck for the date, both sides show a delicate nickel surface.

PCGS 88, NGC 20, CAC 27. The last two sold in the \$2,000 range and the current CU value is \$2,450. Only six PCGS coins are finer, all graded MS66+ and the most recent one of those to sell brought \$10,575 in our

December 2016 Regency Sale, featuring the Angel Dee's collection. Ranking just under the highest grade, we think this one will please any advanced collector.

PCGS# 3973 | ESTIMATE: \$1,800+

LOT 446 5C 1934-D PCGS MS66+ CAC

This marvelous SUPERB GEM is tied for FINEST graded at either service, and it boasts a superb eye appeal. Richly toned with deep gold at the centers mixing with shades of of orange, rose, and bold pink toward the peripheries. Nicely struck for the date, both sides show nearly full definition and the surfaces are devoid of all but the tiniest marks. Rivaling the Angel Dee's coin in terms of toning and eye appeal, this coin has the added benefit of being CAC-approved.

PCGS 94, NGC 23, CAC 27. In total, PCGS and NGC have graded 8 coins in MS66+ with NONE FINER! The last PCGS/CAC coin to sell in auction realized \$16,450 back in September 2014. With its CAC approval and bold eye appeal, could a record bid be recorded for this coin? Only time will tell!

LOT 447 5C 1937 PCGS MS67+ CAC

"Minty" fresh! What a spectacularly preserved SUPERB GEM, looking as lustrous and flawless as it did when it left the dies. A dusting of pale, icy blue blends with clear gold, imparting a bold look on this sharply impressed Buffalo nickel.

PCGS 458, NGC 468, CAC 105. PCGS has graded 48 in 67+. The most recent MS67+ in PCGS/CAC sold in January 2017's FUN auction for \$1,528 and keep in mind, only 14 coins are graded finer. The most recent PCGS MS68 sold in

our December 2016 offering of the Angel Dee's set that sold for \$12,338. This coin seems to have a lot to offer the advanced collector, without the high price tag.

LOT 448 5C 1937-D 3 LEGGED. PCGS MS63 CAC

A lovely, originally toned CHOICE 3 Legged nickel. Rose and gold accents are dusted over pleasing frosted surfaces. Nicely struck for one of these. An always popular and well known variety, it was created when a mint employee filed off some clash marks from the die, accidentally removing the front leg of the bison.

PCGS 352, NGC 297, CAC 65. It's been nearly a year since the last PCGS/CAC coin sold in auction, realizing \$3,525 in November 2016. The current PCGS Price Guide value is \$3,800 and these have sold for more than \$4,000 in the past. A key date bound for a fine set!

PCGS# 3982 | ESTIMATE: \$3,000+

5C 1938-D BUFFALO. PCGS MS67+ CAC

A virtually perfect example of the final Buffalo nickel issue. Sharply struck with blazing luster and beautiful light gold, peach, and lilac toning, this SUPERB coin has an awesome look.

PCGS 1950, NGC 2552, CAC 179. In MS67+ the Populations are: PCGS 118, NGC 22. The most recent example brought \$3,120 in the 2018 FUN auction. That spectacularly toned coin brought a very strong price, others have generally sold in the \$700-\$1,000 range, with the CU value at \$950. With 27 coins finer, and each of those being a five figure coin, this is as high a grade as most Collector's can ever hope to own.

LOT 450 5C 1938-D BUFFALO. PCGS MS67+ CAC

Sitting near the apex of the grading scale, everything about this high-end SUPERB GEM is exceptional! A strong luster sets the beautiful toning aflame giving this sharply struck coin an incredible eye appeal!

PCGS 1941, NGC 2525, CAC 177. In MS67+, PCGS has graded 113, and NGC 20. The last PCGS MS67+ CAC sold for \$823 and in the same sale, one sold for \$1,410 (2017 ANA). There are only 26 coins graded finer, and the most recent PCGS MS68 was the Angel Dee's coin that sold for \$12,925. This coin has a very high-end look and will not bust the budget--sounds like a great combination!

PCGS# 3984 | ESTIMATE: \$900+

LOT 451 5C 1938-D BUFFALO. NGC MS68*

This is one WILDLY toned moose of a Buffalo! Dramatic rainbow hues gracefully and majestically blanket both the obverse and reverse, the AMAZING colors brought out by a strong mint luster. Beautiful greens, blues, pinks, oranges and golds all meld together. If we were to rate this nickel on our Morgan dollar scale, we would truly rate this one as a 10 (the very best). Both sides are sharply struck and this remarkable SUPERB GEM is truly deserving of its "*" designation for superior eye appeal!

PCGS 26, NGC 27. The last NGC MS68 with the Star designation realized \$5,640 in November 2016. With the present coin's stunning eye appeal, we think this one could exceed that level! What a great example for a high-end set or type collection.

LOT 452 5C 1936 SATIN. PCGS PR67 CAC

We are totally mesmerized by the high-end look! Want an amazingly toned SUPERB GEM Proof nickel, and while we have handled higher graded examples, the presently offered coin is truly memorable! Rich golds and blues, blend with light orange, apricot, and pale rose accents. Needless to say the eye appeal is exceptional and the technical qualities are all there and then some!

PCGS 309, NGC 151, CAC 115. There really is a wide range of prices for these in auction, and we believe that the

APRs and pricing guides for a coin like this may well prove useless to the toning aficionado. The Proof Buffalo nickel series is a short and totally do-able set, and this would be a great start, or addition to a high-end set.

PCGS 341, NGC 159, CAC 114. PCGS has graded 27 in PR67+. The last one to sell in auction brought \$4,465 in our December 2017 Regency Auction. Keep in mind, the ISS 6

next step up costs OVER \$9,000. This coin will be a star in ANY high-end Buffalo set. Do not let the pops fool you, these are not coins you see frequently!

LOT 454 5C 1937 PCGS PR66 CAC

At first glance, you would think this coin is a CAMEO Proof. The fields are about as deeply mirrored as you would ever see on a Buffalo nickel. They are brilliant, clear, and deep, without any of the typical nickel haze that almost always plagues this series. The devices are boldly struck and both sides are flawless. This coin will capture your gaze from across the room, it is that flashy!

PCGS 850, NGC 491, CAC 299. You can pretty much throw away the price guides and ignore the recent APRs

when figuring your bids. A CAMEO would cost about 8X what a typical PR66 would--this coin is oh so close and certainly worthy of a premium bid.

Beautifully toned, this AMAZING coin is virtually perfect and is the SOLE FINEST graded by PCGS for the date in Full Steps. A polychromatic display of golden, rosy, icy blue tones grace both sides. A billowy satin glow brings out the boldly impressed, sharply struck devices. To call this coin's eye appeal superb is a gross understatement.

PCGS 1, NGC 1. This coin has never been in auction, and as the FINEST graded, it will be hotly contested by the most advanced of Jefferson nickel Registry Set Collector's. We do expect a world record price for the date when this coin crosses the block! Good luck!

LOT 456 5C 1954-S PCGS MS66 FS

A VERY RARE date with a Full Step designation and this is a very well known coin--it is the second finest graded piece at PCGS. Very well struck, all of Montecello's steps are fully separated and defined. Likewise, all the other details of Jefferson's beloved home are crisply rendered with full details to the structure's famed portico. As expected for a very high grade coin, the surfaces are boldly lustrous with only a few microscopic marks. The 54-S is a real stopper in the series with a fully struck design and of similar rarity to the famed dates in the early 1960s.

PCGS 1, NGC 1. While there is a single coin finer, neither this coin, nor that one have sold in auction. The finest to ever sell in auction was a toned MS65+ that sold for \$12,925 in a weak 2016 FUN auction. The PCGS Price Guide value lists a \$25,000 price in their current guide. If you are working on putting together the top ranking PCGS Registry Set of Jefferson nickels with full steps, a very challenging pursuit to be sure, you need this SUPERB GEM!

High-end in every way! Deeply reflective mirrors beam on both sides and are extremely clean and offer a bold clarity and no haze or toning. The devices have enough frost to them to be awarded the coveted CAMEO designation—which is very rarely seen on early Jefferson nickel Proofs, and nearly always missing on the silver-alloy War nickel proofs.

PCGS 8, NGC 1, CAC 6. The last one to sell brought \$3,760 in December 2015. Every PCGS/CAC example has brought well in excess of the current PCGS Price Guide of \$1,850, and no doubt this one will too! A 67 CAM is worth \$14,000+ based on the most recent APR. Good luck!

OUR ESTIMATES

The estimates you see published in this catalog are based on HAMMER. Keep in mind that a coin could be either low or high end for the grade, have stunning color or be dull, all of which radically affect a coin's value. Yes, there can be huge price differences within a grade, and we offer estimates as a guide so Collector's can have a better idea of value. One thing we will never do is offer low ball estimates in order to claim stronger sales.

These published estimates represent what Legend Rare Coin Auctions determines to be an approximate high wholesale value for the coin. The numbers are based upon current market values, similar trades, auction prices, published prices, and a consideration of the coin's quality. There is no guarantee that the estimated prices are minimums or are exactly what you can expect to get if you attempt to resell them wholesale.

We always advise you to view the coins you are interested in and calculate what you'll pay using as much information as possible. If you have any questions, please feel free to ask us. We are here to help you!

LOT 459 H10C 1797 15 STARS. NGC MS64

A condition census LM-1, this is one of the FINEST 1797 15 Stars half dime that survives. Thanks to the layout of the stars on the obverse, the centers are generally very weakly struck. On this fully CHOICE example, we note only the slightest weakness around Liberty's ear, but the remainder of the design elements are very sharp, including Liberty's hair curls, drapery.

Deeply and richly toned, the obverse displays a pale slate/blue-gray, and the reverse mostly shows gold with sea-green and iridescent accents that are brought out by a fully satin-like luster. The eye appeal of this HIGH GRADE early half dime is wonderful and totally original!

PCGS 3, NGC 1. The most recent example was the PCGS/CAC Winsor-Clapp-Eliasberg-Gardner coin that realized a very strong \$70,500 in June 2014. An NGC-graded example last sold in August 2012 for \$25,850. The current Collector's Universe value is about the average of those two realizations, listed at \$48,000. Between PCGS and NGC there are only five coins finer combined. Choice and Gem Mint State coins are VERY RARE and very rarely offered! Opportunity knocks loudly here!

LOT 460 H10C 1837 NO STARS, SMALL DATE. PCGS MS67 CAC This SUPERB GEM is worthy of the FINEST Type or Half Dime set!

Sensational surfaces are pretty much the epitome of perfection-even when using a strong glass. We will note what looks like a scratch on the reverse is clearly IN the die (breaks no details). The surfaces have a superb satiny texture. A bold luster swirls all over. The luster enhances totally original moderate shades of golden brown/reddish gold that partially cover the coin. This is NOT a dull coin in any way. Miss Liberty and the details are frosted and are fully struck. The eye appeal is great!

PCGS 6, NGC 4, CAC 5. The last PCGS piece to sell in auction was a NON CAC. That coin brought \$28,200 in March 2017. Even an NGC CAC piece brought \$22,325-back in 2014. Do not think these are easy to find. If you are building the ultimate Half Dime or Type set, this coin should be more then worthy of inclusion. This IS a Legend quality coin!

LOT 461 H10C 1838 NO DRAPERY. PCGS MS66+ CAC

Pulchritudinous in every way--A.K.A a MONSTER! Sharply struck devices are brought out by a superlative satin mint frost. Both obverse and reverse show a stunning polychromatic, pastel patination. Shades of rosy pink, teal-blue, and champagne-gold blend together over the satin smooth surfaces. You really cannot picture a more beautifully toned SUPERB

GEM example of this early Seated half dime.

PCGS 49, NGC 45, CAC 14. There are six graded 66+ and 10 finer. Don't bother looking at the price guides, nor any APRs.

This coin's beautiful and high-end look will help this coin bring a VERY STRONG price. What a SUPERB GEM!

LOT 462 H10C 1843 PCGS MS67+

Whenever we see early Seated half dimes in such lofty grades, we marvel and wonder how such a tiny coin could have survived! This MAGNIFICENT SUPERB GEM is tied for ABSOLUTE FINEST KNOWN for the date.

Brilliant mint luster has an amazing swirling frost that really beams from below a delicate mix of totally original and beautiful

toning. Shades of icy-teal, pearly-silver, and magenta-pink caress the smooth and FLAWLESS surfaces on the obverse, while the reverse is more pearly-silver, pewter, and rose toned. The design elements are razor sharp and complete. The eye appeal is SUPERB!

PCGS 2, NGC 0. There are NO MS67s approved by CAC. NONE ARE GRADED HIGHER at either service. Nothing finer than a PCGS MS66 has ever sold in auction. PCGS estimates a value of \$6,750 in MS67+. In the entire series, 1840-1859, only 33 have been graded 67+, and most of those are 1859s. This is a UNIQUE opportunity thus far for the advanced Seated Liberty half dime collector, and it should not be missed for any reason! Who knows when the opportunity to acquire another SUPERB 1843 half dime will be!

PCGS# 4332 | ESTIMATE: \$6,000+

LOT 463 H10C 1845 PCGS MS66+ CAC

Very high-end and very FRESH! Bold satiny luster shows off a delicate, semi-PL flash when rotated in a light. Sharply struck with full definition to the devices. Boasting a light dusting of pastel iridescent toning on both sides, the eye appeal of this SUPERB early Seated half dime is excellent.

PCGS 20, NGC 5, CAC 6. Only 2 MS66+ have been graded at PCGS. None of these have ever sold in auction. The most recent PCGS MS67 to sell realized \$1,320 in the 2018 FUN auction and a PCGS 68 sold in the 2017 FUN sale for \$2,820. The

current MS67+ CU value is \$2,250. What a lovely, totally ORIGINAL GEM for the Seated half dime collector!

LOT 464 H10C 1848-O PCGS MS66+ CAC

Beautiful and high-end! For an Antebellum era coin to survive in such superb quality is very rare, and this gorgeous PQ GEM is among the ten finest PCGS graded coins. Frosty satin like mint sheen glows on both sides. The surfaces are dusted subtly by a touch of iridescent gold and the devices are fully struck up, a very rare trait for this date. At the low end of the condition census.

PCGS 9, NGC 16, CAC 10. There are only 2 coins graded MS66+ at

PCGS, none at NGC, and only seven coins are finer at PCGS, the finest being the monster MS68 in the Simpson Collection. The last PCGS MS66 CAC to sell in auction realized \$6,000 in the 2018 FUN auction and the most recent PCGS MS67 CAC brought \$15,275 in the May 2015 auction of the Gardner Collection. The current Collector's Universe value is listed at \$5,350 and that is just way too cheap given the cited MS66 in the FUN auction, the Pogue coin that sold in March 2017 for \$6,463. The coin that sold in FUN sold previously in May 2015 (also a Gardner coin) for \$5,288. We think this one will sell more in line with our range and the CU value will have to be adjusted up.

How can a coin, struck right before the biggest crisis in our nation's history survive in such a PRISTINE state of preservation?! Bold, billowing, brilliant satin silver luster glows from all over. The SUPERB surfaces are totally without flaw! Even under the inspection with a strong loupe all that is revealed are mint made die clashes. Hints of exceptional multi-colored toning graces the rims, mostly on the reverse. It is almost hard to think of a finer example!

PCGS 29, NGC 15, CAC 15. There are 17 in 67+ at PCGS,

NONE at NGC, and fewer than a half dozen are graded finer at PCGS. The last PCGS 67+ sold in November 2017 and it was not CAC approved. It realized a strong \$7,800. The current Collector's Universe value is listed at \$4,250 and we can certainly see this remarkable coin bringing more! Another really FRESH and high-end SUPERB GEM from this little group that has NEVER been on the market before! Don't let this coin pass you by!

PCGS# 4371 | ESTIMATE: \$3,800+

LOT 467 H10C 1859 PCGS MS68+ CAC

An AMAZING jewel! The number of superlatives needed to describe this SUPERB GEM would still not do full justice to the remarkable eye appeal and ultra high-end quality. One glance at this MS68+ half dime, and you will fall in love with it--it will be impossible to put down. Clearly, since the moment this coin was removed from the dies in 1859, it was put away and lovingly cared for. We cannot imagine how this coin survived the Civil War, Reconstruction, financial panics in

1873 and 1893, and who knows what personal issues that affected the owners of this coin. What we are certain of is that it is tied for FINEST certified, and quite possibly FINEST KNOWN.

A strong, brilliant mint luster blazes over smooth, pristine, FLAWLESS surfaces. That brilliance brings the vivid toning, particularly on the reverse to life. Shades of aqua, cobalt, teal, gold, amber, and rose hues blend beautifully together. The devices are very sharply struck up, with every detail crisply rendered to their absolute finest advantage.

PCGS 5, NGC 4, CAC 2. There are 3 MS68+ coins reported on the PCGS Population report, but NONE have ever sold in auction. This coin is clearly fresh to the market. The Shapiro-Gardner PCGS MS68 CAC has a record from 2007 at \$22,713 when Mr. Gardner purchased it. The James Lull MS68 sold in January 2005 for nearly \$30,000. In 68+ Collector's Universe lists a value of \$22,500. We think this coin will break that level! A PERFECT coin for the FINEST type set or for anyone collecting the highest quality Seated half dimes! Know that there will be a long, drawn out bidding war to take home this prize. We wish the winning bidder a very hearty congratulations in advance.

Sitting at the absolute top of the pop, this SUPERB GEM half dime is a true prize to the advanced collector of this series. Only 120,000 were struck, and this date is RARE in all grades of MS65 or higher! Super high-end surface quality shows off a brilliant luster with impressive iridescent golden and olive-tan patina with accents of rose, blue, and emerald accents at the reverse rim. Sharply struck of any post minting defects.

The eye appeal is superb!

PCGS 3, NGC 1, CAC 2. There are two in 66+ at PCGS, tied as FINEST known. The current PCGS Price Guide value is listed at \$12,000. This is not the PCGS MS66 CAC that sold in the June 2014 auction for \$8,225. A SUPERB choice for any top ranking set of Seated Liberty half dimes.

LOT 469 H10C 1873 PCGS PR67+ CAC

Congrats to this amazing coins designation which makes it the FINEST graded. This coin is well worthy of that designation.

Deep mirrors beam from all over. The mirrors are flawless and exhibit great clarity. When you twirl the coin the mirrors look like a freshly formed sheet of ice. Both sides are moderately toned with totally original attractive colors. The toning

does not lessen the flash of the mirrors. Miss Liberty and the details are frosted and are fully struck (kind of amazing for such a tiny coin). The eye appeal is superb!

ONLY 600 pieces were minted. PCGS 6, NGC 8, CAC 3. This is the ONLY PR67+ Cameo graded. It has never been sold via auction. There is a current Collector's Universe Value of \$7,000. Seems kind of cheap for a 145 year old obsolete FINEST graded piece! This coin will fit in ANY top set.

LOT 470 10C 1796 PCGS MS63 CAC

A lovely CHOICE Mint State example from the first year of dime production. Frosty and semi-reflective surfaces surround crisply struck devices. Every detail is rendered to full definition in Liberty's hair and essentially complete in the eagle's breast feathers. Only the slightest weakness is noted in the centers of stars 12 and 13. Pale gold blends with rich silver and dove accents. An earlier die state with just a crack at TA in STATES, not a full fledged cud. Despite the MS63 grade, there are no singularly significant marks to describe. The JR-3 variety is rated as R-5 and is the second rarest variety for the year behind the JR-5.

This impressive coin is ex John Whitney Walter Collection, Stack's, May 1999, lot 1768. John Whitney assembled an essentially complete collection of the coins of 1796 by die variety, half cent through \$10 gold, and he was dubbed"Mr. 1796." He purchased this coin from the Stack's April 1988 sale of the F. Dabney Caldwell Collection, lot 2324. There are two other examples of this R-5 variety graded MS63 by NGC, these include the terminal die state that sold one lot before this one in the Whitney Sale, lot 1767 (this piece had an extensive pedigree going back to the early 20th century).. The other is from the Haig Koshkarian Collection, ANR, March 2004, lot 46 (purchased from Ed Milas in May 1987). Though not noted in the ANR catalog, the Koshkarian coin is the "MS63" that appeared in RARCOA's session of Auction ë81 listed in the cenus in the JR book. We can say for certain that this coin is tied for finest for the variety. John Whitney Walter's Collection was sold in May 1999.

PCGS 15, NGC 21, CAC 6. A highly important coin, for the early dime specialist. With its impressive qualities, this choice BU coin will be a centerpiece for any U.S. type set or early dime set. A PCGS/CAC JR-1 (rarity-3) sold in the 2017 ANA auction for \$41,125. The current PCGS Price Guide value is listed at \$42,500. Very RARE any finer, with a PCGS MS64 being worth over \$70,000. This is an important opportunity to buy a well pedigreed, RARE 1796 Mint State dime that should not be taken lightly or missed! Good luck!

LOT 471 10C 1798 NGC AU58

JR-4, the Large 8, variety. Lustrous fields are coated by a marbled cobalt, teal, steely-silver, and rosy-gray. Only the slightest hint of rub can be seen on the highest points of the design elements that are generally well struck save for the most central portion of the reverse. Struck from a later state of the obverse die with a sharp curving die crack. The eye appeal is quite nice. It is numismatically interesting to note that this reverse die was also used to strike the 1798 BD-2 quarter eagles.

PCGS 2, NGC 3. The most recent Large 8 to sell in auction was a PCGS coin that sold in December 2013 for \$5,875. The last NGC coin sold for \$4,994 over five years ago. The current CU value is listed at \$7,500. A very scarce early dime that does not appear with any real frequency in this grade!

PCGS# 4466 | ESTIMATE: \$4,700+

LOT 472 10C 1821 SMALL DATE, PCGS AU58

A very attractive and original toned CHOICE AU JR-8. A light friction is noted on both sides over sharply struck devices. The eye appeal is very nice and under a strong glass, we note only the lightest of friction lines.

PCGS 9, NGC 2. The current PCGS Price Guide value is listed at \$2,200. The last one sold for \$1,939 and was CAC approved. PCGS has graded fewer than twenty coins in total in Mint State. A nice example for the variety.

PCGS# 94496 | ESTIMATE: \$1,600+

A lovely choice example of the JR-3 variety which matches the Large E's reverse with the second 23/2 overdated obverse die. Both sides are awash in appealing patina. An attractive, satiny specimen without any obvious distractions. All 1823 dated coins are over dates from leftover 1822 dies. It would be great if all MS63s could be this nice.

PCGS 11, NGC 7 (NGC makes no distinction between the Large E and Small E reverse varieties. The most recent one sold in our May 2016 Regency Auction, realizing \$3,643. Keep in mind only 10 are graded finer, and in MS63 the PCGS value is \$4,000.

WOW! Unbelievable! Remarkable! Stunning! Superb! Legend Rare Coin Auctions is humbled by the honor to offer this AMAZING Capped Bust dime! Not only is this coin of the highest quality; both technical and visual, it is among the FINEST GRADED of the entire Capped Bust dime series! It is almost impossible to think of where this coin was so lovingly placed and left, totally unbothered over the last 182 years that it could survive in this PRISTINE, lofty grade!

A SUPERB rolling luster has vivid, smooth cartwheels that are totally uninterrupted when this coin is twirled in a light. The fields possess a bold satiny frost that is completely without flaw. There are zero breaks to the frost. The devices are incredibly sharp, from a precision strike from the JR-3 die combination. Both sides display a wonderful pastel iridescent toning. Shades of baby blue, clear gold, and rose come to life in a light. What a wonderful, old collection type of toning!

PCGS 2, NGC 1, CAC 1. This is the only MS67+ graded. For the entire Capped bust dime series, from 1809 to 1838, there are only four MS67+s graded, with a mere two MS68s graded finer. For the type these are the most relevant APRs, note they are both from the February 2016 D. Brent Pogue Collection:

1830 Small 10C PCGS MS67 (lot 3035) sold for \$67,562;

1834 Large 4 PCGS MS67+ (lot 3042) sold for \$70,500;

Tied for FINEST 1843 dime graded! Exceptionally well preserved and totally original, both obverse and reverse are draped in a rich dove/pewter/teal/pale blue/ rose patina that was likely imparted by very long term storage in an old collector's envelope. A full satin frost can be seen from under the toning accenting the colors and sharp strike. Under intense scrutiny with a very powerful loupe, we see

nothing but the tiniest of minor marks. The eye appeal is very special!

LOT 480 10C 1837 NO STARS. PCGS PR64

A very rare Proof striking of the first year of Gobrecht's original, eye catching design without the obverse stars. According to Walter Breen, on June 30, 1837, Robert Patterson had the new dies installed into the press and had 30 Brilliant Proofs struck for various officials and other VIPs. Today, perhaps 25 survive, most are lower grade.

Displaying generally icy

smooth mirrors, the presently offered coin has a bold visual allure. The mirrors have a watery reflective nature that brings out the delicate hues that cling to the surfaces. Shades of golden-russet, olive, and pale blue are seen when rotated. A strong glass and patience does reveal a few trivial lines in the fields that account for the assigned grade, but the overall eye appeal is quite nice.

PCGS 8, NGC 13. Clearly the population reports show duplication of the same coin being submitted multiple times. The last one to sell realized \$14,687 in our February 2015 Regency Auction. LOT 481 10C 1842 PCGS PR65 CAC EX SIMPSON.

This is an exceedingly rare and very high-end gem! Its rarity is equal to any million dollar classic rarity! Deep mirrors beam from all over. There is only one tiny well hidden mark in the right field that keeps this coin from full PR66 (you need to use a glass to see it). The mirrors are similar to the same type you would see on a coin from the 1880's: deep, clean, crystal clear, with bold reflectivity. Both sides are evenly blanketed by an original intense electric violet/navy/purple mix. Miss Liberty and the details are fully struck and have generous frost. This coin is total eye candy!

PCGS 1, NGC 1, CAC 1. There are NONE graded higher. The mintage is estimated at a mere 5 pieces. There maybe one NGC PR65, though it is not stickered by CAC. The current Collector's Universe Value is \$45,000. Even if you offered \$100,000, you could not duplicate this coin! Also, this coin was formerly in the Simpson Collection which is probably the greatest coin collection ever assembled.

This piece snuck by us! Had we seen it when it came in for auction, we would have done our best to just buy it. Why this piece is not a 67+ we may never understand.

Electric deep mirrors beam vividly from all over. The mirrors are ultra clean (there is a thin die line on the reverse), have bold clarity, and are highly reflective. A killer mix of totally original blue/amber/violet/ pale green colors swirl all over he obverse. The reverse probably was laying on felt and has a blue/violet/tangerine color mix.

Miss Liberty and the details are thickly frosted and are full struck. The eye appeal is quite colorful and dynamic!

ONLY 700 were minted. PCGS 3, NGC 5, CAC 3. The last PCGS PR67 CAC piece to sell in auction brought \$4,406 in October 2014. Certainly, a killer multicolored GEM piece like this is worth much more today. The current Collector's Universe Value is \$6,000. Good luck!

The epitome of freshness and originality. Boldly lustrous on both sides, this high-end SUPERB GEM has a full, complete strike. Both sides display heavy die polish lines in the fields. Delicate golden-amber toning can be seen in areas of the design and the eye appeal is wonderful.

PCGS 26, NGC 13, CAC 12. It has been over three years since the last CAC-approved PCGS coin sold in auction, realizing \$3,525 in December 2014. The current PCGS Price Guide value is listed at \$3,000 and only two coins are graded finer at PCGS, both 67+ FB. If you are working on a top shelf set this SUPERB coin would fit right in!

LOT 493 10C 1928-S PCGS MS66 FB CAC

Fully frosty and brilliant, looking as fresh today as it did the moment it came off the dies 90 years ago. Sharply struck with full bands, this lovely GEM is perfect for any GEM set of Mercury dimes.

PCGS 41, NGC 10, CAC 13. The current PCGS value is listed at \$4,450 and the most recent PCGS MS66 FB CAC sold for \$3,055 in June 2017. Two coins sold in the 2016 ANA auction for \$3,760 and \$3,878. Anything finer, and PCGS has graded only 15 coins in higher grade, will cost five figures. A great coin for a GEM set with lots of appeal.

This piece easily ranks as one of the finest graded for the date. CAC showed it no mercy by not beaning it. We do not know what they saw.

Superior surfaces are the epitome of perfection. Even using a strong glass you can't even find a microscopic problem. The surfaces also have an exceptional satiny texture. a full booming luster can be seen from feet away. A marvelous mix of reddish

gold/violet/blue colors frame the peripheries all over. Miss Liberty and the details are needle sharp in strike. The eye appeal is breathtaking!

PCGS 5, NGC 2. Of course there are NONE finer. The last PCGS piece to sell in auction brought \$10,575 back in 01/2013. That is five forever years ago! The beautiful SUPERB GEM will be a terrific addition to ANY toned Merc or Type set. It's also a coin you can just stare at all day too

OUR ESTIMATES

The estimates you see published in this catalog are based on HAMMER. Keep in mind that a coin could be either low or high end for the grade, have stunning color or be dull, all of which radically affect a coin's value. Yes, there can be huge price differences within a grade, and we offer estimates as a guide so Collector's can have a better idea of value. One thing we will never do is offer low ball estimates in order to claim stronger sales.

These published estimates represent what Legend Rare Coin Auctions determines to be an approximate high wholesale value for the coin. The numbers are based upon current market values, similar trades, auction prices, published prices, and a consideration of the coin's quality. There is no guarantee that the estimated prices are minimums or are exactly what you can expect to get if you attempt to resell them wholesale.

We always advise you to view the coins you are interested in and calculate what you'll pay using as much information as possible. If you have any questions, please feel free to ask us. We are here to help you!

LOT 501 10C 1968 NO S. PCGS PR68 CAM

One of the RAREST modern mint issues. 1968 saw the first year of Proofs struck at the San Francisco mint, and a very limited, but unknown, number of Proof dimes made it into sets without the "S" mint mark.

As expected for a recent proof, the surfaces are flawless; the mirrors deep, clearly reflective, and beaming. The frosted devices show a wonderful amount of CAMEO contrast.

PCGS 7, NGC 2. The last one to sell in auction realized \$22,325 in April 2017; before that two coins sold for \$30,550. The current PCGS value is \$30,000 and this is a major rarity in he modern U.S. series, missing from most collections of Roosevelt dimes.

LOT 502 20C 1875-S PCGS MS65 CAC

A very attractive, totally original GEM example of this popular obsolete denomination. Struck for only two years for circulation, the 1875-S saw the largest mintage, making it the PERFECT date for a type set. Satiny mint frost shows off a wonderful antique olive, tan, pewter, and gold variegation. The surfaces are free of any distracting marks and the strike is bold, even on the tops of the eagle's wings and Liberty's knees which are often quite flat. The eye appeal is better than most for the grade.

PCGS 203, NGC 208, CAC 54. The most recent PCGS/CAC coin did NOT have the eye appeal of this gem. Prior to that, a brilliant untoned example realized \$3,995 in November 2016. Prior to 2015, every PCGS/CAC coin realized in excess of \$3,000. This is a coin that needs to be seen to be fully appreciated, and then a liberal bid can be figured! Good luck!

PCGS 28, NGC 3, CAC 11. We sold one in our February 2018 Premier Session for \$1,760 and the only CAC coin to sell realized \$1,998 in September 2015. The current PCGS Price Guide value is listed at \$1,750. What a neat type coin for the budget minded collector.

Exceptional surfaces are remarkably clean and smooth. Even when using a strong glass there are no surprise imperfections that pop up. The surface texture is satiny. A moderate luster does help the totally original colors of pale olive/pewter which are spread all over. Miss Liberty and every detail are clearly visible and have strong strikes. The eye appeal is wonderful!

PCGS 14, NGC 10, CAC 1. NO PCGS CAC piece piece has ever been sold at auction. We assure you, this piece is far better than most that have traded. The current Collector's' Universe Value is \$4,750. This coin is worth every cent of that!

LOT 505 25C 1853 ARROWS AND RAYS. PCGS MS66 CAC

A wonderfully original and eye appealing GEM example of this important one year type coin. A razor sharp strike brings all the details of Ms. Liberty's face, hair, drapery, and all of the other intricate devices are fully defined. Boldly accented by the extraordinary underlying mint bloom, olive, tan, and gold toning really comes to the forefront of the viewer's attention.

While common in most grades thanks to a generous mintage of over 15 million, in ultra high grade like this, the number of survivors are in the in the single digits. The Arrows and Rays type came about under the terms of the 1853 Coinage Act, which reduced the weights of silver coins. This was in response to the wholesale export and melting as the silver content was worth more than face. To make these new standard coins differentiate from earlier issues, arrows were placed next to the date, and a burst of rays above the eagle. Due to striking issues, the rays were removed in 1854.

PCGS 9, NGC 7, CAC 2. This remarkable coin was sold in July 2005 for \$32,200. Purchased by noted Seated coinage collector, Gene Gardner, this coin was more recently resold in the June 2014 sale of the Gardner Collection for \$35,250. This is the only CAC approved example in this grade to ever sell in auction. Only two coins are graded finer at PCGS, both MS67. The most recent example to sell in January 2005 for \$56,350. For type set purposes, or any amazing set of Seated Liberty quarters, this is not a coin to pass up!

LOT 506 25C 1854 ARROWS. PCGS MS65

A beautifully toned example of this two-year only type. Brilliant satin luster glows from under a delicate layer of pastel, iridescent toning. Soft rosy-pink, lavender-gray, golden-peach hues are really brought out when the luster catches the light. Very sharply struck with nearly completely crisp definition to the well struck devices. The eye appeal is more than decent on this GEM.

PCGS 35, NGC 21. The current Collector's Universe price is \$5,500 and the most recent example to sell in auction realized \$4,230, but it was no where near as attractive as the presently offered coin. We sold a 65+ for \$14,688 in December 2017 and keep in mind a 66 will cost over \$25,000. A great coin for any high grade Seated Quarter set.

PCGS# 5432 | ESTIMATE: \$4,000+

LOT 507 25C 1856-O PCGS MS65

A major condition rarity and tied for FINEST graded at PCGS. The obverse and reverse are both draped in beautiful pastel iridescent toning. Soft cobalt blends with gold, lilac, emerald, olive, and russet-tan. Well struck from an obverse die that has a spidery die crack that loops around the periphery.

With a mintage of 968,000, you would not think that it was a major

condition rarity, but the vast majority of the issue was distributed in the antebellum New Orleans area where they were circulated for years with very few contemporary Collector's to set examples aside, any Mint State survivor exists by pure happenstance.

PCGS 3, NGC 0. There have been two appearances of PCGS MS65s at auction. This one sold in November 2014 for \$11,163. Even Gene Gardner, who assembled one of the greatest collections of Seated coinage ever only had a MS64. Opportunity knocks very loudly here!

LOT 508 25C 1865-S PCGS MS66+ CAC

VERY High-end QUALITY HERE! Clearly one of the FINEST 1865-S quarters that survives from the original mintage of only 41,000. A billowing, brilliant mint luster swirls all over on both sides. Untoned, frosty silver looks as clean and free of flaw as the day it was struck, as one could reasonably expect of a coin graded so fine. Every detail is fully embossed from a precision and exacting blow from the dies. It is amazing to think that there may be two others graded 66+, tying this one for FINEST KNOWN status.

PCGS 4, NGC 1, CAC 3. NGC has one coin reported at MS67, which is this coin. The last time the present coin sold in auction was in the Gardner Collection sale, as a regular MS66 PCGS/CAC selling for \$58,750 in June 2014. A PCGS MS66+ CAC with somewhat mottled, uneven toning sold for \$64,625 in February 2014. The current Collector's Universe value is \$65,000 and remember, there are NONE FINER. This coin is quite special!

LOT 509 25C 1867-S PCGS MS67 CAC

By far, the FINEST KNOWN example of this VERY RARE date. Only 43,000 quarters were struck at San Francisco and most of these quickly disappeared into circulation. The next finest is MS64.

A pearly satin mint bloom radiates with a silvery-white iridescence with a delicate dusting of clear gold and powdery lilac that brings out the pearl-like luster of both sides. The devices are sharply struck on both sides and the surfaces are essentially perfect! This coin's status as FINEST KNOWN was established when it was first sold in the March 1975 Stack's sale of the James A. Stack Collection. In the 43 years since, no other 1867-S has come even close to rivaling this amazing coin in terms of technical quality, visual allure, or numeric grade.

This coin is ex. James A. Stack Collection (Stack's, 3/1975), lot 122; dealer intermediaries; Auction '86 (Paramount, 7/1986), lot 1619; interddiaries; Long Beach Signature (Heritage 6/2004), lot 6063; Gene Gardner Collection (Heritage, 5/2015), lot 98352 (as NGC MS67 CAC); the present consignor.

PCGS 1, NGC 1, CAC 1. The NGC Census still shows this coin. As an NGC coin, this coin realized \$88,125 three years ago. Conditionally RARE, this GEM is tied for the second FINEST graded at PCGS. Vivid mint brilliance has a satiny/frosty glow that accents a sharp strike. The obverse has a pale, iridescent toning, while the reverse has a marble-like pattern of icy-silver blue, coppery amber-gold, and rich slate-pewter. The eye appeal is very high-end and totally original.

PCGS 10, NGC 9, CAC 2. No CAC-approved MS65 has ever sold in auction. Since 1998, there has been only seven appearances of a PCGS MS65 in auction. The record price was in March 2006 when one sold for \$6,900. The most recent example sold in April 2017 for a mere \$2,350 but the current Collector's Universe is a more realistic \$3,750. Tied for FINEST graded. This is a surprising condition rarity! With a mintage of over 8.5 million there are remarkably few graded Mint State examples. Only a handful of MS66 examples graded. This GEM is untoned, with a brilliant mint luster that rolls vividly on satin smooth surfaces. Completely struck with razor sharp definition, this quarter boasts a "just off the dies" eye appeal and freshness.

PCGS 8, NGC 8, CAC 4. Last sold in July 2009, this beauty realized \$5,290. The most recent example to sell was the Eliasberg-Gardner coin that realized a very soft \$2,350 in June 2016 (after selling in August 2015 for \$4,230, and May 2015 for \$5,640). This is a death defying MONSTER of an ULTRA CAMEO! Yes, this coin not only walks and talks, it glows in the dark. This coin breaks the factor charts by a mile! We do think at the very least this coin should be a + (we make no promises it will).

Ultra deep and never ending mirrors have incredible clarity, cleanliness, and nearly blinding reflection. There is one light hint of hidden

toning (yeah, it's actually hidden) still, this coin is as ULTRA BLACK AND WHITE as you will ever see! Miss Liberty and the details are bold in appearance. They have sculpted full details which are covered by thick iridescent white frost. You'd think this coin was chiseled from a block of ice. The eye appeal is phenomenal!

ONLY 762 were minted. PCGS 9, NGC 15, CAC 13 (obviously a resubmission in there). Our sister company has tried this coin for a PR68+. They are still scratching their heads as to what PCGS was thinking. The last PCGS CAC DC to sell in auction brought \$23,500.00 back in 04/2013. You can't find these any more at shows or auctions. Even if you could, you won't find many looking like this! This coin is also fresh to the market having been placed with a collector in 2014.

Think about it, which would you much rather own? One of the best PR 25C Barbers that's PCGS CAC or a bunch of dupes or marginal coins? Of course if you collect Barbers or are building a Type set, this coin is a "must buy." Warning: wear sunglasses when viewing the image!

Ex. Cheyenne Collection.

WOW!

Dreamy mirrors are deep and really boom from all over. They have strong clarity, cleanliness, and are highly reflective. When you twirl the coin the mirrors flow like a river. A pale hint of gold is spread over both sides. Miss Liberty and the details are sharply struck and have thick creamy white frost. The eye appeal is tremendous!

Only 813 were minted. PCGS 8, NGC 17, CAC 14. While the CU value is listed at \$5,050, the last one to sell in auction realized \$6,600 in the 2018 FUN auction. Cannot say we have seen many of these for sale at today's ridiculous low prices.

Opportunity knocks loud here!

LOT 524 25C 1908 PCGS PR66 CAM CAC

A very eye appealing GEM 1908 quarter. Bold, deeply reflective mirrors shine with extreme clarity, providing a sharp contrast against the lovely frosted white devices. The devices are very well struck and the surfaces are nicely preserved with only a subtle tone seen in the protected outlines of the design.

A low mintage date, with a total of only 545 proofs struck, and this era had very few that were struck with the cameo finish of

the previous decade, making any CAMEO a very scarce and desirable coin, more so with such a high end look.

PCGS 2, NGC 2, CAC 3. This was the most recent example to sell in auction, where it realized \$2,115. The current PCGS value is listed at \$2,750 and fundamentally, that just seems WAY TOO CHEAP! Prices cannot stay so depressed forever, so take advantage of the current market and build a set today!

LOT 525 25C 1916 STANDING LIBERTY. PCGS MS67 FH

One of the absolute FINEST KNOWN examples of this classic 20th century rarity.

Both sides are aglow with a bold satiny luster that gleams throughout the surfaces. SUPERB GEM quality surfaces show off a mellow dusting of clear champagne and subtle pewter tons, which brings out the sharpness of the details and are amplified by the brilliance of the mint luster. The strike is as fine as you will hope to encounter on a 1916 quarter.

Only 52,000 examples were struck in December 1916, as part of the "Renaissance of American Coinage," a period from 1907 to 1921 when some of the nations greatest sculptural artists redesigned America's circulating coinage: from St. Gaudens' Indian and Liberty Striding Forward designs on the \$10 and \$20 gold coins, to Anthony DiFrancesi's Peace dollar design, every denomination underwent a makeover during this period, and are some of the most popular, endearing, and beautiful designs ever used on our coins. Herman MacNeil's Standing Liberty quarter design is a truly wonderful design, and this is an essentially perfect example for any collector to start his or her set with!

PCGS 5, NGC 3. There is just a single coin graded finer, a 67+ FH that has not been sold in auction since 2010. The most recent PCGS MS67 FH sold in the 2015 FUN auction for \$146,875. The record price for this grade is \$149,500 for a coin sold in August 2010 and the 67+ FH sold in November that year for just shy of \$200,000. The current PCGS Price Guide value is listed at \$165,000 and since these appear with such infrequency, it is very possible that that level will be exceeded by this AMAZING high grade example. A true 20th century trophy bound for one of the premier collections of Standing quarters and the opportunity should not be missed!

Conditionally rare any finer, This is about as fine a grade as most Collector's can hope to add to their sets. After a few minor adjustments to the Type 1, including covering Liberty's bare breast with some chain mail armor and three stars added under the eagle on the reverse. Sharply struck and offering a bold satin luster on the slightly rusted obverse, a hint of color graces the left rim of the obverse.

PCGS 103, NGC 51, CAC 30. There have been only a half dozen PCGS/CAC coins

ever sold in auction, going back to 2012. Each one has sold in the \$1,500-\$2,115 range and the current Collector's Universe value is listed at \$1,800. VERY RARE any finer so we anticipate strong bidding for this one!

LOT 527 25C 1918/7-S PCGS MS63 CAC

One of a very few true overdates in the entire 20th century catalog of U.S. coins, the 18/7-S quarter is a very rare date and among the rarest dates in ANY Mint State grade!

A beautiful rosy hue caresses the satiny lustrous surfaces on both sides. A vibrant mint bloom brings the delicate pastel toning to life. While not fully struck up, the details are only weak on Liberty's head and on a few of the brads on the shield. Wonderfully eye appealing example of this date that will delight even the most persnickety collector.

PCGS 26, NGC 7, CAC 2. No CAC-approved example in MS63 has ever sold in auction! The last PCGS MS63 sold in auction in the 2017 FUN Auction for \$23,500 and the current PCGS Price Guide value is listed at \$26,500. Very RARE any finer and this coin will delight any advanced Standing Liberty quarter collector. We do expect strong bidding!

LOT 528 25C 1919-S PCGS MS64 FH CAC

Possessing an incredible strike and exceptional eye appeal, unlike the majority of 1919-S quarters. A lower mintage date that was not well produced. Most known have a flat strike and are lack luster. The presently offered example is on the other side of the spectrum, fully struck on the shield and with crisp detail on Liberty's head, a bold luster rolls on both sides.

The obverse shows a light overtone of clear gold, while the reverse is untoned. Very high-end surfaces look to be of a higher grade, it is only under close inspection that a couple of microscopic bag marks are seen. The eye appeal is totally unmarred by any distracting spots or unsightly toning splotches.

PCGS 27, NGC 19, CAC 6. There have been three PCGS/CAC examples sold in auction. The most recent was in April 2016 for \$14,688; before that one sold in June 2015 for \$24,675, and the first one brought \$13,225 in November 2012. The current PCGS Price Guide listing is at \$17,500 and keep in mind that it is VERY RARE any finer, with the value more than doubling in MS65 FH! An impressive near-GEM for any advanced collector with a lot of visual allure!

LOT 529 25C 1924-S PCGS MS65+ FH CAC

Many of the mintmarked Standing Liberty quarters from the mid-20s are very poorly struck, often lacking full head details. This well struck GEM is impressive, showing full detail on the head, and only some minor weakness on a few brads on the shield. A brilliant swirling luster beams from all over, giving life to a delicately toned vibrant surface. Struck late in the life of the dies, there are a

number of spidery die cracks seen on both sides. The eye appeal is excellent!

PCGS 36, NGC 34, CAC 6. In MS65+, PCGS has graded 3 and NGC 2. Two have sold in the past, the most recent for \$10,800 in February 2018 and the one prior to that sold in the 2014 FUN auction, bringing \$12,925. PCGS 140, NGC 44, CAC 41. Only 8 coins are graded MS66+ with 27 coins finer in the designation. Neither of the two MS66+ did not have the eye appeal of this beauty. This coin brought \$1,234, well in excess of the \$850 Collector's Universe value. The collector has changed directions and now you have a second chance to bid on this very pretty GEM!

LOT 534 25C 1932-D PCGS MS65+ CAC

Our sister company, Legend Numismatics are huge fans of this date in GEM. They have read us the riot act how rare they really are and how much better this coin is then 95% of what you will ever see called GEM MS65. Apparently, 1932-D's do not come all that great. It's been 30+ years of operations and PCGS has graded only 2 higher.

To start, this coin is closer to MS66 than MS65. Sensational surfaces are flawless; even using a strong glass all you will see are light toning lines-not a single imperfection. The surfaces are super smooth. A surprising strong luster beams from all over. There is some light reddish brown toning spread more so around the peripheries than anywhere else. What looks like finger prints clearly are NOT-those are light toning lines. Washington and all the details are extremely well struck. The eye appeal is wonderful!

PCGS 84, NGC 33, CAC 19 (w/none beaned higher). PCGS has graded only 5 coins MS65+ (and 2 in MS66). We would put this coin next to any called MS65+ (and it would win)! The last PCGS CAC piece to sell in auction brought \$21,739 in December 2015. The current Collector's Universe value is \$28,000. It should be noted that a NON CAC MS66 sold for \$74,000 in January 2018. There is no question this sharply better MS65+ 1932-D has been carefully stored since the day it left the bank!

O-103. This coin has been with our collector client since it sold in our July 2015 Regency Auction, where it was described in part:

"This wonderful piece almost looks like a medal! Exceptionally clean, smooth surfaces have a light luster, while the colors are an original soft dove gray/light pewter. There is some minor toning on the high points of the face. Miss Liberty and the

details are extremely well struck and you don't need a glass to see the feathers on the eagle's neck.

The eye appeal is wonderful!"

The earlier Draped Bust half dollars (1801-03) are very scarce issues, and in light of the scarcity of the 1801 and 1802 issues, the 1803 is sometimes overlooked, but it is an extremely difficult issue to find in higher grades.

PCGS 15, NGC 2, CAC 6. This coin realized \$8,519 against a presale estimate of \$6,500-\$7,000. The current PCGS Price Guide value is listed at \$8,000 and we expect that this coin will surpass that level again.

A condition census O-109a. Satiny brilliant mint luster glows from below a beautiful blend of antique toning on both sides. Nicely struck for the date, the presently offered coin was struck from a late state of the dies, with extensive die cracks that nearly encircle the obverse and others on the reverse--these are very cool to examine under a strong glass. Boldly eye appealing, this coin will be great in any type set, or date set of Draped Bust halves.

PCGS 67, NGC 79. Auction prices realized are all over the place, but most fall in the \$7,000+ range, and the current Collector's Universe value is \$7,250. This coin's exceptional visual allure will entice strong bidding from type and date Collector's for sure!

LOT 541 50C 1807 LARGE STARS. 50/20. PCGS AU58 CAC

Sharply struck from an earlier state of the O-112 die marriage, showing off fully delineated details in the devices. A rich satin mint frost blooms in the protected areas, adding a real sparkle to the eye appeal. The obverse has a delicate toning around the rims, while the reverse has a rich gunmetal-blue iridescence with accents of teal and rose that appear when rotated in a light.

A true prize for the advanced Capped

Bust half dollar collector, this SUPERB AU O-112 has a fantastic pedigree: Ex Alto II, Stack's October 1991, lot 766; Gehrig Prouty Collection; Sheridan Downey June 2001 (withdrawn), later sold privately to Keith Davignon; Sheridan Downey August 2017, lot 1.The first varieties of the Capped Bust series featured the blundered denomination, which is listed as 50/20, however today it is believed that it is really a 50 punched over an inverted 5. It is a very popular variety and this coin is a real GEM for the grade!

PCGS 36, NGC 14, CAC 12. The only other PCGS/CAC coin to sell in auction realized \$8,813 in the 2016 ANA auction. We anticipate strong bidding for this early Capped Bust half when this one crosses the block!

LOT 542 50C 1807 LARGE STARS. PCGS XF40

O-114. Sharply struck with a great underlying luster, this impressive looking XF boasts a great old "album" style toning. A band of bluish-green meets some subtle gold before yielding to a rich silver-gray coloration in the center. This old toning lessens the visual effect of a few ancient circulation marks. For an XF, this coin has a great eye appeal--especially for an O-114.

PCGS 15, NGC 5. The last one sold in the 2018 FUN auction, realizing \$2,040 and before that one sold in the 2017 ANA sale for \$2,820. The current PCGS Price Guide value is listed at \$2,800.

OUR ESTIMATES

The estimates you see published in this catalog are based on HAMMER. Keep in mind that a coin could be either low or high end for the grade, have stunning color or be dull, all of which radically affect a coin's value. Yes, there can be huge price differences within a grade, and we offer estimates as a guide so Collector's can have a better idea of value. One thing we will never do is offer low ball estimates in order to claim stronger sales.

These published estimates represent what Legend Rare Coin Auctions determines to be an approximate high wholesale value for the coin. The numbers are based upon current market values, similar trades, auction prices, published prices, and a consideration of the coin's quality. There is no guarantee that the estimated prices are minimums or are exactly what you can expect to get if you attempt to resell them wholesale.

We always advise you to view the coins you are interested in and calculate what you'll pay using as much information as possible. If you have any questions, please feel free to ask us. We are here to help you!

PCGS 94, NGC 48, CAC 11. The only PCGS/CAC coin to sell brought \$1,870 in a mail

LOT 547 50C 1815/ 2 PCGS XF45

Light wear on the high points, this coin possesses a great eye appeal for the grade. Boldly defined design elements and smooth fields do not show any significant signs of any sort of mishandling. Only a few stray marks from circulation are noted under strong magnification. A great example of the KEY date series to the Bust half dollar series. Only

47,150 half dollars were struck for the entire year, and they were actually delivered in January 1816; hours later the building where silver and gold planchets were rolled burned, accounting for the lack of coins struck in 1816. Only a single set of dies were used to strike 1815 half dollars, and all are of this 5/2 variety.

PCGS 66, NGC 31. The last non-CAC example realized \$7,931 in the 2016 ANA auction and the current PCGS Price Guide value is \$8,800. This is the KEY date to the series, always in demand from Collector's!

The KEY date to the ever popular Capped Bust half dollar series. All 1815 halves were struck from a single set of dies, and all are overdates; the 2 is clearly seen under the 5 to the naked eye. The presently offered AU58 is a true prize for the specialist collector. Rich patina blankets the semi-satiny surfaces. The details are boldly defined, and well struck throughout, except on some stars.

The entire mintage of 47,150 was struck using a single pair of dies and was delivered early in 1816. Hours after, one of the buildings that housed the planchet rolling equipment burned down, preventing gold and silver coins from being produced again until 1817 (when only half dollars were struck for depositors). Because of the low mintage, the date is constantly in demand from Collector's.

PCGS 21, NGC 29, CAC 5. While definitely not the same coin, there was a similar AU58 that sold in the 2014 FUN auction for \$30,550. This coin sold for \$22,325 in our December 2017 Regency Auction and the current PCGS Price Guide value is \$26,000 and this CAC approved GEM AU58 should realize an exceptionally strong price. LOT 554 50C 1839 DRAPERY. PCGS MS64 CAC

Totally original! A great start to our offering of Seated Liberty half dollars. A wonderful old envelope type toning leaves a blanket of iridescent toning on both sides in pastel hues that really come out as you rotate the coin in a light. That light brings out a bold satin frost in the fields. Ms. Liberty is fully struck up with

complete detail of every drapery fold in her gown; likewise the eagle has complete definition in the feathers. This is a classic old time collection look. The With Drapery variety is slightly less common than the Without Drapery.

PCGS 18, NGC 13. CAC 7. We believe there is duplication in the NGC and PCGS population figures. Regardless, this date is VERY RARE any finer. We think the last one to sell was a fluke, selling for only \$2,585 in April 2017. Not long ago there was a time that MS64 examples, both PCGS and NGC, were selling for \$6,000+. Today, Collector's Universe lists a value of \$4,950. We can see this near-Gem selling for a strong bid when it crosses the block. Keep in mind that a 65 is a \$15,000-\$20,000 coin.

LOT 555 50C 1840-O NGC MS64

EX ELIASBERG-RICHMOND. A conditionally rare early date Seated half that boasts the legendary Eliasberg pedigree. Lustrous surfaces show off a light gold tone with splashes of blue at the rims. Very rare so fine, neither PCGS nor NGC have graded any example finer! This coin has a provenace that can be traced back to Edouard Frossard's March 1894 auction, where it was purchased by J.M. Clapp; John H. Clapp Estate to Louis Eliasberg, en bloc in 1942 via Stack's. Eliasberg Collection, April 1997, lot 1918;

Richmond Collection, DLRC, March 2005, lot 1665; present consignor.

PCGS 2, NGC 16. The most recent MS64 was the PCGS/CAC coin we sold in February 2016 for \$9,694. The most recent NGC coin sold for \$5,288 in the 2014 ANA auction. This coin, with its extensive pedigree will see very fierce bidding.

LOT 556 50C 1841 PCGS MS63 CAC

A date that clearly was not saved at the time of issue, and is extremely rare in Choice Mint State and finer. This coin is a collector's dream! Combining high grade, bold eye appeal, and high-end quality, you cannot beat this 1841! Brilliant underlying luster is brought out while viewed in a light, making the iridescent blue, orange, rose, and olive hues sparkle. Both sides are fully struck up from an exacting and precision blow from the dies. Generally handled with care since 1841, we note a few ancient bag marks when strong magnification is used. The

eye appeal is very high-end! While not noted on the holder, this is a repunched date, with the lower portions of the 1 and 8 clearly doubled. We also note some cool, spidery die cracks on the left obverse.

PCGS 7, NGC 4, CAC 1. The two most recent examples sold for \$3,525 (January and October 2016), and neither of those were CAC-- this CAC approved coin has a much more colorful look and should sell for more! There are only nine coins finer at PCGS, the finest being the MS65 that was in the Gardner Collection.

LOT 557 50C 1841-O PCGS MS62 CAC

Satiny lustrous and boasting a lively brilliance that shines through the pale pewter-dove-silver tone that caresses the surfaces of both sides. Ms. Liberty and the eagle are fully struck up, the reverse die beginning to shatter, with die cracks coming in from the rim at 3:30 through the right wing and from the rim at 6:30, passing between AL and piercing the eagle's left talon, through the body, and ending in the field in front of the beak. Close inspection does reveal some minor scuffs on the reverse above the eagle's head, but nothing that is out of the ordinary for the MS62 grade, and the eye appeal is very strong for the grade.

PCGS 15, NGC 9, CAC 2. Since 2011, only three MS62s have sold in auction, including the Dick Osburn Collection coin, which is the other CAC-approved coin, that sold for \$2,875 in the 2011 ANA auction. More recently a non-CAC NGC coin sold for \$2,056 in April 2015. The current PCGS Price Guide value is \$2,400 and the price nearly doubles in MS63. A great coin for any Seated Liberty collector.

50C 1842 PCGS MS62 CAC GOLD STICKER

What a neat coin! Graded back in the early days of PCGS and housed in a first generation "rattler" holder, this conservatively graded, deeply toned beauty has been awarded the coveted GOLD CAC sticker, and it is no question why!

The surfaces are generally very smooth and free of any singularly distracting marks (a few minor ticks are noted, but would not be out of place on a coin graded 63). Deep pewter-slate patina shows hints of gold and lavender when rotated at certain angles. The eye appeal is exceptional for MS62, and would be great for a 63 as well.

PCGS 17, NGC 9, CAC 7. This is the only GOLD CAC example for the entire date. This is also the only PCGS/CAC coin to sell in auction in five years, realizing \$1,410 in the 2017 FUN auction. A PCGS/CAC MS63 with a somewhat splotchy look realized \$1,998 in December 2015. This coin should see spirited bidding and realize a strong price when it crosses the block.

PCGS# 6239 | ESTIMATE: \$1,250+

LOT 559 50C 1843 PCGS MS64 CAC

Totally original, this impressive, near-Gem early Seated half was boldly struck on both sides- the reverse die imparting an impressively strong strike considering it had cracked in half in the coining process, leaving a bisecting crack that starts at A in STATES traveling through the left side of the eagle's body through the L in HALF to the rim. A strong mint frost comes through the light dove-tan-gold-russet-olive coloration. For the sake of full disclosure we will note a few microscopic ticks hidden under the tone, but none are distracting to the high-end eye appeal.

PCGS 7, NGC 11, CAC 4. The only other PCGS/CAC coin to sell in auction last sold for \$2,585 in July 2016. The Gardner coin, which was NGC/CAC sold for \$2,938 in October 2015. The current PCGS Price Guide value is listed at \$3,250 and it would not come as a surprise if this coin realized that or more. Very rare any finer and a great coin for a type set or a high-end Mint State set of Seated halves.

LOT 560 50C 1844 PCGS MS60 CAC GOLD STICKER

Richly toned and nicely struck, this lovely coin is totally original and has a great look. Nicer than some 62s and 63s we have seen (we make no guarantee this coin will upgrade to those levels, but clearly this coin is very undergraded).

PCGS 3, NGC 1, CAC 2. This is the only Gold CAC coin, and it is also the only MS60 to ever sell in auction, bringing \$911 nearly three years ago. There is not a huge spread between MS60 and MS62 in the PCGS Price Guide, ranging from \$850

to \$1,250--but we can see this coin bringing the same price as a PCGS/CAC MS62 would (none of which have ever sold).

LOT 561 50C 1845-O PCGS MS63 CAC

What an impressive coin! Fully reflective, prooflike lustrous surfaces beam from under a rich patination on both the obverse and reverse. A polychromatic blend of deep orange-gold, olive, and violet-gray have an almost marbled effect, imparting a unique and very attractive look.

PCGS 9, NGC 4, CAC 2. Very RARE any finer. This coin brought a premium bid of \$3,055 when it last sold over three years ago. The current PCGS Price Guide is \$3,000 and keeping in mind that the only PCGS/CAC MS64 to sell in auction realized \$8,812 in the 2013 ANA sale. The MS63 level presents a good value and opportunity for someone looking for a truly CHOICE example of this date.

LOT 563 50C 1846-O MEDIUM DATE. PCGS MS62 CAC

Here is another early Seated Liberty half dollar that was produced in healthy numbers, over 2.3 million were struck, but precious few were saved at the time of mintage. Per PCGS and NGC population data, of the Medium Date variety, there are 35 grading events, which obviously includes some duplication. Tremendous eye appeal!

PCGS 8, NGC 8, CAC 4. This is the Gardner coin that sold in October 2015 for \$2,585. The Eliasberg coin is also graded MS62, last sold in a non-CAC NGC encapsulation for \$2,233 in 2014. PCGS reports seven coins graded finer, and these are very rarely offered; the present high-end MS62 may be the best you can acquire for quite sometime. Good luck!

LOT 562 50C 1846 TALL DATE. PCGS MS63 CAC

A lovely example with deep gunmetal toning that is blended with lilac that comes out of the devices when rotated under a light. Fully struck and very attractive, this is a great example of this date for any collector.

PCGS 10, NGC 5, CAC 5. The most recent Tall Date to sell in auction realized \$2,640 and was non-CAC. This coin is pedigreed to the Richard Jewell Collection, sold in the 2013 ANA sale, where this one brought \$2,350. In today's market with a CU value at \$2,950, we think it should sell for more.

PCGS# 6252 | ESTIMATE: \$2,300+

LOT 564 50C 1847 PCGS MS63 CAC

OGH! Fully CHOICE quality and high-end for the assigned grade. Robust mint frost provides an excellent back light effect around the crisply struck devices and brings out the subtle sky blue, gold, and olive accents that blend with the surrounding silver-dove patination. Clearly this totally original coin sat in some sort of paper envelope for a long time, slowly acquiring this totally original, and classic look. The reverse die was pretty badly cracked when this coin was struck with a number of cracks at the rim and one that passes right through the eagle's neck.

PCGS 13, NGC 7, CAC 3. Only one PCGS-graded coin has sold since the turn of the decade, a non-CAC, brilliant silver (likely dipped) example that sold for \$1,880 in the 2014 ANA auction. The current PCGS Price Guide value is \$2,000 and this coin should exceed that level when the gavel falls. The PCGS Population Report shows 15 grading events finer. A great coin for any serious collector of Seated Liberty half dollars.

PCGS# 6257 | ESTIMATE: \$1,800+

LOT 565 50C 1847-O PCGS MS62 CAC

The 47-O is another date that saw extensive use in circulation and the very few survivors in Mint State are a tiny fraction of a percentage of the original mintage; of the original mintage of 2,584,000 PCGS and NGC combined have graded a total (including resubmissions) 50 combined in all Mint State grades. For a coin graded "only" MS62, the presently offered coin offers a very high-end look. Rich, totally original, multihued iridescent toning graces the obverse, the subtleties of the shades brought out by the underlying mint frost.

PCGS 5, NGC 10, CAC 2. Per our auction database, and PCGS Coin Facts, only two MS62 examples graded by PCGS have ever sold in auction, a non-CAC coin that sold in April 2017 for \$1,998 and one that sold in January 1999—that is VERY infrequent! Going back to 2011, three non-CAC NGC coins have sold for \$1,880 and \$1,840. As a PCGS/CAC coin, this example should see very strong bidding, and it would not come as a shock if this coin surpassed the sale price of the last non-CAC PCGS MS63 coin sold for.

LOT 566 50C 1848-O PCGS MS63 CAC

Very nice! Brilliant mint bloom swirls on both sides adding depth to the well struck details--the luster really glows in Liberty's drapery folds. The details are generally full although the star centers are not fully formed. A very light dusting of gold toning is deeper at the peripheries and adds to the exceptional eye appeal.

PCGS 10, NGC 8, CAC 3. The current PCGS Price Guide is \$2,600. This date is very rare any finer, and with its great eye appeal this fully CHOICE 48-O will delight any serious collector of Seated half dollars.

PCGS# 6261 | ESTIMATE: \$2,000+

LOT 567 50C 1849 PCGS MS63 CAC

A beautiful example of the date. Sumptuous toning is brought to life when the vivid luster is caught at the right angles in a light. Rich rose and gold hues dominate with pleasing accents of baby blue and sea green clinging to the peripheries. The eye appeal is excellent, the strike is bold and essentially complete, and any marks are tiny, hidden and do not affect the visual allure of this CHOICE example.

PCGS 13, NGC 15, CAC 6. The most recent PCGS/CAC MS63 to sell in auction was the ex Simpson Collection coin that sold in the 2017 ANA auction for \$2,233. That coin was attractively toned but somewhat dark. We note that in MS64, the value more than doubles, the last PCGS/CAC coin sold for \$4,700. A great type coin, or representing this historic year in a complete date/mintmark set. Either way you will likely not see a more attractive MS63 anytime soon!

PCGS# 6262 | ESTIMATE: \$2,000+

LOT 568 50C 1849-O PCGS MS62 CAC

A very attractive example of this date that saw a decent mintage, but very few were saved at the time of issue and the number of Mint State survivors is miniscule. Boldly struck up at the central devices, but there is some very slight weakness at the star centers and Liberty's uppermost hairlines. A sparkling luster dances in the light accenting the very subtle pewter-silver toning. Under a strong glass we do see some minor ticks and lines, which explain the modest MS62 grade. A very heavy die crack from the reverse rim at 3:00 to the border of the eagle's shield.

PCGS 5, NGC 5, CAC 2. The other CAC coin was also graded by PCGS and sold for \$2,830 in February 2016, a very weak point in the market cycle. This date is RARE in any Mint State grade, no PCGS MS64 has sold since 2010. LOT 569

LOT 569 50C 1850-O PCGS MS64 CAC

A wonderful survivor of this Antebellum date, just below the apex of the grading report. Beautifully toned with rich shades of slate-blue, olive-tan, gold, and gray-rose on the obverse; the reverse is dominated by a broad swath of teal blue. The sharply struck devices and satiny underlying luster add to this near-GEM's exceptional eye appeal!

PCGS 19, NGC 14, CAC 7. This was the only CAC-approved example to ever sell in auction, last selling over six years ago--that is forever ago! The last MS64 graded by PCGS sold for \$2,820 in a weak 2015 FUN auction--and that coin was unevenly toned. VERY RARE any finer, making this MS64 a great price and grade point for advanced Collector's.

Certainly high-end for the assigned grade, the present coin straddles the line for placement in the Choice category. Brilliantly lustrous surfaces have a mix of satiny frost and a rolling cartwheel effect that brings life to the razor sharp strike. Every detail is fully rendered by an exacting blow from the dies. A gentle halo of golden tone frames the rims on both sides. There are a few marks that we note for the sake of full disclosure and account for the assigned grade--however the eye

appeal is very high-end for the grade. This is a neat variety with the second 1 in the date repunched, the number originally punched too close to the 5. A lower mintage date, with only 200,750 struck for circulation, many of which were exported and melted for bullion. Very few survive in Mint State grades.

PCGS 9, NGC 2, CAC 1. This example sold in May 2013 for \$4,700—a price in line with MS63s—that is how nice this coin is! The current PCGS Price Guide lists a value of \$4,500 and we think this coin will exceed that level when it crosses the block.

PCGS# 6266 | ESTIMATE: \$4,200+

LOT 571 50C 1851-O PCGS MS62 CAC

Another really pretty and PQ for the grade Antebellum half dollar. A remarkable flashy luster beams around the sharply struck devices giving them a real 3-D effect. Both sides show precision strikes, rendering every detail with razor-like sharpness. The frosty-brilliant surfaces are mostly untoned save for a very light dusting of gold at the rims. The eye appeal is excellent for an MS62, and at first glance this old holdered coin has the look of a higher grade.

PCGS 7, NGC 5, CAC 2. According to our auction database, there have been only six auction appearances going back to 1999, and this coin represents 2 of them, selling first in September 2006 and then again in November 2016 for \$2,233. Before that, an example sold in the 2014 ANA auction for \$3,055, clearly the Collector's Universe value of \$2,000 is too low. Here is another coin that is very scarce and rarely offered in Mint State--what a great combination of features for the collector!

PCGS# 6267 | ESTIMATE: \$2,000+

LOT 572 50C 1852 PCGS MS63

A very scarce, lower mintage date with only 77,130 struck, and as more gold flowed from the California rush, the ratio of gold and silver in circulation forced the price of silver up, making it very profitable for folks to export silver coins to be melted into silver bullion. The present coin is fully Choice with a radiant satiny frost that provides a back light to the classic old collection soft dove-rose, powder-blue, and lilac-silver patina.

PCGS 21, NGC 8. We think there is duplication in these figures. Regardless this is a VERY SCARCE issue, and very rare any finer. In the last decade, only two PCGS-graded coins have sold in auction--the last one bringing \$3,525 in February 2017 (not this coin). The current PCGS Price Guide value is \$4,250. We very much like the look of this scarce issue and think it will fit very nicely in a wonderful set of Seated half dollars!

Displaying a totally original blend of light golden tan and silver-tan patina on both sides, this 1855 half dollar has bold visual appeal aided by sharply impressed design elements and a swirling luster. We do note a few tiny, ancient marks that are nearly invisible to the unaided eye.

PCGS 12, NGC 15, CAC 4. The only CAC-approved coin to sell in auction brought \$4,700 in the 2017 ANA auction. Any coin graded higher is a five figure coin, with a PCGS/CAC MS65 selling for \$16,450 in December 2013. A great type coin, or representative of the date for a very carefully assembled collection. LOT 585 50C 1887 NGC PF65 GOLD CAC

Yet another fabulous old holder coin where the grade is higher then what the holder says. CAC confirms this too. Deep mirrors beam effortlessly from all over. The mirrors have exceptional clarity, are perfectly clean, and are highly reflective. When you twirl the coin, the mirrors look like a freshly formed sheet of ice. A wonderful and totally original circular mix of many/rose/evergreen/blue/lime colors swirl on both sides. Miss Liberty and every detail are thickly frosted and are fully struck.

ONLY 710 were minted. PCGS 26, NGC 21, CAC 6,. The only problem with this coin, it is a PR66 or 66+! The current Collector's Universe Value for a PR66 is \$7,250.00. This coin needs to be seen to be fully appreciated for its exceedingly high-end quality.

PCGS# 6448 | ESTIMATE: \$8,000+

LOT 586 50C 1887 PCGS PR65+ DCAM CAC

A very cool GEM DCAM Seated half! While this date is seen with cameo contrast on a somewhat regular basis, 1887 halves with DCAM contrast are extremely RARE. Frosted devices, showing generally full strikes that contrast against icy smooth, crystal clear, deep and beaming proof mirrors! The contrast is dramatic and clear. Essentially untoned, save for a gentle touch of the clearest gold, and the eye appeal is AMAZING!

Only 710 proofs were struck. PCGS 1, NGC 2, CAC 1. Only two coins are graded finer at

PCGS, both are graded PR66+ DCAM. No CAC approved PR65 DCAM, graded by PCGS or NGC has ever sold in auction. A PCGS PR64 DCAM CAC sold for \$6,463 in January 2015 and a PR66+ DCAM PCGS/CAC sold for \$21,150 in March 2013, thus we feel the current PCGS Price Guide value of \$8,500 is way too low, considering a PR65 DCAM sold in our July 2017 auction for \$9,400. We will find out when this exceptional GEM crosses the block.

LOT 587 50C 1897-S PCGS MS66 CAC

Ex. Akers-Duckor. One of the key dates to the Barber half series, boasting one of the great pedigrees to the series: Akers-Duckor. The present GEM boasts a vibrant satin mint bloom that shines around chiseled, sharp devices. Hints of golden-peach iridescent toning add dimension and eye appeal.

PCGS 2, NGC 3, CAC 3. It is indeed hard to believe that there are six coins graded finer at PCGS, since at the time of mintage, the collecting of coins by mintmark was in its

infancy, so any of these superb coins exist by pure happenstance and luck rather than carefully preserved by some collector. This coin last sold for \$11,500 in July 2009, after realizing \$13,800 in April 2009. A superb coin, destined for another amazing collection of Barber halves.

LOT 588 50C 1899-O PCGS AU58

Oh so close to Mint State, this AU58 is perfect for the "Everyman" collector! The Barber half dollar series is one of the most popular for the Everyman Registry. Pearly satin gloss on both sides have a lovely sheen. Well struck with the slightest hint of friction and perhaps a few old album slide marks. The details are fully defined and the eye appeal, accented by a dusting of pastel iridescence, is quite nice.

PCGS 17, NGC 7. The most recent example to sell in auction was in the 2015 FUN auction, where it realized \$2,820. If you are working on an Everyman Registry Set, you can now add this 1899-O!

PCGS# 6484 | ESTIMATE: \$1,500+

LOT 589 50C 1902 PCGS MS66+ CAC

A major condition rarity! Sitting near the apex of the Population Report, this GEM possesses exceptional eye appeal. A superb satiny luster glows from the fields, accenting the boldly struck devices, has an intense vivacity. A dusting of russet-gold, olive-tan, and hints of amber-rose-teal.

PCGS 4, NGC 6, CAC 3. PCGS has graded 2 in 66+ and only two coins are graded higher. The other coin, from the Shireman Collection, sold in the 2016 FUN auction, realized \$11,163. At the time, the market was in a real slump, as the gold, oil, and stock market prices were dropping. The current Collector's Universe value is listed at \$12,500. As one of the FINEST KNOWN, we expect the bidding on this GEM to be fierce! If you are building a high-end set, this could be your 1902!

LOT 590 50C 1906-D PCGS MS64 CAC

Deep russet-tan gold toning is draped evenly over extremely satiny surfaces. Accents of olive, slate, and pewter attest to the originality of this near-GEM quality 06-D half.

PCGS 52, NGC 36, CAC 12. The most recent CAC-approved coin was the NGC-graded Rev. McClure coin that sold in June 2016 for \$1,116. The last PCGS/CAC coin sold in in February 2014 for \$1,293. Very scarce any finer!

LOT 591 50C 1892 PCGS PR65 DCAM CAC

Deep, reflective mirrors offer the boldest in brilliance and clarity and beam from all over! What a great example of the first year of Barber's Liberty head design. The design elements are extremely sharp in strike, and ultra frosted devices showing the extreme in Deep Cameo contrast.

PCGS 3, NGC 0, CAC 1. This GEM sold for \$7,200 in December 2017. A non-CAC PCGS PR65 DCAM sold for \$4,113 in September 2013. These DO NOT come up with any frequency so prepare to bid liberally if you want to take this beautiful coin home!

THE DALE LARSEN COLLECTION OF TONED LATE DATE WALKING LIBERTY HALF DOLLARS

Dale is a well-known professional numismatist since 2002. Prior to entering the trade, he collected beautifully toned GEM coins. In October 2017, in our Philadelphia Regency Auction, we sold his type coins, which in some cases realized "beyond moon money." After that successful sale, he contacted us again, and consigned his later date Walkers. As many folks know, late date Walkers survive in relatively large numbers in

high grade. The challenge is to find them with spectacular toning. Dale purchased every one of these coins, save for one, prior to becoming a full time professional numismatist. For many of these dates, you will not find as beautifully toned a specimen as is offered here. Since these coins have for the most part been off the market for nearly 20 years, for the advanced toned Walker collector, this is perhaps a once-in-a-decade opportunity!

LOT 592 50C 1937 PCGS MS66+

Sharply struck and highly lustrous with exceptional toning. Hand selected for its wonderful color by Mike DeFalco, the obverse has a arc of deep orange, violet, rose, and emerald toning. The reverse has lively dappled iridescent spectrum of color around the rim and on the eagle's wing. The eye appeal is exceptional! What a great coin to start out our offering of Dale's collection and worthy of a serious bid!

PCGS# 6601 | ESTIMATE: \$1,700+

LOT 593 50C 1939-D PCGS MS67 CAC

As you would expect from a coin in this lofty grade, the luster and surfaces are impressive. However, what makes this SUPERB GEM even more so is the beautiful rainbow toning on both sides. Bold bands of rainbow highlights the lower portion of the obverse, arching around and reappearing at BE and over the head. The colors are arranged in equal width bands of green, blue, violet, and coppery red. The toning on the reverse has shades of magenta, olive, gold, emerald, teal, aqua, with accents of crimson and

rich purple. All the colors are vividly brought out by a strong luster and the eye appeal is truly special. There is no question as to why Dale chose this one for his collection. Purchased from Richard Abrahams.

THE DALE LARSEN COLLECTION OF TONED LATE DATE WALKING LIBERTY HALF DOLLARS

LOT 594 50C 1941 PCGS MS67+ CAC

WOW. This is about as lustrous as you will see on a Walker with bold swirling satin cartwheels that blaze brilliantly on both sides. This coin's toning is more subtle, but beautifully iridescent with accents of blue and red toward the rims of the obverse and reverse. The quality and eye appeal are excellent and this date is very rare any finer. Dale purchased this coin from Larry Whitlow and you can tell it was hand selected for is wonderful eye appeal!

LOT 595 50C 1941-D PCGS MS67+ CAC

Tied for second finest graded at PCGS and it is sensationally beautiful! Lovely pastel iridescent toning--light shades of pink, gold, tangerine, lime-green, sky blue, and pale aqua are really brought out by a bold swirling cartwheel luster. It is very hard to imagine a finer, or prettier example of this date. This coin was purchased from Andrew Kimmel. Only one example is graded finer, and a highlight of Dale's late date toned Walkers.

PCGS# 6612 | ESTIMATE: \$5,500+

LOT 596 50C 1941-S PCGS MS66+ CAC

A beautifully toned GEM. The color is more subtle than on other coins in this collection, offering a delicate gold hue which blends with a soft pastel rose, aqua, and pewter/slate patina. The colors do come to have a bold iridescence that is really wonderfully brought out by a vivid, attractive satin sheen. Purchased years ago from David Hall Rare Coins, this marvelous coin is just shy of full SUPERB quality and the eye appeal is exceptionally high-end!

PCGS 777, NGC 231, CAC 150. In MS66+ as

here, PCGS has graded only 80 examples. The most recent example to sell in auction realized \$3,480 in the January 2018 sale of the Steve Duckor Collection. It did NOT have the remarkable eye appeal of this coin, and only nine coins are graded finer in MS67 at PCGS, and the last one to sell realized over \$35,000. We know that this high-end coin will see very strong bidding. Like the other coins in Dale's collection, it is truly a unique coin in terms of visual appeal.

THE DALE LARSEN COLLECTION OF TONED LATE DATE WALKING LIBERTY HALF DOLLARS

LOT 597 50C 1942 PCGS MS66+

Remarkable, sunset orange, crimson, gold, and autumnal coppery color form bold rings around both sides. Untoned areas at the centers of both sides are bright and brilliant with hints of reflection. Sharply struck, Ms. Liberty's dress details and hand are nearly fully rendered by an expert and exacting strike. The eye appeal is exceptional! Purchased from Jon Rosenthal. We can see this GEM seeing for a very strong price!

PCGS# 6411 | ESTIMATE: \$500+

LOT 598 50C 1942-D PCGS MS67+ CAC

Not only is this 42-D one of the finest graded (only a handful grade finer in MS68), but it is one of the most visually impressive SUPERB GEMS of this date you are likely to ever see! A bold arc of deep rainbow toning accents areas of the rims on both sides; bold crimson, subtle violet, and tinges of teal, icy blue, and vivid lemon-yellow all are brought out by a stunning mint luster. Sharply struck throughout the devices and the eye appeal is superb! Dale acquired this amazing coin from RCNH ages ago.

PCGS 192, NGC 138, CAC 61. There are only 11 coins graded MS67+ and five finer, all MS68 at PCGS. For a coin like this, you can toss out your price guides and ignore the few APRs. Keep in mind that fifteen years have passed since the last PCGS MS68 sold in auction, so if you are looking for one of the FINEST 1942-D halves that exists, do not let this opportunity pass you by!

PCGS# 6615 | ESTIMATE: \$5,500+

LOT 599 50C 1942-S PCGS MS66 CAC

WOW, does this coin have a brilliant flash! Both sides have a spectacular, white hot glowing mint luster that beams from all over. The obverse has a delicate frame of rainbow toning at the rim. Just that narrow band of color is enough to contrast the brilliant fields and well struck devices. The eye appeal is INSANE and we think this coin, with its icy, flawless surfaces, should grade at least a 66+ as we can find nothing but an insignificant line or two, none of which takes less than a 6x glass to locate. Dale bought this coin from Bobby Avena.

PCGS# 6617 | ESTIMATE: \$2,300+

LOT 600 50C 1942-S PCGS MS66 CAC

This remarkable GEM has a totally different look than Dale's other 42-S. Draped across both sides with a wonderful array of sunset orange/gold/red, eggplant-violet, with traces of icy-silver and delicate rose. Dale could not choose which one he liked better, thus he kept both 42-Ss, this one purchased from Pinnacle Rarities. This one possesses such a high-end look, it is no question as to why Dale loved it so much, and no doubt you will too!

LOT 601 50C 1943 PCGS MS67+ CAC

Numismatic primavera! The pastel lime, gold, rose, and icy blue tones that delicately grace both sides, you instantly think of Easter eggs and early spring. The quality is VERY High-end, and boldly lustrous. Nearly every detail is fully rendered by a full, complete strike. Even using a very powerful glass we cannot find a single mark or line to detract from the wonderful SUPERB GEM eye appeal.

PCGS 593, NGC 553, CAC 310. PCGS has graded 57 in MS67+ and only 10 coins finer (all MS68). Go ahead and toss out your price guides and APRs, this coin's beautiful look and very high-end look will certainly attract very strong bidding. The last MS68, as a point of reference sold for \$21,150 in 2015. We wish to congratulate the winning bidder in advance!

LOT 602 50C 1943-D PCGS MS66 CAC

LOT 603 50C 1943-S PCGS MS66+ CAC

WOW! What an impressively and beautifully toned uber-GEM! A wealth of iridescent toning in varying shades of teal, icy-blue, pastel pink, deep violet, and other pleasing hues blend together in an almost tie-dye pattern that covers the entire surface of the obverse. A strong brilliant luster blooms from below the colorful toning, bringing each color to vivid life. The reverse is untoned and fully frosted, giving great contrast to the obverse. Both sides are well struck and very well defined.

Here is another coin you really can just toss out any published pricing information. Know that this is a truly unique coin visually and will be a wonderful addition to any high-end SUPERB set!

LOT 604 50C 1944 PCGS MS66+ CAC

What a very beautiful toned GEM! Brilliant mint luster beams from all over with a strong, seductive flash. An amber-crimson crescent of toning wraps around nearly the entire obverse rim. The sharpness and completeness of the strike is equally impressive to the lustrous surfaces and dramatic toning. We have seen coins in MS67 holders that are not as high quality as this beauty and while we do not guarantee it will ever upgrade, we would not be surprised if it did!

LOT 605 50C 1944-D PCGS MS66+ CAC

Here is another lovely rainbow, rim toned SUPERB GEM that Dale bought from the late Larry Whitlow. The toning starts with a very deep scarlet, almost oxblood tone, then breaking to a pastel blend of icy blue, lemon-yelow, and light lilac tone. The central obverse is totally untoned and highly lustrous. The untoned reverse has a dramatically bold luster that beams from all over. The eye appeal is wonderful and is amplified by a very strong strike. From the specialist collector of toned Walkers, this coin is no doubt worthy of a serious bid!

LOT 606 50C 1944-S PCGS MS65 CAC

Both sides have a bold, crescent of coppery orange toning, more widely patinated on the obverse than reverse, but both sides have a wonderful look. Well struck with a vibrant mint frost that brings aids in accenting the color. A coin truly worthy of a strong bid!

PCGS# 6623 | ESTIMATE: \$450+

LOT 607 50C 1945 PCGS MS67+ CAC

Tied for FINEST graded at PCGS. Notonly does it rank high for its exceptional technical qualities, but also for the pure subjective standpoint of the eye appeal. This SUPERB GEM is AMAZING! A dramatic, antique patina is awash on both the obverse and reverse, accenting the sharply and completely struck up devices. Likewise, the bold, cartwheel luster booms on both sides, making the colors dance on the high-end surfaces. The fields and devices are totally devoid of even the most insignificant marks. There really is nothing more than a single tiny contact mark that blends in with the eagle's wing feather details. The blend of colors, violets, golds, oranges, icy blues and greens all come together like a work of modern art.

PCGS 189, NGC 120, CAC 92. There are 19 coins graded as MS67+ and NONE FINER. While there are auction records, they are useless on a coin with this dramatic color. As one of the finest and most beautifully toned Walkers we have had the pleasure of offering, we know could bring a record price!

LOT 608 50C 1945-D PCGS MS67 CAC

Another lovely coin Dale bought from Larry Whitlow a long time ago. This SUPERB GEM has a very strong strike, with full definition on both sides. Soft blue, gold, and green tones blend together with a bold, beautiful visual effect.

While not rare, even in this lofty grade, it is rare any finer, with fewer than two dozen graded. With its great look, you can go ahead and toss away the pricing data, and just go with your gut! Truly worthy of a very strong bid!

LOT 610 50C 1946 PCGS MS66+ CAC

A beautiful, SUPERB GEM that is bathed with an intense luster that swirls on both sides. A delicate frame of greenish-gold creates a gentle halo on both sides. This is another old Larry Whitlow purchase Dale made years ago.

PCGS# 6619 | ESTIMATE: \$700+

Here is a SPECTACULAR 46-D! A real SUPERB GEM, carefully selected long ago for is very high-end look! Swirling, brilliant mint frost blazes on both sides. The obverse has a stunning arch of rich crimson and pine-green. The details are fully struck up and the eye appeal is excellent!

PCGS 99, NGC 127, CAC 55. Dale's notes indicate he purchased this GEM from Kingswood Galleries and the only record we can find from when that firm was in operation was in June 2002 where one sold for \$3,105. With only four MS67+s graded finer, this immaculate GEM is bound for a top ranking set of Walkers!

Extremely high-end and very close to full SUPERB quality! A bold satin luster beams from all over with a strong frost. A frame of rich colorful toning offering shades of crimson, emerald, gold, and azure highlights the brilliant silver of the obverse. The reverse possesses just a touch of greenish-gold along the right rim. The devices are fully struck up and the surfaces smooth and free of all but the most teeny ticks. The eye appeal is exceptional and a delight to behold. Like the other coins in Dale's collection you know it was carefully selected for inclusion and should bring a very strong price indeed!

LOT 614 50C 1947-D PCGS MS66+ CAC

One of the more dramatically toned Walkers in Dale's collection happens to be the capstone to the series. Shamrock and emerald green tones are suffused with a bright coppery-orange and vivid red at the rims. The devices are sharply struck and the surfaces are free of any distracting marks, lines or ticks. A very unique looking SUPERB GEM and a great way to cap off this great collection of toned Walking Liberty half dollars, put together by a veteran of the numismatic industry.

With a very attractive, iridescent toning that lightly covers both sides, this totally original, near-GEM 1916-D half is a great example of this early date Walker. Offering a bold satin frost that underlies the toning, the eye appeal is really nice for the date and grade.

PCGS 604, NGC 371, CAC 61. The last two examples sold in auction for \$1,116 and \$1,146 in June 2017 and February 2016 respectively--the current PCGS Price Guide value is listed at \$1,350. Scarce any finer, and

with its original eye appeal, this near-gem will fit into any GEM set.

LOT 616 50C 1917-D OBVERSE. PCGS MS65 CAC

Purely original and very attractive with excellent eye appeal imparted by a lively pastel iridescent tone that comes out with the satiny luster that comes out in the light on both sides. Pale emerald, icy lilac, and tinges of blue, gold, and rose from long term storage in an old collector envelope. Sharply struck throughout with full definition to Liberty's dress, hand, shoes and face as well as the eagle on the reverse. The eye appeal is excellent and totally original.

LOT 617 50C 1917-S OBVERSE. PCGS MS64+ CAC

What a high-end example, a true borderline GEM! Seductively lustrous with a brilliant satin frost that beams from all over. Both the obverse and reverse display the most subtle dusting of original, clear gold iridescent toning. Even under the most intense scrutiny with a powerful loupe, we cannot locate even the slightest of marks. Offering a bold strike throughout the beautiful design, event the central portions of the design are nicely defined.

PCGS 169, NGC 96, CAC 24. In MS64+ the pops are PCGS 8, NGC 3. The most recent

MS64+ sold for \$10,281 in September 2017 and the current PCGS Price Guide lists a value of \$12,000. Keep in mind that the most recent MS65 sold for \$24,000 in the 2018 FUN auction, and before that, we sold one in our December 2017 Regency auction for \$30,550. We unhesitatingly grade this coin an MS65.9+. There is one tiny mark that keeps it from being a knockout MS67.

Remarkable surfaces are the epitome of cleanliness and are satiny smooth. As we mentioned, only one tiny hit keeps it from total perfection. A headlight type luster blazes from all over. Both sides are blast snowy white. Miss Liberty and the details are frosty and are sharply struck. This is far superior to the average MS65 you will find. The eye appeal is tremendous!

PCGS 61, NGC 39, CAC 17. PCGS has graded only 2 coins MS65+. The last PCGS CAC MS65+ to sell in auction brought \$20,400 in January 2018. We expect Walker Collector's to bid aggressively here-be prepared!

LOT 624 50C 1938 PCGS MS67+ CAC

Doubtless one of the FINEST 1938 Walkers that survives! The eye appeal is AMAZING! Frosty, satin luster shines brilliantly with a pearly texture. Untoned, save for a band of crimson-gold toning at the rims, this remarkable survivor has a bold strike and is bested by only a single coin.

PCGS 104, NGC 40, CAC 32. PCGS has graded only five coins in 67+ with a sole coin finer. The most recent

example realized \$8,400 in the 2018 FUN auction, but the one prior to that realized \$15,600 in September 2017. Keep in mind the sole MS68 has not been in auction since 2011 and that coin realized \$18,400.

PCGS# 6604 | ESTIMATE: \$9,500+

LOT 625 50C 1938-D PCGS MS66+ CAC

Another wonderful, totally original, SUPERB GEM! With a vivid satin sheen in the fields, the devices are sharply struck and offer bold definition. Ever so subtle clear gold patina lightly dusts both sides. The surfaces are clean, essentially free of any defect, and are truly a delight to behold.

PCGS 513, NGC 117, CAC 137. There are only 49 coins graded in MS66+ at PCGS and 10 at NGC. The most recent PCGS MS66+ CAC to sell in auction realized \$2,585 in our

December 2017 Regency Auction XXIV and the current PCGS Price Guide value is listed at \$2,550. The value more than doubles in MS67--GOOD LUCK!

PCGS# 6605 | ESTIMATE: \$2,500+

LOT 626 50C 1938-D PCGS MS66+ CAC

With only 491,600 minted, this is the lowest mintage after 1934, and as such, always promoted as the key issue to the late date set. This SUPERB GEM has a vivid satin sheen in the fields. The devices are sharply struck and offer bold definition. A dusting of the ever so subtle pastel toning at the obverse rims frame both sides and are a delight to behold.

PCGS 513, NGC 117, CAC 137. There are only 49 coins graded in MS66+ at PCGS and 10 at NGC. The most recent PCGS MS66+ CAC to sell in auction realized \$2,585 in our December 2017 Regency Auction XXIV and the current PCGS Price Guide value is listed at \$2,550. PCGS# 6626 | ESTIMATE: \$450+

LOT 627 50C 1939-D PCGS MS67+ CAC

Tied for second finest certified at PCGS, this GEM is beyond SUPERB quality! Sharply struck with bold detail even in the highest design elements in the central portions of the design that are often softly defined. A bold, pearlescent satin sheen envelopes both sides, with a dusting of iridescent toning on the obverse. Totally original and pleasing, it is hard to imagine a more eye appealing example.

PCGS 107, NGC 78, CAC 67. Combined between PCGS and NGC there are 11 coins that have received the 67+ grade, and each service has graded two coins MS68 finer. The most recent PCGS/CAC MS67+ sold in January for \$6,000 and the current Collector's Universe value is listed at \$5,000. We anticipate this SUPERB coin will bring a very strong bid from advanced Collector's, keep in mind the last MS68 sold for nearly \$26,000!

PCGS# 6607 | ESTIMATE: \$5,000+

LOT 628 50C 1940 PCGS MS68 CAC

Tied for FINEST graded at PCGS. A superb, silky, brilliant virtually perfect SUPERB GEM! All of the design elements are fully and crisply rendered by an exacting, precision blow from the dies. Lovingly cared for since the coin came off the dies, the surfaces are pristine and immaculate. The luster is absolutely brilliant throughout. A delicate dusting of iridescent toning attests to the amazing originality and adds to the already SUPERB eye appeal.

PCGS 27, NGC 20, CAC 22. The most recent PCGS/CAC MS68 sold for \$8,400 in the 2018 FUN auction. There are NONE graded finer and we expect very strong bidding to take this MARVELOUS GEM home! Bound for the FINEST set of Walkers!

PCGS# 6609 | ESTIMATE: \$7,000+

LOT 629 50C 1941 PCGS MS66 CAC

Last offered in our Regency Auction XIX, where we described it as: "If this was a Morgan, we'd have been willing to add it to the Northern Lights Collection. No question this is one of the wilder toned 1941's we've ever seen (and we have seen many)! If you stop and think, how many 1941's have you ever seen fully toned like this?

The quality of this coin is SUPER high-end. Sensational and totally original colors of deep violet/evergreen/gold vividly intermingle all over the obverse. They do have moderate iridescence. The reverse has light speckled golden brown colors. We do rank the obverse colors a full 9+ on our 1-10 Morgan Toner scale (10 is the best). Miss Liberty and the details are remarkably struck and do stand out. If you love great color coins-this is a very rare exceptional Half Dollar; Walkers do not come as vividly toned as Morgans do. Note: the value here is in the color and we expect strong bidding activity."

It sold for \$3,055 on a \$2,000-\$2,250 estimate. We anticipate a similarly strong result this time around as well!

PCGS# 6611 | ESTIMATE: \$2,500+

LOT 631 50C 1942 PCGS MS66 CAC

A beautifully toned example of this late date Walker. Brilliant satiny luster has wonderful sunset and navy with accents of rose, green, and gold hues. Nicely struck and beautiful, worthy of a premium bid!

PCGS# 6614 | ESTIMATE: \$375+

LOT 630 50C 1941-D PCGS MS67 CAC

A very lustrous superb GEM that has some reflective tendencies around the sharply struck devices. A dusting of pastel iridescent toning seemingly floats on the silky smooth surfaces. Exceptionally eye appealing!

PCGS 220, NGC 173, CAC 119. The last one to sell lacked the eye appeal of this wonderful coin that sold for \$720 in January 2018. The current CU value is listed at \$800, but we think this one should bring way more!

PCGS# 6612 | ESTIMATE: \$800+

LOT 632 50C 1942 PCGS MS67+ CAC

A very wonderfully preserved and intensely lustrous SUPERB GEM. A vibrant, glowing, mint bloom blazes on both sides bringing the satin smooth surfaces to life and accenting the delicate gold toning. The devices are boldly impressed, showing crisply defined details. Extremely rare any finer!

PCGS 378, NGC 378, CAC 188. The PCGS Population in 67+ is 30, and only half a dozen coins have graded finer, all MS68. The most recent MS67+ to sell in auction was a PCGS/CAC coin that sold in the 2018 FUN auction for \$2,640 and the current PCGS Price Guide value is listed at \$2,750. The last MS68 sold for \$16,450 and that was nearly five years ago!

PCGS# 6614 | ESTIMATE: \$2,600+

LOT 633 50C 1942-S PCGS MS66+ CAC

Pearly, frosted luster blooms on both the obverse and reverse of this impressive GEM. A light dusting of pastel patina and a crisply struck design comes together to present a wonderful eye appeal.

PCGS 637, NGC 188, CAC 188. In MS66+ there are 80 reported on the PCGS Pop Report and 7 at NGC. The most recent PCGS MS66+ CAC coin to sell in auction realized \$2,233 in the 2017 ANA auction and the current CU value is \$1,500. Any PCGS coin graded finer will cost \$28,000+!

PCGS# 6617 | ESTIMATE: \$1,800+

LOT 634 50C 1943 PCGS MS68 CAC OMG! What a death defying ULTRA High-end MONSTER! It was a crime that PCGS did not grade this coin an MS68+. We just cannot figure their reasoning.

Insane surfaces are absolutely flawless and are super smooth.

You will never see a more perfect right obverse field then what this coin has. A tremendous unbroken luster screams from all over. This is a coin that once you pick it up you can't stop twirling it. A thunderous crescent of totally original forest green/gold/reddish gold hugs parts of the peripheries all over. Miss Liberty and every detail are so sharply struck they stand out looking sculpted. The eye appeal is crazy! Your jaw will drop and lock- just like ours did!

PCGS 10, NGC 19, CAC 5. The last PCGS CAC piece to sell in auction brought \$21,150 08/2015. Legend Numismatics currently has a really nice piece that it wants \$20,500 for. We've seen many SUPERB GEM 1943 Walkers and unhesitatingly say this coin blows all others away. If you seek the ultimate in color and quality, this is a piece you "must see" and "must have" for your collection.

PCGS# 6618 | ESTIMATE: \$15,000+

LOT 635 50C 1943-S PCGS MS65

While not a rare date, has magnificent toning on both sides. The obverse deeply toned with rings of every color of the spectrum converging into the center where teal, rose, and burnt orange tones blend. The reverse has a mostly brilliant silver center with deep violet, magenta, gold, and crimson at the peripheries. This kind of color would be quite rare on a Morgan dollar; on a Walker--the rarity is off the charts!

PCGS# 6620 | ESTIMATE: \$3,000+

LOT 636 50C 1944 PCGS MS67 CAC

A remarkable, intensely and beautifully toned SUPERB GEM 1944 Walker! Emerald-green, fiery magenta-red, and sunset orange-gold blend together beautifully across the well struck obverse. The reverse is a stark contrast, being blast white and totally untoned. The eye appeal is SUPERB in every way!

PCGS 125, NGC 98, CAC 81. Two years ago, this SUPERB GEM sold for \$7,050 in

auction--a testament to the amazing eye appeal. Toss out any pricing info and if you collect the FINEST of toned Walkers, just keep your paddle raised until this prize is hammered down to you!

PCGS# 6621 | ESTIMATE: \$7,000+

LOT 637 50C 1946 PCGS MS67 CAC

A SUPERB, well struck late date Walker that displays a fresh, frosty satin luster. A tinge of rainbow toning at IBER on the obverse adds to the already huge eye appeal!

PCGS 74, NGC 47, CAC 34. The most recent coin to sell was the Duckor coin in the recent FUN auction that realized \$1,800 and it did not have the wonderful accent of color on the obverse. Only five coins are finer, all 67+. Bound for a very carefully selected set of Walkers--good luck.

PCGS# 6627 | ESTIMATE: \$1,400+

LOT 638 50C 1940 PCGS PR67 CAC

Rich, watery, reflective mirrors beam from both sides. The delicate pastel iridescence is seen in the fields adding to the visual allure.

PCGS 353, NGC 360, CAC 163. The most recent example to sell in auction realized \$852 in February 2018 and the current PCGS Price Guide value is listed at \$850. VERY SCARCE any finer!

PCGS# 6640 | ESTIMATE: \$700+

LOT 639 50C 1940 PCGS PR67+ CAC

A beautiful, very high-end SUPERB GEM. Brilliant, watery mirrors gleam on both sides. A delicate iridescent gold and pale silver/white graces both sides attesting to this coin's originality.

PCGS 376, NGC 364, CAC 163. The current Collector's Universe value is \$1,050 and this coin could easily exceed that! RARE any finer!

PCGS# 6640 | ESTIMATE: \$1,000+

LOT 640 50C 1941 PCGS PR68+ CAC

There are no words to describe how wild the WOW factor is here! Of the thousands of Proof Walkers that exist, this coin is by far one the VERY BEST in terms of color, quality and eye appeal. BOTH PCGS and CAC agree!

Glassy, deep mirrors beam boldly from all over. The mirrors

are not just clean, they are flawless. They have great clarity and reflection. Mother Nature could not have created a more killer coloration. Incredible and totally original tissue paper type colors of gold/golden brown/violet/amber/pearl green and blue swirl all over. Miss Liberty and every detail are needle sharp in strike and stand out. The eye appeal is not only jaw dropping but is one you will never forget!

PCGS 68, NGC 84, CAC 28. PCGS has graded NONE higher. NO PCGS CAC pieces in PR68 + have ever been sold via auction. We can not imagine this exquisite masterpiece not setting a record price with furious bidding. Be prepared!

PCGS# 6641 | ESTIMATE: \$15,000+

LOT 641 50C 1948-D PCGS MS66+ FBL CAC

An impressively toned and marvelously preserved GEM Franklin with a bold eye appeal. Rich golden-orange hues dominate over smooth, lustrous surfaces.

PCGS 260, NGC 54, CAC 73. In 66+ FBL, there are 29 graded at PCGS and 8 at NGC. The most recent PCGS/CAC example sold for \$1,058 and the current CU value is listed at \$1,250. Keep in mind that in 67, the value jumps dramatically, by a factor of five or more!

PCGS# 86652 | ESTIMATE: \$900+

LOT 642 50C 1949-D PCGS MS66 FBL CAC

Here is a dramatically toned PQ GEM example of a date that very infrequently appears in auction in such high grade. Dappled orange-tan-gold patina on the obverse is amplified by a brilliant underlying luster. Impressive quality and eye appeal!

PCGS 79, NGC 5, CAC 22. There are 9 coins graded finer, all MS66+ FBL. The most recent MS66 FBL CAC sold for \$1,528, but every example prior to that sold for between \$3,738 and \$8,695! With this coin's impressive look, it should surpass the CU value of \$1,200 pretty quickly and easily.

PCGS# 86654 | ESTIMATE: \$1,250+

LOT 643 50C 1950 PCGS MS66 FBL

We are not sure why CAC did not "bean" this beauty! Boldly lustrous fields have brilliant rolling cartwheels. Both the obverse and reverse are framed with a band of rainbow toning. Unbelievable eye appeal for the date and grade.

PCGS 295, NGC 59. With a coin like this, with its seductive eye appeal and quality, you can just toss out your price guides and ignore most of the APRs. You will be hard pressed to find another with such a lovely look.

PCGS# 86656 | ESTIMATE: \$800+

LOT 644 50C 1950 PCGS MS66+ FBL CAC

A beautifully toned example that is well struck, lustrous and exceptionally eye appealing.

PCGS 335, NGC 60, CAC 82. In MS66+ FBL, PCGS has graded 38 and only 20 finer. The current Collector's Universe value is listed at \$1,150 and worthy of a premium bid!

PCGS# 6614 | ESTIMATE: \$2,600+

LOT 645 50C 1952 PCGS MS66+ FBL CAC

Tied for second finest graded at PCGS, both sides show a strong luster and boast totally original Mint Set toning. The eye appeal is spectacular!

PCCS 409, NGC 123, CAC 113. In 66+ FBL, the populations are as follows PCGS 34, NGC 3, and 28 coins are finer at PCGS, all MS67 FBL. The current PCGS value is \$750 and due to this coin's SUPERB look we think it will bring a VERY STRONG price when bidding ends.

PCGS# 86661 | ESTIMATE: \$700+

LOT 646 50C 1954-S PCGS MS66+ FBL CAC

Another coin that is just under the highest graded, indeed, PCGS has graded just three coins finer as MS67 FBL. This 66+ FBL has a great look, boldly toned from original mint set holder storage. Well struck with a glowing satin gleam that brings the colors all together.

PCGS 177, NGC 13, CAC 33. Only 21 have been graded 66+ FBL at PCGS, and the most recent example sold for \$1,800 in January 2018. The current PCGS Price Guide assigns an estimated value of \$2,820 and 67 FBL will cost in excess of \$12,500. This beauty will certainly attract attention from advanced Collector's who do not want to spend five figures. Good luck.

LOT 647 50C 1950 PCGS PR67+ CAC

Among the FINEST GRADED 1950 proof half dollars, bested by only a single PR68 in the non-CAM designation.

Totally clean, deeply reflective mirrors beam from all over. The surfaces are free of any distracting marks, toning or haze that is often seen on these early proof Franklins.

PCGS 117, NGC 239, CAC 52. Only 6 have graded 67+ and there is a single PR68 finer in the designation. The last PCGS coin was not CAC approved and realized \$4,700 in June 2016. The current PCGS Price is listed at \$6,500 and keep in mind that the sole PR68 is worth \$23,000 or more!

PCGS# 6691 | ESTIMATE: \$4,500+

LOT 648 50C 1952 PCGS PR68 CAC

WOW! Both sides of this highly reflective SUPERB GEM are sheer perfection! Tied for FINEST non-Cameo graded at PCGS. Deep beaming mirrored fields have a very bold, chrome like reflectivity. The eye appeal is amazing.

PCGS 4, NGC 80, CAC 8. No PCGS-graded PR68 has ever sold in auction. An NGC PR68* sold in September 2013 for \$2,585 and PCGS PR68 CAM CAC sold for \$13,200 in September 2017. This marvelous coin will likely sell in excess of the \$3,500 value PCGS estimates. Bound for one of the top ranking sets of Proof Franklin halves.

PCGS# 6693 | ESTIMATE: \$3,000+

50C 1952 PCGS PR67 CAM CAC

With only 10 finer in the CAMEO designation, this SUPERB GEM has a lot to offer. Ultra reflective, watery textured mirrors beam from all over, contrasting nicely against the frosty devices. The beaming mirrors are blinding in the light-get out your sunglasses!

PCGS 77, NGC 105, CAC 54. The current CU value is \$2,100 and the last one to sell was not CAC-approved and realized \$3,819 in February 2018. Only 10 are finer. Certainly a remarkable coin for the finest of CAM Franklin sets.

PCGS# 86652 | ESTIMATE: \$1,750+

LOT 650 50C 1969-D PCGS MS67

A SUPERB example, bested by only a single coin at PCGS. Totally original toning covers highly lustrous surfaces. The surfaces are free of any distracting marks or ticks, and overall the eye appeal is very high-end for a type that rarely comes so fine!

PCGS 20, NGC 10. There is only a single 67+ finer. The most recent PCGS coin sold for \$1,880 in February 2017 and the current Collector's Universe value is \$2,750. For the Registry collector of JFK half dollars, they do not come much finer!

Good luck!

PCGS# 6712 | ESTIMATE: \$1,800+

LOT 651 50C 1923-S MONROE. PCGS MS65

We have not seen such a captivating toned Monroe like this in years. The images will speak for themselves.

Technically, the coin is all there and then some. Overall, the surfaces are clean and smooth. The obverse has a jaw dropping mix of original blue/reddish gold/green//amber colors that can be seen from yards away. If this were a toned Morgan, we'd rank this coin a 9+ on our 1-10 scale (10 is the best). The reverse has some bold rims colors.

If you buy wildly toned Commems, this Monroe is Mother Nature's masterpiece! We expect it to realize a record price.

OUR ESTIMATES

ф

The estimates you see published in this catalog are based on HAMMER. Keep in mind that a coin could be either low or high end for the grade, have stunning color or be dull, all of which radically affect a coin's value. Yes, there can be huge price differences within a grade, and we offer estimates as a guide so Collector's can have a better idea of value. One thing we will never do is offer low ball estimates in order to claim stronger sales.

These published estimates represent what Legend Rare Coin Auctions determines to be an approximate high wholesale value for the coin. The numbers are based upon current market values, similar trades, auction prices, published prices, and a consideration of the coin's quality. There is no guarantee that the estimated prices are minimums or are exactly what you can expect to get if you attempt to resell them wholesale.

We always advise you to view the coins you are interested in and calculate what you'll pay using as much information as possible. If you have any questions, please feel free to ask us. We are here to help you!

LOT 652 50C 1938 NEW ROCHELLE. PCGS SP67+ CAC

These are just so cool! During the production run, mint employees struck 50 examples on specially polished planchets after polishing the dies, similar to the process for making Proof coins; what keeps them from being full PROOFS, is that each coin was struck only once, rather than two or more times as required for striking proofs. As expected for the lofty 67+ grade level, this coin has no hairlines, ticks, marks or carbon spotting. The strike is full and the fields beam with ultra bold reflectivity and display rich, fully PL mirrors. To say the eye appeal is SUPERB is a huge understatement!

PCGS 11, NGC 4, CAC 9. Only 2 are graded SP67+ and there is only one SP68 finer. We sold a PCGS SP67+ CAC in our October 2017 Regency Auction XXIII for \$19,975. The current PCGS Price Guide value is listed at \$17,000. These are very rare and usually see very active bidding when they are called to the auction block. We expect strong bidding for this uber-GEM example!

LOT 653 50C 1937-D OREGON. PCGS MS66+ CAC

Rich and totally original toning dominates both the obverse and reverse of this sharply struck SUPERB Gem Oregon. The obverse has a target pattern toning with the center displaying a bold coppery-carmine and surrounded by deep eggplant-purple, cobalt-slate, and indigo coloration. The reverse shows similar hues, with some additional olive and rose accents. The eye appeal is strong and totally unique.

PCGS 1296, NGC 926, CAC 211. There are 38 66+ graded at PCGS, 13 at NGC. Here is monster toner commemorative half that the price guides and APRs will prove completely useless. We do expect fierce bidding competition for this one! Good luck!

LOT 654 50C 1915-S PANAMA-PACIFIC. PCGS MS67+ CAC An outstanding Pan-Pac half--one of the finest we have handled, and a near twin to the beautiful SUPERB coin we sold in July 2017 that was described as: "Deep, original iridescent toning graces both sides of this SUPERB GEM Pan Pac half. Flawless surfaces

show off a brilliant satin luster that glows through the toning and in between the details of the fully struck devices."

PCGS 106, NGC 62, CAC 62. There are 19 coins that have been graded MS67+ at PCGS, with a mere four coins graded MS68 finer. The above cited SUPERB GEM we sold in our July 2017 Regency Sale brought \$9,988 and the current Collector's Universe value is listed at \$12,500--higher than the \$10,000 that was listed when we cataloged that other coin. We do expect this coin to sell for a very strong price, and keep in mind that if you can even find a 68, it would cost \$30,000+! This coin is bound for a SUPERB collection of classic commemoratives.

Brilliant and flashy! Clearly this GEM was struck from an early, highly polished pair of dies that shows a nearly full reflection on both sides. Sharply struck on both sides, a real prize for the advanced commemorative collector.

PCGS 0, NGC 11. Three are no auction records for a PL MS66. We sold an NGC MS65 PL CAC in our Regency Auction 25, but this coin is certainly of much higher quality!

LOT 656 50C 1936-D RHODE ISLAND. PCGS MS68 CAC

Building a high grade, high-end, beautiful toned Commem set? If you so, this will be your Rhode Island!

Technically, we grade this coin an MS69. Clearly, it sat undisturbed and probably was never touched since it left the Mint. We can't imagine cleaner or more satiny smooth surfaces. The luster is really strong and beams boldly from all over. A sensational ring of reddish gold/pale green/amber frames the peripheries all over. The centers are a lilac/creamy white color. This is a very lively coin. All of the details are really sharply struck and show no softness. The eye appeal is gorgeous!

PCSG 26, NGC 5, CAC 10. The last piece to sell in auction brought \$5,040 March of 2018. This coins is far more colorful than the piece that just sold. We expect strong bidding here from the toned Commem lovers. Be ready!

PCGS# 9364 | ESTIMATE: \$4,500+

LOT 657 50C 1936 WISCONSIN. PCGS MS68+ CAC

This coin actually borders MS69! Really!

There is one microscopic hidden tick on the obverse. The surfaces are pristine. A full booming luster can be seen from feet away. Mother Nature with some aid of the cardboard holder this coin was stored in, created an awesome color mix. Totally original shades of reddish gold/green/amber/ deep violet sparkle from all over. All of the details are sharply struck and stand out. The eye appeal is tremendous!

PCGS 34, NGC 43, CAC 24. The last PCGS CAC MS68+ to sell in auction brought \$17,625 01/2015. These certainly do not appear with any frequency. This coin will be a grand highlight of ANY GEM Type or complete 144 piece Commem set.

PCGS# 9447 | ESTIMATE: \$14,000+

LOT 658 50C 1946-S BOOKER T WASHINGTON PCGS MS68 CAC

We could not believe our eyes when we saw this coin. We unhesitatingly pronounce this piece the FINEST 1946S BTW that exists! Our sister company Legend Numismatics has handled many of world's best toned Commems and paid zoo money for them. This is one date and grade they have never seen. Plus, they have NEVER seen an BTW as wildly toned. In our opinion, PCGS should have graded this coin a + (we make no guarantees). We could never even imagine a finer piece existing.

Obviously this coin sat in its cardboard holder until recently. For 72 years it was never touched or messed with. We have looked this coin over and over and have found ZERO imperfections of ANY size. The colors are totally original and are beyond amazing. Electric fiery violet red/pearl green/gold/amber swirl wildly on the obverse. The reverse has the same colors only a little less vibrant. Most important every detail is pinpoint sharp in strike. The eye appeal of this coin is not only memorable, but is incredible!

If this were a Morgan Dollar, we'd have put it in our Northern Lights Collection where it would have been one of the BEST period. We rank the colors on this coin a full 11- yes 11 on our 1-10 color scale (10 is the best). That is how wild this coin's is.

PCGS 4, NGC 11, CAC 6. NO PCGS MS68's have been sold at auction. The current Collector's Universe Value is a measly \$8,000. We can see NON Commem Collector's chasing this coin because of its out of this world beauty. We expect full beyond Mars money price to be realized here.

PCGS# 9406 | ESTIMATE: \$10,000+

LOT 659 1925 NORSE MEDAL, THICK, PCGS MS66+ CAC

Among the absolute FINEST Thick Planchet Norse-American medals that has ever been graded by PCGS. Initially proposed to be a half dollar, Congress could not pass the required legislation to get the a coin struck to honor the centennial of the settlement of Norwegian immigrants in the Midwest. Instead, legislation passed to strike medals in commemoration. Because of their relation to the classic commemorative series, this medal has nearly ALWAYS been included in sets.

This one is very well struck with full definition on both sides, and awash in deep crimson, scarlet, and aubergine toning. Clearly a SUPERB GEM that was let to rest unmolested for ages prior to certification.

PCGS 51, NGC 37, CAC 30. There are only four in MS66+ and there is only a single MS67 finer. This near POP TOP example is among the most beautiful examples of the Thick Planchet we have EVER seen! The price guides and auction comps are totally useless for a SUPERB GEM of this magnitude!

PCGS# 9347 | ESTIMATE: \$4,500+

LOT 660 1925 NORSE-MEDAL, THIN. PCGS MS66 CAC

Struck in 1925 to commemorate the arrival of 53 Norwegian immigrants one hundred years earlier, the Philadelphia mint struck these as medals, since a commemorative coin act did not pass Congress. (However, this medal, in its three standard varieties: Thick planchet silver (mintage 33,750); Thin planchet silver, as here (mintage 6,000); and gold (mintage 100)). With the much lower mintage, the Thin Planchet variety is much more elusive in such lofty states of

preservation. Popularly collected alongside the 144-set of commemorative half dollars, in fact we have seen contemporary coin albums (Library of Coins, Wayte Raymond, and the like) with an octagonal opening to include this medal with the half dollars.

The presently offered premium quality GEM has a lovely old tone with shades of lilac-teal, amber-rose, and slate-blue that evenly coat both obverse and reverse. Well struck and beautifully preserved, this Norse medal is one of the FINEST graded, and there is no doubt as to why!

PCGS 16, NGC 6, CAC 13. None are graded any finer at either service. There is a wide range of APRs in recent times, there was a monster that sold for \$19,388 in April 2016 and other PCGS/CAC examples have sold for as much as \$18,800. The most recent one did not have the attractive eye appeal of the present piece, and one sold in July 2017 for \$9,106. For the advanced commemorative half dollar collector who needs an example of this low mintage medal, you will not find a higher graded piece.

LOT 661 \$2.50 1926 SESQUICENTENNIAL. PCGS MS66+

What an impressive, superb GEM quality Sesqui quarter eagle! A brilliant satin luster blooms from all over, and it amplifies the sharply struck design elements. A medium orange golden-glow shows some areas of toning, and only under the magnification of a strong loupe can you see any tiny ticks. The eye appeal, as you might expect is incredible!

PCGS 186, NGC 107. PCGS has graded only half a dozen in 66+ and a mere

single coin finer! The last example to sell in auction realized \$19,200 in the 2018 FUN auction (was CAC). A non CAC coin sold in the 2016 ANA auction for \$14,100. The current PCGS Price Guide value is listed at \$16,500. The single MS67 graded finer has not sold in auction, making this one of the FINEST available for purchase. A real prize for the advanced gold commemorative coin collector.

LOT 662 \$5 1850 MOFFAT. PCGS XF45 CAC

K-7. Totally different that what you normally see in the market today! Unfortunately, over the years, too many of these privately produced territorial or pioneer issues have been conserved and stripped of all originality. The presently offered CHOICE XF is deeply toned with deep, olive and violet overtones on both the obverse and reverse, the type seen from years stored in a leather pouch. Somewhat weakly struck on the hair curl above the ear, as normally seen on this type. There are a few old circulation marks, but nothing detracts from the amazing eye appeal of this early Territorial issue.

PCGS 13, NGC 10, CAC 3. No CAC-approved XF45 has ever sold in auction. The most recent XF45 to sell was graded by NGC range and sold for \$5,170 in September 2016. Going back to the 2014 FUN auction, every example has sold in the \$5,000 to \$6,000, again, none were CAC. The current PCGS Price Guide offers a value of \$6,900. With many Pioneer or Territorial issues being very rare in any grade, carrying five figures or more, the presently offered Moffat Five is a great "entry level" territorial.

PCGS# 10243 | ESTIMATE: \$5,000+

LOT 663 50C 1853 BG-302. PCGS MS64

One of the most popular types from the extensive California "Fractional" series, the BG-302 is the "Peacock" issue, so named from the spray of rays above the eagle's head, it looks like a peacock with its tail feathers in full display. It is the ONLY time this reverse die was utilized. Somewhat scarce, perhaps 150-200 examples are known. Richly toned on both sides with rose, violet, icy blue colors that come out when the lustrous, nearly prooflike surfaces are viewed in a light.

PCGS 13, NGC 4. The most recent example to sell in auction realized \$4,700 in the 2016 FUN auction, a sale that was held during a market downturn. Prior to that, the last PCGS MS64 sold n the 2008 FUN auction, realizing \$6,325. The current Collector's Universe value is listed at \$6,000 and there are only 3 coins finer at PCGS. A great coin for a "Cal Frac" type set or an addition to your territorial collection.

PCGS# 9406 | ESTIMATE: \$5,000+

LOT 664 10C 1883 HAWAII. PCGS PR64

An incredibly RARE issue in any Proof grade! A total of only 26 proofs were struck at the Philadelphia mint; a run of six coins in September 1883 and in 1884 an additional 20 coins were made. As such it is a MAJOR rarity with multiple levels of demand: as a territorial issue (even though Hawaii did not become a U.S. territory until 1898), a classic rarity, or since Hawaii was still an independent kingdom under the rule of King Kalakua I, world coin Collector's. The present coin possesses a distinct Proof appearance with brilliant watery mirrors. The king's portrait, designed by William Barber, is fully struck up and nicely frosted.

A pale, iridescent pearly-silver hue blends with a delicate clear gold at the rims. The eye appeal is decent.

PCGS 3, NGC 0. The most recent comparable example to sell in auction was a PCGS PR63 that sold for \$11,750 in November 2014; a few months earlier, a PCGS PR64 CAC sold for \$12,690 in the 2014 ANA auction. Only four coins are graded finer at PCGS, all PR66. The current PCGS Price Guide value is listed at \$16,500. For a coin this RARE, they just seem WAY TOO CHEAP! Some day Collector's will truly appreciate these Hawaiian Proofs for the MAJOR numismatic rarities they are, on par with many rarities that routinely bring six-figures! Opportunity knocks VERY LOUDLY here--will you take advantage?

25C 1883 HAWAII. PCGS PR67 CAM CAC

We unhesitatingly call this amazing SUPERB GEM the FINEST KNOWN Hawaiian Quarter in Proof! It is a wonder that this coin survives in such a wonderful condition! Only 26 proofs were struck for VIPs at the time.

Deep, watery mirrors beam from all over. The fields are icy smooth and remarkably clean, free of any hairlines, regardless of how microscopic. A wonderful halo of blue and amber patina frames the obverse's brilliant silver centers. The reverse is draped in a dramatic cobalt and crimson toning throughout, and a twirl in the light reveals teal, gold, and violet hues that clearly sparkle. The sharply struck devices are extremely frosted and contrast against the heavily mirrored fields.

The Kingdom of Hawaii did not become an official territory of the United States until 1898, but in 1883, King Kalakaua I commissioned the U.S. mint to strike a series of silver coins. Designed by William Barber, the obverse displays a portrait of the king facing left; the reverse shows the kingdom's Arms. This series has multiple levels of appeal, including advanced U.S. type Collector's, Territorial Collector's, and since Hawaii was technically a separate kingdom, world coin Collector's.

Only 26 were struck. PCGS 1, NGC 0, CAC 1. The only comparable example to ever sell in auction was the glorious NGC PR66* UCAM that was part of an original proof set sold in Stack's November 2008 auction that sold for \$43,125 (listed as a record price by PCGS CoinFacts). The presently offered coin IS NOT that coin! There is NO value listed in the PCGS Price Guide. Prepare to bid liberally to win this amazing superb proof Hawaiian quarter. This coin has no peers!

LOT 667 G\$1 1849 NO L. PCGS MS65

The oft cited mintage of 1,000 No L gold dollars seems low, given how many are estimated to survive--that said, these were the first struck of the newly authorized denomination. This impressive GEM example booms with brilliant, golden luster on both sides. Rich golden color is a delight to behold and exceptionally vibrant and eye catching. Close examination reveals a couple of ticks here and there, but none are really distracting to the eye. This piece is beautiful and represents a great way to start a set of gold dollars.

PCGS 34, NGC 23. The current PCGS Price Guide lists a value of \$6,000. Very rare any finer, and the most recent PCGS coin to sell in auction was CAC-approved, realizing \$5,405 in the 2016 ANA auction.

Sharply struck and displaying only a tiny tick or two, the eye appeal is very nice. RARE in this grade, and much rarer any finer.

PCGS 9, NGC 7. The current Collector's Universe value is listed at \$6,500. The last one sold over five years ago, and there are only a half dozen finer, and a 67 would cost \$20,000. A high quality GEM like this should see strong bidding. Good luck!

OUR ESTIMATES

The estimates you see published in this catalog are based on HAMMER. Keep in mind that a coin could be either low or high end for the grade, have stunning color or be dull, all of which radically affect a coin's value. Yes, there can be huge price differences within a grade, and we offer estimates as a guide so Collector's can have a better idea of value. One thing we will never do is offer low ball estimates in order to claim stronger sales.

These published estimates represent what Legend Rare Coin Auctions determines to be an approximate high wholesale value for the coin. The numbers are based upon current market values, similar trades, auction prices, published prices, and a consideration of the coin's quality. There is no guarantee that the estimated prices are minimums or are exactly what you can expect to get if you attempt to resell them wholesale.

We always advise you to view the coins you are interested in and calculate what you'll pay using as much information as possible. If you have any questions, please feel free to ask us. We are here to help you!

LOT 670 G\$1 1860-D PCGS XF40 CAC

One look and you will agree this is a SUPERB GEM VERY High-end XF! We have seen AU's that do not look anywhere as nice.

Sensational surfaces are super clean and smooth. Just a few tiny old ticks can be seen if you use a really strong glass. The surfaces are not messed with. Both sides are an original deep gold color. There are NO spots or discolorations. A surprising strong luster enhances the color and the details. Miss

Liberty and the details are way above average in strike. The wear is even. The eye appeal is fabulous!

ONLY 1506 were minted. PCGS 9, NGC 1, CAC 1. The last PCGS CAC piece to sell in auction brought \$9,775 back in 08/2011. This certainly is not a date or grade you see appear at all (especially CAC'd). The current Collector's Universe Value of this obsolete Mint coin seems too cheap. Good luck!

We'd bet in the old day (before 3rd party grading) this coin would have been called an MS piece. With today's pinpoint standards, the quality is now SUPER High-end.

Exquisite surfaces are super clean and have a thick satiny texture. You can see a tiny tick here and there and frost break or two. Nothing is serious or stands out. There is a bold glowing luster that is unbroken beaming from all over. Both sides are a mix of totally original deep gold/pale orange gold colors. There

are NO spots or discolorations. Miss Liberty and the details are extremely well struck. The wear is faint and is well hidden. The eye appeal is fabulous!

ONLY 6200 were minted. PCGS 5, NGC 6, CAC 1. NO PCGS CAC piece has ever sold via auction. The last PCGS NO CAC piece to sell at auction brought \$6,462.00 July of 2017. We can easily see this magnificent Civil War era coin blowing past that number. This coin is a true piece of American history!

marriages combined.

The key diagnostic feature is the thin, pointed top to the 5 in the date. The other two varieties have a recut top. The Bass Dannreuther reference cites examples sold in the Bowers & Merena January 2000 Rarities sale, as well as: Brand I, James Stack, Auction '85, Richmond Collection, and Nebraska Collection VI. The ANS retains an example, donated by B. Peyton in 1960, and the discovery coin remains in the Harry Bass Core Collection at the ANA. Similar in appearance to the one in Auction '85, but we cannot be sure based on the black and white photos. The most recent example to sell was the Richmond Collection-James Ferrendelli Collection NGC MS62 in the 2014 ANA auction. Before that an PCGS/ CAC MS61 with an extensive pedigree (ex Brand Collection above), sold for \$40,250 in the January 2012 FUN Auction. With two examples impounded in institutional collections, the number available to Collector's is guite small and this presents a remarkable opportunity for the advanced early gold die variety specialist collector.

PCGS 8, NGC 10, CAC 3. We know this coin was fresh to the market and has been resubmitted several times for at least a "+". Regardless, the eye appeal is exceptional and the rarity of this variety will entice very strong bidding.

LOT 675 \$2.50 1834 CLASSIC HEAD. PCGS AU50 CAC

The definition of "crusty"! What a great looking, totally unmolested picture of originality. Bold olive-green gold patina shows accents of rose gold and burnt orange when rotated. Nicely struck up with only the most insignificant marks that come from a brief stay in circulation.

William Kneass's Classic Head design is a transitional series bridging the old tenor gold coins of 1795 to 1834 and the Liberty series struck 1840 to 1907. The short lived series is a great series to collect as there are no MAJOR rarities, but at the same time is quite challenging to find attractive, original, unmolested pieces.

PCGS 86, NGC 45, CAC 5. The only CAC-approved example in this grade sold back in July 2013, where a similar looking example brought \$1,293. This is a very pleasing first year of issue for the type and the current PCGS price is \$1,250.

LOT 676 \$2.50 1835 PCGS MS61 CAC

A flashy, semi-proof like Mint State example. The obverse has a brilliant luster that has a distinctive mirror-like finish--clearly from an early state while the dies still had some polish on it. While overall the strike is quite bold, we do note some bluntness to it in Liberty's curls. Quite nice for a coin "only" graded MS61.

PCGS 14, NGC 34, CAC 8. The last PCGS/CAC coin sold back in January 2012 for \$3,450 (that is over six years ago!); more recently a CAC NGC coin sold for \$3,819 in the 2014 ANA auction (from the Dr. James Ferrendelli Collection). This coin has a few less marks. The current Collector's Universe value is \$3,750. A very neat collector coin that should see active bidding from type and specialist Collector's.

The frosty mint luster in areas yield to semi-PL reflectivity. Some light patina can be seen in areas along the reverse legend. Very eye appealing and just a hair's breadth from a full Mint State grade.

PCGS 19, NGC 49. The most recent example to sell in auction realized \$1,880 in April 2017. This coin was last sold in a Guide value is listed at \$2,400. We anticipate strong hidding for

LOT 681 \$2.50 1838-C PCGS XF45 CAC

As the first emission from the Charlotte mint, the 1838-C quarter eagle has a broad range appeal from Collector's of many stripes. Like many southern branch mint issues, the 38-C is often found heavily conserved; this CHOICE XF is a richly toned and totally original--an exception to what you normally see! Struck from a later die state with intersecting die cracks on the reverse. As always seen, there is a depression in the cheek and the C is boldly repunched. The eye appeal is superior to what you would expect for a XF coin.

PCGS 12, NGC 4, CAC 1. According to our auction database, going back to 1994 there have been eight auction appearances combined between PCGS and NGC, clearly these DO NOT come up for sale with any kind of frequency. The current PCGS Price Guide value is listed at \$7,250. The only PCGS XF45 sold in the last 15+ years sold for \$6,463 in the 2016 ANA Auction, and that coin was NOT CAC-approved. If this was not sent from heaven, then it was one heck of a craftsman that carved it from a GEMMY block of fresh minted gold! The WOW factor here is beyond sanity! Plus, why did PCGS not grade this coin a +? What in the world do they want?

Mega MONSTER ultra-deep mirrors beam boldly from all over. The mirrors have remarkable depth, clarity, cleanliness, and yes, you do need to wear Ray Bans when viewing the coin (The flash is that blinding). PCGS# 7932 | ESTIMATE: \$6,000+

25, NGC 18. The most recent example sold for \$7,755 in a June 2017 auction sale. The current PCGS Price Guide value is listed at \$8,000. VERY RARE any finer. These really do not appear with any frequency in auction and this would make for an excellent addition to a Proof gold type set or collection of Proof quarter eagles.

LOT 689 \$2.50 1914 PCGS MS64+ CAC

A very tough date in GEM, which makes a borderline GEM like this a great value! Totally eye appealing satiny frost blooms on both sides, highlighting a wonderful strike and high quality surfaces. Every detail is expertly embossed from a precision blow from the dies.

PCGS 503, NGC 416, CAC 75. PCGS has graded 48 as MS64+. The most recently sold examples to sell in auction realized between \$5,280 and \$6,168. This coin is very close

to full GEM quality and keep in mind we just recently sold a non-CAC PCGS MS65 in our December 2017 Regency Auction for \$11,750. Opportunity knocks very loudly here to obtain a very high quality coin that won't cost a five figure price level.

PCGS# 7946 | ESTIMATE: \$5,000+

LOT 690 \$2.50 1929 PCGS MS64+ CAC

A very pleasing and original near-gem example of the final year of this popular type. A bold satin frost shows off nice surfaces and well struck incuse devices. With the market crash of 1929, no other quarter eagles were struck for circulation and with the 1933 gold recall, many were returned for melting.

PCGS 2089, NGC 2894, CAC 342. PCGS has graded 126 in MS64+ and the population figures drop dramatically in MS65 and finer grades. The current PCGS Price Guide value is

listed at \$900 and the last CAC-approved example to sell in auction brought \$823 in November 2016. A PCGS/CAC MS65, remember, if you can find one, will cost \$5,000+.

STATES OF THE STATE OF THE STATES TO STATE STATES OF THE STATES TO STATE STATES TO STATES

LOT 691 \$2.50 1910 NGC PR66+ CAC

The mintage of 1910 Proof quarter eagles was reported at 682, a whopping sum for any Proof gold coin. Obviously the number of coins that went melted as unsold were never taken out, or there could have been a mistake in reporting. The current combined PCGS and NGC populations come to about 200 pieces, and the PCGS CoinFacts estimates that about 136 exist.

Struck in the Satin, or Roman Finish, the 1910 have a brighter gold color and a more reflective finish than the matte proofs of 1908. The present SUPERB GEM has flawless, brilliant gold color with full definition from a razor sharp strike. The fields have some of the mattelike texture, but without the full, sandblast finish of a matte proof. The eye appeal is exceptional and this coin ranks among the FINEST graded.

PCGS 12, NGC 31, CAC 12. This is the ONLY PR66+ graded by either service. The finest at PCGS are a pair of PR67, and at NGC a pair at PR68. This coin has never sold in auction, but the current Collector's Universe value is listed at \$52,500. This is a real prize for the Proof gold collector. Proof gold has always held a special place among advanced Collector's, and we expect strong bidding for this CAC-endorsed GEM!

LOT 692 \$3 1878 PCGS MS65+ CAC

A beautiful GEM \$3 gold piece. The 1878 is one of the most widely seen dates, appearing about as often as the 1854 and 1874. While readily available in grades up to and including MS64, they are quite scarce in MS65 and finer. Bold, glowing satin luster blooms on both sides. Nicely struck there is full definition on Liberty's portrait and on the wreath. The surfaces are totally silken and smooth, free of any distracting marks or lines.

PCGS 225, NGC 136, CAC 44. In MS65+ PCGS graded 14, and NGC 9. No CAC-approved MS65+ sold in auction. Do not let the population figures fool you, this date does not come with any frequency, in fact, our records indicate that only 2 CAC approved PCGS MS65 have sold in auction, the most recent in November 2014 for \$10,575 and the other for \$12,338 in September 2014. The current PCGS Price in MS65+ is \$12,200 and that level may well be surpassed when this GEM crosses the block. A non-CAC MS65+ sold for \$10,575 in August 2014.

A VERY RARE \$3! Only 801 were struck for circulation. This near GEM has a distinct reflective, Prooflike fields and fully struck, frosty devices, giving this coin the initial appearance of a Proof. Totally original, rich orange gold color accents the awesome quality of the surfaces. The eye appeal is excellent!

PCGS 25, NGC 16, CAC 9. Only two CAC coins have sold in auction. The most recent example sold for \$15,863 in June 2017. Before that one sold for in our December 2012 auction for \$18,400. The current PCGS value is \$19,000. Rare any finer! Add this near GEM to your set today!

The sharply struck devices are frosty and the eye appeal is excellent. Housed in an NGC "Fatty" holder. Only 6,000 were struck.

PCGS 73, NGC 37, CAC 12. The only NGC/CAC coin to sell in auction was designated "PL" and sold for \$8,813. RARE any finer!

DOLLARS 1378

LOT 695 \$3 1878 PCGS PR63+ DCAM CAC

An incredible rarity! A fully choice, high-end, and totally ORIGINAL Deep Cameo Proof \$3. A remarkable survivor from a miniscule original mintage of 20 pieces, which were all delivered early in the year (February 9 to be exact). Because the mintage was so low, most known examples display ample cameo contrast and the presently offered, fully CHOICE example has a bold contrast between the fields and devices, imparting a very impressive eye appeal.

Deep reflective fields have a rich orange peel texture that is so desirable for Collector's. The strike on both sides is sharp and displaying a full frost that contrasts with vibrance and makes the eye appeal quite vivid. A small number of obverse hairlines is all that keeps this visually very impressive rarity out of a higher grade holder. Rarely available in Proof and who knows when the next one will appear, most seen Proof \$3 gold date from the 1880s.

PCGS 1, NGC 0, CAC 1. In all grades and designations, there are 23 grading events, meaning that there is clearly been duplication from upgrades, crossovers, and other grading. In the DCAM designation, the most recent coin to sell was the PR66 DCAM that sold in January 2012. The most recent Proof 1878 \$3 to sell in any designation was the PCGS PR63 that sold in the 2017 ANA auction. The presently offered lot is NOT that coin. Since there are no relevant APRs our estimate could prove conservative! Who knows when any collector will have the opportunity to buy an example of this major golden rarity will present itself again! Don't let this one get away from you.

LOT 696 \$3 1888 PCGS PR66 CAM CAC

WOW, WOW, WOW! The WOW factor here is off the charts! What a stunning HIGH-END GEM this coin is.

Intense deep mirrors blaze from all over; they have sensational clarity, cleanliness, and have the ultimate in reflection. When you twirl the coin, the mirrors roll like a river of molten gold. The contrast is mind boggling too! Some light gold toning can be seen on the reverse. There is NO haze here. Miss Liberty and every detail are thickly frosted and are fully struck. The eye appeal is spectacular!

291 were struck. PCGS 7, NGC 9, CAC 5. PCGS has graded only 1 + higher. The current Collector's Universe value is \$52,500. With so little GEM PCGS CAC gold around, we can see this coin easily selling for that. We know at the major shows we have attended this year; PR Gold certainly was not anything we saw much of at all!

LOT 697 \$5 1798 LARGE 8, 13 STAR REVERSE. NGC AU58

BD-2. A scarce variety, rated R-5, with perhaps 50-70 known in all grades. Here is a very pleasing 18th century \$5 for the type or date collector. Somewhat blunt in strike, the surfaces show a moderate frosty olive-gold surface. Struck from a later state of the dies with a number of major die cracks on both sides. Very cool eye appeal.

PCGS 17, NGC 13. The last NGC coin to sell in auction realized \$14,100 in a weaker market (2016 FUN). An MS61, the next grade up at NGC) would cost about \$10,000 more. For the type or date collector, this is a very nice piece at an excellent price point. The Collector's Universe value is listed at \$21,500.

LOT 698 \$5 1803/2 PCGS AU58

BD-4. Rarity-4. The only 1803/2 half eagle that has a perfect T in LIBERTY.

This is a very attractive early five, with a glossy mint bloom that radiates from brilliant yellow gold surfaces. Sharply struck from Obverse State B and Reverse State C, with various die cracks seen on both sides, the most dramatic of which arches under the date. Only some light friction can be seen on the highest points of the design and in the fields. The planchet, as normally seen has adjustment marks at the upper reverse periphery. The eye appeal is excellent for the grade and so close to full Mint State grade-- indeed, in the days before 3rd party certification, this coin would likely have been cataloged as "BU."

PCGS78, NGC 87. We believe that there is at least some duplication in the population reports. The most recent example to sell in auction was one of the four examples that Harry Bass owned, selling for \$14,100 in June 2017. The current Collector's Universe value is listed at \$14,500. This coin has a bold look that will truly delight any collector of early gold, and is a great type coin.

We cannot take our eyes off this MONSTER. Not only is this coin SUPER High-end, it looks like a Proof! Really, there is even contrast.

Full deep mirrors beam intensely from all over. The mirrors are clean to the naked eye (there are some lines and ticks you see only with a strong glass), the clarity is outstanding, and the reflection is nearly blinding. The flash /luster of this piece is so gonzo the astronauts on the space station can see this coin. Both sides are a heart pounding deep gold that mixes with orange/pale reddish gold all over (all original colors). There are NO flecks or discolorations. Miss Liberty and every detail are so sharply struck they look like they were carved out from a fresh block of gold. The wear is light and is well hidden. The eye appeal is off the charts drop dead awesome!

PCGS 79, NGC 87, CAC 28. PCGS has graded 2 coins AU58+. The last one to sell at auction brought \$17,625 08/2017. We can see strong bidding on this GEM AU piece. We hardly ever see them as boldly prooflike as this. Good luck!

PCGS 32, NGC 6, CAC 8. The last PCGS-graded coin to sell in auction realized \$16,450 and was NOT CAC. A very scarce coin, scarcer than other early fives in all graded, the 1804 has a "magic" date.

One of the FINEST 1805 half eagles that survives. A simply stunning, near GEM early five. Sharply struck with essentially full definition of the devices. All of Robert Scot's engraved details are visible, and most show full, complete crispness. A rich, glowing mint bloom graces both the obverse and reverse of this impressive coin. There are barely any marks visible, even with a glass, and none mar the impeccable eye appeal of this borderline GEM quality coin!

PCGS 18, NGC 17, CAC 4. Prior to this coin selling, the last one realized \$63,250 in June 2012. The current Collector's Universe value is listed at \$57,500. Only three are finer, the most recent to sell was the Pogue MS65 that sold for \$164,500 in September 2015. This brilliant coin has a bold look that should see very strong bidding here! For the date or type collector, this amazing survivor would make a real prize!

LOT 703 \$5 1807 BUST LEFT. PCGS MS62

BD-8. In 1807, the newly hired assistant engraver, John Reich began work on the redesign of the nation's coins.

Starting with the largest denominations then being circulated, the half dollar and half eagle, he replaced Robert Scot's right facing bust of Liberty with his right facing Capped Bust design.

The presently offered Mint State example has a rich satin glow that drapes frosty lustrous fields. Reich's new design elements are sharply struck up. A lovely golden color shows of the quality of the surfaces. A few ancient marks are noted on both sides but none are singularly distracting or diminishing to the eye appeal.

PCGS 53, NGC 43. The most recent example to sell in auction realized \$15,275 in the Blue Moon Collection sale. The current PCGS Price Guide value is listed at \$16,000. A very popular first year of type early gold coin.

LOT 704 \$5 1808 PCGS MS63

BD-3--the so-called "Normal 5 D", considered to be Rarity-4 in the Bass-Dannreuther reference, with perhaps 100-125 examples known in all grades. While the 1808 is not a rarity in the absolute sense, David Akers noted "Although not particularly rare as a date, in my experience the 1808 is very difficult to obtain in choice mint state. Certainly it is much more rare in uncirculated condition than the 1807, 1809/8, 1810." Large Date, Large 5 or 1812

Totally choice, with a full, satin luster this is a very pleasing, high grade example of this early five. The devices are fully struck up and razor sharp, each detail accented wonderfully by a rich medium gold tone. The surfaces show some tiny old lines that only appear at certain angles on both sides and are wholly acceptable for the assigned grade. None of these detract from the overall wonderfully handsome eye appeal.

PCGS 19, NGC 18. PCGS has graded only 19 coins finer, the majority of them graded MS64. The most recent PCGS-graded example to sell in auction realized \$30,550 in January 2017 (that example was CAC approved). Before that, the last PCGS coin was sold in March 2014 (four years ago) for \$25,850. The current PCGS Price Guide value is listed at \$25,500. A great coin for any type set or specialized collection of early gold--either way this wonderful CHOICE Uncirculated coin has multiple levels of demand and will find itself at home in any collection!

devices are well struck and offer boldly defined design elements.

PCGS 31, NGC 28. The most recent NGC coin sold in March 2014 for \$14,100 and more recently a PCGS-graded example realized the same amount in February 2016. The current CU value is listed at \$16,000. Here is a nice early Capped Bust half eagle.

BD-4. Light friction is seen on both sides. The devices show a somewhat uneven strike, bold in some areas of the obverse, but somewhat blunter on corresponding spots on the reverse. A good coloration, offering shades of olive-gold with shades of richer orange.

PCGS 33, NGC 43. The last one sold for \$9,000 in a November 2017 and the current Collector's Universe value is listed at \$11,000. One of the more common die marriages, making this a great type coin.

PCGS# 8108 | ESTIMATE: \$8,000+

LOT 707 \$5 1813 PCGS MS63

BD-2, R-4--the scarcer of the two varieties of the year. The first year of the "fat head" design, one of the rarest and most avidly sought early gold types.

Satiny smooth luster has a very rich frosty glow in the fields. A visually pleasing honey gold clings to the rims, while the centers are a lighter yellow-wheat coloration. Well struck and well made. Nicely preserved, there are only a couple of microscopic marks that keep this CHOICE example from an even higher grade.

PCGS 55, NGC 34. As the most available date in a series of some of the rarest gold coins in the entire U.S. series, there is no doubt that the populations are inflated due to regrades and resubmissions. The most recent sold in March 2017, realizing \$21,150. The Collector's Universe value is listed at \$25,000. The value does jump dramatically in the next grade up, making MS63 the highest grade most can hope to obtain. Good luck!

Remarkable surfaces are proof like. You do not have to imagine the mirrors. The surfaces are also sleek, super clean, and are intensely

lustrous (have a ton of flash). Both sides are a beautiful even gold color. There are NO spots or discolorations. Miss Liberty and the details are well struck and reveal only minor wear. The eye appeal is great!

PCGS 92, NGC 430, CAC 40. The last 1834 AU58 to sell in auction was an NGC coin; that piece realized \$2,350 in December 2017. The last PCGS CAC piece realized \$3,878 in June 2016. LOT 709 \$5 1843-O LARGE LETTERS. PCGS MS63+ CAC

A real High-end Condition Census example. What an AMAZING New Orleans Mint half eagle. This is the second finest graded at PCGS, with only a single MS64 graded finer at that service. Out of a total mintage of 101,075, the breakdown given in the literature is that 82,000 of that were of the Large Letters variety, although based on his seminal research, David Akers believes the distribution was more evenly split. More recent observations by Doug Winter notes that while available in VF and XF grades, it is VERY RARE in Uncirculated.

Sharply struck on both sides, this FULLY CHOICE example shows only the slightest hint of weakness at the eagle's neck feathers and Liberty's hair curls. The luster is bold, with a strong satin glow. There is a touch of very subtle reflection in the obverse fields. Wonderful, totally original spattering of coppery-rust colored toning on both sides that imparts a great look; attesting to its unconserved originality.

PCGS 1, NGC 2, CAC 1. PCGS has graded only one MS64 finer; NGC has graded six in MS64, two in 64+, and a single coin in 65--this lends some credence to the idea that a mini-hoard was dispersed ages ago. Ed Milas owned two examples, both graded MS64 by NGC that sold in Stack's May 1995, one of which sold for \$31,900; Milas bought that coin in Mid America's August 1991 auction in an NGC 63 holder for \$42,900. James A. Stack owned one that was called "CHOICE BRILLIANT UNCIRCULATED," the Eliasberg coin was called "MS63/MS60 and is a different coin than this one. The Norweb Collection lacked an example, Bass's coin graded NGC AU55. Let that data sink in. This is VERY RARE and VERY IMPORTANT coin for the southern mint collector, and should not be missed. Once this coin sells, who knows when the next opportunity to acquire one will come up!

PCGS# 8216 | ESTIMATE: \$30,000+

The Oak Crest Collection of Carson City Half Eagles was carefully assembled over the last two decades by a dedicated collector, whose eye for quality was exceptional. The collector sourced his coins from several of the biggest dealers and auction houses, and the set is complete, save for an example of the 1870-CC, which he couldn't find that suited his tastes. Rather than include an inferior coin in his set, he left that hole open. The coins are impressive on their own, but when viewed together, and seeing how they all match, not just in grades, but in terms of eye appeal, you clearly can tell assembling the set was a labor of love for the Oak Crest collector. This is a very important opportunity for the collector of Carson City gold coins, or Liberty half eagles in general to be able to add these important rarities to their cabinets.

"We are honored to have been selected to present this important, specialized set in our 26th Regency Auction," declared Legend Auctions' president, Julie Abrams. "There is an almost mythological aura surrounding coins from the Carson City mint," explains Senior Numismatist, Greg Cohen. "Any specialized offering, especially of the gold coins, creates a stir in the collecting community. While the eagles and double eagles are more commonly offered, the half eagles are a very challenging series to collect, but unlike the other two series, none are cost prohibitive. The Oak Crest Collection will be remembered for years for its quality and eye appeal."

LOT 710 \$5 1871-CC PCGS AU58 CAC

What a great coin to start the Oak Crest offering! This is an historic coin, struck during the second year of operations at the Carson City mint, and only 20,770 examples were struck, of which today, experts believe that perhaps 140-150 survive. This coin is solidly among the top-ten examples graded at PCGS, and tied for FINEST seen at CAC. While rare-date gold scholars have written that this date does appear with more frequency than most other dates in the 1870s, in AU grades it is a rarity, a fact that has not changed in the nearly 40 years since David Akers wrote his auction analysis on U.S. gold coins.

Semi-brilliant, satiny surfaces show off a strong cartwheel luster that shows off the bright yellow gold color. For the issue, the fields are generally smooth, devoid of the heavy marks that often appear on gold issues from the "old west" mint. There are a few minor ticks and lines that we note under a strong glass, but they do not detract from the strong eye appeal. The devices are boldly struck, offering impressive detail on both the obverse and reverse devices, with only the slightest touch of softness at the extreme central details. The eye appeal is exceptional for an early Carson City gold coin.

PCGS 7, NGC 7, CAC 3. This coin is solidly in the Winter Condition Census, listed in "Gold Coins of the Carson City Mint, published in 2001. A very close match to the #3 coin in the listing, as the Nevada Collection Duplicate, earlier ex Dr. Larry Cutler Collection, Heritage, March 2, 1991, lot 5452, and the Winter Plate Coin. Our consignor acquired this coin in 2007 privately. Finer than both Bass coins, which are both PCGS AU55, and one is ex Eliasberg Collection. The combined PCGS and NGC Population figures show four coins graded finer, the finest of which is an NGC MS63. The finest PCGS coin is a 62, which is thought to be the #2 coin in the Winter census, which is ex Auction '79 and Auction '80 and serves as the Akers Plate.

The most recent PCGS AU58 CAC example sold in March 2017, and realized \$42,300. That was the first time in over a decade that a PCGS-graded example sold in auction, the one prior to that was the Old West Collection coin sold in ANR's August 2006 auction. There has not been an NGC-graded example sold in nearly seven years, clearly, these are very rarely seen out in the market place and an opportunity like this should not be taken lightly. It may be years again before another beautiful 1871-CC becomes available.

PCGS# 8323 | ESTIMATE: \$30,000+

LOT 711 \$5 1872-CC PCGS AU55 CAC

A high-end, condition census 72-CC \$5. Survival estimates range from 70-80 (per Doug Winter), to 92 (PCGS CoinFacts), to 125-150 (Rusty Goe); with this coin among the TOP TEN graded by PCGS, it is an important coin for any Carson City gold collection. Note, no Mint State survivors of this date are even rumored to exist, and David Akers noted that "most known specimens are well worn with Fine and VF being typical."

Rich, medium gold coloration blankets both the obverse and reverse of this impressive Choice AU survivor. Ample golden luster survives in the recesses of the design elements. Typically, the few survivors of the original 16,980 struck display weakly struck devices, this coin, while not fully rendered, the design elements are generally sharper than the average 72-CC. This weakness is noted at the centers, but Liberty's curls are fully delineanated, and there is some softness of the eagle's neck feathers. The peripheral details are strong in contrast. A neat, frost luster does swirl in a light, accenting the subtle amber-orange hues that add depth to the eye appeal. That appeal is unmarred by any serious marks or cuts that often plague AU examples of CC gold, and this coin does not possess that bright-neon yellow gold that you often see on the heavily processed coins.

PCGS 7, NGC 8, CAC 4. PCGS and NGC have each graded 3 coins in AU58. Clearly at these grades, we believe that there is duplication of the same specimen being resubmitted in hopes of getting higher grades. The finest is the ex Battle Born coin, now in a PCGS AU58 holder, NO MINT STATE coins are known! Harry Bass had three examples graded AU50 by PCGS at the time of the Bass sales: one ex Superior February 1972; one ex Miles Collection; and the last, ex Alto Collection. The first coin ended up in an NGC AU55 holder and ranks as #3 on the Winter census (2001). Our consignor purchased this coin in 2007.

It has been over six and a half years since the last AU55 graded by PCGS has sold, realizing \$21,850 in a November 2011 auction sale. The current PCGS Price Guide value is listed at \$25,000 and when you take its great overall look and combine it with it's condition census status, and demand today for Carson City gold coins, this coin will see impressive bidding activity, and will see strong bidding.

Good luck!

PCGS# 8326 | ESTIMATE: \$20,000+

LOT 712 \$5 1873-CC PCGS AU50

A world-class rarity, among the rarest in not just the 19-coin Carson City set of \$5 gold, but in the entire Liberty half eagle series. This is a very rare issue in AU grades. All the, estimates range indicates that it is likely fewer than 75-85 examples survive from an original mintage of 7,416 (the second lowest in the entire CC mint series). The current AU50 is solidly in the condition census, among the nine finest graded by PCGS.

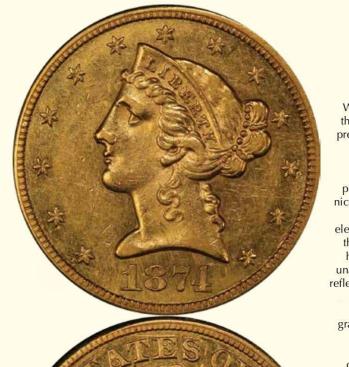

The present 73-CC is a wonderful example for the advanced collector. Possessing a very good strike for the date, the details are essentially full, flat due to the light, even wear from a brief time in wild west commerce. Much luster remains in the fields and when combined with a light source a rich, reddish-orange hue blends with the rich amber-honey gold. No major distractions, again, not a common trait for a coin that saw commercial use in the early 1870s in the western portions of the United States. A strong glass will reveal a few ancient reeding marks, but these do not have a major impact on this coin's excellent eye appeal.

PCGS 2, NGC 5. There are eight coins finer combined at both services, the finest being the ANA '76-Bass-Battle Born coin, graded PCGS MS62. The 2001 Winter census lists coins down to XF45. This coin was purchased by our consignor in 2006. The extensive Old West Collection, sold by ANR in 2006 lacked an example--indication as to how rare this date is. A small group came out of the Bass Collection, all long dispersed. Most examples known are graded in the VF/XF range, and even these are rare and rarely appear on the market.

The current PCGS Price Guide value is listed at \$25,000 and the PCGS AU50 to sell in auction, sold four years ago, in a February 2014 auction sale, realizing \$21,150. This highly attractive coin has a better overall look, and will certainly entice any collector of rare date U.S. gold, whether focused on Carson City issues, or not. The word opportunity appears a lot in the descriptions for the Oak Crest coins, as with this, do not let the opportunity pass you by, for once this one sells who knows when the next high grade example of this KEY issue will become available again.

PCGS# 8331 | ESTIMATE: \$20,000+

LOT 713 \$5 1874-CC PCGS AU58 CAC

This is one of the FINEST known examples of this date. While the estimate of surviving examples likely ranges in the 125-150 coins--making it one of the more "available" pre-1878 Carson City issued \$5, it is VERY RARE in such a high grade, with few graded finer.

The Oak Crest collector was drawn to this coin's nearly prooflike, reflective luster, which stands in contrast to the nicely frosted and sharply struck devices. Ms. Liberty's hair curls, the eagle's wing feathers, and all the other design elements were crisply embossed by an exacting blow from the dies. Only the slightest hint of friction appears on the highest points and in the fields, barely perceptible to the unaided eye. A vibrant golden hue is brought to life by the reflection and you really cannot beat this coin's eye appeal!

PCGS 8, NGC 10, CAC 4. After thirty-one full years of grading coins, PCGS has graded two coins finer: the finest being the Ellis Robison- Reed Hawn- Lawrence Cutler, MD-Nevada- Battle Born Collection coin, a PCGS/CAC coin that sold in the 2012 ANA for \$43,125. The second finest is the recently sold A.J. Vanderbilt Collection PCGS MS62 that sold in March 2018 for \$90,0000! Per the 2001 Winter census, this coin is tied for 3rd finest. Our consignor purchased this rarity privately from our sister firm, Legend Numismatics in 2007, and prior to that, this coin was part of an extensive collection of Liberty Half Eagles sold in the February 2007 Pre-Long Beach Auction. This piece was not CAC at the time, and since that time, only one CAC-approved AU58 has sold in auction, selling for \$27,025 in August 2012. With its nearly Mint State status, and being among the absolute finest known examples, the presently offered "GEM" AU will certainly excite even the most jaded collector of rare U.S. gold coins.

PCGS# 8334 | ESTIMATE: \$23,000+

LOT 714 \$5 1875-CC PCGS AU55 CAC

In high-end AU, the 75-CC is a VERY RARE coin; indeed, if not for a small group of VF and XF coins that came out into the market two decades ago, the overall rarity of this date would be comparable to the 72-CC and 73-CC. Of an original mintage of 11,828, somewhere around 150 examples are estimated to survive, as said, mostly in lower grades. Choice AU55 pieces, as here are very rare, with only two Mint State coins graded higher.

The Oak Crest coin has a rich honey-orange golden with accents of a greenish hue across the surfaces. A bold, satiny luster has a almost glossy texture. While a strong glass reveals a few ancient lines and a few old circulation marks, the naked eye appeal is exceptional. Both sides feature very well struck up design elements, with only a touch of weakness at the azure of the shield. Struck from Winter 1-B dies, which features a bold doubled die reverse. This doubling is easily seen at FIVE D.

PCGS 6, NGC 9, CAC 4. There are only two coins finer at PCGS, the Robison-Hawn-Battle Born collection coin in MS61 and the MS63 coin that last sold in 2007 for \$103,500. This coin sits firmly in the Winter condition census, as well as the PCGS CoinFacts census. Our consignor purchased this coin in 2013, and it does not match any of the AU55s that appear in our auction database. No CAC-approved AU55 has ever sold in auction. The most recent PCGS-graded example sold in August 2017, realizing \$20,563. The current PCGS Price Guide value is \$22,500. Anyone working on a specialized set of Carson City gold needs to reflect that this handsome AU55 is tied for third finest graded at PCGS. With the two Mint State coins presumably in strong hands, who knows when a comparable opportunity might occur. Be sure to view this beauty and bid accordingly!

PCGS# 8337 | ESTIMATE: \$20,000+

LOT 715 \$5 1876-CC PCGS AU58 CAC

The 1876-CC is a unique case study in the Carson City half eagle set. It boasts the lowest mintage of all CC-mint fives, standing at a production level of 6,887--however, its rarity is overshadowed by other, more famous dates in the series-but David Akers wrote that it is "approximately the same rarity as the 1871-CC, 1872-CC, and 1877-CC, and a little more rare than the 1874-CC." The survival estimates suggest somewhere between 100 and 125 survive in all grades, and the typical survivor is usually seen in XF or lower grades. Because of improvements made at the Carson City mint, the quality of production vastly improved in 1876, and all the half eagles were produced in the second half of the year. The improvements resulted in better quality of striking of gold coins, as earlier date CC-gold have weak or uneven strikes. Only a single die pair was used and all known examples have a large die lump on Liberty's neck.

Like sometimes seen on high grade examples of the issue, the fields offer a distinctive, semi-reflective luster that grabs the viewer's attention from across the room. A light rose tinge to the brilliant golden surfaces accents a strong strike, clearly the improvements made to the machinery had its desired effect! Every detail is razor sharp from an exacting blow from the dies. We do note that under a glass, some minor abrasions are visible, acquired during its brief time in wild west commerce.

PCGS 3, NGC 7, CAC 1. The coin offered here is solidly in the condition census--arguably the 3rd finest known, as it is the only CAC approved AU58. Indeed, it is bested by only an NGC MS61 and the monster Eliasberg-Battle Born MS66. As a clue to the difficulty finding an example of this date is, the extensive Old West Collection sold by ANR in 2006 lacked an example. Our consignor purchased this coin in 2007. The most recent example to sell in auction was the ex Nevada Collection (listed as as Winter condition census #3, and the plate coin in the 2001 Winter book) sold for \$37,600 in the September 2016 sale of the Twelve Oaks Collection. The only other PCGS coin to sell in the October 1999 Bass II Auction. Even nearly 20 years ago, that coin realized \$26,450. The current PCGS Price Guide value is listed at \$35,000, and keep in mind the only higher grade PCGS coin is a \$450,000+ item, so any collector building the FINEST PCGS-graded set needs to prepare for a drawn out bidding competition. What a great coin for any serious gold collection. We can see this coin far surpassing our estimate!

PCGS# 8340 | ESTIMATE: \$30,000+

LOT 716 \$5 1877-CC PCGS AU58 CAC

Another date with a paltry mintage, only 8,680 half eagles were produced in 1877 at the Carson City mint. The various references suggest about 125-135 exist in all grades, and the typical survivor is in VF or low end XF; in high-end AU, as here, this date is EXTREMELY RARE! Over shadowed somewhat by other dates, the 77-CC is a real sleeper in the series. The presently offered "GEM" AU coin is among the finest extant, and a delight to behold!

A very attractive example that displays an abundance of greenish gold overtones with subtle hints of rose, brought out by the impressive satin-like frost. The luster really does bloom in the fields around the crisply embossed devices. Some light friction is seen on the high points and using a powerful loupe, a few tiny lines and ticks are found with effort. A collector could search for a decade, or more to find a more visually appealing example, and still come up empty handed!

PCGS 4, NGC 5, CAC 2. Clearly in the condition census for the date. There are currently 3 coins listed in Mint State finer at PCGS, representing perhaps 2 different coins. The MS60 is the Bass coin that is now in a PCGS MS62 holder. Other than that, there is a 61 on their population report that never sold in auction. Winthrop Carner-Battle Born coin, was the most recent PCGS AU58 to sell in auction. The presently offered coin possesses a much better eye appeal and technical quality. The Battle Born coin sold for \$20,700 in August 2012, and the ONLY other AU58 to sell in auction was the NGC coin from the H. Lang Collection sold back in July 2002 (realizing \$29,900). Our consignor puchased this coin in 2006. With nothing graded higher ever selling in auction in nearly 20 years, this is an exceptionally important opportunity for any advanced collector of rare date U.S. gold coins. At this point you probably can just toss away the price guides and know that if you pay a record price today, it will seem cheap down the road--this is not a coin that can be replaced! Our hearty congratulations in advance to the successful bidder!

PCGS# 8343 | ESTIMATE: \$22,000+

LOT 717 \$5 1878-CC NGC AU58

The 1878-CC is a major rarity, and arguably rarer than the 1870-CC. From an original mintage of 9,054, survival estimates range from 60-70 known (Doug Winter, 2001), 97 (PCGS CoinFacts), to 90-120 (Rusty Goe). The presently offered coin is among the FINEST graded by NGC, only three coins are graded higher. There are no coins finer than AU58 at PCGS.

The presently offered coin has a great, original look. A glowing mint bloom appears from below a lovely greenish gold tone with rose-gold highlights. As the fields hit the light, your eye is captivated by the flash seen in the protected recesses of the devices. Upon close magnification with a glass, you will find some friction in the fields and a few stray marks, but no where near the choppy surfaces you would normally see on examples of this date. None of these are visible to the naked eye. The dies imparted a bold impression on the planchet with only some minor weakness of strike noted, but overall better than usually encountered. Doug Winter explains that the strike is typically found stronger on the reverse than on the obverse, and sometimes the reverse can look a full grade higher than the obverse, due to this striking weakness. Liberty's hair curls are fully formed and separated, though a touch flat at the highest points.

PCGS 4, NGC 9. Our consignor purchased this coin in March 2007, and at the time, between the two services, there were three or four coins graded AU58--today, if you include the two reported AU58+s that are on the NGC Census, there are 15 graded. Clearly there are some resubmissions of the same coin on the population figures. PCGS has not graded anything finer, NGC has 2 coins in AU58+ and a single Mint State coin called MS63 (which has never sold in auction). This coin's quality certainly lands it squarely in the condition census for the date. David Akers noted that the 1870-CC appeared more often than the 1878-CC in his analysis put together nearly 40 years ago, a statistic that still rings true in high grade. The last NGC AU58 sold in September 2017, realizing \$38,775. Prior to that, a PCGS AU58 with a similar look and great provenance sold for \$47,000. The current PCGS Price Guide lists a value of \$52,500. As one of the finest known examples with its great looks, we would not be shocked if this coin surpassed our estimate. Again, the presently offered 78-CC presents a very important opportunity to add a condition census level coin to your collection; whether you collect rare date gold in general, or CC-mint issues specifically, this rarity will spark a lot of attention!

PCGS# 8346 | ESTIMATE: \$35,000+

LOT 718 \$5 1879-CC PCGS AU58 CAC

Beginning in 1879, the mintages for Carson City gold coins began to increase, making this the first, in Doug Winter's words, "that is relatively easy to obtain, especially in lower grades...it is very scarce in higher circulated grades and extremely rare in full Mint State." Of the 17,281 initially struck, perhaps 200-250 exist in all grades, most in VF and XF. AU58s lie at the low end of the condition census, and their populations are likely inflated by regrades.

This coin last sold in auction as part of the Old West Collection, ANR, August 2006, lot 1331, where it was cataloged in part as: "A brilliant, lustrous, and very attractive coin--lots of eye appeal here! The striking is quite good on both sides, with just slight evidence of lightness. The luster is rich..." To that we will point out the exceptional color. Rich honey-gold blooms with the amazing, vibrant mint brilliance. The quality of this coin was noted a few months after the auction, where Doug Winter opined, "In my opinion, the Old West 1879-CC was just gorgeous and I could see it grading MS61 on a good day." While no one will guarantee that, we can say that this coin is about as close to Mint State as you can hope to get without the holder saying "MS."

PCGS 14, NGC 26, CAC 4. At the time this coin was last sold in auction, only 2 Mint State coins were graded finer. In the nearly 12 years since, there are now 6 graded Mint State, with the finest being MS62. This coin brought \$12,650 back in August 2006, and our consignor purchased it from our sister firm, Legend Numismatics in 2009. No CAC-approved example has ever sold in AU58 at auction. More recent examples do not have the quality or eye appeal, and have sold for around \$10,000 and the current PCGS Price Guide value is \$12,500. With a Mint State coin being worth in the \$20,000+ range, this very high-end AU58 has a lot to offer and we can see it bringing its previous auction record, or more, when it crosses the block in 2018!

PCGS# 8349 | ESTIMATE: \$10,000+

LOT 719 \$5 1880-CC PCGS AU58 CAC

While the mintage of half eagles jumped in 1880 to 51,017, precious few were saved by contemporary Collector's, as evidenced by today's population reports, this date is VERY RARE In Mint State. Even with the higher mintage, in David Aker's seminal work, he noted that the 80-CC appeared with about equal frequency as the lower mintage 79-CC. Survival estimates range from 275 to 600 in all grades, but PCGS CoinFacts estimate 11 coins in Mint State--the finest being the MS63 that was in the Battle Born Collection.

The Oak Crest coin will long be remembered for its pleasing natural yellow gold with subtle rosy accents. A strong retained luster has an ember-like glow particularly around the rim and around the date. The reverse has a nearly full cartwheel luster. The strike is quite strong on both sides with nearly full definition on both sides. Minimally abraded, a strong glass reveals a few light friction lines but the look is very high-end for the grade.

PCGS 34, NGC 44, CAC 6. This is the highest grade to receive a CAC approval. PCGS and NGC combined have graded 24 in all grades finer, from AU58+ to the sole MS63. No CAC approved examples in AU58 have ever sold in auction. Going back to 1995, our auction database shows exactly 19 PCGS AU58s sold in auction; think about that; in 23 years, that comes out to less than one appearance per year. The most recent examples (again not CAC) sold for between \$5,000 and \$6,500. Currently, the Collector's Universe value is \$6,600. This coin has been off the market since the collector bought it in 2008. This very attractive coin will see competitive bidding from specialists, good luck!

PCGS# 8352 | ESTIMATE: \$6,000+

LOT 720 \$5 1881-CC PCGS AU58 CAC

And from a mintage of over 50,000 in 1880, the 1881-CC mintage dropped to 13,886, making it the RAREST date from the 1880s, and its total survival rate is comparable to some of the much higher priced dates of the early 1870s. Dave Akers wrote in his classic reference on half eagles that "The 1881-CC is a very rare coin in any condition but for some unknown reason it as received little recognition as a rarity. It is by far the rarest Carson City Half Eagle after 1878 and, in fact is fully in the same rarity class as the dates from 1871 to 1877." In 2001, Doug Winter estimated that between 70 and 80 survive in all grades; PCGS CoinFacts estimates 115, and in the Battle Born Catalog, Rusty Goe estimates between 150 and 190.

A rich coppery orange gold patina dominates with accents of green-gold throughout. The strike is above average for the date, which is generally poorly struck, we do note some weakness in the centers. Often seen dull and grainy, this Oak Crest coin does have a more satiny frost and there are hints of cartwheel luster on the reverse.

PCGS 13, NGC 5, CAC 4. There are only 10 examples graded higher and the two finest (a PCGS MS65 and an NGC MS66 are not included in the 2001 Winter/ Halperin Census and Rusty Goe noted that they had never been verified. The finest to ever sell in auction was the extensively pedigreed NGC MS63+ CAC that sold as part of the Battle Born Collection. The Old West Collection coin was an NGC MS62. There was only one PCGS/CAC AU58 to sell in auction, a coin that sold for \$12,925 in July 2013. Prior to that coin, we can trace three PCGS coins that have sold in auction going back to 2005. The current PCGS Price Guide value is listed at \$13,500 and keep in mind that any Mint State coin is extremely rare and will cost well into the \$20,000 range. This coin is truly a great example of this very rare, and under rated date. Collector's really should take note as to how great an opportunity this is!

PCGS# 8356 | ESTIMATE: \$11,000+

LOT 721 \$5 1882-CC PCGS MS62

In 1882 the mintage "yo-yo" continued, with 82,817 coins struck, the highest mintage of half eagles since the mint opened in 1870. Survival estimates range from source to source, but go as high as perhaps 750-950 in all grades. Near the top of the condition census, and is tied in grade with the Old West/Battle Born Collection coin, PCGS has graded just a single MS62+ finer (and NGC lists a single coin in each 62+ and 63).

Rich orange in color, the surfaces are somewhat grainy in texture, but the surfaces show a strong underlying brilliance.

The devices are very nicely struck, and both sides show essentially full, crisp definition. Despite the texture, the eye appeal is quite nice!

PCGS 7, NGC 5. Our consignor bought this coin in 2007, but it does not match the two NGC MS62s sold that year. It seems to match the description of the coin in the September 1999 Goldberg sale: "This is a pretty satisfying example, kept from the 63 level by a diminishment of luster, not by its general look. A rare coin this nice." That did not meet reserve, but we cannot plate match it. Since 2011, all PCGS graded MS62s that have sold in auction brought in the general \$14,000-\$15,000 range. The current Collector's Universe value is listed at \$17,500 and keep in mind that the 62+ has not yet sold in auction (the NGC 62+ sold for \$18,800 in 2015). This 82-CC presents a great opportunity for any Carson City gold collector, don't let it pass you by!

PCGS# 8359 | ESTIMATE: \$13,000+

LOT 722 \$5 1883-CC NGC MS62

One of the finest surviving examples of this lower mintage date. Yet again, the year following a generous mintage, the 83-CC dropped to 12,958. Doug Winter wrote, "In my opinion, the 1883-CC half eagle is considerably rare than generally acknowledged, especially in higher grades." This agrees with David Akers notes where he stated, "I have only seen two strictly uncirculated examples." PCGS CoinFacts and the 2001 reference note that perhaps 3-4 Mint State coins exist. A few more than that are listed on the population reports, but since they are clustered at 61, they probably represent some duplicate submissions.

Well struck throughout with a bold, satiny mint frost on both sides. Medium, honey-wheat toned golden surfaces have a very nice brilliance, particularly around the devices. Under close inspection there are a few tiny lines that can be seen, as well as an insignificant bag mark or two, but none detract from the nice eye appeal that this Condition Census 83-CC has.

PCGS 0, NGC 2. Neither of these NGC coins have been sold via auction. Our consignor purchased this coin in 2007 and is not the former PCGS MS61 that sold in the February 2007 Goldberg auction for \$14,950 (which is #3 in the 2001 census. An NGC MS61 sold in August 2014 for \$18,213. Only a single PCGS MS63 (ex Battle Born Collection) is graded finer. That coin brought \$43,125 in August 2012. Since no PCGS MS62 has been graded, there is no Collector's Universe value assigned; in MS61 it is \$21,500 and in MS63 it is \$44,000. Certainly this coin is worth a bid somewhere within that wide range. Here is a VERY RARE and important opportunity for any advanced CC gold collector! Do not take it lightly.

PCGS# 8362 | ESTIMATE: \$20,000+

LOT 723 \$5 1884-CC NGC MS61

The mintage stayed relatively low in 1884, as only 16,402 half eagles were struck, and is similar in terms of rarity with the 83-CC and under appreciated when compared to similarly rare dates from the 1870s. Very scarce in all grades, and a major rarity in Mint State.

This is an attractive example with hints of reflective luster in the fields. Ms. Liberty and the eagle are very well struck up and the details are crisply rendered from an exacting blow from the dies. This Mint State coin was not listed in the Winter/Halperin census in 2001, as it was discovered more recently in a European bank holding. Consistent with coins from similar sources, there is a thin layer of russet-gold "vault dust" over deeper orange-gold tinges. Both sides show a scattering of minor contact marks that account for the assigned grade. Overall the look is quite nice, totally original, and truly Mint State.

PCGS 2, NGC 6. We think there is duplication at NGC, based on the number of auction appearances. Here is a clue to the rarity in Mint State: both the Old West and Battle Born Collections had a PCGS 58—they did not get a Mint State coin. The most recent MS61 to sell in auction was a PCGS coin, sold in Stack's January 2007 sale of the Morgan Branch Mint Gold Collection, which fetched \$29,900. The only NGC MS61 to sell in auction was in an October 2006 sale. The current Collector's Universe value is \$35,000 and when this once a dozen year event occurs, who knows where the bidding will end—perhaps the price guides will have to be rewritten. Another prize for the advanced collector from the Oak Crest Collection!

PCGS# 8365 | ESTIMATE: \$20,000+

LOT 724 \$5 1890-CC PCGS MS64 CAC

The only gold coins struck between 1884 and 1890 at the Carson City Mint were double eagles. After that five year period, 53,800 half eagles were struck in 1890. With a survival estimate up to 1,000 coins (depending on which estimate you go with) in all grades, it is a coin that with effort can be found in all grades with relative ease--until you get to the MS64 level.

Brilliant, yellow gold surfaces show off a strong satin mint luster with a rolling cartwheel affect on both the obverse and reverse. The details are boldly and sharply impressed. A very CHOICE piece that has just a tiny mark or two from an even loftier grade level.

PCGS 32, NGC 17, CAC 5. Only a single CAC approved coin ever sold in auction, realizing \$11,750 in June 2015. Back when our consignor bought this coin (in 2007) these were bringing between \$15,000 and \$17,000). The current Collector's Universe value is listed at \$14,500 and it could end up bringing close to that. There are only 2 coins finer, the Battle Born coin in MS65 and one in MS66. A great coin for any Carson City or gold coin collector.

PCGS# 8376 | ESTIMATE: \$11,000+

LOT 725 \$5 1891-CC PCGS MS64 CAC

From a mintage of 208,000, the 91-CC \$5 is the most common date with over 2,000 thought to survive in all grades.

Fully frosted with a bold satiny sheen on both sides. A rich orange-gold patina combined with the lustrous surfaces come together to create a near GEM quality eye appeal.

PCGS 83, NGC 60, CAC 20. The last PCGS/CAC coin to sell in auction realized \$5,875. In May 2014, we sold the "RYK" PCGS MS64 CAC-- that coin sold for \$8,225. The current Collector's Universe value is listed at \$7,500. PCGS has graded a half dozen coins finer, 4 in 64+ and 2 in 65. The last 64+ sold for \$10,575 in May 2015 and the only MS65 to ever sell in auction brought \$43,700 nearly a dozen years ago!

THE OAK CREST COLLECTION OF CARSON CITY HALF EAGLES

LOT 726 \$5 1892-CC PCGS MS62+ CAC

From a mintage of 82,968, the 92-CC is the second to last date of coinage from this wild west mint. With an estimated survival of 1,000-2,000 pieces, this is among the more common dates of the series.

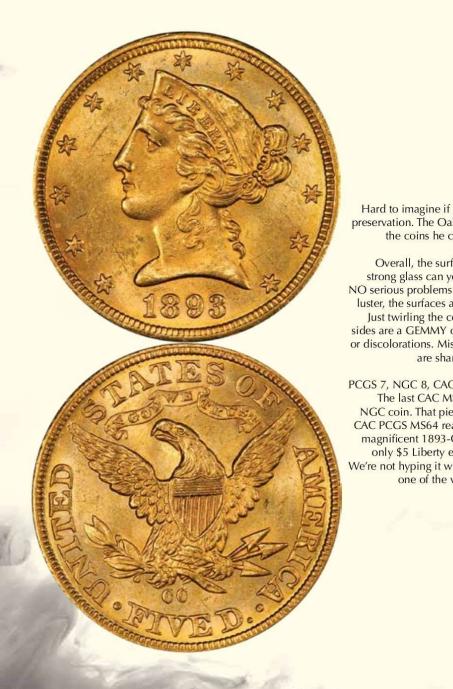

This CHOICE example offers a very impressive eye appeal for the assigned grade. Sharply struck throughout, the design elements are amplified by a beaming satiny golden bloom with swirling cartwheel luster.

PCGS 41, NGC 50, CAC 7. There are only 3 coins graded MS62+ and none have sold in auction. There are 18 in MS63 and 1 in MS64 as the finest known. The current Collector's Universe value in MS62+ is \$4,150. A very attractive coin and worthy of a "Mint Set" of half eagles or any collection of CC gold.

PCGS# 8380 | ESTIMATE: \$4,000+

THE OAK CREST COLLECTION OF CARSON CITY HALF EAGLES

LOT 727 \$5 1893-CC PCGS MS64 CAC

Hard to imagine if many 1893CC's exist in a finer state of preservation. The Oak Crest Collector was very picky about the coins he chose for his set and this coin proves it.

Overall, the surfaces appear clean. Only when using a strong glass can you find a few ticks and lines. There are NO serious problems. Not only does this coin have a strong luster, the surfaces also reveal light semi-prooflike mirrors. Just twirling the coin slightly shows off the mirrors. Both sides are a GEMMY original gold color. There are NO spots or discolorations. Miss Liberty and the details are frosty and are sharply struck. The eye appeal is fantastic!

PCGS 7, NGC 8, CAC 2. PCGS has only one MS64+ higher. The last CAC MS64 1893-CC to sell in auction was an NGC coin. That piece realized \$30,550 11/2014. A NON CAC PCGS MS64 realized \$21,150 01/2017. Certainly this magnificent 1893-CC will enjoy serious bidding from not only \$5 Liberty enthusiasts, but CC Collector's as well. We're not hyping it when we tell you this coin is most likely one of the very best 1893-CC's you will ever find!

PCGS# 8384 | ESTIMATE: \$22,000+

LOT 728 \$5 1868-S PCGS AU58 CAC

While not rare in an absolute sense, with a relatively generous mintage of 52,000, in high grade, this is a VERY RARE and UNDERRATED date! In his epic analysis of U.S. Gold Coins, David Akers wrote: "As a date, the 1868-S is not nearly as rare Asthe S Mint Half Eagles from 1858 to 1867. However, above EF it is just as rare as the earlier issues..." sitting well within the condition census, the presently offered "slider" is bested by only three pieces, 1 in MS60 and 2 in MS61. This is the FINEST graded piece to bear a CAC green sticker.

Displaying an exceptional eye appeal, this GEM AU is sharply struck with fully and crisply defined devices on both sides. The wear is barely more than the slightest imperceptible friction and there are just as small number of tiny bag marks. The surfaces offer a glossy mint luster that shows a rich orange-red golden patina that is just a delight to behold.

PCGS 5, NGC 9, CAC 2. The other CAC coin is an NGC coin that last appeared on the market over six years ago, and it was nearly 11 years ago since the last PCGS AU58 sold. More recent APRs include a PCGS AU55 CAC that sold for nearly \$4,000 in the 2016 ANA auction and a PCGS MS61 sold in June 2015 for \$18,213. There are 3 PCGS coins are graded finer, including the MS60 in the Hansen Collection and the MS61 from the A.J. Vanderbilt Collection that just solf for \$22,800 in March of 2018. \$5 1872 PCGS MS63 CAC EX H.W. BASS JR. COLLECTION

Everything about this High-end half eagle is impressive! First is it is clearly one of the FINEST examples extant from a miniscule mintage.

Fully Prooflike and intensely lustrous, at first glance, you would think this was a Proof striking. not a business strike. The devices are fully struck up with full definition to the details. Every strand of Liberty's hair, every feather on the eagle, is fully rendered to its finest advantage. With a mintage of only 1,660, it is not surprising that the fields would be highly reflective from strong die polishing prior to striking that miniscule number of pieces. Brilliant yellow gold color is accented by an intense, beaming reflective luster.

Ex. Paramount's ANA Auction, August 1969, lot 1982 to Harry Bass. Bowers and Merena's Sale of the Harry Bass Collection, Part III, May 2000, lot 506. Unknown intermediaries to the 2018 FUN Auction.

PCGS 2, NGC 0, CAC 2. One of these is a MS63+. This coin was sold in the 2018 FUN auction for \$18,000 BEFORE it was CAC approved. The current PCGS Price Guide value is listed at \$22,500. Only two coins are graded at PCGS finer, both MS64 and are impounded in major collections and will not be on the market any time soon. Bound for one of the FINEST sets of With Motto Liberty half eagles and we would not be surprised to see a very strong final bid before the hammer drops. A real prize for the advanced collector!

LOT 730 \$5 1879 PCGS MS65

This is a rare NON CAC piece we like. We really do not know why CAC did not bean it. We would have!

Excellent surfaces are clean overall to the naked eye. Only with a strong glass can you detect a tiny tick or two and a few light frost breaks. Nothing stands out. The texture of the surfaces are sleek but satiny. A strong unbroken luster illuminates the surfaces. Both sides are a wonderful totally original gold color. There are zero spots or discolorations. Miss Liberty and the details are frosty and are sharply struck. The eye appeal is wonderful!

PCGS 5, NGC 5. The last PCGS piece to sell in auction brought \$7,050 01/2017. The current Collector's Universe value is \$9,000. This is a really nice piece for a date and grade that you never see.

One of the FINEST 1902-S half eagles that survives! We are so pleased to offer yet another SUPERB late date Lib \$5.

This one has a blistering mint luster that glows brilliantly with a strong rolling cartwheel. SUPERB golden color drips with amazing originality. The devices are very well struck up and the surfaces are very pleasing, free of any serious marks, ticks, lines, etc. The eye appeal is exceptional.

PCGS 6, NGC 8. The current Collector's Universe value is listed at \$19,500 and the only PCGS coins that have sold have both been CAC approved; the most recent of which sold in the 2014 FUN auction for \$17,625. There are surprisingly two coins finer, a 68 and a MONSTER MS69! The last time the 68 sold was nearly 18 years ago, and the 69 has never sold publicly! This is the best one available currently, and should see very strong bidding from Registry set Collector's!

We think the only reason this coin was not beaned was not relating to the grade. It looks like it had a light dipping long ago. The coin clearly is full MS67. The surfaces are exceedingly clean and smooth. They do glow boldly with a strong unbroken luster. The color is a lighter brighter yellow gold. There is a tiny pinpoint stain at 6:00 on the obv rim. Miss Liberty and the details are fully struck and stand out. The eye appeal is really strong!

PCGS 1, NGC 5. The last one sold back in 2008 for \$21,275. The current Collector's Universe Value is \$24,500. If you are building the ultimate Type or \$5 Liberty set, this coin is a "must have." SUPERB GEM gold like this is impossible to find on the bourse floor any more. Good luck!

A very RARE No Motto \$10 in a very pleasing collector grade. Only 7,000 were originally struck. David Akers noted: "the 1859- is as rare as the famous 1858 and 1859-O, and thus ranks near the top of the series in rarity according to frequency of appearance at auction and rarity according to average grade. I have seen relatively few specimens and most graded only VF..." Today, PCGS CoinFacts estimates that 45 examples survive in all grades. Yellow gold surfaces show even, unblemished

wear and is remarkably problem-free and eye appealing.

PCGS 4, NGC 0, CAC 1. There has not been one sold in auction since the 2008 FUN auction, when this exact OGH sold (without CAC approval). Flash forward 10 years and with the recent sale of the Admiral Collection Collector's are really starting to realize how RARE this series is. For reference, an NGC F15 sold in January 2014 for \$4,406. With strong interest in the series, we can see this coin selling for close to the CU value of \$5,000.

One of the more interesting varieties in the Liberty Head eagle series, happens to be on one of the rarer San Francico Mint issues in the series. Only 16,700 eagles were struck total between the "normal" and inverted dates. The presently offered coin is certainly among the finer graded examples at both services. The overdate feature was created when the die sinker accidentally punched the first three digit logotype of the date upside down, then corrected the error. Only about 50 or so are known, and prior to the discoveries of the S.S. Brother Jonathan and S.S. Republic, this date was really only seen in lower grades.

SUPERB rich orange gold color offers a stunning, totally original eye appeal. Crisply struck up with full definition on both sides; scattered tiny contact can be seen. The fields are highly lustrous imparting a great look. Very close to Mint State, this coin will certainly appeal to many gold bugs!

PCGS 2, NGC 5, CAC 2. Tied for FINEST seen at CAC. There are only a handful finer, the finest being a PCGS MS64 that has not been sold in auction since 2001. The current Collector's Universe value is listed at \$42,500. We anticipate very strong bidding for this remarkable CHOICE AU!

LOT 742 \$10 1903 PCGS MS65+

A real condition rarity! With just one other graded MS65+ and one in MS66, this lustrous, well struck GEM ranks just under the APEX of the Population Report. A glowing, satin-like frost blooms from all over. Both sides show a soft iridescent tone, likely imparted from long time storage in an old envelope or bank vault. We do note, under strong magnification some microscopic contact on the cheek and some minor toning dots, otherwise, this GEM is essentially flawless and high-end.

PCGS 8, NGC 11. There are only two in MS65+ with a single coin finer (a sole MS66). The last regular MS65 graded by PCGS sold for \$9,775 back in 2010. The other MS65+ is CAC approved and sold for \$9,000 in November 2017 and the MS66 is CAC approved and sold for \$22,325. Bound for a high ranking Registry Set of \$10 Libs. Good luck!

Only 86,895 were minted, and CoinFacts estimates perhaps 625 survive in all grades. Just a touch of friction in the fields and on the highest points keep this GEM AU from being a full Mint State. Pleasing gold luster shows accents a richer orange gold patina and crisp, complete strike.

PCGS 61, NGC 94, CAC 3. The most recent PCGS AU58 to sell in auction for \$1,294 in September 2016, and it was not CAC approved. Prior to that the last one to sell was in June 2009. Clearly not a grade that sells with any frequency.

As expected for the grade, the eye appeal is very nice!

PCGS 41, NGC 33. Amazingly

there are a dozen coins graded higher. The most recent example to sell was the Crow River CAC-approved example that realized \$30,550 in our Regency Auction XVIII. The most recent non-CAC PCGS MS66 sold for \$10,869 in November 2016. The current Collector's Universe value is listed at \$17,500. Super slider quality and really pretty! Possessing a bold eye appeal that is from a combination of rich golden toning, nicely struck devices and a wealth of original mint bloom, only a touch of friction keeps this coin out of a Mint State encapsulation. Close examination reveals a couple of old lines which do not affect the wonderful eye appeal.

PCGS 51, NGC 123, CAC 34. There are only two coins graded in AU58+, and neither have appeared in auction before

this sale. The R.L. Miles-Harry Bass-El Dorado PCGS AU58 CAC, another high-end AU58 sold for \$9,400 in June 2014. The current PCGS Price Guide is listed at \$7,250 and the last MS60 graded by PCGS sold over 11 years ago and more recently a MS61 sold for \$10,575. LOT 747 \$20 1861-O PCGS AU53 CAC

A very important and historic Type One \$20, the 1861-O was struck under the authority of three governing authorities: the U.S., State of Louisiana, and the Confederacy. All told, 17,741 double eagles were struck for circulation during this turbulent year in our nation's history. Most known examples grade VF to XF, and all told, about 150-175 examples are known today in all states of preservation.

The presently offered example is very high-end and totally original. The surfaces offer a a wealth of flash, the result of the semi reflective, prooflike luster that survives, especially in the obverse fields. This coin has a very high-end look, rivaling many that have graded higher, and you can certainly tell by the originality that this one has not been conserved to give it a more "commercial" look that you normally see on these better date \$20s. The devices are very well struck and with full definition to the peripheral devices, this coin was likely struck early on, suggesting it was approximately one of the 5,000 struck by the Union from January 1 to January 26. While we do note some bag marks under magnification, they are not distracting to the naked eye. The olive-green gold patina is very eye appealing and any collector of Type 1 double eagles, New Orleans gold, or specialists in Civil War numismatics will be naturally drawn to this beauty!

PCGS 18, NGC 16, CAC 4. The most only CAC-approved AU53 example sold in October 2010! Since then, just two PCGS-graded coins have sold, the most recent realizing \$58,750 over four years ago. There are just about two dozen coins finer at PCGS, the best being graded MS60. No CAC-approved coins graded finer than AU53 have ever been sold in auction. The current PCGS Price Guide value is listed at \$61,000. This visually and historically impressive CHOICE AU will be a grand addition to any cabinet and should see very strong bidding competition! LOT 749 \$20 1875-CC PCGS MS61

A very pleasing Mint State example of this Type II double eagle from the Carson City mint. The coin is about as fresh as can be, consigned to us in an old "slab" from New York dealer Manfra, Tordella, and Brookes, graded MS63 and signed by the late dealer Gerald Bauman. The surfaces are totally original with a boldly radiating cartwheel luster. The devices are very sharply struck with fully detailed devices on both obverse and reverse. A light layer of "vault dust" clings to the surfaces, attesting to its freshness and originality. The eye appeal is

excellent for the grade, and we note only a few tiny ticks; when we sent it into PCGS, we thought it was a "shot 62," and while we make no guarantee it will ever grade a 62 it is a very pretty 61.

PCGS 192, NGC 193. The most recent PCGS MS61 without CAC approval sold for \$10,800 in December 2017. Prior to that, three examples sold for \$11,750 and one for \$12,338. The current PCGS Price Guide value is listed at \$15,000. The insert of that original "MTB Slab" is available to the winning bidder if they are interested in it. This is a great coin for any one collecting CC-mint double eagles, or for a type set of mint marked gold, or any other gold coin holding. We anticipate strong demand when this one crosses the block!

PQ and totally original, this is a classic condition rarity in any grade finer. A glowing, frosty gold luster has a lovely rich golden-orange coloration that resides on both sides. Ms. Liberty and the eagle are boldly struck up with full, crisp definition. We do note a few teeny ticks that are totally appropriate for the assigned grade, and none of them mar the exceptional eye appeal.

PCGS 205, NGC 87, CAC 6. We believe the population figures are inflated somewhat in hopes of getting a 63 into a 63+ or finer holder--PCGS has graded 4 in 63+, 14 in 64, and 1 in 64+ as the only coins finer than the offered MS63. Only a single CAC-approved coin has ever sold in auction, an NGC coin that sold in December 2015 for \$4,700. The last PCGS-graded coin sold in February 2017 for \$4,348--that was the first PCGS coin sold since November 2015. The current PCGS Price Guide value is \$5,000 and right now, with gold creeping up, PCGS/CAC gold is one of the hottest areas in the market. What a great way to add a coin to your holdings that is rarely seen in this high a grade. Keep in mind that a 64 will cost into the five figures.

LOT 751 \$20 1893 PCGS MS64 CAC

A condition rarity, one of only 89 or so graded, with a mere 5 coins graded finer. Boldly lustrous with semi-prooflike reflection in the fields. Original in terms of surfaces and tone, the eye appeal is amazing for the date. This coin has the look of many coins that came out of some European bank holding with what this cataloger refers to as "vault dust" seen in areas, proving its unmolested state of preservation.

PCGS 89, NGC 64, CAC 9. No CAC-approved MS64 graded by either service has ever sold in auction. There have been only 9 auction appearances for PCGS MS64s going back to 2010--all of which are in the \$4,000-\$5,300 range. A PCGS MS64+ CAC sold in November 2015, but that coin did have a pretty noticeable cut in Liberty's hair. The current PCGS Price Guide value is listed at \$5,250. The coloration is quite lovely and the eye appeal is totally original.

PCGS 292, NGC 350, CAC 31. PCGS has graded fewer than two dozen coins finer. While the current Collector's Universe value is listed at \$2,700, it has been over five years since the last PCGS MS64 CAC sold in auction, realizing nearly \$5,000. While prices for non-CAC coins have brought less, these are VERY RARE any finer, so for the collector building a set, this high-end MS64 has a lot to offer!

Brilliant, rolling cartwheel luster gives this coin the look of a 1900 or 1904 Philadelphia mint issue. A PROPERTY OF A PARTY OF A PARTY

LOT 758 \$20 1907 HIGH RELIEF, FLAT RIM. PCGS MS66

A SUPERB, PQ High Relief. This beautifully designed coin is arguably the most artistic and beautiful design to ever appear on a coin struck for general circulation. The story of the High Relief begins in 1905 when President Roosevelt lamented the then drab designs on our circulating coins. After viewing the high relief on ancient Greek coins and observing the beautiful designs, he contacted his friend, world renowned sculptor Augustus St. Gaudens to redesign all the coins, from the cent to the double eagle. After about 24 experimental strikings of the Ultra High Relief, which proved unruly to strike in mass quantities, the reliefs were lowered, and the High Relief as we know it today was struck to the tune of 11,250 pieces, divided between the flat rim and wire rim variants. Augustus St. Gaudens died of stomach cancer before he was able to see any example struck in its intended metal.

Gorgeous, medium honey gold surfaces display a very seductive mint bloom. Under close inspection only the most minute marks are detected, but you do need a powerful loupe to find them, thus they don't detract from the overall appeal of this splendid GEM. While intended for circulation, a large number of these were saved for their unique high relief quality, and there is a large cluster of examples certified as MS62 to MS64. Scarce in GEM, and RARE in the such lofty grades of MS66 or finer.

PCGS 52, NGC 60. The most recent two examples sold for \$60,000 (November 2017 and January 2018); prior to that, in 2015 and 2016 these sold for around \$68,000. The current Collector's Universe value is listed at \$72,500, and keep in mind that only 13 coins are graded finer, with the most recent MS67 selling for \$228,000. PCGS# 9136| ESTIMATE: \$57,500+

LOT 759 \$20 1909/8 PCGS MS64+

This overdate Saint is the only major variety in this extremely popular series, and as such is included in a Red Book set. The present coin is so close to GEM quality!

The overdate feature is clear, and visible with the naked eye. A brilliant and vibrant mint luster glows from all over. Radial cartwheel bands smoothly roll

across high-end surfaces. A beautiful golden color blooms vividly and even under a close examination with a strong glass only a couple of the most insignificant tiny ticks can be seen. The eye appeal is AMAZING for the grade!

PCGS 107, NGC 32. Only four are graded MS64+. Only two have sold, in auction, the most recent for \$20,563 in November 2016. The current Collector's Universe value is listed at \$18,000. Very RARE any finer, an MS65 will cost more than DOUBLE. This near-GEM will fit nicely in any High-end set!

PCGS# 9151 | ESTIMATE: \$14,000+

LOT 760 \$20 1920 PCGS MS64+ CAC

A true condition rarity in the series, it is excessively rare any finer! There are only TWO MS65s graded, and in fact, we just sold one of them for \$188,000!

The present MS64+ is as nice as anyone could ever hope to own for the date. A brilliant, rolling cartwheel luster has a bold, and rich satiny texture. The devices are fully struck up and the

surfaces are high-end quality for the grade assigned. It is oh so close to a GEM grade that prior to the advent of PCGS and NGC, this coin may well have been described as GEM BU!

PCGS 1102, NGC 453, CAC 82. In MS64+ PCGS has graded 90 coins and NGC 18. We think there is plenty of duplication in the population reports as examples are cracked out, crossed over, and attempted multiple times in hopes of getting a 65 grade. The last PCGS MS64+ CAC sold for \$10,800 in February 2018, and there is a record for one selling in the 2015 ANA auction for \$21,150. Remember, the only MS65 to sell recently was in our January 2018 Regency Auction 25 for \$188,000! We expect this beautiful MS64+ to bring a very strong bidding war indeed!

PCGS# 9170 | ESTIMATE: \$9,000+

LOT 761 \$20 1922-S PCGS MS64+

SUPER High-end! In the old days prior to third party grading we bet this coin would have been called a GEM BU MS65. It sure looks GEMMY!

Outrageous surfaces are pristine-something we can't say we have seen on too many Saints. Even using a strong glass, you have to look really hard to see a few microscopic tiny ticks. A huge glowing luster beams from all

over. The surfaces are totally original and have not been messed with in any way. Both sides are a marvelous pale orange gold color. There are NO spots or discolorations. Miss Liberty and the details are lightly frosted and are well struck. The eye appeal is fantastic!

PCGS 376, NGC 226, CAC 39. PCGS has graded 49 coins in MS64+. The last PCGS CAC to sell in auction brought \$8,813 in August 2017. The current Collector's Universe value is \$9,200. In our opinion, considering the next step up only has 4 beaned and would cost you at least \$60,000, at around \$10,000 we think a 64+ is a great value!

PCGS# 9174 | ESTIMATE: \$8,000+

LOT 762 \$20 1925-S PCGS MS63+ CAC

A KEY DATE Saint in very pleasing grade. This fully CHOICE example is totally original with a lovely rich golden color that comes to life with a satiny mint glow. Sharply struck on both sides, the details are fully rendered and there are only a few small marks scattered about. The eye appeal is excellent, looking as if it came fresh from an old holding.

The 25-S had a very large mintage of 3,776,500. This number has no relation to the number of survivors; the vast majority were never released for circulation and following F.D.R.'s gold recall, were melted into bullion. A few of the few hundred survivors came from European bank holdings.

PCGS 111, NGC 34, CAC 7. In 63+ there are 3 at PCGS, 1 at NGC. Only one of these has sold in auction, realizing \$20,125 in July 2011--nearly seven years ago! The next step up in MS64 will cost around \$40,000. This is a wonderful opportunity for the advanced Saint collector--do not let it pass you by!

PCGS# 9182 | ESTIMATE: \$18,000+

LOT 763 \$20 1926-S PCGS MS64+ CAC

Well preserved and very eye appealing, this near-GEM 26-S will make an awesome addition to any collection of double eagles. A very scarce coin, although not as rare as other mint marked issues. Sharply struck and highly lustrous, this coin possesses a great eye appeal. Very few marks are noted and are limited to the microscopic kind.

PCGS 409, NGC 284, CAC 40. At PCGS there are 62 graded in MS64+. Clearly there is duplication at both services. The current PCGS Price Guide value in 64+ is listed at \$10,500 and the most recent PCGS/CAC example to sell realized \$9,964 in March 2016. While more commonly seen than the other mint marked dates, this is still a very rare date in GEM Mint State, making a borderline coin like this a great addition to any collection!

e are pleased to offer the first of two parts of this extensive collection of patterns assembled over the course of many years by a dedicated collector of coins. His passion for numismatics has been life long, and his patterns are just one of many areas of collecting interest. Over the course of the last 15 to 20 years, Mr. Cook has assembled a collection of over 150 pattern coins, which we will be offering in two parts—the first part in Regency Auction 26 and the second in Regency Auction 27. In Regency Auction 26, we carefully selected coins that we thought would have some good "cross-over" appeal to other coins we are offering in this sale. To that end, we have selected all of James Longacre's Liberty Head design patterns that feature a portrait of Liberty in the style adopted on the three cent nickel series. We have also put some very popular types including a Morgan half dollar, a Sailor Head dime, a Washlady quarter, and others. All told 77 lots are presented in Part 1.

From the earliest days of the U.S. Mint to the modern era, proposed designs, new compositions, and enigmatic "pieces de caprice" produced for VIP Collectors were struck. This fascinating series has been studied for well

over a century, with the standard reference being used today was written by Dr. J. Hewitt Judd and is now in its 10th Edition. What is great about patterns, one of the things that drew Mr. Cook to them is that they are very undervalued relative to their rarity. Many of the pieces in this extensive collection are represented by fewer than a dozen specimens in all grades, and many can be found in wonderful condition for under \$5,000, making them affordable for many Collector's.

Our sister firm, Legend Numismatics, is world famous for its part in the 2008 purchase of the Southern Collection, and subsequent sale to collector Bob Simpson for over \$35,000,000. Some of the coins in the Cook Collection are duplicates from the Simpson Collection. Others are pedigreed to the Denali Collection, another world class pattern collection sold by Legend Numismatics. Legend Rare Coin Auctions has, from its inception, offered many amazing patterns, including the Simpson Collection of Standard Silver Patterns in 2017. We hope that if you have not yet "taken the plunge" into the world of pattern collecting, the Steven Cook Collection will inspire you to.

LOT 764 3CS 1850 J-125. PCGS PR65

R-4 (76-200 minted). Liberty cap and rays (similar to 1836 gold dollar and contemporary Mexican silver coins); Roman numeral III within palm branch wreath reverse. Struck in silver with a plain edge.

A beautifully toned GEM, tied for FINEST graded at PCGS. Highly polished dies have left the surfaces of this coin very reflective and with some light striations. Deeply toned at the rims with a gorgeous turquoise, cobalt, royal-purple, sunset-orange, and gold coming to a brilliant center on both sides. The eye appeal is SUPERB!

PCGS 3, NGC 7. This coin does not appear to have been sold in auction and presents a much prettier eye appeal than we have seen! A recent J-125 sold in our January 2018 Regency Auction, where a PCGS PR64+ CAC sold for \$4,465. The current PCGS Price Guide value is listed at \$5,500. Often included in advanced sets of 3CS, this gorgeous J-125 GEM would be a great beginning to an advanced set!

PCGS# 11536 | ESTIMATE: \$4,500+

LOT 765 G\$1 1852 J-148. PCGS PR64 CAC

R-7- (7-12 minted). Annular gold dollar. UNITED STATES OF AMERICA and 1852 around ornamented raised rim. Reverse: ONE DOLLAR and wreath around raised rim. Struck in copper-nickel with a plain edge. A very interesting concept for the gold dollar. Starting in 1849 with the mass outpouring of gold from California, gold dollars were struck, but were tiny. In an effort to make the diameter larger and still maintain the legislated weight, a larger planchet was produced with a perforated hole in the center punched out. The fields are reflective and show off a lovely

copper-nickel sheen. Razor sharp in definition, the eye appeal is quite nice. The surfaces are free of distracting hairlines, marks, or any spots, save for one above the second "L" in DOLLAR which serves as a pedigree marker.

PCGS 4, NGC 1, CAC 1. Since 2003, there have been three appearances in PCGS PR64, each time realizing between \$4,400 and \$5,000. The only other PCGS coin to sell in the last 15 years was the PR66 that we sold in May 2016 (the ex Newman coin) for \$12,338. This is a very interesting pattern issue that rarely appears at auction and should see active bidding from not just pattern. Collector's, but advanced gold dollar. Collector's as well.

PCGS# 11614 | ESTIMATE: \$4,000+

LOT 766

1C 1853 J-151. PCGS PR65+ CAC

R-6- (21-30 minted). Struck with the obverse of the \$2.50. Wreath with ONE CENT on reverse. Struck in a 40% nickel 60% copper planchet with a reeded edge. Second finest at PCGS. Razor sharp in strike, both sides are crisply and expertly impressed by an exacting blow from the dies. Reflective fields on both sides make the design elements really stand out. Lightly toned and very original.

PCGS 2, NGC 4, CAC 2. This is the only PR65+ graded, and only one PR66 is graded finer at PCGS.

An NGC PR65 sold in January 2012 for \$5,175 and that was the most recent GEM to sell from any grading service. A non CAC PCGS PR64 sold for \$5,040 in February 2018. The current Price Guide value is \$5,900. What a NEAT GEM!

PCGS# 11628 | ESTIMATE: \$4,500+

CONT.

LOT 767 1C 1854 J-161. NGC PF61 BN

R-4 (76-200 minted). Similar design to the current Large cent (but with no stars on the obverse), struck on a smaller diameter copper planchet with a plain edge. Even, rich chocolate brown surfaces have a somewhat orange-peal texture. Sharply struck in areas, blunt in others, typical to the issue. A few old ticks account for the grade, but the eye appeal for such a modest grade piece is very nice.

PCGS 1, NGC 8. The most recent NGC graded example to sell in auction realized \$1,087 in

October 2014. Any pattern that is graded problem free valued around \$1,000 just seems too cheap!

PCGS# 11663 | ESTIMATE: \$1,000+

LOT 768

1C 1858 J-193. PCGS PR61 CAC

R-5 (31-75 minted). Transitional pattern regular obverse of 1858/Reverse of 1859. Struck in copper-nickel with a plain edge.

For the assigned grade, this Flying Eagle pattern cent has a very strong eye appeal. Housed in an OGH, it possesses razor sharp definition to the details. There is a good amount of very pleasing toning and both sides show just a few minor hairlines and ancient flecks that are taken into account with the PCGS grade.

PCGS 1, NGC 0, CAC 1. Prior to becoming CAC-approved, this coin sold for \$1,763 in the notoriously weak 2015 FUN auction. The current PCGS Price Guide value is listed at \$1,750.

PCGS# 11844 | ESTIMATE: \$1,500+

LOT 769 1C 1858 J-204. PCGS PR64 CAC

R-5 (31-75 minted). Small eagle obverse; Oak wreath with ornamented shield. Struck in copper nickel with a plain edge.

A lovely and original CHOICE Small Flying Eagle cent. Sharply struck with reddish-gold, coppery surfaces. The surfaces are generally clean and free of any distractions, save for a tiny fleck or two that do not take away from the eye appeal.

PCGS 17, NGC 16, CAC 3. No CAC-approved PR64 has sold in auction. Don't let the population report fool you, only two PCGS coins have sold since 2006: one in November 2017 for \$2,040 and the other in November 2013 for \$2,820. PCGS has a value of \$3,900 in their current Price Guide.

PCGS# 11871 | ESTIMATE: \$2,000+

Good luck!

LOT 770 1C 1858 J-208. PCGS PR63

R-1. Adopted designs of 1859, but dated 1858. Struck in copper-nickel with a plain edge.

Highly reflective copper-nickel surfaces and sharply struck, frosty devices have a nearly cameo-like reflection. Very pleasing to the eye, this CHOICE coin has some minor flecks that account for the grade.

PCGS 39, NGC 18. The most recent example realized \$1,920 in March 2018 and in the 2018 FUN auction, one sold for \$2,040. The current PCGS Price Guide value is \$1,850 and this coin should sell for somewhere around that.

PCGS# 11885 | ESTIMATE: \$1,700+

LOT 771 50C 1861 J-280. NGC PF63 BN

EX SIMPSON. R-7- (7-12 minted). Struck using the regular proof obverse die of 1861, similar reverse to regular issue with GOD OUR TRUST in open field above eagle. Struck in copper with a reeded edge. Razor sharp in strike, this PR63 BN has a bold eye appeal with accents of olive, blue, brown and hints of the original red in places. The surfaces show some hairlines, but none are very distracting.

PCGS 2, NGC 2. This is a duplicate from the Simpson Collection, the most famous collection of pattern

issues ever assembled. In August 2010, a selection of Mr. Simpson's duplicates were offered at auction, this one selling for \$2,185. A very rare pattern issue, boasting a great pedigree and Civil War date has a lot to offer the collector!

PCGS# 12108 | ESTIMATE: \$2,000+

LOT 772 1C 1863 J-299. NGC PF65 BN CAC

R-3 (201-500 mintage). A transitional issue struck with the regular dies on a thick bronze planchet used from 1864-1909. Struck in medal turn, as opposed to coin turn. Nicely mirrored on both sides, an even brown coloration with accents of cobalt, emerald, and hints of original red that add to the superb look. Razor sharp in definition, the crisp reliefs stand out in full 3-D effect. We note a few teeny ticks under a strong glass, but they are not in any focal areas. The eye appeal is very strong.

PCGS 9, NGC 10, CAC 3. The current Collector's Universe value is listed at \$2,500. The most recent J-299 to sell in auction was a non-CAC PCGS coin that sold for \$1,540 in April 2016. The last NGC coin sold for \$1,410 in the 2014 FUN auction. Another pattern that has multiple layers of demand—Indian cent Collector's, pattern Collector's, Civil War Collector's, transitional issue Collector's, all should vie for this GEM.

PCGS# 60454 | ESTIMATE: \$1,200+

LOT 773 H10C 1863 J-323. PCGS PR65 RB CAC

R-7+ (4-6 minted). Regular Proof dies of 1863, struck on a copper planchet with a reeeded edge. Exceptionally bold mirrors beam with a gleaming red brilliance that is enhanced by shades of sea-green, brick, and violet. The design elements are sharp throughout and the eye appeal superb. While cataloged in Judd as a regular issue die trial, some experts believe these were minted the following decade in off-metal proof sets sold to Collector's.

PCGS 1, NGC 1, CAC 1. This and the NGC coin are

one in the same, we are able to plate match it to the one in the January 2009 sale of the Queller-Lemus Collection, and is ex: Public Auction Sale (Hollinbeck, 7/1953), lot 1985; Thomas Bergin Collection, June Sale (Stack's, 6/1984), lot 1174; Stuart C. Levine Collection (Bowers and Merena, 4/1986), lot 2272. In the sale of the Queller Collection, this coin realized \$5,175. More recently it sold for \$4,113, but that was a weaker market--August 2015 and the current Collector's Universe value is \$5,500. Another great Civil War era GEM pattern that has a lot to offer!

PCGS# 70480 | ESTIMATE: \$4,000+

LOT 774

50C 1863 J-340. PCGS PR64 CAC

R-6- (21-30 minted). Regular obverse die, reverse similar to regular proof die, with GOD OUR TRUST in field above eagle. Struck in silver with a reeded edge.

Highly reflective mirrors beam from under a layer of lavender, pewter, robin's egg blue, and lilac-olive toning with streaks of original silver on the obverse and teal-blue, rose, and pale gold on the reverse. The devices are very well struck up and offer a strong frost. There is a moderate amount of contrast, just shy of a full CAM designation. Very original in terms of quality and eye appeal.

PCGS 11, NGC 4, CAC 1. Going back to 2004, every PR64 graded by PCGS has sold in the \$3,000 to \$3,500 range and the current Collector's Universe value is listed at \$3,800. Only two have been graded finer at PCGS, both PR65.

PCGS# 11844 | ESTIMATE: \$3,200+

LOT 775 3CN 1865 J-410. NGC PF65 CAM

R-6- (21-30 minted). Very similar to regular issue dies, but with minor differences to the date and ribbon placements. Struck in nickel with a plain edge.

Looks like a GEM CAMEO proof 1865 3CN! Deep mirrors and frosty devices show off a bold look. A few tiny ticks can be seen but the eye appeal is great. It is interesting to note that the J-410 looks so similar to a regular 1865 Proof, that Eliasberg's "regular" proof 1865 3CN was indeed a J-410.

PCGS 0, NGC 3. The Queller-Lemus coin, sold in January 2009 was an NGC PR65 non-CAM sold for \$6,325. More recently a PCGS PR65 (non-CAM), sold for \$3,680 in March 2011. What a cool coin to add to an advanced 3CN set!

PCGS# 518793 | ESTIMATE: \$2,500+

LOT 776 3CN 1865 J-413. PCGS PR64 RB CAC

R-5 (31-75 minted). Struck from regular Proof dies on a copper planchet with a plain edge.

Visually very high-end for the grade! Rich coppery mirrors beam from under a lovely array of violet hues that create a neat contrast on the fully struck reliefs.

PCGS 5, NGC 2, CAC 3. This coin sold in November 2013 for \$1,880 and the current PCGS Price Guide value is listed at \$2,300. Very few are graded finer in the RB designation, the last PCGS example selling

back in August 2004. Not only should this coin appeal to pattern. Collector's, but to very advanced. Collector's of three cent nickels.

PCGS# 70594 | ESTIMATE: \$1,500+

LOT 777 25C 1865 J-425. NGC PF65 CAM

R-6+ (13-20 minted). A transitional pattern using the regular proof obverse die matched with a With Motto proof reverse of 1866-1891. Struck in silver with a reeded edge. Deep, beaming mirrors (especially on the reverse) provide a bold contrast to the frosted reliefs. All of the details are fully rendered and razor sharp. A pewter/dove overtone graces the obverse, while the reverse is awash in gold and azure hues.

There has been much discussion as to when these transitional patterns were struck and whether they are

true patterns or were produced later on for sale to Collector's. Regardless, they have long been a part of the pattern series. The J-425, additionally, as it is struck in silver with a reeded edge, could be a great addition to an advanced proof Seated Liberty quarter collection.

PCGS 1, NGC 1. This coin does not appear on the NGC Census, but clearly it exists. It is ex Queller/Lemus, but more recently sold for \$7,050. There is a PCGS PR65 that last sold in May 1999. The current Collector's Universe value is listed at \$9,000. Bound for an advanced collection!

PCGS# 60610 | ESTIMATE: \$6,000+

LOT 778 25C 1865 J-426. NGC PF64 RB

R-7- (7-12 minted). A transitional pattern using the regular proof obverse die matched with a With Motto proof reverse of 1866-1891. Struck in copper with a reeded edge. Smooth fields show off a wealth of highly eye appealing toning. As you rotate this near-GEM in a light, the varying hues of original mint red, mellow brown, and light green accents are seen here and there. The surfaces appear more like a bronzed copper mint medal struck at the time than deep mirrors like on the silver proofs of the era.

PCGS 0, NGC 2. In February 2014, this coin sold for \$3,966 and less than a year earlier, the Col. Green-Eric Newman coin sold for \$5,581. A PCGS PR65 exists, but has not been on the market since 2003! About as fine an example as can be found and worthy of an advanced cabinet!

PCGS# 70611 | ESTIMATE: \$3,500+

LOT 779 5C 1867 J-566. NGC PF65

R-6- (21-30 minted). Longacre's coronet head of Liberty similar to the 3CN. Large 5, CENTS in a laurel wreath IN GOD WE TRUST on reverse. Struck in nickel with a plain edge. Nicely reflective nickel fields are smooth and free of all but the most insignificant flaws. A real GEM with sharply struck devices.

PCGS 3, NGC 4. In July 2014 two PR65s sold, one PCGS and one NGC, realizing \$2,350 and \$1,880 respectively. The current Collector's Universe value is listed at \$2,500. The Liberty Head design, with its

similarity to the 3CN should attract bidding from advanced Collector's of that series, as well as nickel and pattern Collector's.

PCGS# 60776 | ESTIMATE: \$1,600+

LOT 780

5C 1867 J-570. NGC PF65 CAM

R-5 (31-75 minted). Design by Longacre. Obverse bust of Liberty facing left, similar to 3 cent nickel, but with a star on the coronet; reverse large 5 within wreath, IN GOD WE TRUST above. Struck in nickel with a plain edge.

Flashy nickel silver mirrors are strongly reflective against the frosted reliefs. A delicate dusting of pale gold adds some dimension to the visual effect.

PCGS 2, NGC 2. Only one PR65 CAM graded by either service has ever sold, realizing \$1,763 in March 2015. In non-CAM PR65, an NGC coin sold for \$2,350 in September 2014. With its similarity to the 3CN design, (and more interesting design that the adopted Shield type) it should see competitive bidding!

PCGS# 860780 | ESTIMATE: \$1,500+

LOT 781 10C 1867 J-587. NGC PF65 RB R-7- (7-12 minted). Regular proof dies struck in copper with a reeded edge.

A lovely toned GEM example. Bold reflection comes through with a neat palette of color. Sharply struck and totally devoid of any contact.

The eye appeal is exceptional!

PCGS 0, NGC 1. This coin last sold over five years ago for \$4,406 (November 2012). The current Collector's

Universe value is listed at \$5,000. Only a single PR66 RB is finer, a PCGS coin that has not been seen in auction since 2005. Clearly a rarity that is not often offered, presenting an important opportunity for the collector.

PCGS# 70799 | ESTIMATE: \$3,500+

LOT 782

1C 1868 J-608. PCGS PR66 CAM CAC

R-4 (76-200 minted). Longacre's Liberty head as adopted for the 3CN, and a similar reverse to the 3CN. Struck in nickel with a plain edge.

SUPERB! Deep beaming, nickel mirrors boom around the highly frosted, sharply struck design elements. The high-end quality can be seen from across the room!

PCGS 5, NGC 5, CAC 7. The last PCGS/CAC coin to sell was a non-CAM that sold in February 2018 for \$2,880. The PCGS Price Guide value is listed at \$2,500. A prize for the small cent pattern collector!

PCGS# 80820 | ESTIMATE: \$1,600+

LOT 783 3C 1868 J-615. PCGS PR64

R-5 (31-75 minted). Longacre's Liberty head, similar to the adopted 3CN design, but with smaller date and wider rim. Reverse has a large Roman numeral III in a agricultural wreath, similar to the \$3 gold piece. Struck in nickel with a plain edge struck in medal turn.

Pleasing pewter-dove patina over reflective surfaces. Sharply struck and very original, this coin has a nice eye appeal.

PCGS 7, NGC 4. The last one to sell was in March 2012 for \$1,093. Before that the Simpson duplicate sold for \$1,380 (NGC). The current PCGS Price Guide value is listed at \$1,700.

PCGS# 60827 | ESTIMATE: \$1,200+

LOT 784 3CN 1868 J-616. PCGS PR64 RB

R-6+ (13-20 minted). Similar design to regular issue 3 cent nickel but the reverse has an agricultural wreath (similar to \$3 gold), as opposed to the laurel wreath on the issued coins. Struck in copper with a plain edge.

Nicely mirrored fields show off a wealth of original red and gently mellowing down with a gentle iridescent overtone. Sharply struck, this coin would be GEM were it not for some teeny flecks and a microscopic mark or two.

PCGS 6, NGC 0. The last one to sell realized \$2,233 in June 2017. The only other one sold this DECADE realized \$4,025 in the 2011 FUN auction. The current Collector's Universe value is listed at \$3,000. Another great pattern 3CN that would augment a high-end collection of that obsolete denomination!

PCGS# 70829 | ESTIMATE: \$1,800+

LOT 785 3CN 1868 J-618. PCGS PR65 CAM CAC R-4 (76-200 minted). Similar to the regular 3CN design, struck in nickel with a plain edge.

Glassy reflective mirrors beam from all over, creating a strong contrast against the frosted reliefs. Some minor, microscopic flecks and a dusting of clear gold attest to the originality.

PCGS 6, NGC5, CAC 3. The current Collector's Universe value is listed at \$2,300 and the most recent one to sell brought \$1,763 back in June 2013. There is

only one coin finer. Bound for an advanced 3CN collection or a collection of patterns.

PCGS# 860834 | ESTIMATE: \$1,400+

LOT 786

5C 1868 J-633. NGC PF64 CAC

VERY choice in quality. Reflective fields with a dusting of iridescent tone. Sharply struck and very original.

PCGS 26, NGC 7, CAC 2. The most recent one to sell was in October 2016 where a PCGS coin sold for

\$1,175; an NGC coin sold or \$1,236 in February 2014. The current Collector's Universe value is listed at \$1,700. This choice coin should see strong bidding.

PCGS# 60851 | ESTIMATE: \$1,000+

LOT 787 H10C 1868 J-638. PCGS PR65 CAC

R-6- (21-30 minted). Regular issue proof dies struck in nickel with a plain edge.

A lovely GEM! Watery mirrors beam from under an iridescent white/gold toning on both sides. Sharply struck on both obverse and reverse, the eye appeal is amazing. VERY scarce!

PCGS 8, NGC 1, CAC 2. This coin is the NGC coin reported, as it was just recently crossed over. The other CAC coin sold in the 2013 ANA auction for \$2,233

and the current PCGS Price is \$3,000. What a great coin for any serious half dime collector!

PCGS# 60856 | ESTIMATE: \$2,000+

LOT 788

10C 1868 J-641. PCGS PR65 CAM CAC

R-7- (7-12 minted). Similar to the normal obverse die, but with no date below. Cereal wreath reverse with six-pointed star above ONE CENT, 1868 below. Struck in nickel with a reeded edge.

One of the finest, and one of only two CAMEO's Sharply struck devices have a bold frosty look that contrast brilliantly against the clean, deep, awesome mirrors. A few minor ticks in the planchet are noted and do not detract from the eye appeal. VERY RARE and while the design is only lightly different than the

regular issue, the differences make this pattern issue unique and more elegant.

PCGS 1, NGC 0, CAC 1. This coin has sold twice in auction, first in September 2011 for \$4,888 and again in June 2014 for \$4,230. In regular PR65, the current Collector's Universe value is listed at \$5,250. This coin will make a fine addition to any collection of Proof Seated dimes, or collection of 1868 pattern issues.

PCGS# 507107 | ESTIMATE: \$3,500+

LOT 789 3CN 1869 J-676. PCGS PR64 CAM CAC R-4 (76-200 minted). Similar to the regular issue 3 cent nickel dies, struck in nickel with a plain edge.

Bold, icy mirrors have exceptional clarity and sheen for a coin struck in nickel. Virtually untoned with just a touch of iridescent silver/white seen on both sides. Sharply struck, there is a mint made flaw on the planchet, appearing at the center of the reverse, but the eye appeal is strong, as is the cameo contrast.

PCGS 4, NGC 3, CAC 1. This coin last sold in March 2015, realizing \$1,410. We sold a PCGS PR65 CAM CAC in our July 2017 auction for \$1,469. The current Collector's Universe value is listed at \$1,700. These are just too cheap at these levels! What a neat coin for any collector of 3CN or patterns.

PCGS# 388660 | ESTIMATE: \$1,100+

LOT 790 3C 1869 J-678. PCGS PR64 BN

R-7- (7-12 minted). Struck from regular 3CN dies on a copper planchet with a plain edge.

Flashy and attractively toned, both sides of this VERY RARE pattern are very eye appealing.

PCGS 1, NGC 0. This coin has sold various times over the last 6+ years, first realizing over \$4,000 in August 2011; most recently it has sold for \$2,000. We know that in this market, in this sale, with attention to both patterns and 3CN, this coin will bring more! The

current Collector's Universe value is listed at \$2,700. A great coin with multiple layers of demand!

PCGS# 60903 | ESTIMATE: \$1,600+

LOT 791 5C 1869 J-684. NGC PF65 CAM

R-5 (31-75 minted). Longacre's Liberty head similar to the 3 cent nickel, but with star in the diadem. Reverse large Roman numeral V within laurel wreath. Small Maltese cross above with ribbon IN GOD WE TRUST.

Struck in nickel with a plain edge.

Smooth, icy mirrors beam with high-end reflection. James Longacre's design elements are well struck and frosty and contrast wonderfully with the mirrors. The eye appeal is very nice indeed.

PCGS 2, NGC 4. The last NGC -coin to sell in auction was CAC-approved and sold for \$2,070. More recently, in a very weak FUN sale, one sold in 2015 for \$1,763. The current Collector's Universe value \$2,750. Here is another coin that should appeal to nickel Collector's, pattern Collector's, and thanks to the similar portrait of Liberty to the 3CN, advanced Collector's of that obsolete series.

LOT 792

10C 1869 J-703. PCGS PR64

R-6+ (13-20 minted). Liberty head with plain diadem, Standard Silver reverse. Struck in silver with a plain edge.

A very CHOICE example with bold reflection that bursts through a lively golden-lilac and pale blue iridescent toning. Sharply struck, the eye appeal is excellent.

PCGS 8, NGC 4. Once part of the Jones Beach collection, it more recently sold for \$1,351 in the 2014 ANA auction and the current PCGS Price is \$1,750. Very scarce and very attractive.

PCGS# 60928 | ESTIMATE: \$1,100+

LOT 793 25C 1869 J-721. PCGS PR62

R-5 (31-75 minted). A Capped Head of Liberty with 3 stars, Standard Silver reverse. Struck in silver with a reeded edge.

Light iridescent tone can be seen on watery reflective fields. Sharply struck with just a few tiny stray lines worthy of mention.

PCGS 5, NGC 1. The last time a PR62 sold in auction was in 2003 when an NGC coin sold; the last PCGS PR62 to sell in auction was in January 1991! These do not come high grade, the SImpson coin was only a PR64.

PCGS# 60948 | ESTIMATE: \$1,100+

LOT 794 25C 1869 J-727. PCGS PR66 CAC

R-5 (31-75 minted). Liberty head right with no star on diadem. Standard Silver reverse. Struck in silver with a reeded edge.

A very High-end GEM, one of the FINEST known! Beautifully toned! The angular toning pattern on the obverse suggests long term storage in an ancient collector envelope. Blues, golds, oranges, and every shade between blends with a suffusion of color and rich watery mirrored fields. Sharply struck throughout, the eye appeal is unique and totally original!

PCGS 7, NGC 4, CAC 3. The most recent example to sell in auction was not CAC approved, and did not have the outstanding eye appeal of this GEM, realizing only \$1,880 in the 2014 ANA auction. Prior to that, this coin realized \$3,055 in June 2013 and before that, another non-CAC coin sold for \$2,990 in the 2011 ANA auction. Only one coin is graded finer, a PR66+, and the Simpson coin was only a PR64+ that we sold in our Regency Auction XX (January 2017) for \$2,350.

25C 1869 J-728. PCGS PR65 CAM CAC
R-6+ (13-20 minted). Liberty head no star on diadem.
Standard Silver reverse. Struck in silver with a plain edge.

Brilliant, untoned, flashy, beaming mirrors are aglow on both the obverse and reverse of this GEM. The surfaces are clean and offer bold clarity to the strong mirrors. Sharply struck devices are frosty and contrast in a most wonderful way against the mirrored fields.

PCGS 2, NGC 0, CAC 1. No PR65 CAM has ever sold in auction. A regular PR65 sold over 22 years ago for \$2,860. PCGS has graded only a single coin finer in the CAM designation, the PR67 we sold in January 2017 as part of the Simpson Standard Silver Pattern Collection. That coin realized \$7,638. A great coin worthy of any world class collection of Patterns.

PCGS# 512010 | ESTIMATE: \$3,000+

LOT 796 50C 1869 J-752. NGC PF64 CAC

R-7- (7-12 minted). Liberty head right with no star on diadem. Standard Silver reverse. Struck in aluminum with a reeded edge.

A very neat Standard Silver pattern. First the mirrors are strong and beaming with only a touch of iridescence visible, not at all hazy like many aluminum patterns ended up. The strike is bold throughout with just a hint of weakness on the coronet and hair curls. Struck from a cracked reverse die and there are some mint made planchet flaws on the reverse. High-end for a 64 and approaching a cameo like contrast.

1869

PCGS 4, NGC 1, CAC 1. In April 2014 this coin sold for \$2,585 (not CAC at the time). The last time a PCGS PR64 sold was in September 2002—that coin realizing \$3,450. The current Collector's Universe value is listed at \$3,250 and this is a very rare opportunity to acquire a this RARE pattern!

R-7+ (4-6 minted). Liberty head right with no star on diadem. Standard Silver reverse. Struck in aluminum with a plain edge.

Sharply struck across the entire design types. Dove toning dusts both sides of this reflective example.

Struck with such force that the wire rims are VERY high.

PCGS 0, NGC 1, CAC 1. The current Collector's Universe value is listed at \$2,500 and the last time this

coin sold it realized \$2,059 in April 2014. VERY RARE in any grade, the finest is the Simpson coin we sold for \$10,281 in January 2017.

Sharply struck with flashy mirrors and beautifully toned all over. Some old hairlines are seen with a strong glass and account for the grade. The eye appeal is SUPERB for the assigned grade.

PCGS 6, NGC 1, CAC 1. Going back to 1990, only four PCGS PR63s have sold in auction, with the most

recent sold in October 2010.

R-7- (7-12 minted). Liberty head right, her hair back with a headband and single star, Standard Silver reverse. Struck in aluminum with a plain edge.

Wonderfully preserved, this near GEM does not have any of the problems that often plague patterns struck in aluminum, there are no unsightly patches of oxidation, no haze, no serious marks. Bold reflection and sharply struck devices produce a neat contrast between field and reliefs, all together imparting a very nice eye appeal.

PCGS 1, NGC 1. This coin sold for \$2,820 and the other Cameo which was the PCGS PR66 CAM sold for \$4,818. Bound for a great collection of pattern coins when the gavel falls!

3C 1870 J-794. PCGS PR65 RB CAC

EX DENALI COLLECTION. R-7+ (4-6 minted). Regular issue proof dies struck in copper with a plain edge.

This is an old friend. Our sister firm, Legend Numismatics, handled the Denali Collection of 1870 Patterns in 2010. Flashy Proof fields offer a lovely watery reflection bringing out an impressive array of totally original toning. The devices are sharply struck up and frosty. The surfaces are totally devoid of any flaws and the eye appeal is exceptional.

PCGS 2, NGC 0, CAC 2. Both of these are ex Denali. Only one PR66 RB is graded finer and is impounded in the Simpson Collection. Off the market since August 2013, where it realized \$5,875 and the current PCGS Price Guide value is \$6,000. What a great coin to add to an advanced cabinet of 3CN, the J-794 is an extremely RARE pattern issue!

Vivid hues of rose, blue, gold blend together over richly mirrored copper. The fields are ablaze with reflectivity that really makes the patination pop. Well struck and very nicely preserved, this coin has exceptional eye appeal!

PCGS 1, NGC 0, CAC 1. This near-GEM does not appear to have ever sold in auction. We recently sold a PCGS PR65 RB CAC for \$7,150 in our February 2018 Premier Session, and the current PCGS value in PR64 RB is \$6,500. If you missed the one we offered in February, here is a very rare second chance to bid on an exceptionally RARE 3CS pattern!

EX DENALI COLLECTION. R-7- (7-12 minted). Barber's Seated Liberty obverse paired with a regular proof die. Struck in silver with a reeded edge.

A beautifully toned GEM Proof half dime pattern. Deeply mirrored fields flash through a layer of vivid blue and orange gold patina. Fully defined devices are crisply struck up and wonderfully rendered. The eye appeal is SUPERB.

PCGS 2, NGC 1, CAC 1. The current PCGS Price

Guide value is listed at \$5,500. Our auction data base does not show this coin selling, although CoinFacts has a very low record, which we think represents a buyback. A PR64 sold in the 2016 ANA auction for \$2,233 and a PCGS/CAC PR66 sold for \$4,348 in the notoriously weak 2015 FUN auction. What a great RARITY!

Watery reflective mirrors surround sharply struck, glossy devices. Mostly untoned, there is a narrow frame of pale gold on the rims of both sides and a couple of old carbon flecks. The eye appeal is quite nice.

PCGS 4, NGC 0. The last one to sell realized \$1,895

in a September 2015 and in July 2013 that coin sold for \$2,350. The Simpson duplicate sold in the 2010 ANA auction for \$2,185, which was an NGC PR63. Seems cheap for a coin this rare!

10C 1870 J-848. PCGS PR66 CAC

R-7+ (4-6 minted). Liberty head right, no star on tiara; Standard Silver agricultural wreath reverse. Struck in aluminum with a plain edge.

Extremely RARE. This coin has no oxidation or haze(a typical to aluminum coins) to impact the deep, clean, clear mirrors that boast a powerful reflection. There actually is decent contrast, although a near miss CAMEO. Miss Liberty and the details are fully struck and have gorgeous thick frosting. The eye appeal is great!

PCGS 2, NGC 2, CAC 4. Only two coins have ever sold in auction. A PR66 (ex Simspon-Stonwall Collections) sold for \$5,875 in November 2012 and an NGC coin sold in July 2008 for \$12,650. The current PCGS Price Guide value is listed at \$5,500 and one coin, a PR66+ is finer. Good luck!

R-5 (31-75 minted). Liberty head with single star on headband, Standard Silver reverse. Struck in silver with a reeded edge.

Sharply struck devices possess a bold frost that contrasts with extreme brilliance giving this near gem a great CAMEO look. Lightly toned with just a dusting of the palest clear gold.

PCGS 1, NGC 1, CAC 1. The only recent auction comp is the Simpson PCGS PR64+ CAC that sold in C for \$2,201 in our May 2016 Personal Austion. This

our January 2017 Regency Auction. We also sold a PCGS PR65 CAC for \$2,291 in our May 2016 Regency Auction. This CAMEO PR64 is very high-end and should see fierce bidding!

Highly reflective and very attractive for the assigned grade. Sharply struck throughout. Perhaps a touch glossy from an old wiping, but the overall eye appeal is certainly better than what you would expect for a PR62.

PCGS 2, NGC 0. The last time this coin sold was nearly six years ago. The Simpson coin was only slightly finer as a PCGS PR64--which sold for \$1,410. The current PCGS price is \$1,000. A very affordable pattern, but rare none the less!

EX DENALI COLLECTION. R-7- (7-12 minted). Barber's Seated Liberty obverse and Standard Silver agricultural wreath reverse. Struck in copper with a reeded edge.

An interesting "coin without a country" Standard Silver pattern quarter. Beautifully toned copper shows a tinge of teal and cobalt on both sides, dusted over a beautifully reflective copper surfaces. All the details are razor sharp. The eye appeal is SUPERB.

PCGS 3, NGC 1, CAC 1. The most recent PCGS PR65 RB to sell in auction brought \$4,348 in our September 2016 Regency Auction (that coin was NOT CAC). In August 2013, this coin did realize \$4,406. A VERY RARE pattern issue, and worthy of placement in any collection of pattern coins!

LOT 812 25C 1870 J-882. NGC PF65

EX ELIASBERG AND SIMPSON COLLECTION. R-7+ (4-6 minted). Barber's Seated Liberty obverse paired with the regular issue 1870 Proof reverse die. Struck in silver with a reeded edge.

First off, how great a provenance--can it get any better--Eliasberg and Simpson?!

A sharply struck GEM. Beautifully toned surfaces offer a rich mirrored reflection on both sides. The mirrors are highly reflective and watery, the toning is blue

and gold on the reverse which is quite vivid. The obverse is dove, tan, and rich gold. The eye appeal is as exceptional as the pedigree!

PCGS 0, NGC 1. This GEM sold in August 2013 for \$6,463 and the current Collector's Universe value is listed at \$6,500. Mr. Simpson has a PCGS PR66 CAM in his collection, this was his duplicate. Good luck!

Struck in silver with a reeded edge.

Very pretty, rich, original toning drapes the excellent watery reflective mirrored fields on both sides. Even using a strong glass the surfaces are devoid of any distractions and the eye appeal quite nice.

PCGS 1, NGC 4. The Simpson sold in our January 2017 Regency Auction for \$3,643. The most recent

NGC-graded APRs were between \$2,000 and \$2,300. Only a single NGC PR67 is finer, which sold for \$4,313 in June 2011 (this coin retains a better look and features a much sharper strike).

Intense contrast captivates the viewer. Bold, deep, highly reflective fields beam against the frosted sharply struck design elements. A real GEM, this coin is devoid of any of the issues that plague coins struck in aluminum, including oxidation, corrosion, etc.

These die trials in aluminum were produced for sale to VIPs at the mint, and are incredibly rare. In many instances, fewer than half a dozen sets were produced, and over the years, broken up. Not only are they popularly collected by pattern specialists, but in some cases advanced Collector's of U.S. gold dollars would include these pattern issues to augment their collections. These are RARER than the regular issue Proof Gold dollar of 1869, and can be had for about the same amount.

This is a high R7 (4-6 MINTED). It is struck in copper. We also believe it is the Judd Plate coin. One of the most striking and high-end copper Standard Silver Patterns we have ever seen-even beating some of the Simpson coins! Exceptionally clear, clean, and powerfully reflective mirrors beam from both sides. The color is about 65% GEM ORIGINAL MINT RED. Miss Liberty and the details are frosty and have full strikes. The eye appeal is totally jaw dropping! That is why we picked it as one of the Denali highlight coins for the color catalog we put out.

PCGS 1, NGC 0, CAC 1. There are NO auction records for ANY GEMS. The Judd books lists a PR65 (which probably is a BN) for \$11,000. We think this coin represents great value and opportunity. The current Collector's Universe Value is a mere \$7,900 (how could they figure that if NONE have ever sold via auction?). We think this coin's rarity and stunning awesome looks could make the price realized closer to \$10,000!

25C 1870 J-911 PCGS PR66+ CAM CAC EX DENALI

The FINEST KNOWN example of this very rare R-7+ Standard Silver Pattern. Struck in aluminum with a plain edge. There were many varieties of Standard Silver coins produced between 1869 and 1871 in various different metals and with differing designs. This variety has a capped bust of Liberty facing right with three stars on the band. The reverse wreath is made of one branch each of laurel and oak. This simple design looks fantastic on the highly reflective and contrasted aluminum planchet. Indeed, the coin is blinding when viewed under a light. Most of these

off metal strikings were produced as parts of special sets made for VIP clients at the mint to a very limited extent. Untoned and only the slightest bit of haze, but never dipped or conserved. As pretty today as the moment it was carefully removed from the dies.

PCGS 1, NGC 0, CAC 1. This is the finest example known, and sold in our Regency XI Auction as lot 347 for \$7,931. In January 2016's Regency Auction XX, the Bob Simpson example, graded PR65 CAC sold for \$7,931. Too bad this design never made it into coinage--it is beautiful! The obverse features James Longacre's Seated Indian figure of Liberty and the reverse is the standard proof die for the year. This coin is extremely high-end.

Outstanding deep mirrors vividly beam from all over. Copper coins rarely offer powerful mirrors like this—totally clean and clear. A bold mix of violet, red, and magenta hues are totally original and blazes from both sides. Very similar surfaces to bronzed copper medals produced at the mint. There are NO spots or discolorations. Miss Liberty and every detail is sharply struck and does have thick frost. The eye appeal is awesome!

A gorgeous GEM, and arguably the FINEST known example. The Barber/Longacre Indian Princess/ Commercial Dollar design is one of the most beautiful design that was not adopted for regular issue. The design shows Liberty seated wearing an Indian headdress. She supports the globe with flags and holds a pole with Liberty cap. Struck in silver with a reeded edge, considered to be R-7+, with about 4-6 examples known. These beautiful Commercial dollar patterns are the forerunner to the Trade Dollars issued starting the following year.

Deep, bold mirrors have a blistering reflectivity that contrasts brilliantly against the razor sharp, frosted devices. Every detail is fully rendered and boldly impressed from an exacting, forceful blow from the dies. Since the time this coin was produced you can tell it was lovingly cared for, and even under intense scrutiny all you can find is a stray line or two.

PCGS 1, NGC 0, CAC 1. This is the FINEST CERTIFIED example at either service. If you are an advanced collector of patterns, this piece is a MUST! Bid liberally!

LOT 852

\$1 1879 J-1611. PCGS PR67 CAM CAC

A beautiful SUPERB Morgan dollar pattern, essentially a twin to the J-1615 we sold in our July 2017 Regency Auction.

Struck using a regular issue proof die for the 1879 dollar, paired with Morgan's large perched eagle design. Struck in Silver with a reeded edge, and rated R-7- with about a dozen or so pieces believed to survive.

Both sides of this impressive Premium Quality SUPERB GEM boast icy smooth, reflective mirrors that beam through lovely iridescent toning. Shades of gold, orange, teal, and blue blend on both sides, adding depth of character to the exceptional eye appeal. For the type the details are very sharply struck and frosty with bold contrast. The eye appeal is spectacular!

PCGS 1, NGC 0, CAC 1. It cannot be denied that this coin is among the absolute FINEST KNOWN examples. In April 2017, a non-CAMEO example brought \$30,550 and Collector's Universe does not yet have an estimate for CAMEO. The above mentioned J-1615 was graded PCGS PR67+ CAM CAC realized \$39,950. Bound for either an advanced pattern or Morgan dollar collection, either way, this coin would fit in beautifully!

PCGS# 134097 | ESTIMATE: \$30,000+

LOT 853 \$1 1879 J-1611. NGC PF68 CAM

R-7- (7-12 minted). Regular issue Morgan dollar obverse paired with Morgan's large eagle perched holding olive branch and arrows. Struck in silver with a reeded edge.

What a great opportunity to be able to acquire a SUPERB example of this very RARE silver dollar pattern. Do not let the fact we have two examples in this sale fool you, the J-1611 is very rarely offered!

Deep, beaming, reflective mirrors are the ultimate in cleanliness and clarity! George Morgan's design elements are crisply embossed on both sides and are fully frosted, combining with the mirrors for a full CAMEO contrast. Flawless icy surfaces are smooth and totally problem free. We expect this SUPERB GEM to be a centerpiece in a world class collection of Morgan dollars or major pattern rarities!

PCGS 0, NGC 1. This is the FINEST graded example at either service. There is a record for a PCGS/CAC non-CAM that sold in April 2017 for \$30,550. This coin is a major pattern Morgan rarity, and is bound for extremely fierce bidding.

PCGS# 134097 | ESTIMATE: \$35,000+

LOT 854 \$1 1879 J-1631, PCGS PR65 CAC

The FINEST PCGS-graded example of this very rare "Goloid" dollar pattern, struck in goloid (an alloy of 5.46% gold, 84.54% silver, and 10% copper) with a reeded edge. The coiled hair design designed by George Morgan is very similar to the graceful coiled hair bust of Liberty on the extremely rare \$4 Stella patterns of 1879 and 1880, and is part of the monetary system that was proposed to create a metric coinage system that would allow for more fluid international acceptance. The coin is considered to be R-7-(7-12 examples).

Highly reflective mirrors are the ultimate in depth and clarity. Both sides possess a marbled, polychromatic patina that shows off amber, blue, gold, olive, tan, and russet hues. The obverse has a distinctive, nearly cameo effect that really highlights the frosty nature of the devices. The eye appeal is SUPERB.

PCGS 1, NGC 1, CAC 1. Finer than the Simpson coin, which is a PCGS PR64+. The Garrett Collection coin, sold in March 1980, still holds the record, selling for \$19,000. We think that with the sale of this remarkable coin that record may finally be eclipsed after nearly four decades! Good luck!

895.8 S. 4.2-G. 100-C. 55

LOT 855 \$1 1880 J-1650. PCGS PR65 CAM

R-7- (7-12 minted). Metric or Goloid dollar pattern. Morgan's Liberty head, with hair in a bun, plain headband inscribed LIBERTY. E PLURIBUS UNUM, 13 stars and date surround. Reverse: GLORIA EST DEO in cartouche with composition in beaded circle, all within an Agriculture wreath. Struck in aluminum with a reeded edge.

A GEM example with superb reflective mirror flash. Boldly struck with such a force that the obverse shows buckling and fissures, all part of the minting process and adds to the visual interest. The eye appeal is very high-end and unmarred by any of the typical flaws that plague coins struck in aluminum, no haze or oxidation.

PCGS 2, NGC 2. A PCGS PR65 non-CAM sold in August 2006, realizing \$10,925—that was nearly a dozen years ago. An NGC PR65 CAM sold in 2017 for \$11,100. There are none graded finer at PCGS. One of the best of the best at PCGS, and should see fierce bidding.
